be included in the proposal. Résumés or vitae of key personnel must be provided. USIA also recommends the inclusion of brochures and general information concerning the applicant, e.g. organizational charts, job descriptions, the names of board members (or similar group), the number of employees, etc.

II. Advising Center Operation and Services

The second part of the proposal should contain details on the advising center's proposed location and hours of operation, proposed staffing pattern (including the percentage of time each employee will devote to advising activities and a description of their functions and responsibilities), budget, and advising services to be provided. A resume or brief narrative explaining the qualifications of the person or persons who will have primary responsibility for conducting, advising and/or providing oversight of the advising center staff should be included. The proposal should demonstrate the center's ability to provide the following educational advising services to international students and scholars:

1. Information and guidance on U.S. educational institutions, systems, tuition and related costs, fields of study, specialized training, etc;

2. Information and advice on U.S. standardized tests, e.g. TOEFL, GRE, GMAT, FMGEMS, etc., to include the provision of registration application forms, maintenance of bulletins and testing schedules;

3. Information and research on short-term institutional training in technical and professional fields;

4. Information on English language training programs in the U.S.;

5. Group and individual advising sessions, pre-departure orientation and reentry programs, as appropriate.

The center will also be required to monitor the status of the educational system in Mexico and to share that information with USIA and United States Information Service (USIS) office at the American Embassy. The applicant should also be willing to assist and support educational outreach activities of the USIS post abroad by developing a network of contacts with the local Ministry of Education, universities, and other appropriate institutions.

III. Provision of Resource Materials, Equipment and Training

The third part of the proposal should address the extent to which the U.S. headquarters office will support its advising center abroad through the provision of educational advising resource materials and professional development activities and training.

Student access to a comprehensive university catalog collection, in print and/or microfiche, and an extensive collection of current references on U.S. educational institutions and programs is an integral component of an educational advising center and the applicant's ability to provide such should be made clear in this section.

Office equipment that facilitate the processing of inquiries, such as electronic mail, facsimile machines, and telexes, would be regarded as an asset to the advising function and mention of such equipment should be made in the proposal. The Agency expects the advising center to be equipped with audio visual aids for students' use. Videos on U.S. study and life complement the presentation and materials offered at group and individual advising sessions.

IV. Regional Educational Advising Consultancy

The fourth part of the proposal should contain details on the Regional Educational Advising Consultancy (REAC) for Mexico and Central America. Funding for the REAC should be contained within the $130,000 budget. The Agency recommends that the person(s) dédicated to the REAC work a minimum of 20 hours per week. The REAC would service overseas educational advising centers in Mexico and Central America. The objective of the REAC is to:

1. Attain widespread recognition as the regional resource center for educational advising;

2. Encourage regional communication and networking among Mexican and Central American advising centers;

3. Foster information sharing through such means as the development and sharing of materials (i.e., advising handouts), a regional newsletter, workshops, electronic mail, Internet, etc.;

4. Provide advice to advising centers on how to conduct regional and in-country workshops, pre-admission and pre-departure orientation sessions, outreach activities, etc.

5. Provide needs assessments, training, and professional development for the educational advisers in the region as necessary.

Please note that travel within the region for needs assessments and consultations, must be arranged by means of an annual request (via cable) to the educational advising centers via the USIS office in each country.

Proposed Budget

Applicants must submit a comprehensive line-item budget for which specific details are available in the application packet. The budget should not exceed $130,000, including the REAC. The applicant should submit separate line-item budgets for the Educational Advising Center in Mexico City and for the REAC.

Cost-sharing is encouraged. Cost-sharing may be in the form of allowable direct or indirect costs. The recipient must maintain written records to support all allowable costs which are claimed as being its contribution to cost participation, as well as cost to be paid by the Federal government. Such records are subject to audit. The basis for determining the value of cash and in-kind contributions must be in accordance with OMB Circular A110, Attachment E. Cost sharing and matching should be described in the proposal. In the event the recipient does to provide the minimum amount of cost-sharing as stipulated in the recipient's budget, the Agency's contribution will be reduced in proportion to the recipient's contribution.

The recipient's proposal shall include the cost of an audit that: (1) Complies with the requirements of OMB Circular No. A–133, Audits of Institutions of Higher Education and Other Nonprofit Institutions; (2) complies with the requirements of American Institute of Certified Public Accountants (AICPA) Statement of Position (SOP) No. 92–9; and (3) includes review by the recipient's independent auditor of a recipient-prepared supplemental schedule of indirect cost rate computation, if such a rate is being proposed.

The audit costs shall be identified separately for: (1) Preparation of basic financial statements and other accounting services; and (2) preparation of the supplemental reports and schedules required by OMB Circular No. A–133, AICPA SOP 92–9, and the review of the supplemental schedule of indirect cost rate computation.

Applicants should refer to the application package for a list of allowable costs.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the application packet. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also

be reviewed by the appropriate geographic area office, and the USIA budget and contracts offices. Proposals may also be reviewed by the Agency's Office of General Counsel. Funding decisions are at the discretion of the Associate Director for Educational and Cultural Affairs. Final technical authority for grant awards resides with USIA's contracting officer.

Review Criteria

Technically eligible applications will be competitively reviewed according to the following criteria:

a. *Quality of program plan:* Proposals should exhibit a thorough knowledge and understanding of the needs of students from Mexico and Central America and exhibit originality, substance, and rigor.

b. *Program planning:* Proposals must include a detailed agenda and relevant workplan of program activities. The agenda should adhere to the program overview and guidelines described above.

c. *Ability to achieve program objectives/institutional capacity:* Proposed personnel and institutional resources should be adequate and appropriate to achieve the program goals and adhere to the guidelines described above. The applicant should demonstrate an ability to recruit and maintain a professional staff to successfully accomplish the goals of the program.

d. *Multiplier effect/impact:* Program activities should be designed to foster long-term mutual understanding between citizens of the United States and Central America and Mexico.

e. *Institution's track record/ability:* Proposals should demonstrate a track record of successful programs, including responsible fiscal management and full compliance with all reporting requirements for Agency grants. The Agency will consider the past performance of prior grantees and the demonstrated potential of new applicants.

f. *Evaluation plan:* Proposals should provide a plan for evaluation by the grantee institution, including periodic progress reports.

g. *Cost-effectiveness:* The overhead and administrative components of grants, as well as salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate.

h. *Cost-sharing:* Proposals should maximize cost-sharing through other private sector support as well as institutional direct-funding contributions. Evidence of such cost sharing should be detailed in the proposal.

Notice

The terms and conditions published in the RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. Final awards cannot be made until funds have been fully appropriated by Congress, and allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about September 15, 1994. Funded proposals will be subject to periodic reporting and evaluation requirements.

Dated: June 6, 1994.

John P. Loiello,

Associate Director, Bureau of Educational and Cultural Affairs.

BILLING CODE 8230–03–M

Sunshine Act Meetings

Federal Register
Vol. 59, No. 111
Friday, June 10, 1994

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 10:00 a.m. on Tuesday, June 14, 1994, to consider the following matters:

Summary Agenda

No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Reports of actions approved by the standing committees of the Corporation and by officers of the Corporation pursuant to authority delegated by the Board of Directors.

Discussion Agenda

Memorandum and resolution re: Proposed revision to Part 336 of the Corporation's rules and regulations, entitled "Employees Responsibilities and Conduct," which would remove the standards of conduct regulations at sections 336.1–336.23 and 336.29–37 and the Appendix to such part and would promulgate similar regulations as a supplement to regulations on "Standards of Ethical Conduct for Employees of the Executive Branch" issued by the Office of Government Ethics.

Memorandum and resolution re: Proposed amendments to the Corporation's rules and regulations in the form of a new Part 366, entitled "Contractor Conflicts of Interest," which would be applicable to private sector contractors, including law firms, which submit offers to provide services to the Corporation or which enter into contracts to provide services to the Corporation; would govern conflicts of interest, ethical responsibilities, and the use of confidential information by such contractors; and would provide guidance to Corporation contracting personnel.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, N.W., Washington, DC.

The FDIC will provide attendees with auxiliary aids (e.g., sign language interpretation) required for this meeting. Those attendees needing such assistance should call (202) 942–3132 (Voice); (202) 942–3111 (TTY), to make necessary arrangements.

Requests for further information concerning the meeting may be directed to Mr. Robert E. Feldman, Acting Executive Secretary of the Corporation, at (202) 898–6757.

Dated: June 7, 1994.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Acting Executive Secretary.

[FR Doc. 94–14243 Filed 6–7–94; 8:45 am]

BILLING CODE 6714–0–M

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:03 a.m. on Tuesday, June 7, 1994, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider the following:

Reports of the Office of Inspector General.

Matters relating to the probable failure of a certain insured depository institution.

Matters relating to the Corporation's corporate and supervisory activities.

Application of Community Federal Savings Bank, Tupelo, Mississippi, a proposed new federally chartered stock savings bank, for Federal deposit insurance.

In calling the meeting, the Board determined, on motion of Director Jonathan L. Fiechter (Acting Director, Office of Thrift Supervision), seconded by Mr. Stephen R. Steinbrink, acting in the place and stead of Director Eugene A. Ludwig (Comptroller of the Currency), concurred in by Acting Chairman Andrew C. Hove, Jr., that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10)).

The meeting was held in the Board Room of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Dated: June 7, 1994.

Federal Deposit Insurance Corporation.

Patti C. Fox,

Acting Deputy Executive Secretary.

BILLING CODE 6714–01–M

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of June 13, 1994.

A closed meeting will be held on Tuesday, June 14, 1994, at 2:00 p.m.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Roberts, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Tuesday, June 14, 1994, at 2:00 p.m., will be:

Institution of injunctive actions.

Institution of administrative proceedings of an enforcement nature.

Settlement of injunctive action.

Settlement of administrative proceedings of an enforcement nature.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: John Ramsay (202) 942–0700.

Dated: June 8, 1994.

Jonathan G. Katz,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: [59 FR 29324, June 6, 1994].

STATUS: Closed meeting.

PLACE: 450 Fifth Street, NW., Washington, DC.

DATE PREVIOUSLY ANNOUNCED: June 6, 1994.

CHANGE IN THE MEETING: Additional Item.

The following item will be considered at a closed meeting scheduled for Thursday, June 9, 1994.

Litigation matter.

Commissioner Roberts, as duty officer, determined that Commission business required the above change and that no earlier notice thereof was possible.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Carrie Dwyer at (202) 942–0100.

Dated: June 7, 1994.

Jonathan G. Katz,

Secretary.

Department of the Treasury

Internal Revenue Service

26 CFR Parts 1, 20, 25, and 602
Valuation Tables and Actuarial Tables Exceptions; Final Rule and Proposed Rule

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1, 20, 25, and 602

[TD 8540]

RIN 1545–AM81

Valuation Tables

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the valuation of annuities, interests for life or terms of years, and remainder or reversionary interests. Changes to the applicable tax law were made by section 5031 of the Technical and Miscellaneous Revenue Act of 1988. These regulations will provide the public with the guidance needed to comply with the Act.

DATES: These regulations are effective May 1, 1989. For dates of applicability of these regulations, see the EFFECTIVE DATES portion under SUPPLEMENTARY INFORMATION.

FOR FURTHER INFORMATION CONTACT: William L. Blodgett, (202) 622–3090 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in these final regulations has been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act (44 U.S.C. 3504(h)) under control number 1545–1343. The estimated annual burden per respondent varies from 30 minutes to one hour, depending on individual circumstances, with an estimated average of 45 minutes.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be sent to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, PC:FP, Washington, DC 20224, and to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Background

On November 2, 1992, the IRS published in the **Federal Register** proposed amendments to the income tax regulations (26 CFR part 1) under sections 170, 642, 664, and 7520 of the Internal Revenue Code (Code), and to the estate and gift tax regulations (26 CFR part 20 and part 25) under sections 2031, 2512, and 7520 of the Code. Conforming changes were proposed for regulations under other sections of the Code. On February 3, 1993, the IRS published in the **Federal Register** certain corrections to the proposed regulations. This project finalizes those amendments. Written comments responding to the Notice of Proposed Rulemaking were received. No public hearing was requested, and none was held. After consideration of all of the comments received regarding the proposed regulations, those amendments are adopted by this Treasury decision with revisions in response to those comments. A summary of the principal comments received and revisions made in the final regulations in response to those comments is provided below.

Explanation of Provisions

The notice of proposed rulemaking included estate tax regulations that described the implementation of the new valuation standard, including an explanation of the general effective date of May 1, 1989 (§ 20.7520–1), an explanation of the special elections for charitable interests (§ 20.7520–2), a listing of Code provisions that are not subject to section 7520 (§ 20.7520–3), and a description of transitional rules for income, estate, and gift tax valuations (§ 20.7520–4). In the final regulations, the substance of §§ 20.7520–1 through 20.7520–4 has been incorporated into analogous provisions for the Income Tax Regulations (§§ 1.7520–1 through 1.7520–4) and the Gift Tax Regulations (§§ 25.7520–1 through 25.7520–4).

In response to comments, several editorial changes were made to clarify certain of the formulas contained in the proposed regulations. These clarifications principally involve the insertion of additional parentheses or brackets in order to make the formulas easier for the reader to understand and apply.

Also in response to comments, § 1.170A–12(b) was updated in a correction to the proposed regulations that was published in the **Federal Register** on February 3, 1993. The update includes a formula for the computation of the special factor to value a remainder interest following one life where the property is subject to exhaustion, wear and tear, or obsolescence. A similar formula in § 1.170A–12(e), which is applicable to the valuation of a remainder interest following two lives, was also updated. The change in formulas avoids the need to include lengthy commutation factor tables in the regulations.

Clarifying amendments have been made in the final regulations concerning the meaning of "valuation date" for purposes of an election to value a transfer to a charitable remainder trust. In the case of an election under section 7520 to compute the present value of the charitable interest by use of the interest rate component for either of the 2 months preceding the month in which the transfer is made, the month so elected is the valuation date for purposes of determining the interest rate and mortality tables. Sections 1.664–2(c) and 1.664–4(e)(4) of the final regulations have been revised accordingly.

Comments were received pertaining to the rule in the proposed regulations under section 7520 concerning the transfer of more than one partial interest in the same property at different times. In response to these comments, the regulations have been amended to make it clear that, generally, each separate transfer is valued with the interest rate applicable in the month of the transfer.

The proposed regulations provide for making the election to use a prior month's interest rate in the case of a transfer to charity. Comments questioned the need for requiring the filing of detailed information as part of a prior-month election. This information is already required to be filed with the tax return for certain situations involving charitable interests that are subject to measuring lives. See, for example, § 20.2055–2(f)(5). This requirement is now explained in the regulations under section 7520. Comments also raised a question about the revocability of the election and the time for making the election. The final regulations provide that the taxpayer makes the prior-month election by so stating on the return and identifying the elected month. The failure to include with the return other information that is required to describe the transfer, whether or not the election is made, will ordinarily not invalidate the election. For elections made on or before June 10, 1994, a reasonable attempt to make the election and submit the required information will be treated as a valid election. The final regulations also provide that the election is generally made on a timely filed tax return for the year of the transfer. However, the election may also be made or changed on an amended or supplemented return that is made within 24 months after the original return is filed.

Comments were received concerning whether the five percent de minimis test (i.e., a transfer to charity of at least five percent of the value of the interest) set forth in the proposed regulations should be applied in determining if the

taxpayer may elect to use an alternative prior month interest rate. The final regulations delete this de minimis test.

Comments were received concerning the application of these regulations in situations where an individual is expected to die prematurely or where two individuals die simultaneously. See, for example, Rev. Rul. 80–80, 1980–1 C.B. 194, which holds that, in cases where the individual's death is imminent, the standard actuarial tables prescribed by the regulations are not to be used. See, also, *Carter* v. *United States*, 291 F.2d 63 (5th Cir. 1991), where the court refused to ascribe value to an income interest for purposes of the section 2013 credit where the death of the transferee was simultaneous with the death of the transferor. Comments were also received concerning the scope of these regulations in light of *O'Reilly* v. *Commissioner*, 973 F.2d 1403 (8th. Cir. 1992), *rem'd*, T.C.M. 1994–61. In *O'Reilly*, the Circuit Court held that the standard actuarial tables were not applicable to a situation in which the application of those tables would have produced an unreasonable result. In that case, the property held in trust produced an extraordinarily low rate of return. A similar result was reached by the Tax Court in *Froh* v. *Commissioner*, 100 T.C. 1 (1993), dealing with depletable property. Consistent with these comments, the Service and Treasury are contemporaneously proposing an amendment to these regulations that defines the circumstances in which the section 7520 tables would not apply in valuing a transferred interest. That Notice of Proposed Rulemaking is published elsewhere in this issue of the **Federal Register**.

Notice 89–60, 1989–1 C.B. 700, announced a method for determining the deemed yearly rate of return for new pooled income funds. This method defined the deemed rate as the highest annual average section 7520 interest rate for the preceding three years, reduced by one percentage point. The proposed regulations would have defined the deemed rate as the highest annual average section 7520 interest rate for the preceding three years, multiplied by 90 percent. Both methods produced the same result for each of the years after the enactment of section 7520:

First year of pooled income fund	5/1/89 to 12/31/89	1990	1991	1992	1993	1994
Notice 89–60 method	9.4	9.8	9.8	9.8	9.4	8.4
Proposed regulation method	9.4	9.8	9.8	9.8	9.4	8.4

Commentators have indicated a strong preference for the method announced in Notice 89–60, because they view the computation as simpler than that set forth in the proposed regulations. In response to these comments, the final regulations adopt the method described in Notice 89–60 for determining the deemed yearly rate of return for new pooled income funds.

Comments were received concerning whether, in valuing transfers to a new pooled income fund, the same deemed rate of return would be used throughout the entire three-year period. The final regulations provide that the deemed rate of return for transfers to a new pooled income fund is recomputed each calendar year using the monthly section 7520 rates for the three-year period immediately preceding the calendar year in which each transfer to the fund is made until the fund has been in existence for three taxable years and can compute its highest rate of return for the three taxable years immediately preceding the taxable year in which the transfer of property to the fund is made.

A commentator suggested that, with respect to the interpolation method for valuing transfers to pooled income funds and charitable remainder unitrusts, a taxpayer be permitted to elect a more exact method of computing the appropriate interest rate. The method prescribed in the proposed regulations has been in use for many years and is prescribed by the Internal Revenue Service in Publication 1457, "Actuarial Values, Alpha Volume," (8–89) and Internal Revenue Service Publication 1458, "Actuarial Values, Beta Volume," (8–89). The IRS and Treasury believe that any change from the method prescribed in these publications, which are in current use, would create undue confusion for taxpayers. Consequently, the commentator's suggested change is not being adopted at this time.

Comments were received inquiring about the application of section 7520 to the valuation of annuities issued by certain organizations other than insurance companies. In response to these comments, the final regulations explain that the section 7520 tables are to be used in valuing these annuities. This is an application of the principle adopted in Rev. Rul. 84–162, 1984–2 C.B. 200, for transfers after November 23, 1984. A different method of valuation continues to apply for purposes of computing the exclusion ratio in reporting the annuity payments under section 72. These clarifications have been made by updating § 1.101–2(e)(1)(iii)(*b*) and *Example 8* of § 1.1011–2(c).

Comments were received concerning the presumption in the proposed regulations under section 664 that, if a governing instrument for a charitable remainder unitrust does not prescribe when the distribution is made during the period, the distribution is presumed to be made on the first day of the period. Unitrusts have traditionally been regarded as providing for distributions at the beginning of each period unless the governing instrument provides to the contrary. This presumption has been reflected in unitrust factors prescribed in the regulations under section 664 since the enactment of that section. Therefore, the presumption that distributions are made on the first day of the period, if not otherwise provided for in the instrument, is continued in the final regulations.

Effective Dates

These regulations are generally effective in the case of annuities, interests for life or terms of years, and remainder or reversionary interests created after April 30, 1989. The regulations provide certain transitional rules intended to alleviate any adverse consequences resulting from the statutory amendments. Several principal provisions of the regulations were announced in Notice 89–24, 1989–1 C.B. 660 (which announced the change from the 10 percent fixed rate of interest to the section 7520 floating rate of interest), and Notice 89–60 (which announced the change in mortality tables) (See § 601.601(d)(2)(ii)(*b*) of the Statement of Procedural Rules). A transitional rule in the final regulations provides that, for valuation dates of transfers after April 30, 1989, and before June 10, 1994, a transferor can rely on Notice 89–24 or Notice 89–60 in valuing the transferred interest. For gift tax purposes, a transitional rule in the final regulations provides that if, after December 31, 1988, but before May 1, 1989, a donor transferred an interest in property, retaining an interest in the same property, and the donor later transferred the retained interest in the

property after April 30, 1989, and before January 1, 1990, the donor may elect to value the transfer of the retained interest under either the 10 percent tables or the section 7520 tables (whichever is more beneficial). For estate tax purposes, a transitional rule in the final regulations provides that the estate of a mentally incompetent decedent may elect to value the property interest included in the gross estate under the mortality table and interest rate in effect at the time the decedent became mentally incompetent or the mortality table and interest rate in effect on the decedent's date of death if the decedent was under a mental incapacity that existed on May 1, 1989, and continued uninterrupted until the decedent's death. For purposes of determining the value of the remainder interest in a testamentary charitable remainder unitrust or annuity trust, a transitional rule in the final regulations provides that the mortality table and 10 percent interest rate in effect before May 1, 1989, or the mortality table and interest rate under section 7520 may be used if the decedent was mentally incompetent on May 1, 1989, and (1) such incompetency continued uninterrupted until death, or (2) the decedent died within 90 days of first regaining competency after April 30, 1989.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in EO 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking preceding these regulations was submitted to the Small Business Administration for comment on its impact on small business.

Drafting Information

The principal author of these regulations is William L. Blodgett, Office of Chief Counsel (Passthroughs and Special Industries), IRS. However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 20

Estate taxes, Reporting and recordkeeping requirements.

26 CFR Part 25

Gift taxes, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1, 20, 25, and 602 are amended as follows:

Paragraph 1. In the list below, for each section indicated in the left column, remove the language in the middle column and add the language in the right column:

Section	Remove	Add
1.52–1(f)	or 20.2031–10, whichever is appropriate	or, for certain prior periods, 20.2031–7A
1.101–2(e)(2) *Example (1)*(ii)	paragraph (f) of	
1.170A–4(d) *Example 9*, third sentence	Table B of §20.2031–10(f)	§20.2031–7A(c)
1.170A–5(b) *Example 5*, fifth sentence	Table A(1) in §20.2031–10(f)	§20.2031–7A(c)
1.170A–6(c)(3)(i)	or §20.2031–10, whichever is appropriate	or, for certain prior periods, 20.2031–7A
1.170A–6(c)(3)(iii) *Example 1* second sentence	Table B in §20.2031–10(f)	§20.2031–7A(c)
1.170A–6(c)(3)(iii) *Example 2* second sentence	Table B in §20.2031–10(f)	§20.2031–7A(c)
1.170A–6(c)(3)(iii) *Example 3* third sentence	§20.2031–10(e)	§20.2031–7A(c)
1.170A–6(c)(3)(iii) *Example 3* fourth sentence	Table B in §20.2031–10(f)	§20.2031–7A(c)
1.170A–6(c)(4) second sentence	or §20.2031–10, whichever is appropriate.	
1.170A–6(c)(5) *Example 1* sixth sentence	Table B in §20.2031–10(f)	§20.2031–7A(c)
1.170A–6(c)(5) *Example 2*(b)	§1.664–4(b)(5)	§1.664–4A(c)
1.170A–6(c)(5) *Example 3*(b)	§20.2031–10(f)	§20.2031–7A(c)
1.170A–7(c) third sentence	or §20.2031–10, whichever is appropriate	
1.170A–12(a)(3) fourth sentence	paragraph (d) of §25.2512–5 or 25.2512–9 whichever is appropriate.	§25.2512–5 (or, for certain prior periods, §25.2512–5A)
1.170A–12(c) first and third sentences	paragraph (d) in §25.2512–5 or 25.2512–9	§25.2512–5 (or, for certain prior periods, §25.2512–5A)
1.170A–12(c) *Example*, fourth sentence	Table B of §25.2512–9(f)	§25.2512–5A(c)
1.414(c)–2(b)(2)(ii) second sentence	or §20.2031–10 (Estate Tax Regulations), whichever is appropriate.	or, for certain prior periods, §20.2031–7A (Estate Tax Regulations)
1.414(c)–4(b)(3)(i) last sentence	or §20.2031–10 (Estate Tax Regulations), whichever is appropriate.	or, for certain prior periods, §20.2031–7A (Estate Tax Regulations)
1.642(c)–6(d)(2) third and fifth sentences	paragraph (d)(2)	paragraph (d)(3)
1.642(c)–6(d)(2) fourth sentence	paragraph (a)(2) of this section	§1.642(c)–6(b)
1.642(c)–7(d)(2) first and second sentences	paragraph (b)(2) of	
1.664–1(a)(6) *Example (6)*(ii) second sentence	§1.664–4(b)(2)	§1.664–4A(c)
1.664–4(b)(2) second sentence	paragraph (a)(4) of this section	§1.664–4(a)
1.664–4(b)(2) last sentence	paragraph (a)(3) of this section	§1.664–4(b)
1.664–4(b)(3) first sentence	paragraph (b)(5)	paragraph (d)(6)
1.664–4(b)(3) third and sixth sentences	paragraph (b)(3)	paragraph (d)(4)
1.664–4(b)(3) fifth sentence	paragraph (a)(4) of this section	§1.664–4(b)
1.1014–5(a)(3) first sentence	or §20.2031–10, whichever is applicable	or, for certain prior periods, §20.2031–7A
1.1014–5(c) *Example (1)* fourth sentence	Table A(2) in paragraph (f) of §20.2031–10	§20.2031–7A(c)
1.1014–5(c) *Example (2)* second sentence	Table A(2) in paragraph (f) of §20.2031–10	§20.2031–7A(c)
1.1014–5(c) *Example (3)* sixth sentence	Table A(1) in paragraph (f) of §20.2031–10	§20.2031–7A(c)
1.1014–5(c) *Example (4)* third sentence	Table A(1) in paragraph (f) of §20.2031–10	§20.2031–7A(c)
1.1014–5(c) *Example (5)*(a) fifth sentence	Table A(1) in paragraph (f) of §20.2031–10	§20.2031–7A(c)
1.1014–5(c) *Example (6)* fourth sentence	Table A(2) in paragraph (f) of §20.2031–10	§20.2031–7A(c)
20.2031–7(a)(2) first and second sentences	paragraph (f)	paragraph (d)(6)

Section	Remove	Add
20.2031–7(a)(2)	paragraph (e)	paragraph (d)(5)
20.2031–7(b)(1)	paragraph (b)(1)	paragraph (d)(2)(i)
20.2031–7(b)(2)	paragraph (b)(2)	paragraph (d)(2)(ii)

25.2522(c)–3(d)(2)(iv) first sentence	or 25.2512–9, whichever is appropriate	
25.2522(c)–3(d) (2)(iv) *Example 1* second sentence.	Table B in §25.2512–9(f)	§25.2512–5A(c)
25.2522(c)–3(d)(2)(iv) *Example 2* second sentence.	Table B in §25.2512–9(f)	§25.2512–5A(c)
25.2522(c)–3(d)(2)(iv) *Example 3* third sentence.	§25.2512–9(e)	§25.2512–5A(c)
25.2522(c)–3(d)(2)(iv) *Example 3* fourth sentence.	Table B in §25.2512–9(f)	§25.2512–5A(c)
25.2523(a)–1(d) second sentence	or 25.2512–9, whichever is appropriate	or, for certain prior periods, §25.2512–5A.
25.2523(a)–1(d) third sentence	(d) of §25.2 512–5 or 25.2512–9, whichever is appropriate.	(d) of §25.2512–5.
25.2523(a)–1(d) fourth sentence	(see §25.2512–5(e) or 25.2512–9(e), whichever is appropriate).	
25.2523(a)–1(d) fifth sentence	(e) or 25.2512–9(e), whichever is appropriate .	(d) or, for certain prior periods, §25.2512–5A
25.2523(c)–1(c) *Example*, tenth sentence	(70,000 X .708919, as found in Table II of §25.2512–5).	as determined under §25.2512–5A(c)

PART 1—INCOME TAXES

Par. 2. The authority citation for part 1 is amended by adding an entry in numerical order to read as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.170A–12 also issued under 26 U.S.C. 170(f)(4). * * *

Section 1.642(c)–6 also issued under 26 U.S.C. 642(c)(5).

Section 1.642(c)–6A also issued under 26 U.S.C. 642(c)(5).

Section 1.664–1 also issued under 26 U.S.C. 664(a).

Section 1.664–2 also issued under 26 U.S.C. 664(a).

Section 1.664–3 also issued under 26 U.S.C. 664(a).

Section 1.664–4 also issued under 26 U.S.C. 664(a).

Section 1.664–4A also issued under 26 U.S.C. 664(a). * * *

Section 1.7520–1 also issued under 26 U.S.C. 7520(c)(2).

Section 1.7520–2 also issued under 26 U.S.C. 7520(c)(2).

Section 1.7520–3 also issued under 26 U.S.C. 7520(c)(2).

Section 1.7520–4 also issued under 26 U.S.C. 7520(c)(2).

Par. 3. Section 1.101–2 is amended as follows:

1. Paragraphs (e)(1)(iii)(*b*) (*1*) and (2) are revised.

2. Paragraph (e)(1)(iii)(*b*)(*3*) is removed.

3. The revised provisions read as follows:

§ 1.101–2 Employees' death benefits.

* * * * *

(e) * * *

(1) * * *

(iii) * * *

(*b*) * * *

(*1*) In the case of an annuity paid by an insurance company or by an organization (other than an insurance company) regularly engaged in issuing annuity contracts with an insurance company as the coinsurer or reinsurer of the obligations under the contract, by use of the discount interest rates and mortality tables used by the insurance company involved to determine the installment benefits; and

(*2*) In the case of an annuity issued after November 23, 1984, to which paragraph (e)(1)(iii)(*b*)(*1*) of this section is not applicable, by use of the

appropriate tables in § 20.2031–7 of this chapter (Estate Tax Regulations).

* * * * *

Par. 4. Section 1.170A–12 is amended as follows:

1. In paragraph (a)(3), a sentence is added between the fourth and fifth sentences.

2. Paragraphs (b), and (e) (1) and (2) are revised.

3. Paragraph (f) is removed.

4. The authority citation at the end of the section is removed.

5. The added and revised provisions read as follows:

§ 1.170A–12 Valuation of a remainder interest in real property for contributions made after July 31, 1969.

(a) * * *

(3) * * * Except as provided in § 1.7520–3(b) of this chapter, for transfers of remainder interests after April 30, 1989, the present value of the remainder interest is determined under § 25.2512–5 of this chapter by use of the interest rate component on the date the interest is transferred unless an election is made under section 7520 and § 1.7520–2 of this chapter to compute the present value of the interest transferred by use of the interest rate component for either of the 2 months preceding the month in which the interest is transferred. * * *

(b) *Valuation of a remainder interest following only one life*—(1) *General rule.* The value of a remainder interest in real property following only one life is determined under the rules provided in § 20.2031–7 (or for certain prior periods, § 20.2031–7A) of this chapter (Estate Tax Regulations), using the interest rate and life contingencies prescribed for the date of the gift. See, however, § 1.7520–3(b) (relating to exceptions to the use of prescribed tables under certain circumstances). However, if any part of the real property is subject to exhaustion, wear and tear, or obsolescence, the special factor determined under paragraph (b)(2) of this section shall be used in valuing the remainder interest in that part. Further, if any part of the property is subject to depletion of its natural resources, such depletion is taken into account in determining the value of the remainder interest.

(2) *Computation of depreciation factor.* If the valuation of the remainder interest in depreciable property is dependent upon the continuation of one life, a special factor must be used. The factor determined under this paragraph (b)(2) is carried to the fifth decimal place. The special factor is to be computed on the basis of the interest rate and life contingencies prescribed in § 20.2031–7 (or for certain prior periods, § 20.2031–7A) of this chapter (Estate Tax Regulations) and on the assumption that the property depreciates on a straight-line basis over its estimated useful life. For transfers for which the valuation date is after April 30, 1989. special factors for determining the present value of a remainder interest following one life and an example describing the computation are contained in Internal Revenue Service Publication 1459, "Actuarial Values, Gamma Volume," (8–89). This publication is no longer available for purchase from the Superintendent of Documents. However, it may be obtained by requesting a copy from: CC:DOM:CORP:T:R (IRS Publication 1459), room 5228, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. See, however, § 1.7520–3(b) (relating to exceptions to the use of prescribed tables under certain circumstances). Otherwise, in the case of the valuation of a remainder interest following one life, the special factor may be obtained through use of the following formula:

$$\left(1+\frac{i}{2}\right)\sum_{t=0}^{n-1} v^{(t+1)}\left[\left(1-\frac{l_{x+t+1}}{l_x}\right)-\left(1-\frac{l_{x+t}}{l_x}\right)\right]\left(1-\frac{1}{2n}-\frac{t}{n}\right)$$

Where:

n=the estimated number of years of useful life,

i=the applicable interest rate under section 7520 of the Internal Revenue Code,

v=1 divided by the sum of 1 plus the applicable interest rate under section 7520 of the Internal Revenue Code,

x=the age of the life tenant, and

lx=number of persons living at age x as set forth in Table 80CNSMT of § 20.2031–7 (or, for prior periods, in § 20.2031–7A) of this chapter.

(3) The following example illustrates the provisions of this paragraph (b):

Example. In June 1992, A, who is 62, donates to Y University a remainder interest in a personal residence, consisting of a house and land, subject to a reserved life estate in A. At the time of the gift, the land has a value of $30,000 and the house has a value of $100,000 with an estimated useful life of 45 years, at the end of which the value of the house is expected to be $20,000. The portion of the property considered to be depreciable is $80,000 (the value of the house ($100,000) less its expected value at the end of 45 years ($20,000)). The portion of the property considered to be nondepreciable is $50,000 (the value of the land at the time of the gift ($20,000) plus the expected value of the house at the end of 45 years ($20,000)). The interest rate prescribed under section 7520 for June 1992 is 8.4 percent. Based on an interest rate of 8.4 percent, the remainder factor for $1.00 prescribed in § 20.2031–7 of this chapter for a person age 62 is 0.29567. The value of the nondepreciable remainder interest is $14,783.50 (0.29567 times $50,000). The value of the depreciable remainder interest is $17,387.20 (0.21734, computed under the formula described in paragraph (b)(2) of this section, times $80,000). Therefore, the value of the remainder interest is $32,170.70.

* * * * *

(e) * * *

(1)(i) If the valuation of the remainder interest in the real property is dependent upon the continuation or the termination of more than one life or upon a term certain concurrent with one or more lives, a special factor must be used.

(ii) The special factor is to be computed on the basis of—

(A) Interest at the rate prescribed under § 25.2512–5 (or, for certain prior periods, § 25.2512–5A) of this chapter, compounded annually;

(B) Life contingencies determined from the values that are set forth in the mortality table in § 20.2031–7 (or, for certain prior periods, § 20.2031–7A) of this chapter; and

(C) If depreciation is involved, the assumption that the property depreciates on a straight-line basis over its estimated useful life.

(iii) If any part of the property is subject to depletion of its natural resources, such depletion must be taken into account in determining the value of the remainder interest.

(2) In the case of the valuation of a remainder interest following two lives, the special factor may be obtained through use of the following formula:

$$\left(1+\frac{i}{2}\right)\sum_{t=0}^{n-1}v^{(t+1)}\left[\left(1-\frac{l_{x+t+1}}{l_x}\right)\left(1-\frac{l_{y+t+1}}{l_y}\right)-\left(1-\frac{l_{x+t}}{l_x}\right)\left(1-\frac{l_{y+t}}{l_y}\right)\right]\left(1-\frac{1}{2n}-\frac{t}{n}\right)$$

Where:
n=the estimated number of years of useful life,
i=the applicable interest rate under section 7520 of the Internal Revenue Code,
v=1 divided by the sum of 1 plus the applicable interest rate under section 7520 of the Internal Revenue Code,
x and y=the ages of the life tenants, and
lx and ly=the number of persons living at ages x and y as set forth in Table 80CNSMT in § 20.2031–7 (or, for prior periods, in § 20.2031–7A) of this chapter.

§ 1.170A–13 [Amended]

Par. 5. Section 1.170A–13 is amended by removing the authority citation immediately following paragraph (d)(3).

Par. 6. Section 1.170A–14 is amended by:

1. Revising the third and fourth sentences of paragraph (h)(4), *Example 2*, as set forth below.

2. Removing the fifth sentence of paragraph (h)(4), *Example 2*.

§ 1.170A–14 Qualified conservation contributions.

* * * * *

(h) * * *

(4) * * *

Example 2. * * * Under § 1.170A–12(b), the value of a remainder interest in real property following one life is determined under § 25.2512–5 of this chapter (Gift Tax Regulations). (See § 25.2512–5A of this chapter with respect to the valuation of annuities, interests for life or term of years, and remainder or reversionary interests transferred before December 1, 1983.)

* * * * *

Par. 7. Immediately following § 1.643(d)-2, an undesignated center heading and § 1.642(c)–6A are added to read as follows:

Pooled Income Fund Actuarial Tables Applicable Before May 1, 1989

§ 1.642(c)–6A Valuation of charitable remainder interests for which the valuation date is before May 1, 1989.

(a) *Valuation of charitable remainder interests for which the valuation date is before January 1, 1952.* There was no provision for the qualification of pooled income funds under section 642 until 1969. See § 20.2031–7A(a) of this chapter (Estate Tax Regulations) for the determination of the present value of a charitable remainder interest created before January 1, 1952.

(b) *Valuation of charitable remainder interests for which the valuation date is after December 31, 1951, and before January 1, 1971.* No charitable deduction is allowable for a transfer to a pooled income fund for which the valuation date is after the effective dates of the Tax Reform Act of 1969 unless the pooled income fund meets the requirements of section 642(c)(5). See § 20.2031–7A(b) of this chapter (Estate Tax Regulations) for the determination of the present value of a charitable remainder interest for which the valuation date is after December 31, 1951, and before January 1, 1971.

(c) *Present value of remainder interest in the case of transfers to pooled income funds for which the valuation date is after December 31, 1970, and before December 1, 1983.* For the determination of the present value of a remainder interest in property transferred to a pooled income fund for which the valuation date is after December 31, 1970, and before December 1, 1983, see § 20.2031–7A(c) of this chapter (Estate Tax Regulations) and former § 1.642(c)–6(e) (as contained in the 26 CFR part 1 edition revised as of April 1, 1994).

(d) *Present value of remainder interest dependent on the termination of one life in the case of transfers to pooled income funds made after November 30, 1983, for which the valuation date is before May 1, 1989*—(1) *In general.* For transfers to pooled income funds made after November 30, 1983, for which the valuation date is before May 1, 1989, the present value of the remainder interest at the time of the transfer of property to the fund is determined by computing the present value (at the time of the transfer) of the life income interest in the transferred property (as determined under paragraph (d)(2) of this section) and subtracting that value from the fair market value of the transferred property on the valuation date. The present value of a remainder interest that is dependent on the termination of the life of one individual is computed by use of Table G in paragraph (d)(4) of this section. For purposes of the computation under this section, the age of an individual is to be taken as the age of the individual at the individual's nearest birthday.

(2) *Present value of life income interest.* The present value of the life income interest in property transferred to a pooled income fund shall be computed on the basis of:

(i) Life contingencies determined from the values of *lx* that are set forth in Table LN of § 20.2031–7A(d)(6) of this chapter (Estate Tax Regulations); and

(ii) Discount at a rate of interest, compounded annually, equal to the highest yearly rate of return of the pooled income fund for the 3 taxable years immediately preceding its taxable year in which the transfer of property to the fund is made. For purposes of this paragraph (d)(2), the yearly rate of return of a pooled income fund is determined as provided in § 1.642(c)–6(c) unless the highest yearly rate of return is deemed to be 9 percent. For purposes of this paragraph (d)(2), the first taxable year of a pooled income fund is considered a taxable year even though the taxable year consists of less than 12 months. However, appropriate adjustments must be made to annualize the rate of return earned by the fund for that period. Where it appears from the facts and circumstances that the highest yearly rate of return for the 3 taxable years immediately preceding the taxable year in which the transfer of property is made has been purposely manipulated to be substantially less than the rate of return that would otherwise be reasonably anticipated with the purpose of obtaining an excessive charitable deduction, that rate of return may not be used. In that case, the highest yearly rate of return of the fund is determined by treating the fund as a pooled income fund that has been in existence for less than 3 preceding taxable years. If a pooled income fund has been in existence less than 3 taxable years immediately preceding the taxable year in which the transfer of property to the fund is made, the highest yearly rate of return is deemed to be 9 percent.

Par. 8. Section 1.642(c)–6 is amended as follows:

1. The section heading is revised.

2. Paragraphs (a) and (b) are revised.

3. Paragraph (c)(1) is revised.

4. Paragraphs (d)(2) and (d)(3) are redesignated as § 1.642(c)–6A, paragraphs (d)(3) and (d)(4), respectively.

5. Paragraph (d)(1) is redesignated as paragraph (d) and revised.

6. Paragraph (e) is revised.

7. The authority citation at the end of the section is removed.

8. Paragraph (f) is added.

9. The added and revised provisions read as follows:

§ 1.642(c)–6 Valuation of a remainder interest in property transferred to a pooled income fund after April 30, 1989.

(a) *In general.* (1) For purposes of sections 170, 2055, 2106, and 2522, the fair market value of a remainder interest in property transferred to a pooled income fund is its present value determined under paragraph (d) of this section.

(2) The present value of a remainder interest at the time of the transfer of property to the pooled income fund is determined by computing the present value (at the time of the transfer) of the life income interest and subtracting that value from the fair market value of the transferred property on the valuation date. The fact that the income beneficiary may not receive the last income payment, as provided in paragraph (b)(7) of § 1.642(c)–5, is not taken into account for purposes of determining the value of the life income interest. For purposes of this section, the valuation date is the date on which property is transferred to the fund by the donor except that, for purposes of section 2055 or 2106, it is the alternate valuation date, if elected, under the provisions and limitations set forth in section 2032 and the regulations thereunder.

(3) Any claim for a deduction on any return for the value of the remainder interest in property transferred to a pooled income fund must be supported by a statement attached to the return showing the computation of the present value of the interest.

(b) *Actuarial computations by the Internal Revenue Service.* The regulations in this and in related sections provide tables of actuarial factors and examples that illustrate the use of the tables in determining the value of remainder interests in property. Section 1.7520–1(c)(2) refers to government publications that provide additional tables of factors and examples of computations for more complex situations. If the computation requires the use of a factor that is not provided in this section, the Commissioner may supply the factor upon a request for a ruling. A request for a ruling must be accompanied by a recitation of the facts including the pooled income fund's highest yearly rate of return for the 3 taxable years immediately preceding the date of transfer, the date of birth of each measuring life, and copies of the relevant documents. A request for a ruling must comply with the instructions for requesting a ruling published periodically in the Internal Revenue Bulletin (see §§ 601.201 and 601.601(d)(2)(ii)(*b*) of this chapter) and include payment of the required user fee. If the Commissioner furnishes the factor, a copy of the letter supplying the factor should be attached to the tax return in which the deduction is claimed. If the Commissioner does not furnish the factor, the taxpayer must furnish a factor computed in accordance with the principles set forth in this section.

(c) *Computation of pooled income fund's yearly rate of return.* (1) For purposes of determining the present value of the life income interest, the yearly rate of return earned by a pooled income fund for a taxable year is the percentage obtained by dividing the amount of income earned by the pooled income fund for the taxable year by an amount equal to—

(i) The average fair market value of the property in such fund for that taxable year; less

(ii) The corrective term adjustment.

* * * * *

(d) *Valuation.* The present value of the remainder interest in property transferred to a pooled income fund after April 30, 1989, is determined under paragraph (e) of this section. The present value of the remainder interest in property transferred to a pooled income fund for which the valuation date is before May 1, 1989, is determined under the following sections:

Valuation dates		Applicable regulations
After	Before	
	01–01–52	1.642(c)–6A(a)
12–31–51	01–01–71	1.642(c)–6A(b)
12–31–70	12–01–83	1.642(c)–6A(c)
11–30–83	05–01–89	1.642(c)–6A(d)

(e) *Present value of the remainder interest in the case of transfers to pooled income funds for which the valuation date is after April 30, 1989*—(1) *In general.* In the case of transfers to pooled income funds for which the valuation date is after April 30, 1989, the present value of a remainder interest is determined under this section. See, however, § 1.7520–3(b) (relating to exceptions to the use of prescribed tables under certain circumstances). The present value of a remainder interest that is dependent on the termination of the life of one individual is computed by the use of Table S in paragraph (e)(5) of this section. For purposes of the computations under this section, the age of an individual is the age at the individual's nearest birthday. If the valuation date of a transfer to a pooled income fund is after April 30, 1989, and before June 10, 1994, a transferor can rely on Notice 89–24, 1989–1 C.B. 660, or Notice 89–60, 1989–1 C.B. 700, in valuing the transferred interest. (See § 601.601(d)(2)(ii)(*b*) of this chapter.)

(2) *Present value of a remainder interest.* The present value of a remainder interest in property transferred to a pooled income fund is computed on the basis of—

(i) Life contingencies determined from the values of *Ix* that are set forth in Table 80CNSMT in § 20.2031–7(d)(6) of this chapter (Estate Tax Regulations); and

(ii) Discount at a rate of interest, compounded annually, equal to the highest yearly rate of return of pooled income fund for the 3 taxable years immediately preceding its taxable year in which the transfer of property to the fund is made. For purposes of this paragraph (e), the yearly rate of return of a pooled income fund is determined as provided in § 1.642(c)–6(c) unless the highest rate of return is deemed to be the rate described in paragraph (e)(3) of this section for funds in existence less than 3 taxable years. For purposes of this paragraph (e)(2)(ii), the first taxable year of a pooled income fund is considered a taxable year even though the taxable year consists of less than 12 months. However, appropriate adjustments must be made to annualize the rate of return earned by the fund for that period. Where it appears from the facts and circumstances that the highest yearly rate of return of the fund for the 3 taxable years immediately preceding the taxable year in which the transfer of property is made has been purposely manipulated to be substantially less than the rate of return that would otherwise be reasonably anticipated with the purpose of obtaining an excessive charitable deduction, that rate of return may not be used. In that case, the highest yearly rate of return of the fund is determined by treating the fund as a pooled income fund that has been in existence for less than 3 preceding taxable years.

(3) *Pooled income funds in existence less than 3 taxable years.* If a pooled income fund has been in existence less than 3 taxable years immediately preceding the taxable year in which the transfer is made to the fund and the transfer to the fund is made after April 30, 1989, the highest rate of return is deemed to be the interest rate (rounded to the nearest two-tenths of one percent) that is 1 percent less than the highest annual average of the monthly section 7520 rates for the 3 calendar years immediately preceding the calendar year in which the transfer to the pooled income fund is made. The deemed rate of return for transfers to new pooled

income funds is recomputed each calendar year using the monthly section 7520 rates for the 3-year period immediately preceding the calendar year in which each transfer to the fund is made until the fund has been in existence for 3 taxable years and can compute its highest rate of return for the 3 taxable years immediately preceding the taxable year in which the transfer of property to the fund is made in accordance with the rules set forth in the first sentence of paragraph (e)(2)(ii) of this section.

(4) *Computation of value of remainder interest.* The factor that is used in determining the present value of a remainder interest that is dependent on the termination of the life of one individual is the factor from Table S in paragraph (e)(5) of this section under the appropriate yearly rate of return opposite the number that corresponds to the age of the individual upon whose life the value of the remainder interest is based. The tables in paragraph (e)(5) of this section include factors for yearly rates of return from 4.2 to 14 percent. Many actuarial factors not contained in the tables in paragraph (e)(5) of this section are contained in Table S in Internal Revenue Service Publication 1457, "Actuarial Values, Alpha Volume," (8–89). A copy of this publication may be purchased from the Superintendent of Documents, United States Government Printing Office, Washington, DC 20402. For other situations, see § 1.642(c)–6(b). If the yearly rate of return is a percentage that is between the yearly rates of return for which factors are provided, a linear interpolation must be made. The present value of the remainder interest is determined by multiplying the fair market value of the property on the valuation date by the appropriate remainder factor. This paragraph may be illustrated by the following example:

Example. A, who will be 55 years old on May 8, 1990, transfers $100,000 to a pooled income fund on January 1, 1990, and retains a life income interest in the property. The highest yearly rate of return earned by the fund for its 3 preceding taxable years is 9.47 percent. In Table S, the remainder factor opposite 55 years under 9.4 percent is .18785 and under 9.6 percent is .18322. The present value of the remainder interest is $18,623.00, computed as follows:

Factor at 9.4 percent for age 55	.18785
Factor at 9.6 percent for age 55	.18322
Difference	.00463

Interpolation adjustment:

$$\frac{9.47\% - 9.4\%}{0.2\%} = \frac{\lambda}{.00463}$$

$$\lambda = .00162$$

Factor at 9.4 percent for age 55	.18785
Less: Interpolation adjustment	.00162
Interpolated factor	.18623
Present value of remainder interest: ($100,000×.18623)	$18,623.00

(5) *Actuarial tables.* In the case of transfers for which the valuation date is after April 30, 1989, the present value of a remainder interest dependent on the termination of one life in the case of a transfer to a pooled income fund is determined by use of the following tables:

TABLE S.—BASED ON LIFE TABLE 80CNSMT SINGLE LIFE REMAINDER FACTORS

(f) *Effective date.* This section is effective as of May 1, 1989.

Par. 9. Section 1.642(c)–6A is further amended by revising the heading for Table G in newly designated paragraph (d)(4) to read as follows:

§ 1.642(c)–6A Valuation of charitable remainder interests for which the valuation date is before May 1, 1989.

* * * * *

(d) *Present value of remainder interest dependent on the termination of one life in the case of transfers to pooled income funds made after November 30, 1983, for which the valuation date is before May 1, 1989.*

* * * * *

(4) * * *

Table G

Table G—Single Life, Unisex—Table Showing the Present Worth of the Remainder Interest in Property Transferred to a Pooled Income Fund Having the Yearly Rate of Return Shown—Applicable for Transfers After November 30, 1983, and Before May 1, 1989

* * * * *

Par. 10. Section 1.664–1 is amended as follows:

1. Paragraph (a)(5)(ii)(*b*) is revised.

2. Paragraphs (a)(5)(iv) (*a*) through (*c*) are revised and paragraph (a)(5)(iv)(*d*) is added.

3. Paragraph (a)(6), the introductory text, is revised.

4. The authority citation at the end of the section is removed.

5. The added and revised provisions read as follows:

§ 1.664–1 Charitable remainder trusts.

(a) * * *

(5) * * *

(ii) * * *

(*b*) (*1*) In the case of transfers made after November 30, 1983, for which the valuation date is before May 1, 1989, a factor equal to 1.000000 less the factor under the appropriate adjusted payout rate in column 2 of Table D in § 1.664–4A(d)(6) opposite the number of years in column 1 between the date of death of the decedent and the date of the earlier of the death of the last recipient or the last day of such taxable year.

(*2*) In the case of transfers for which the valuation date is after April 30, 1989, a factor equal to 1.000000 less the factor under the appropriate adjusted payout rate in Table D in § 1.664–4(e)(6) opposite the number of years in column 1 between the date of death of the decedent and the date of the earlier of the death of the last recipient or the last day of such taxable year. The appropriate adjusted payout rate is determined by using the appropriate Table F contained in § 1.664–4(e)(6) for the section 7520 rate for the month of the valuation date.

(*3*) If the number of years between the date of death and the date of the earlier of the death of the last recipient or the last day of such taxable year is between periods for which factors are provided, a linear interpolation must be made.

* * * * *

(iv) * * *

(*a*) The section 7520 rate for the month in which the valuation date with respect to the transfer is (or one of the prior two months if elected under § 1.7520–2(b)) after April 30, 1989;

(*b*) 10 percent for instruments executed or amended (other than in the case of a reformation under section 2055(e)(3)) on or after August 9, 1984, and before May 1, 1989, and not subsequently amended;

(*c*) 6 percent or 10 percent for instruments executed or amended (other than in the case of a reformation under section 2055(e)(3)) after October 24, 1983, and before August 9, 1984; and

(*d*) 6 percent for instruments executed before October 25, 1983, and not subsequently amended (other than in the case of a reformation under section 2055(e)(3)).

(6) *Examples.* The application of the rules in paragraphs (a)(4) and (a)(5) of this section require the use of actuarial factors contained in § 1.664–4(e), § 1.664–4A(d), and former § 1.664–4(d) (as contained in the 26 CFR Part 1 edition revised as of April 1, 1994) and may be illustrated by use of the following examples:

* * * * *

Par. 11. Section 1.664–2 is amended as follows:

1. Paragraph (c) is revised as set forth below.

2. The authority citation at the end of the section is removed.

§ 1.664–2 Charitable remainder annuity trust.

* * * * *

(c) *Calculation of the fair market value of the remainder interest of a charitable remainder annuity trust.* For purposes of sections 170, 2055, 2106, and 2522, the fair market value of the remainder interest of a charitable remainder annuity trust (as described in this section) is the net fair market value (as of the appropriate valuation date) of the property placed in trust less the present value of the annuity. For purposes of this section, *valuation date* means, in general, the date on which the property is transferred to the trust by the donor regardless of when the trust is created. In the case of transfers to a charitable remainder annuity trust for which the valuation date is after April 30, 1989, if an election is made under section 7520 and § 1.7520–2(b) to compute the present value of the charitable interest by use of the interest rate component for either of the 2 months preceding the month in which the transfer is made, the month so elected is the valuation date for purposes of determining the interest rate and mortality tables. For purposes of section 2055 or 2106, the valuation date is the date of death unless the alternate valuation date is elected in accordance with section 2032, in which event, and within the limitations set forth in section 2032 and the regulations thereunder, the valuation date is the alternate valuation date. If the decedent's estate elects the alternate valuation date under section 2032 and also elects, under section 7520 and § 1.7520–2(b), to use the interest rate component for one of the 2 months preceding the alternate valuation date, the month so elected is the valuation date for purposes of determining the interest rate and mortality tables. The present value of an annuity is computed under § 20.2031–7(d) of this chapter (Estate Tax Regulations) for transfers for which the valuation date is after April 30, 1989, or under § 20.2031–7A (a) through (d) of this chapter, whichever is applicable, for transfers for which the valuation date is before May 1, 1989. See, however, § 1.7520–3(b) (relating to exceptions to the use of prescribed tables under certain circumstances). If the valuation date of a transfer to a charitable remainder annuity trust is after April 30, 1989, and before June 10, 1994, a transferor can rely on Notice 89–24, 1989–1 C.B. 660, or Notice 89–60, 1989–1 C.B. 700 (See § 601.601(d)(2)(ii)(*b*) of this chapter), in valuing the transferred interest.

Par. 12. Immediately following § 1.664–4 an undesignated center heading and § 1.664–4A are added to read as follows:

Unitrust Actuarial Tables Applicable Before May 1, 1989

§ 1.664–4A Valuation of charitable remainder interests for which the valuation date is before May 1, 1989.

(a) *Valuation of charitable remainder interests for which the valuation date is before January 1, 1952.* There was no provision for the qualification of a charitable remainder unitrust under section 664 until 1969. See § 20.2031–7A(a) of this chapter (Estate Tax Regulations) for the determination of the present value of a charitable interest for

which the valuation date is before January 1, 1952.

(b) *Valuation of charitable remainder interests for which the valuation date is after December 31, 1951, and before January 1, 1971.* No charitable deduction is allowable for a transfer to a unitrust for which the valuation date is after the effective dates of the Tax Reform Act of 1969 unless the unitrust meets the requirements of section 664. See § 20.2031–7A(b) of this chapter (Estate Tax Regulations) for the determination of the present value of a charitable remainder interest for which the valuation date is after December 31, 1951, and before January 1, 1971.

(c) *Valuation of charitable remainder unitrusts having certain payout sequences for transfers for which the valuation date is after December 31, 1970, and before December 1, 1983.* For the determination of the present value of a charitable remainder unitrust for which the valuation date is after December 31, 1970, and before December 1, 1983, see § 20.2031–7A(c) of this chapter (Estate Tax Regulations) and former § 1.664–4(d) (as contained in the 26 CFR part 1 edition revised as of April 1, 1994).

(d) *Valuation of charitable remainder unitrusts having certain payout sequences for transfers for which the valuation date is after November 30, 1983, and before May 1, 1989*—(1) *In general.* Except as otherwise provided in paragraph (d)(2) of this section, in the case of transfers made after November 30, 1983, for which the valuation date is before May 1, 1989, the present value of a remainder interest that is dependent on a term of years or the termination of the life of one individual is determined under paragraphs (d)(3) through (d)(6) of this section, provided that the amount of the payout as of any payout date during any taxable year of the trust is not larger than the amount that the trust could distribute on such date under § 1.664–3(a)(1)(v) if the taxable year of the trust were to end on such date. The present value of the remainder interest in the trust is determined by computing the adjusted payout rate (as defined in paragraph (d)(3) of this section) and following the procedure outlined in paragraph (d)(4) or (d)(5) of this section, whichever is applicable. The present value of a remainder interest that is dependent on a term of years is computed under paragraph (d)(4) of this section. The present value of a remainder interest that is dependent on the termination of the life of one individual is computed under paragraph (d)(5) of this section. See paragraph (d)(2) of this section for testamentary transfers for which the valuation date is after November 30, 1983, and before August 9, 1984.

(2) *Rules for determining the present value for testamentary transfers where the decedent dies after November 30, 1983, and before August 9, 1984.* For purposes of section 2055 or 2106, if—

(i) The decedent dies after November 30, 1983, and before August 9, 1984; or

(ii) On December 1, 1983, the decedent was mentally incompetent so that the disposition of the property could not be changed, and the decedent died after November 30, 1983, without regaining competency to dispose of the decedent's property, or died within 90 days of the date on which the decedent first regained competency, the present value determined under this section of a remainder interest is determined in accordance with paragraph (d)(1) and paragraphs (d)(3) through (d)(6) of this section, or § 1.664–4A(c), at the option of the taxpayer.

Par. 13. Section 1.664–4 is amended as follows:

1. Paragraph (a) is revised.
2. Paragraphs (b)(2) through (b)(5) are redesignated as paragraphs (d)(3) through (d)(6) of § 1.664–4A, respectively.
3. Paragraph (b)(1) is redesignated as paragraph (b) and revised.
4. Paragraphs (c) and (d) are revised.
5. The authority citation at the end of the section is removed.
6. Paragraphs (e) and (f) are added.
7. The revisions and additions read as follows:

§ 1.664–4 Calculation of the fair market value of the remainder interest in a charitable remainder unitrust.

(a) *Rules for determining present value.* For purposes of sections 170, 2055, 2106, and 2522, the fair market value of a remainder interest in a charitable remainder unitrust (as described in § 1.664–3) is its present value determined under paragraph (d) of this section. The present value determined under this section shall be computed on the basis of—

(1) Life contingencies determined as to each life involved, from the values of *lx* set forth in Table 80CNSMT contained in § 20.2031–7(d)(6) of this chapter (Estate Tax Regulations) in the case of transfers for which the valuation date is after April 30, 1989, or column 2 of Table LN, of § 20.2031–7A(d)(6) of this chapter in the case of transfers made after November 30, 1983, for which the valuation date is before May 1, 1989. See § 20.2031–7A (a) through (c) of this chapter, whichever is applicable, for transfers for which the valuation date is before December 1, 1983;

(2) Interest at the section 7520 rate in the case of transfers for which the valuation date is after April 30, 1989, or 10 percent in the case of transfers to charitable remainder unitrusts made after November 30, 1983, for which the valuation date is before May 1, 1989. See § 20.2031–7A (a) through (c) of this chapter, whichever is applicable, for transfers for which the valuation date is before December 1, 1983; and

(3) The assumption that the amount described in § 1.664–3(a)(1)(*i*)(*a*) is distributed in accordance with the payout sequence described in the governing instrument. If the governing instrument does not prescribe when the distribution is made during the period for which the payment is made, for purposes of this section, the distribution is considered payable on the first day of the period for which the payment is made.

(b) *Actuarial Computations by the Internal Revenue Service.* The regulations in this and in related sections provide tables of actuarial factors and examples that illustrate the use of the tables in determining the value of remainder interests in property. Section 1.7520–1(c)(2) refers to government publications that provide additional tables of factors and examples of computations for more complex situations. If the computation requires the use of a factor that is not provided in this section, the Commissioner may supply the factor upon a request for a ruling. A request for a ruling must be accompanied by a recitation of the facts including the date of birth of each measuring life, and copies of the relevant documents. A request for a ruling must comply with the instructions for requesting a ruling published periodically in the Internal Revenue Bulletin (See § 601.601(d)(2)(ii)(*b*) of this chapter) and include payment of the required user fee. If the Commissioner furnishes the factor, a copy of the letter supplying the factor should be attached to the tax return in which the deduction is claimed. If the Commissioner does not furnish the factor, the taxpayer must furnish a factor computed in accordance with the principles set forth in this section.

(c) *Statement supporting deduction required.* Any claim for a deduction on any return for the value of a remainder interest in a charitable remainder unitrust must be supported by a full statement attached to the return showing the computation of the present value of such interest.

(d) *Valuation.* The fair market value of a remainder interest in a charitable remainder unitrust (as described in

§ 1.664–3) for transfers for which the valuation date is after April 30, 1989, is its present value determined under paragraph (e) of this section. The fair market value of a remainder interest in a charitable remainder unitrust (as described in § 1.664–3) for transfers for which the valuation date is before May 1, 1989, is its present value determined under the following sections:

Valuation dates		Applicable regulations
After	Before	
	01–01–52	1.664–4A(a)
12–31–51	01–01–71	1.664–4A(b)
12–31–70	12–01–83	1.664–4A(c)
11–30–83	05–01–89	1.664–4A(d)

(e) *Valuation of charitable remainder unitrusts having certain payout sequences for transfers for which the valuation date is after April 30, 1989*—(1) *In general.* Except as otherwise provided in paragraph (e)(2) of this section, in the case of transfers for which the valuation date is after April 30, 1989, the present value of a remainder interest is determined under paragraphs (e)(3) through (e)(6) of this section, provided that the amount of the payout as of any payout date during any taxable year of the trust is not larger than the amount that the trust could distribute on such date under § 1.664–3(a)(1)(v) if the taxable year of the trust were to end on such date. See, however, § 1.7520–3(b) (relating to exceptions to the use of the prescribed tables under certain circumstances).

(2) *Transitional rules for valuation of charitable remainder unitrusts.* (i) If the valuation date of a transfer to a charitable remainder unitrust is after April 30, 1989, and before June 10, 1994, a transferor can rely upon Notice 89–24, 1989–1 C.B. 660, or Notice 89–60, 1989–1 C.B. 700, in valuing the transferred interest. (See § 601.601(d)(2)(ii)(*b*) of this chapter.)

(ii) For purposes of sections 2055, 2106, or 2624, if on May 1, 1989, the decedent was mentally incompetent so that the disposition of the property could not be changed, and the decedent died after April 30, 1989, without having regained competency to dispose of the decedent's property, or the decedent died within 90 days of the date that the decedent first regained competency after April 30, 1989, the present value of a remainder interest determined under this section is determined as if the valuation date with respect to the decedent's gross estate is either before May 1, 1989, or after April 30, 1989, at the option of the decedent's executor.

(3) *Adjusted payout rate.* For transfers for which the valuation date is after April 30, 1989, the adjusted payout rate is determined by using the appropriate Table F, contained in paragraph (e)(6) of this section, for the section 7520 interest rate applicable to the transfer. If the interest rate is between 4.2 and 14 percent, see paragraph (e)(6) of this section. If the interest rate is below 4.2 percent or greater than 14 percent, see § 1.664–4(b). The adjusted payout rate is determined by multiplying the fixed percentage described in § 1.664–3(a)(1)(i)(*a*) by the factor describing the payout sequence of the trust and the number of months by which the valuation date for the first full taxable year of the trust precedes the first payout date for such taxable year. If the governing instrument does not prescribe when the distribution or distributions shall be made during the taxable year of the trust, see § 1.664–4(a). In the case of a trust having a payout sequence for which no figures have been provided by the appropriate table, and in the case of a trust that determines the fair market value of the trust assets by taking the average of valuations on more than one date during the taxable year, see § 1.664–4(b).

(4) *Period is a term of years.* If the period described in § 1.664–3(a)(5) is a term of years, the factor that is used in determining the present value of the remainder interest for transfers for which the valuation date is after April 30, 1989, is the factor under the appropriate adjusted payout rate in Table D in paragraph (e)(6) of this section corresponding to the number of years in the years. If the adjusted payout rate is an amount that is between adjusted payout rates for which factors are provided in Table D, a linear interpolation must be made. The present value of the remainder interest is determined by multiplying the net fair market value (as of the appropriate valuation date) of the property placed in trust by the factor determined under this paragraph. For purposes of this section, the valuation date is, in the case of an inter vivos transfer, the date on which the property is transferred to the trust by the donor. However, if an election is made under section 7520 and § 1.7520–2(b) to compute the present value of the charitable interest by use of the interest rate component for either of the 2 months preceding the month in which the date of transfer falls, the month so elected is the valuation date for purposes of determining the interest rate and mortality tables. In the case of a testamentary transfer under section 2055, 2106, or 2624, the valuation date is the date of death, unless the alternate valuation date is elected under section 2032, in which event, and within the limitations set forth in section 2032 and the regulations thereunder, the valuation date is the alternate valuation date. If the decedent's estate elects the alternate valuation date under section 2032 and also elects, under section 7520 and § 1.7520–2(b), to use the interest rate component for one of the 2 months preceding the alternate valuation date, the month so elected is the valuation date for purposes of determining the interest rate and mortality tables. If the adjusted payout rate is between 4.2 and 14 percent, see paragraph (e)(6) of this section. If the adjusted payout rate is less than 4.2 percent or greater than 14 percent, see § 1.664–4(b). The application of this paragraph may be illustrated by the following example:

Example. D transfers $100,000 to a charitable remainder unitrust on January 1, 1990. The trust instrument requires that the trust pay 8 percent of the fair market value of the trust assets as of January 1st for a term of 12 years to D in quarterly payments (March 31, June 30, September 30, and December 31). The section 7520 rate of January 1990 is 9.6 percent. Under Table F(9.6), the appropriate adjustment factor is .944628 for quarterly payments payable at the end of each quarter. The adjusted payout rate is 7.557 (8%x.944628). Based on the remainder factors in Table D, the present value of the remainder interest is $38,950.30, computed as follows:

Factor at 7.4 percent for 12 years	.397495
Factor at 7.6 percent for 12 years	.387314
Difference	.010181

Interpolation adjustment:

$$\frac{7.557\% - 7.4\%}{0.2\%} = \frac{x}{.010181}$$

$$x = .007992$$

Factor at 7.4 percent for 12 years	.397495
Less: Interpolation adjustment	.007992
Interpolated factor	.389503
Present value of remainder interest: ($100,000×.389503)	$38,950.30

(5) *Period is the life of one individual.* If the period described in § 1.664–3(a)(5) is the life of one individual, the factor that is used in determining the present value of the remainder interest for transfers for which the valuation date is after April 30, 1989, is the factor in Table U(1) in paragraph (e)(6) of this section under the appropriate adjusted payout. For purposes of the computations described in this paragraph, the age of an individual is

the age of that individual at the individual's nearest birthday. If the adjusted payout rate is an amount that is between adjusted payout rates for which factors are provided in the appropriate table, a linear interpolation must be made. The present value of the remainder interest is determined by multiplying the net fair market value (as of the valuation date as determined in paragraph (e)(4) of this section) of the property placed in trust by the factor determined under this paragraph (e)(5). If the adjusted payout rate is between 4.2 and 14 percent, see paragraph (e)(6) of this section. If the adjusted payout rate is below 4.2 percent or greater than 14 percent, see § 1.664–4(b). The application of this paragraph may be illustrated by the following example:

Example. A, who will be 45 years old on February 19, 1990, transfers $100,000 to a charitable remainder unitrust on January 1, 1990. The trust instrument requires that the trust pay to A semiannually (on June 30 and December 31) 9 percent of the fair market value of the trust assets as of January 1st during A's life. The section 7520 rate for January 1990 is 9.6 percent. Under Table F(9.6), the appropriate adjustment factor is .933805 for semiannual payments payable at the end of the semiannual period. The adjusted payout rate is 8.404 (9%×.933805). Based on the remainder factors in Table U(1), the present value of the remainder interest is $11,098.00, computed as follows:

Factor at 8.4 percent at age 45	.11106
Factor at 8.6 percent at age 45	.10683
Difference	.00423

Interpolation adjustment:

$$\frac{8.404\% - 8.4\%}{0.2\%} = \frac{x}{.00423}$$

$$x = .00008$$

Factor at 8.4 percent at age 45	.11106
Less: Interpolation adjustment	.00008
Interpolated Factor	.11098
Present value of remainder interest: ($100,000×.11098)	$11,098.00

(6) *Actuarial tables for transfers for which the valuation date is after April 30, 1989.* For transfers for which the valuation date is after April 30, 1989, the present value of a charitable remainder unitrust interest that is dependent on a term of years or the termination of a life interest is determined by using the section 7520 rate and the tables set forth below. See, however, § 1.7520–3(b) (relating to exceptions to the use of prescribed tables under certain circumstances). Many actuarial factors not contained in the following tables are contained in Internal Revenue Service Publication 1458, "Actuarial Values, Beta Volume," (8–89). A copy of this publication may be purchased from the Superintendent of Documents, United States Government Printing Office, Washington, DC 20402.

(f) *Effective date.* This section is effective as of May 1, 1989.

Par. 14. Section 1.664–4A is further amended as follows:

1. The fifth sentence of newly designated paragraph (d)(4) is revised.

2. Newly designated paragraph (d)(5) is amended by:

a. Revising the first and fifth sentences.

b. Removing the reference "(b)(4)" in both places it appears and adding "(b)(5)" in each place.

3. The heading for newly designated paragraph (d)(6) is revised.

4. The headings for Table D, Table E, and Table F(1) in newly designated paragraph (d)(6) are revised.

5. The revisions read as follows:

§ 1.664–4A Valuation of charitable remainder interests for which the valuation date is before May 1, 1989.

* * * * *

(d) * * *

(4) *Period is a term of years.* * * * If the adjusted payout rate is greater than 14 percent, see § 1.664–4(b).

* * * * *

(5) *Period is the life of one individual.* If the period described in paragraph (a)(5) of § 1.664–3 is the life of one individual, the factor that is used in determining the present value of the remainder interest is the factor under the appropriate adjusted payout rate in column (2) of Table E in paragraph (d)(6) of this section opposite the number in column (1) that corresponds to the age of the individual whose life measures the period. * * * If the adjusted payout rate is greater than 14 percent, see § 1.664–4(b). * * *

(6) *Actuarial tables for transfers for which the valuation date is after November 30, 1983, and before May 1, 1989.*

* * * * *

Table D

Table D—Term Certain—Table Showing the Present Worth of a Remainder Interest Postponed for a Term of Years in a Charitable Remainder Unitrust Having the Adjusted Payout Rate Shown—Applicable for Transfers After November 30, 1983, and Before May 1, 1989

* * * * *

Table E

Table E—Single Life, Unisex—Table Showing the Present Worth of the Remainder Interest in Property Transferred to a Unitrust Having the Adjusted Payout Rate Shown—Applicable for Transfers After November 30, 1983, and Before May 1, 1989

* * * * *

Table F(1)

Table F(1)—10 Percent—Table Showing Factors for Computations of the Adjusted Payout Rate for Certain Valuations and Payout Sequences—Applicable for Transfers After November 30, 1983, and Before May 1, 1989

* * * * *

Par. 14a. An undesignated center heading is added immediately before § 1.665(a)–0A to read as follows:

Treatment of Excess Distributions of Trusts Applicable to Taxable Years Beginning on or After January 1, 1969

Par. 14b. The undesignated center heading immediately preceding § 1.665(a)–0 is revised to read as follows:

Treatment of Excess Distributions of Trusts Applicable to Taxable Years Beginning Before January 1, 1969

Par. 15. Section 1.1011–2, paragraph (c), *Example (8)(b)* is amended by adding the following three sentences at the end of the paragraph.

§ 1.1011–2 Bargain sale to charitable organization.

* * * * *

(c) * * *

Example (8).

* * * * *

(b) * * * See Rev. Rul. 84–162, 1984–2 C.B. 200, for transfers for which the valuation date falls after November 23, 1984. (See § 601.601(d)(2)(ii)(*b*) of this chapter). For the applicable valuation tables in connection therewith, see § 20.2031–7(d)(6) of this chapter. See, however, § 1.7520–3(b) (relating to exceptions to the use of standard actuarial factors in certain circumstances).

* * * * * *

Par. 16. Immediately following § 1.7519–3T, an undesignated center heading and §§ 1.7520–1 through 1.7520–4 are added to read as follows:

General Actuarial Valuations

§ 1.7520–1 Valuation of annuities, unitrust interests, interests for life or terms of years, and remainder or reversionary interests.

(a) *General actuarial valuations.* (1) Except as otherwise provided in this section and in § 1.7520–3 (relating to exceptions to the use of prescribed tables under certain circumstances), in the case of certain transactions after April 30, 1989, subject to income tax, the fair market value of annuities, interests for life or for a term of years (including unitrust interests), remainders, and reversions is their present value determined under this section. See § 20.2031–7(d) (and, for certain prior periods, § 20.2031–7A) of this chapter, Estate Tax Regulations, for the computation of the value of annuities, unitrust interests, life estates, terms for years, remainders, and reversions, other than interests described in paragraphs (a)(2) and (a)(3) of this section.

(2) For a transfer to a pooled income fund after April 30, 1989, see § 1.642(c)–6(e) (or, for certain prior periods, § 1.642(c)–6A) with respect to the valuation of the remainder interest.

(3) For a transfer to a charitable remainder annuity trust after April 30, 1989, see § 1.664–2 with respect to the valuation of the remainder interest. See § 1.664–4 (or, for certain prior periods, § 1.664–4A) with respect to the valuation of the remainder interest in property transferred to a charitable remainder unitrust.

(b) *Components of valuation*—(1) *Interest rate component*—(i) *Section 7520 Interest rate.* The section 7520 interest rate is the rate of return, rounded to the nearest two-tenths of one percent, that is equal to 120 percent of the applicable Federal mid-term rate, compounded annually, for purposes of section 1274(d)(1), for the month in which the valuation date falls. In rounding the rate to the nearest two-tenths of a percent, any rate that is midway between one two-tenths of a percent and another is rounded up to the higher of those two rates. For example, if 120 percent of the applicable Federal mid-term rate is 10.30, the section 7520 interest rate component is 10.4. The section 7520 interest rate is published monthly by the Internal Revenue Service in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(*b*) of this chapter).

(ii) *Valuation date.* Except as provided in § 1.7520–2, the valuation date is the date on which the transaction takes place.

(2) *Mortality component.* The mortality component reflects the mortality data most recently available from the United States census. As new mortality data becomes available after each decennial census, the mortality component described in this section will be revised periodically and the revised mortality component tables will be published in the regulations at that time. For transactions with valuation dates after April 30, 1989, the mortality component table (Table 80CNSMT) is contained in § 20.2031–7(d) of this chapter (Estate Tax Regulations). See § 20.2031–7A for mortality component tables applicable to transactions for which the valuation date falls before May 1, 1989.

(c) *Tables.* The present value on the valuation date of an annuity, life estate, term of years, remainder, or reversion is computed by using the section 7520 interest rate component that is described in paragraph (b)(1) of this section and the mortality component that is described in paragraph (b)(2) of this section. Actuarial factors for determining these present values are included in tables in these regulations and in publications by the Internal Revenue Service. If a special factor is required in order to value an interest, the Internal Revenue Service will furnish the factor upon a request for a ruling. The request for a ruling must be accompanied by a recitation of the facts, including the date of birth for each measuring life and copies of relevant instruments. A request for a ruling must comply with the instructions for requesting a ruling published periodically in the Internal Revenue Bulletin (see Rev. Proc. 94–1, 1994–1 I.R.B. 10, and subsequent updates, and §§ 601.201 and 601.601(d)(2)(ii)(*b*) of this chapter) and include payment of the required user fee.

(1) *Regulation sections containing tables with interest rates between 4.2 and 14 percent.* Section 1.642(c)–6(e)(4) contains Table S used for determining the present value of a single life remainder interest in a pooled income fund as defined in § 1.642(c)–5. Section 1.664–4(e)(6) contains Table D (actuarial factors used in determining the present value of a remainder interest postponed for a term of years), Table U(1) (actuarial factors for one life), and Table F (payout factors) used in determining the present value of a remainder interest in a charitable remainder unitrust as defined in § 1.664–3. Section 20.2031–7(d)(6) of this chapter (Estate Tax Regulations) contains Table S (actuarial factors for one life), Table B (actuarial factors used in determining the present value of an interest for a term of years), Table K (annuity end-of-interval adjustment factors), Table J (term certain annuity beginning-of-interval adjustment factors), and Table 80CNSMT (mortality components) used in determining the present value of annuities, life estates, remainders, and reversions. The regulations will be revised periodically to include new mortality component tables and new tables of factors.

(2) *Internal Revenue Service publications containing tables with interest rates between 2.2 and 26 percent.* The following documents (with the exception of Publication 1459) have been published for sale by the Superintendent of Documents, United States Government Printing Office, Washington, DC 20402:

(i) Internal Revenue Service Publication 1457, "Actuarial Values, Alpha Volume," (8/89). This publication includes tables of valuation factors, as well as examples that show how to compute other valuation factors, for determining the present value of annuities, life estates, terms of years, remainders, and reversions, measured by one or two lives. These factors may also be used in the valuation of interests in a charitable remainder annuity trust as defined in § 1.664–2 of this chapter and a pooled income fund as defined in § 1.642(c)–5 of this chapter.

(ii) Internal Revenue Service Publication 1458, "Actuarial Values, Beta Volume," (8/89). This publication includes term certain tables and tables of one and two life valuation factors for determining the present value of remainder interests in a charitable remainder unitrust as defined in § 1.664–3 of this chapter.

(iii) Internal Revenue Service Publication 1459, "Actuarial Values, Gamma Volume," (8–89) is no longer available for purchase from the Superintendent of Documents. However, it may be obtained by requesting a copy from: CC:DOM:CORP:T:R (IRS Publication 1459), room 5228, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. This publication includes tables for computing depreciation adjustment factors. See § 1.170A–12 of this chapter.

(d) *Effective date.* This section is effective as of May 1, 1989.

§ 1.7520–2 Valuation of charitable interests.

(a) *In general*—(1) *Valuation.* Except as otherwise provided in this section and in § 1.7520–3 (relating to exceptions to the use of prescribed tables under certain circumstances), the fair market value of annuities, interests for life or for a term of years, remainders, and reversions for which an income tax charitable deduction is allowable is the

present value of such interests determined under § 1.7520–1.

(2) *Prior-month election rule.* If any part of the property interest transferred qualifies for an income tax charitable deduction under section 170(c), the taxpayer may elect (under paragraph (b) of this section) to compute the present value of the interest transferred by use of the section 7520 interest rate for the month during which the interest is transferred or the section 7520 interest rate component for either of the 2 months preceding the month during which the interest is transferred. Paragraph (b) of this section explains how a prior-month election is made. The interest rate for the month so elected is the applicable section 7520 interest rate. If the actuarial factor for either or both of the 2 months preceding the month during which the interest is transferred is based on a mortality experience that is different from the mortality experience at the date of the transfer and if the taxpayer elects to use the section 7520 rate for a prior month with the different mortality experience, the taxpayer must use the actuarial factor derived from the mortality experience in effect during the month of the section 7520 rate elected. All actuarial computations relating to the transfer must be made by applying the interest rate component and the mortality component of the month elected by the taxpayer.

(3) *Transfers of more than one interest in the same property.* If a taxpayer transfers more than one interest in the same property at the same time, for purposes of valuing the transferred interests, the taxpayer must use the same interest rate and mortality component for each interest in the property transferred. If more than one interest in the same property is transferred in two or more separate transfers at different times, the value of each interest is determined by the use of the interest rate component and mortality component in effect during the month of the transfer of that interest or, if applicable under paragraph (a)(2) of this section, either of the two months preceding the month of the transfer.

(4) *Information required with tax return.* The following information must be attached to the income tax return (or to the amended return) if the taxpayer claims a charitable deduction for the present value of a temporary or remainder interest in property—

(i) A complete description of the interest that is transferred, including a copy of the instrument of transfer;

(ii) The valuation date of the transfer;

(iii) The names and identification numbers of the beneficiaries of the transferred interest;

(iv) The names and birthdates of any measuring lives, a description of any relevant terminal illness condition of any measuring life, and (if applicable) an explanation of how any terminal illness condition was taken into account in valuing the interest; and

(v) A computation of the deduction showing the applicable section 7520 interest rate that is used to value the transferred interest.

(5) *Place for filing returns.* See section 6091 of the Internal Revenue Code and the regulations thereunder for the place for filing the return or other document required by this section.

(b) *Election of interest rate component*—(1) *Time for making election.* A taxpayer makes a prior-month election under paragraph (a)(2) of this section by attaching the information described in paragraph (b)(2) of this section to the taxpayer's income tax return or to an amended return for that year that is filed within 24 months after the later of the date the original return for the year was filed or the due date for filing the return.

(2) *Manner of making election.* A statement that the prior-month election under section 7520(a) of the Internal Revenue Code is being made and that identifies the elected month must be attached to the income tax return (or to the amended return).

(3) *Revocability.* The prior-month election may be revoked by filing an amended return within 24 months after the later of the date the original return of tax for the year was filed or the due date for filing the return. The revocation must be filed in the place referred to in paragraph (a)(5) of this section.

(c) *Effective dates.* Paragraph (a) of this section is effective as of May 1, 1989. Paragraph (b) of this section is effective for elections made after June 10, 1994.

§ 1.7520–3 Limitation on the application of section 7520.

(a) *Internal Revenue Code sections to which section 7520 does not apply.* Section 7520 of the Internal Revenue Code does not apply for purposes of—

(1) Part I, subchapter D of subtitle A (section 401 et. seq.), relating to the income tax treatment of certain qualified plans. (However, section 7520 does apply to the estate and gift tax treatment of certain qualified plans and for purposes of determining excess accumulations under section 4980A);

(2) Sections 72 and 101(b), relating to the income taxation of life insurance, endowment, and annuity contracts, unless otherwise provided for in the regulations under sections 72, 101, and 1011 (see, particularly, §§ 1.101–2(e)(1)(iii)(*b*)(*2*), and 1.1011–2(c), *Example 8*);

(3) Sections 83 and 451, unless otherwise provided for in the regulations under those sections;

(4) Section 457, relating to the valuation of deferred compensation, unless otherwise provided for in the regulations under section 457;

(5) Sections 3121(v) and 3306(r), relating to the valuation of deferred amounts, unless otherwise provided for in the regulations under those sections;

(6) Section 6058, relating to valuation statements evidencing compliance with qualified plan requirements, unless otherwise provided for in the regulations under section 6058;

(7) Section 7872, relating to income and gift taxation of interest-free loans and loans with below-market interest rates, unless otherwise provided for in the regulations under section 7872; or

(8) Section 2702(a)(2)(A), relating to the value of a nonqualified retained interest upon a transfer of an interest in trust to or for the benefit of a member of the transferor's family; and

(9) Any other sections of the Internal Revenue Code to the extent provided by the Internal Revenue Service in revenue rulings or revenue procedures. (See §§ 601.201 and 601.601 of this chapter).

(b) *Other limitations on the application of section 7520.* [Reserved]

(c) *Effective date.* Section 1.7520–3(a) is effective as of May 1, 1989.

§ 1.7520–4 Transitional rules.

(a) *Reliance.* If the valuation date is after April 30, 1989, and before June 10, 1994, a taxpayer can rely on Notice 89–24, 1989–1 C.B. 660, or Notice 89–60, 1989–1 C.B. 700 (See § 601.601(d)(2)(ii)(*b*) of this chapter), in valuing the transferred interest.

(b) *Effective date.* This section is effective as of May 1, 1989.

PART 20—ESTATE TAX; ESTATES OF DECEDENTS DYING AFTER AUGUST 16, 1954

Par. 17. The authority citation for part 20 is revised to read as follows:

Authority: 26 U.S.C. 7805.

Section 20.2031–7 also issued under 26 U.S.C. 7520(c)(2).

Section 20.2031–7A also issued under 26 U.S.C. 7520(c)(2).

Section 20.7520–1 also issued under 26 U.S.C. 7520(c)(2).

Section 20.7520–2 also issued under 26 U.S.C. 7520(c)(2).

Section 20.7520–3 also issued under 26 U.S.C. 7520(c)(2).

Section 20.7520–4 also issued under 26 U.S.C. 7520(c)(2).

Par. 18. Section § 20.2013–4 is amended by:

1. Revising the second sentence of the introductory text of paragraph (a).

2. Revising the fourth sentence in *Example (2)* of paragraph (a).

3. The revisions read as follows:

§ 20.2013–4 Valuation of property transferred.

(a) * * * If the decedent received a life estate or a remainder or other limited interest in property that was included in a transferor decedent's gross estate, the value of the interest is determined as of the date of the transferor's death on the basis of recognized valuation principles (see §§ 20.2031–7 (or, for certain prior periods, § 20.2031–7A) and 20.7520–1 through 20.7520–4). * * *

* * * * *

Example (2). * * * The part of that value attributable to the life estate is $44,688 and the part of that value attributable to the remainder is $55,312 (see § 20.2031–7A(b)).

* * * * *

Par. 19. Section 20.2031–0 is added to read as follows:

§ 20.2031–0 Table of contents.

This section lists the section headings and undesignated center headings that appear in the regulations under section 2031.

§ 2031–1 Definition of gross estate; valuation of property.
§ 20.2031–2 Valuation of stocks and bonds.
§ 20.2031–3 Valuation of interests in businesses.
§ 20.2031–4 Valuation of notes.
§ 20.2031–5 Valuation of cash on hand or on deposit.
§ 20.2031–6 Valuation of household and personal effects.
§ 20.2031–7 Valuation of annuities, interests for life or term of years, and remainder or reversionary interests for estates of decedents for which the valuation date of the gross estate is after April 30, 1989.
§ 20.2031–8 Valuation of certain life insurance and annuity contracts; valuation of shares in an open-end investment company.
§ 20.2031–9 Valuation of other property.

Actuarial Tables Applicable Before May 1, 1989

§ 20.2031–7A Valuation of annuities, interests for life or term of years, and remainder or reversionary interests for estates of decedents for which the valuation date of the gross estate is before May 1, 1989.

Par. 20. Immediately following § 20.2046–1 an undesignated center heading and § 20.2031–7A are added to read as follows:

Actuarial Tables Applicable Before May 1, 1989

§ 20.2031–7A Valuation of annuities, interests for life or term of years, and remainder or reversionary interests for estates of decedents for which the valuation date of the gross estate is before May 1, 1989.

(a) *Valuation of annuities, interests for life or term of years, and remainder or reversionary interests for estates of decedents for which the valuation date of the gross estate is before January 1, 1952.* Except as otherwise provided in § 20.2031–7(b), if the valuation date of the decedent's gross estate is before January 1, 1952, the present value of annuities, life estates, terms for years, remainders, and reversions is their present value determined under this section. If the valuation of the interest involved is dependent upon the continuation or termination of one or more lives or upon a term certain concurrent with one or more lives, the factor for the present value is computed on the basis of interest at the rate of 4 percent a year, compounded annually, and life contingencies as to each life involved from values that are based on the Actuaries' or Combined Experience Table of Mortality, as extended. This table and related factors are described in former § 81.10 (as contained in the 26 CFR Part 81 edition revised as of April 1, 1958). The present value of an interest measured by a term of years is computed on the basis of interest at the rate of 4 percent a year.

(b) *Valuation of annuities, interests for life or term of years, and remainder or reversionary interests for estates of decedents for which the valuation date of the gross estate is after December 31, 1951, and before January 1, 1971.* Except as otherwise provided in § 20.2031–7(b), if the valuation date for the decedent's gross estate is after December 31, 1951, and before January 1, 1971, the present value of annuities, life estates, terms of years, remainders, and reversions is their present value determined under this section. If the valuation of the interest involved is dependent upon the continuation or termination of one or more lives, or upon a term certain concurrent with one or more lives, the factor for the present value is computed on the basis of interest at the rate of 3½ percent a year, compounded annually, and life contingencies as to each life involved are taken from U.S. Life Table 38. This table and related factors are set forth in former § 20.2031–7 (as contained in the 26 CFR Part 20 edition revised as of April 1, 1984). Special factors involving one and two lives may be found in or computed with the use of tables contained in the publication entitled "Actuarial Values for Estate and Gift Tax," Internal Revenue Service Publication Number 11 (Rev. 5–59). This publication is no longer available for purchase from the Superintendent of Documents. However, it may be obtained by requesting a copy from: CC:DOM:CORP:T:R (IRS Publication 11), room 5228, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. The present value of an interest measured by a term of years is computed on the basis of interest at the rate of 3½ percent a year.

(c) *Valuation of annuities, interests for life or term of years, and remainder or reversionary interests for estates of decedents for which the valuation date of the gross estate is after December 31, 1970, and before December 1, 1983.* Except as otherwise provided in § 20.2031–7(b), if the valuation date of the decedent's gross estate is after December 31, 1970, and before December 1, 1983, the present value of annuities, life estates, terms of years, remainders, and reversions is their present value determined under this section. If the valuation of the interest involved is dependent upon the continuation of or termination of one or more lives or upon a term certain concurrent with one or more lives, the factor for the present value is computed on the basis of interest at the rate of 6 percent a year, compounded annually, and life contingencies are determined as to each male and female life involved, from values that are set forth in Table LN. Table LN contains values that are taken from the life table for total males and the life table for total females appearing as Tables 2 and 3, respectively, in United States Life Tables: 1959– 1960, published by the Department of Health and Human Services, Public Health Service. Table LN and related factors are set forth in former § 20.2031–10 (as contained in the 26 CFR part 20 edition revised as of April 1, 1994). Special factors involving one and two lives may be found in or computed with the use of tables contained in Internal Revenue Service Publication 723, "Actuarial Values I: Valuation of Last Survivor Charitable Remainders," (12–70), and Internal Revenue Service Publication 723A, "Actuarial Values II: Factors at 6 Percent Involving One and Two Lives," (12–70). These publications are no longer available for purchase from the Superintendent of Documents. However, a copy of each may be obtained from: CC:DOM:CORP:T:R (IRS

Publication 723/723A), room 5228, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044.

Par. 21. Section 20.2031–7 is redesignated as § 20.2031–7A, paragraph (d) and amended as follows:

1. The following redesignation table indicates the old CFR unit numbers for § 20.2031–7 and the corresponding new CFR unit numbers for § 20.2031–7A(d):

Old CFR unit No. in § 20.2031–7	Corresponding new No. in § 20.2031–7A
§ 20.2031–7 heading .	Paragraph (d) heading.
(a)	(d)(1).
(a)(1)	(d)(1)(i).
(a)(2)	(d)(1)(ii).
(a)(3)	(d)(1)(iii).
(b)	(d)(2).
(b)(1)	(d)(2)(i).
(b)(2)	(d)(2)(ii).
(b)(3)	(d)(2)(iii).
(b)(3)(i)	(d)(2)(iii)(A).
(b)(3)(ii)	(d)(2)(iii)(B).
(c) through (f)	(d)(3) through (d)(6).

2. The paragraph heading for paragraph (d) is revised.

3. Paragraphs (d)(1)(i) and (iii) are revised.

4. Paragraph (d)(5), third and fourth sentences are revised and a new sentence is added after the fourth sentence.

5. Paragraph (d)(6), the headings for Tables A, B, and LN are revised.

6. The added and revised provisions read as follows:

§ 20.2031–7A Valuation of annuities, interests for life or term of years, and remainder or reversionary interests for estates of decedents for which the valuation date of the gross estate is before May 1, 1989.

* * * * *

(d) *Valuation of annuities, interests for life or term of years, and remainder or reversionary interests for estates of decedents for which the valuation date of the gross estate is after November 30, 1983, and before May 1, 1989*—(1) *In general.* (i) Except as otherwise provided in § 20.2031–7(b), if the decedent died after November 30, 1983, and the valuation date for the gross estate is before May 1, 1989, the fair market value of annuities, life estates, terms of years, remainders, and reversions is their present value determined under this section. If the decedent died after November 30, 1983, and before August 9, 1984, or, in cases where the valuation date of the decedent's gross estate is before May 1, 1989, if, on December 1, 1983, the decedent was mentally incompetent so that the disposition of the decedent's property could not be changed, and the decedent died on or after December 1, 1983, without having regained competency to dispose of the decedent's property, or if the decedent died within 90 days of the date on which the decedent first regained competency, the fair market value of annuities, life estates, terms for years, remainders, and reversions included in the gross estate of such decedent is their present value determined under either this section or § 20.2031–7A(c), at the option of the taxpayer. The value of annuities issued by companies regularly engaged in their sale, and of insurance policies on the lives of persons other than the decedent, is determined under § 20.2031–8. The fair market value of a remainder interest in a charitable remainder unitrust, as defined in § 1.664–3 of this chapter, is its present value determined under § 1.664–4 of this chapter. The fair market value of a life interest or term for years in a charitable remainder unitrust is the fair market value of the property as of the date of valuation less the fair market value of the remainder interest on such date determined under § 1.664–4 of this chapter. The fair market value of the interests in a pooled income fund, as defined in § 1.642(c)–5 of this chapter, is their value determined under § 1.642(c)–6 of this chapter.

* * * * *

(iii) In all examples set forth in this section, the decedent is assumed to have died on or after August 9, 1984, with the valuation date of the decedent's gross estate before May 1, 1989, and to have been competent to change the disposition of the property on December 1, 1983.

* * * * *

(5) *Actuarial computations by the Internal Revenue Service.* * * * Table LN contains values of *lx* taken from the life table for the total population appearing as Table 1 of United States Life Tables: 1969–71, published by the Department of Health and Human Services, Public Health Service. Many special factors involving one and two lives may be found in or computed with the use of the tables contained in Internal Revenue Service Publication 723E, "Actuarial Values II: Factors at 10 Percent Involving One and Two Lives," (12–83). This publication is no longer available for purchase from the Superintendent of Documents. However, it may be obtained by requesting a copy from: CC:DOM:CORP:T:R (IRS Publication 723E), room 5228, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044.

Table A

Table A—Single Life, Unisex, 10 Percent—Table Showing the Present Worth of An Annuity, of a Life Estate, and a Remainder Interest—Applicable for Transfers After November 30, 1983, and Before May 1, 1989

* * * * *

Table B

Table B—Term Certain, Unisex, 10 Percent—Table Showing the Present Worth of an Annuity for a Term Certain, of an Income Interest for a Term Certain, and of a Remainder Interest Postponed for a Term Certain—Applicable for Transfers After November 30, 1983, and before May 1, 1989

* * * * *

Table LN

Table LN—Applicable for Transfers After November 30, 1983, and Before May 1, 1989

* * * * *

Par. 22. New § 20.2031–7 is added to read as follows:

§ 20.2031–7 Valuation of annuities, interests for life or term of years, and remainder or reversionary interests for estates of decedents for which the valuation date of the gross estate is after April 30, 1989.

(a) *In general.* Except as otherwise provided in paragraph (b) of this section and § 20.7520–3(b) (pertaining to certain limitations on the use of prescribed tables), the fair market value of annuities, life estates, terms of years, remainders, and reversionary interests for estates of decedents is the present value of such interests, determined under paragraph (d) of this section. The regulations in this and in related sections provide tables with standard actuarial factors and examples that illustrate how to use the tables to compute the present value of ordinary annuity, life, and remainder interests in property. These sections also refer to standard and special actuarial factors that may be necessary to compute the present value of similar interests in more unusual fact situations.

(b) *Commercial annuities and insurance contracts.* The value of annuities issued by companies regularly engaged in their sale, and of insurance policies on the lives of persons other than the decedent, is determined under § 20.2031–8. See § 20.2042–1 with respect to insurance policies on the decedent's life.

(c) *Actuarial valuations before May 1, 1989.* The present value of annuities, life estates, terms of years, remainders, and reversions for estates of decedents

for which the valuation date of the gross estate is before May 1, 1989, is determined under the following sections:

Valuation date		Applicable section
After	Before	
	01–01–52	20.2031–7A(a)
12–31–51	01–01–71	20.2031–7A(b)
12–31–70	12–01–83	20.2031–7A(c)
11–30–83	05–01–89	20.2031–7A(d)

(d) *Actuarial valuations after April 30, 1989*—(1) *In general.* Except as otherwise provided in paragraph (b) of this section and § 20.7520–3(b) (pertaining to certain limitations on the use of prescribed tables), if the valuation date for the gross estate of the decedent is after April 30, 1989, the fair market value of annuities, life estates, terms of years, remainders, and reversionary interests is their present value determined by use of standard or special section 7520 actuarial factors. These factors are derived by using the appropriate section 7520 interest rate and, if applicable, the mortality component for the valuation date of the interest that is being valued. See §§ 20.7520–1 through 20.7520–4.

(2) *Specific Interests*—(i) *Charitable Remainder Trusts.* The fair market value of a remainder interest in a pooled income fund, as defined in § 1.642(c)–5 of this chapter, is its value determined under § 1.642(c)–6(e) of this chapter. The fair market value of a remainder interest in a charitable remainder annuity trust, as defined in § 1.664–2(a) of this chapter, is its present value determined under § 1.664–2(c) of this chapter. The fair market value of a remainder interest in a charitable remainder unitrust, as defined in § 1.664–3 of this chapter, is its present value determined under § 1.664–4(e) of this chapter. The fair market value of a life interest or term of years in a charitable remainder unitrust is the fair market value of the property as of the date of valuation less the fair market value of the remainder interest on that date determined under § 1.664–4(e) of this chapter.

(ii) *Ordinary remainder and reversionary interests.* If the interest to be valued is to take effect after a definite number of years or after the death of one individual, the present value of the interest is computed by multiplying the value of the property by the appropriate remainder interest actuarial factor (that corresponds to the applicable section 7520 interest rate and remainder interest period) in Table B (for a term certain) or Table S (for one measuring life), as the case may be. Tables B and S are included in paragraph (d)(6) of this section and in Internal Revenue Service Publication 1457. For information about obtaining actuarial factors for other types of remainder interests, see paragraph (d)(4) of this section.

(iii) *Ordinary term-of-years and life interests.* If the interest to be valued is the right of a person to receive the income of certain property, or to use certain nonincome-producing property, for a term of years or for the life of one individual, the present value of the interest is computed by multiplying the value of the property by the appropriate term-of-years or life interest actuarial factor (that corresponds to the applicable section 7520 interest rate and term-of-years or life interest period). Internal Revenue Service Publication 1457 includes actuarial factors for an interest for a term of years in Table B and for the life of one individual in Table S. However, term-of-years and life interest actuarial factors are not included in Table B or Table S in § 20.2031–7(d)(6) of this chapter. If Internal Revenue Service Publication 1457 (or any other reliable source of term-of-years and life interest actuarial factors) is not conveniently available, an actuarial factor for the interest may be derived mathematically. This actuarial factor may be derived by subtracting the correlative remainder factor (that corresponds to the applicable section 7520 interest rate and the term of years or the life) in Table B (for a term of years) or in Table S (for the life of one individual) in § 20.2031–7(d)(6), as the case may be, from 1.000000. For information about obtaining actuarial factors for other types of term-of-years and life interests, see paragraph (d)(4) of this section.

(iv) *Annuities.* (A) If the interest to be valued is the right of a person to receive an annuity that is payable at the end of each year for a term of years or for the life of one individual, the present value of the interest is computed by multiplying the aggregate amount payable annually by the appropriate annuity actuarial factor (that corresponds to the applicable section 7520 interest rate and annuity period). Internal Revenue Publication 1457 includes actuarial factors in Table B (for an annuity payable for a term of years) and in Table S (for an annuity payable for the life of one individual). However, annuity actuarial factors are not included in Table B or Table S in paragraph (d)(6) of this section. If Internal Revenue Service Publication 1457 (or any other reliable source of annuity actuarial factors) is not conveniently available, a required annuity factor for a term of years or for one life may be mathematically derived. This annuity factor may be derived by subtracting the applicable remainder factor (that corresponds to the applicable section 7520 interest rate and annuity period) in Table B (in the case of a term-of-years annuity) or in Table S (in the case of a one-life annuity) in paragraph (d)(6) of this section, as the case may be, from 1.000000 and then dividing the result by the applicable section 7520 interest rate expressed as a decimal number.

(B) If the annuity is payable at the end of semiannual, quarterly, monthly, or weekly periods, the product obtained by multiplying the annuity factor by the aggregate amount payable annually is then multiplied by the applicable adjustment factor set forth in Table K for payments made at the end of the specified periods. The provisions of this paragraph (d)(2)(iv)(B) are illustrated by the following example:

Example. At the time of [illegible] death in January 1999, the annuitant, age 72, is entitled to receive an annuity of $5,000 a year for life payable in equal monthly installments at the end of each period. The section 7520 rate for January 1999 is 9.6 percent. Under Table S, the remainder factor at 9.6 percent for an individual aged 72 is .40148. By converting the remainder factor to an annuity factor, as described above, the annuity factor at 9.6 percent for an individual aged 72 is 6.2356 (1.00000 minus .40148, divided by .096). Under Table K, the adjustment factor under the column for payments made at the end of each monthly

period at the rate of 9.6 percent is 1.0433. The aggregate annual amount, $15,000, is multiplied by the factor 6.2356 and the product multiplied by 1.0433. The present value of the annuity at the date of the decedent's death is, therefore, $97,584.02 ($15,000×6.2356×1.0433).

(C) If an annuity is payable at the beginning of annual, semiannual, quarterly, monthly, or weekly periods for a term of years, the value of the annuity is computed by multiplying the aggregate amount payable annually by the annuity factor described in paragraph (d)(2)(iv)(A) of this section, and the product so obtained is then multiplied by the adjustment factor in Table J at the appropriate interest rate component for payments made at the beginning of specified periods. If an annuity is payable at the beginning of annual, semiannual, quarterly, monthly, or weekly periods for one or more lives, the value of the annuity is the sum of the first payment plus the present value of a similar annuity, the first payment of which is not to be made until the end of the payment period, determined as provided in this paragraph (d)(2)(iv).

(v) *Annuity and unitrust interests for a term of years or until the prior death of an individual.* See § 25.2512–5(d)(2)(v) of this chapter for examples explaining how to compute the present value of an annuity or unitrust interest that is payable until the earlier of the lapse of a specific number of years or the death of an individual.

(3) *Transitional rule.* (i) If the valuation date is after April 30, 1989, and before June 10, 1994, a taxpayer can rely on Notice 89–24, 1989–1 C.B. 660, or Notice 89–60, 1989–1 C.B. 700 (See § 601.601(d)(2)(ii)(*b*) of this chapter).

(ii) If a decedent dies after April 30, 1989, and if on May 1, 1989, the decedent was mentally incompetent so that the disposition of the decedent's property could not be changed, and the decedent dies without having regained competency to dispose of the decedent's property or dies within 90 days of the date on which the decedent first regains competency, the fair market value of annuities, life estates, terms for years, remainders, and reversions included in the gross estate of the decedent is their present value determined either under this section or under the corresponding section applicable at the time the decedent became mentally incompetent, at the option of the decedent's executor. For example, see § 20.2031–7A(d).

(4) *Publications and actuarial computations by the Internal Revenue Service.* Many standard actuarial factors not included in paragraph (d)(6) of this section are included in Internal Revenue Service Publication 1457, "Actuarial Values, Alpha Volume," (8–89). Publication 1457 also includes examples that illustrate how to compute many special factors for more unusual situations. A copy of this publication may be purchased from the Superintendent of Documents, United States Government Printing Office, Washington, DC 20402. If a special factor is required in the case of an actual decedent, the Service may furnish the factor to the executor upon a request for a ruling. The request for a ruling must be accompanied by a recitation of the facts including a statement of the date of birth for each measuring life, the date of the decedent's death, any other applicable dates, and a copy of the will, trust, or other relevant documents. A request for a ruling must comply with the instructions for requesting a ruling published periodically in the Internal Revenue Bulletin (see §§ 601.201 and 601.601(d)(2)(ii)(*b*) of this chapter) and include payment of the required user fee.

(5) *Examples.* The provisions of this section are illustrated by the following examples:

Example 1. Remainder payable at an individual's death. The decedent, or the decedent's estate, was entitled to receive certain property worth $50,000 upon the death of the decedent's elder sister, to whom the income was bequeathed for life. The decedent died in February 1990. At the time of the decedent's death, the elder sister was 47 years 5 months old. In February 1990, the section 7520 rate was 9.8 percent. Under Table S in paragraph (d)(6) of this section, the remainder factor at 9.8 percent for determining the present value of the remainder interest due at the death of a person aged 47, the number of years nearest the elder sister's actual age at the decedent's death, is .11452. The present value of the remainder interest at the date of the decedent's death is, therefore, $5,676.00 ($50,000×.11452).

Example 2. Income payable for an individual's life. A's parent bequeathed an income interest in property to A for life, with the remainder interest passing to B at A's death. At the time of the parent's death in October 1989, the value of the property was $50,000 and A was 30 years 10 months old. The section 7520 rate in October 1989 was 10.2 percent. Under Table S in paragraph (d)(6) of this section, the remainder factor at 10.2 percent for determining the present value of the remainder interest due at the death of a person aged 31, the number of years closest to A's age at the decedent's death, is .03753. Converting this remainder factor to an income factor, as described in paragraph (d)(2)(iii) of this section, the factor for determining the present value of an income interest for the life of a person aged 31 is .96247. The present value of A's interest at the time of the parent's death is, therefore, $48,123.50 ($50,000×.96247).

Example 3. Annuity payable for an individual's life. A purchased an annuity for the benefit of both A and B. Under the terms of the annuity contract, at A's death, a survivor annuity of $10,000 a year payable in equal semiannual installments made at the end of each interval is payable to B for life. A died in September 1989. For September 1989, the section 7520 rate was 9.6 percent. At A's death, B was 45 years 7 months old. Under Table S in paragraph (d)(6) of this section, the factor at 9.6 percent for determining the present value of the remainder interest at the death of a person age 46 (the number of years nearest B's actual age) is .11013. By converting the factor to an annuity factor, as described in paragraph (d)(2)(iv) of this section, the factor for the present value of an annuity payable until the death of a person age 46 is 9.2695 (1.00000 minus .11013, divided by .096). The adjustment factor from Table K in paragraph (d)(6) of this section at an interest rate of 9.6 percent for semiannual annuity payments made at the end of the period is 1.0235. The present value of the annuity at the date of A's death is, therefore, $94,873.33 ($10,000×9.2695×1.0235).

Example 4. Annuity payable for a term of years. The decedent, or the decedent's estate, was entitled to receive an annuity of $10,000 a year payable in equal quarterly installments at the end of each quarter throughout a term certain. The decedent died in February 1990. For February 1990, the section 7520 rate was 9.8 percent. A quarterly payment had just been made prior to the decedent's death and payments were to continue for 5 more years. Under Table B in paragraph (d)(6) of this section for the interest rate of 9.8 percent, the factor for the present value of a remainder interest due after a term of 5 years is .626597. Converting the factor to an annuity factor, as described in paragraph (d)(2)(iv) of this section, the factor for the present value of an annuity for a term of 5 years is 3.8102. The adjustment factor from Table K in paragraph (d)(6) of this section at an interest rate of 9.8 percent for quarterly annuity payments made at the end of the period is 1.0360. The present value of the annuity is, therefore, $34,471.67 ($10,000×3.8102×1.0360).

(6) *Actuarial Tables.* Except as provided in § 20.7520–3(*b*) (pertaining to certain limitations on the use of prescribed tables), the following tables must be used in the application of the provisions of this section when the section 7520 interest rate component is between 4.2 and 14 percent.

TABLE B.—TERM CERTAIN REMAINDER FACTORS APPLICABLE AFTER APRIL 30, 1989

(e) *Effective date.* This section is effective as of May 1, 1989.

§ 20.2031–10 [Removed]

Par. 23. Section 20.2031–10 is removed.

Par. 24. Section 20.2055–2 is amended by revising paragraph (f)(4) to read as follows:

§ 20.2055–2 Transfers not exclusively for charitable purposes.

* * * * *

(f) * * *

(4) *Other decedents.* The present value of an interest not described in paragraph (f)(2) of this section is to be determined under § 20.2031–7(d) in the case of decedents where the valuation date of the gross estate is after April 30, 1989, or under § 20.2031–7A in the case of decedents where the valuation date of the gross estate is before May 1, 1989.

* * * * *

Par. 25. Immediately following § 20.7101–1, an undesignated center heading and §§ 20.7520–1 through 20.7520–4 are added to read as follows:

General Actuarial Valuations

§ 20.7520–1 Valuation of annuities, unitrust interests, interests for life or term of years, and remainder or reversionary interests.

(a) *General actuarial valuations.* (1) Except as otherwise provided in this section and in § 20.7520–3 (relating to exceptions to the use of prescribed tables under certain circumstances), in the case of estates of decedents with valuation dates after April 30, 1989, the fair market value of annuities, interests for life or for a term of years (including unitrust interests), remainders, and reversions is their present value determined under this section. See § 20.2031–7(d) (and, for certain prior periods, § 20.2031–7A) of this chapter for the computation of the value of annuities, unitrust interests, life estates, terms of years, remainders, and reversions, other than interests described in paragraphs (a)(2) and (a)(3) of this section.

(2) In the case of a transfer to a pooled income fund with a valuation date after April 30, 1989, see § 1.642(c)–6(e) (or, for certain prior periods, § 1.642(c)–6A) of this chapter (Income Tax Regulations) with respect to the valuation of the remainder interest.

(3) In the case of a transfer to a charitable remainder annuity trust with a valuation date after April 30, 1989, see § 1.664–2 of this chapter with respect to the valuation of the remainder interest. See § 1.664–4 (or, for certain prior periods, § 1.664–4A) of this chapter with respect to the valuation of the remainder interest in property transferred to a charitable remainder unitrust.

(b) *Components of valuation*—(1) *Interest rate component*—(i) *Section 7520 interest rate.* The section 7520 interest rate is the rate of return, rounded to the nearest two-tenths of one percent, that is equal to 120 percent of the applicable Federal mid-term rate, compounded annually, for purposes of section 1274(d)(1), for the month in which the valuation date falls. In rounding the rate to the nearest two-tenths of a percent, any rate that is midway between one two-tenths of a percent and another is rounded up to the higher of those two rates. For example, if 120 percent of the applicable Federal mid-term rate is 10.30, the section 7520 interest rate component is 10.4. The section 7520 interest rate is published monthly by the Internal Revenue Service in the Internal Revenue Bulletin (See § 601.601(d)(2)(ii)(*b*) of this chapter).

(ii) *Valuation date.* Generally, the valuation date is the date on which the transfer takes place. For estate tax purposes, the valuation date is the date of the decedent's death, unless the executor elects the alternate valuation date in accordance with section 2032, in which event, and under the limitations prescribed in section 2032 and the regulations thereunder, the valuation date is the alternate valuation date. For special rules in the case of charitable transfers, see § 20.7520–2.

(2) *Mortality component.* The mortality component reflects the mortality data most recently available from the United States census. As new mortality data becomes available after each decennial census, the mortality component described in this section will be revised periodically and the revised mortality component tables will be published in the regulations at that time. For decedents' estates with valuation dates after April 30, 1989, the mortality component table (Table 80CNSMT) is included in § 20.2031–7(d)(6). See § 20.2031–7A for mortality component tables applicable to decedent's estates with valuation dates before May 1, 1989.

(c) *Tables.* The present value on the valuation date of an annuity, life estate, term of years, remainder, or reversion is computed by using the section 7520 interest rate component that is described in paragraph (b)(1) of this section and the mortality component that is described in paragraph (b)(2) of this section. Actuarial factors for determining these present values are included in tables in these regulations and in publications by the Internal Revenue Service. If a special factor is required in order to value an interest, the Internal Revenue Service will furnish the factor upon a request for a ruling. The request for a ruling must be accompanied by a recitation of the facts, including the date of birth for each measuring life and copies of relevant instruments. A request for a ruling must comply with the instructions for requesting a ruling published periodically in the Internal Revenue Bulletin (see Rev. Proc. 94–1, 1994–1 I.R.B. 10, and the first Rev. Proc. published each year, and §§ 601.201 and 601.601(d)(2)(ii)(*b*) of this chapter) and include payment of the required user fee.

(1) *Regulation sections containing tables with interest rates between 4.2 and 14 percent.* Section 1.642(c)–6(e)(4) of this chapter contains Table S used for determining the present value of a single life remainder interest in a pooled income fund as defined in § 1.642(c)–5 of this chapter (Income Tax Regulations). Section 1.664–4(e)(6) of this chapter contains Table D (actuarial factors used in determining the present value of a remainder interest postponed for a term of years), Table U(1) (actuarial factors for one life), and Table F (payout factors) used in determining the present value of a remainder interest in a charitable remainder unitrust as defined in § 1.664–3 of this chapter. Section 20.2031–7(d)(6) contains Table S (actuarial factors for one life), Table B (actuarial factors used in determining the present value of an interest for a term of years), Table K (annuity end-of-interval adjustment factors), Table J (term certain annuity beginning-of-interval adjustment factors), and Table 80CNSMT (mortality components) used in determining the present value of annuities, life estates, remainders, and reversions. The regulations will be revised periodically to include new mortality component tables and new tables of factors.

(2) *Internal Revenue Service publications containing tables with interest rates between 2.2 and 26 percent.* The following documents (except for Publication 1459) have been published for sale by the Superintendent of Documents, United States Government Printing Office, Washington, DC 20402:

(i) Internal Revenue Service Publication 1457, "Actuarial Values, Alpha Volume," (8/89). This publication includes tables of valuation factors, as well as examples that show how to compute other valuation factors, for determining the present value of annuities, life estates, terms of years, remainders, and reversions, measured by one or two lives. These factors may also be used in the valuation of interests in a charitable remainder annuity trust as defined in § 1.664–2 of this chapter (Income Tax Regulations) and a pooled income fund as defined in § 1.642(c)–5 of this chapter.

(ii) Internal Revenue Service Publication 1458, "Actuarial Values, Beta Volume," (8/89). This publication includes term certain tables and tables of one and two life valuation factors for determining the present value of remainder interests in a charitable remainder unitrust as defined in § 1.664–3 of this chapter.

(iii) Internal Revenue Service Publication 1459, "Actuarial Values, Gamma Volume," (8–89) is no longer available for purchase from the Superintendent of Documents. However, it may be obtained by requesting a copy from: CC:DOM:CORP:T:R (IRS Publication 1459), room 5228, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. This publication includes tables for computing depreciation adjustment factors. See § 1.170A–12 of this chapter (Income Tax Regulations).

(d) *Effective date.* This section is effective as of May 1, 1989.

§ 20.7520–2 Valuation of charitable interests.

(a) *In general*—(1) *Valuation.* Except as otherwise provided in this section and in § 20.7520–3 (relating to exceptions to the use of prescribed tables under certain circumstances), the fair market value of annuities, interests for life or for a term of years, remainders, and reversions for which an estate tax charitable deduction is

allowable is the present value of such interests determined under § 20.7520–1.

(2) *Prior-month election rule.* If any part of the property interest transferred qualifies for an estate tax charitable deduction under section 2055 or 2106, the executor may compute the present value of the transferred interest by use of the section 7520 interest rate for the month during which the interest is transferred or the section 7520 interest rate for either of the 2 months preceding the month during which the interest is transferred. Paragraph (b) of this section explains how a prior-month election is made. The interest rate for the month so elected is the applicable section 7520 interest rate. If the executor elects the alternate valuation date under section 2032 and also elects to use the section 7520 interest rate for either of the 2 months preceding the month in which the interest is transferred, the month so elected (either of the 2 months preceding the month in which the alternate valuation date falls) is the valuation date. If the actuarial factor for either or both of the 2 months preceding the month during which the interest is transferred is based on a mortality experience that is different from the mortality experience at the date of the transfer and if the executor elects to use the section 7520 rate for a prior month with the different mortality experience, the executor must use the actuarial factor derived from the mortality experience in effect during the month of the section 7520 rate elected. All actuarial computations relating to the transfer must be made by applying the interest rate component and the mortality component of the month elected by the executor.

(3) *Transfers of more than one interest in the same property.* If a decedent's estate includes the transfer of more than one interest in the same property, the executor must, for purposes of valuing the transferred interests, use the same interest rate and mortality components for each interest in the property transferred.

(4) *Information required with tax return.* The following information must be attached to the estate tax return (or be filed subsequently as supplemental information to the return) if the estate claims a charitable deduction for the present value of a temporary or remainder interest in property—

(i) A complete description of the interest that is transferred, including a copy of the instrument of transfer;

(ii) The valuation date of the transfer;

(iii) The names and identification numbers of the beneficiaries of the transferred interest;

(iv) The names and birthdates of any measuring lives, a description of any relevant terminal illness condition of any measuring life, and (if applicable) an explanation of how any terminal illness condition was taken into account in valuing the interest; and

(v) A computation of the deduction showing the applicable section 7520 interest rate that is used to value the transferred interest.

(5) *Place for filing returns.* See section 6091 of the Internal Revenue Code and the regulations thereunder for the place for filing the return or other document required by this section.

(b) *Election of interest rate component*—(1) *Time for making election.* An executor makes a prior-month election under paragraph (a)(2) of this section by attaching the information described in paragraph (b)(2) of this section to the decedent's estate tax return or by filing a supplemental statement of the election information within 24 months after the later of the date the original estate tax return was filed or the due date for filing the return.

(2) *Manner of making election.* A statement that the prior-month election under section 7520(a) of the Internal Revenue Code is being made and that identifies the elected month must be attached to the estate tax return (or by subsequently filing the statement as supplemental information to the return).

(3) *Revocability.* The prior-month election may be revoked by filing a statement of supplemental information within 24 months after the later of the date the original return of tax for the decedent's estate was filed or the due date for filing the return. The revocation must be filed in the place referred to in paragraph (a)(5) of this section.

(c) *Effective dates.* Paragraph (a) of this section is effective as of May 1, 1989. Paragraph (b) of this section is effective for elections made after June 10, 1994.

§ 20.7520–3 Limitation on the application of section 7520.

(a) *Internal Revenue Code sections to which section 7520 does not apply.* Section 7520 of the Internal Revenue Code does not apply for purposes of:

(1) Part I, subchapter D of subtitle A (section 401 et. seq.), relating to the income tax treatment of certain qualified plans. (However, section 7520 does apply to the estate and gift tax treatment of certain qualified plans and for purposes of determining excess accumulations under section 4980A);

(2) Sections 72 and 101(b), relating to the income taxation of life insurance, endowment, and annuity contracts, unless otherwise provided for in the regulations under sections 72, 101, and 1011 (see, particularly, §§ 1.101–2(e)(1)(iii)(*b*)(*2*), and 1.1011–2(c), *Example 8*);

(3) Sections 83 and 451, unless otherwise provided for in the regulations under those sections;

(4) Section 457, relating to the valuation of deferred compensation, unless otherwise provided for in the regulations under section 457;

(5) Sections 3121(v) and 3306(r), relating to the valuation of deferred amounts, unless otherwise provided for in the regulations under those sections;

(6) Section 6058, relating to valuation statements evidencing compliance with qualified plan requirements, unless otherwise provided for in the regulations under section 6058;

(7) Section 7872, relating to income and gift taxation of interest-free loans and loans with below-market interest rates, unless otherwise provided for in the regulations under section 7872; or

(8) Section 2702(a)(2)(A), relating to the value of a nonqualified retained interest upon a transfer of an interest in trust to or for the benefit of a member of the transferor's family; and

(9) Any other sections of the Internal Revenue Code to the extent provided by the Internal Revenue Service in revenue rulings or revenue procedures. (See §§ 601.201 and 601.601 of this chapter).

(b) *Other limitations on the application of section 7520.* [Reserved]

(c) *Effective date.* Section § 20.7520–3(a) is effective as of May 1, 1989.

§ 20.7520–4 Transitional rules.

(a) *Reliance.* If the valuation date is after April 30, 1989, and before June 10, 1994, an executor can rely on Notice 89–24, 1989–1 C.B. 660, or Notice 89–60, 1989–1 C.B. 700 (See § 601.601(d)(2)(ii)(*b*) of this chapter), in valuing the transferred interest.

(b) *Effective date.* This section is effective as of May 1, 1989.

PART 25—GIFT TAX; GIFTS MADE AFTER DECEMBER 31, 1954

Par. 26. The authority citation for part 25 is revised to read as follows:

Authority: 26 U.S.C. 7805.

Section 25.2512–5 also issued under 26 U.S.C. 7520(c)(2).
Section 25.2512–5A also issued under 26 U.S.C. 7520(c)(2).
Section 25.7520–1 also issued under 26 U.S.C. 7520(c)(2).
Section 25.7520–2 also issued under 26 U.S.C. 7520(c)(2).
Section 25.7520–3 also issued under 26 U.S.C. 7520(c)(2).
Section 25.7520–4 also issued under 26 U.S.C. 7520(c)(2).

Par. 27. Section 25.2512–0 is added to read as follows:

§ 25.2512–0 Table of contents.

This section lists the section headings that appear in the regulations under section 2512.

§ 25.2512–1 Valuation of property; in general
§ 25.2512–2 Stocks and bonds
§ 25.2512–3 Valuation of interests in trusts
§ 25.2512–4 Valuation of notes
§ 25.2512–5 Valuation of annuities, interests for life or term of years, and remainder or reversionary interests transferred after April 30, 1959
§ 25.2512–6 Valuation of certain life insurance and annuity contracts and shares in an open-end investment company
§ 25.2512–7 Effect of surrender
§ 25.2512–8 Transfers for insufficient consideration

Actuarial Tables Applicable Before May 1, 1989

§ 25.2512–5A Valuation of annuities, unitrust interests, interests for life or term of years, and remainder or reversionary interests transferred before May 1, 1989.

Par. 28. Immediately following § 25.2518–3 an undesignated center heading and § 25.2512–5A are added to read as follows:

Actuarial Tables Applicable Before May 1, 1989

§ 25.2512–5A Valuation of annuities, unitrust interests, interests for life or term of years, and remainder or reversionary interests transferred before May 1, 1989.

(a) *Valuation of annuities, interests for life or term of years, and remainder or reversionary interests transferred before January 1, 1952.* Except as otherwise provided in § 25.2512–5(b), if the transfer was made before January 1, 1952, the present value of annuities, life estates, terms of years, remainders, and reversions is their present value determined under this section. If the valuation of the interest involved is dependent upon the continuation or termination of one or more lives or upon a term certain concurrent with one or more lives, the factor for the present value is computed on the basis of interest at the rate of 4 percent a year, compounded annually, and life contingencies for each life involved from values that are based upon the "Actuaries' or Combined Experience Table of Mortality, as extended." This table and many additional factors are described in former § 86.19 (as contained in the 26 CFR Part 81 edition revised as of April 1, 1958). The present value of an interest measured by a term of years is computed on the basis of interest at the rate of 4 percent a year.

(b) *Valuation of annuities, interests for life or term of years, and remainder or reversionary interests transferred after December 31, 1951, and before January 1, 1971.* Except as otherwise provided in § 25.2512–5(b), the present value of annuities, life estates, terms of years, remainders, and reversions transferred after December 31, 1951, and before January 1, 1971, is the present value of such interests determined under this section. If the value of the interest involved is dependent upon the continuation or termination of one or more lives, the factor for the present value is computed on the basis of interest at the rate of 3½ percent a year, compounded annually, and life contingencies for each life involved from U.S. Life Table 16. This table and many accompanying factors are set forth in former § 25.2512–5 (as contained in the 26 CFR Part 25 edition revised as of April 1, 1994). Special factors involving one and two lives may be found in or computed with the use of tables contained in Internal Revenue Service Publication Number 11, "Actuarial Values for Estate and Gift Tax." (Rev. 5–59). This publication is no longer available for purchase from the Superintendent of Documents However, it may be obtained by requesting a copy from: CC:DOM:CORP:T:R (IRS Publication 11), room 5228, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. The present value of an interest measured by a term of years is computed on the basis of interest at the rate of 3½ percent a year.

(c) *Valuation of annuities, interests for life or term of years, and remainder or reversionary interests transferred after December 31, 1970, and before December 1, 1983.* Except as otherwise provided in § 25.2512–5(b), the present value of annuities, life estates, terms of years, remainders, and reversions transferred after December 31, 1970, and before December 1, 1983, is the present value of such interests determined under this section. If the interest to be valued is dependent upon the continuation or termination of one or more lives or upon a term certain concurrent with one or more lives, the factor for the present value is computed on the basis of interest at the rate of 6 percent a year, compounded annually, and life contingencies determined for each male and female life involved, from the values that are set forth in Table LN. Table LN contains values that are taken from the life table for total males and the life table for total females appearing as Tables 2 and 3, respectively, in United States Life Tables 1959–61, published by the Department of Health and Human Services, Public Health Service. Table LN and accompanying factors are set forth in former § 25.2512–9 (as contained in the 26 CFR Part 25 edition revised as of April 1, 1994). Special factors involving one and two lives may be found in or computed with the use of tables contained in Internal Revenue Service Publication 723, entitled "Actuarial Values II: Valuation of Last Survivor Charitable Remainders" (12–70), and Internal Revenue Service Publication 723A, entitled "Actuarial Values II: Survivor at 6 Percent Involving One and Two Lives" (12–70). These tables are no longer available for purchase from the Superintendent of Documents. However, a copy of each [illegible] CC:DOM:CORP:T:R (IRS Publication 723/723A), room 5228, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. The present value of an interest measured by a term of years is computed on the basis of interest at the rate of 6 percent a year.

Par. 29. Section 25.2512–5 is redesignated as paragraph (d) of § 25.2512–5A and amended as follows:

1. The following redesignation table indicates the old CFR unit numbers for § 25.2512–5 and the corresponding new CFR unit numbers for § 25.2512–5A(d).

Old CFR unit No. in § 25.2512–5	Corresponding new No. in § 25.2512–5A(d)
§ 25.2512–5 heading	Paragraph (d) heading
(a)	(d)(1).
(a)(1)	(d)(1)(i)
(a)(1)(i)	(d)(1)(i)(A)
(a)(1)(ii)	(d)(1)(i)(B)
(a)(1)(ii)(A)	(d)(1)(i)(B)(1)
(a)(1)(ii)(B)	(d)(1)(i)(B)(2)
(a)(1)(a)	(d)(1)(i)(C)
(a)(1)(iii)(A)	(d)(1)(i)(C)(1)
(a)(1)(iii)(B)	(d)(1)(i)(C)(2)
(a)(2)	(d)(1)(ii)
(a)(3)	(d)(1)(iii)
(b)	(d)(2).
(b)(1)	(d)(2)(i)
(b)(2)	(d)(2)(ii)
(b)(3)	(d)(2)(iii)
(b)(3)(i)	(d)(2)(iii)(A)
(b)(3)(ii)	(d)(2)(iii)(B)
(c)	(d)(3)
(d)	(d)(4)
[illegible]	(d)(5)
[illegible]	(d)(6).

2. The paragraph heading for paragraph (d) is revised.

3. Newly designated paragraph (d)(1)(i)(A) is amended by revising the first sentence and removing the eighth and last sentences.

4. In newly designated paragraph (d)(1)(i)(B), the concluding text is

amended by revising the first full sentence.

5. In newly designated paragraph (d)(1)(i)(C), the concluding text is amended by revising the first and second full sentences.

6. Newly designated paragraph (d)(1)(iii) is revised.

7. Newly designated paragraph (d)(5) is amended by revising the second and third sentences.

8. Newly designated paragraph (d)(6) is revised.

9. The revisions read as follows:

§ 25.2512–5A Valuation of annuities, unitrust interests, interests for life or term of years, and remainder or reversionary interests transferred before May 1, 1989.

* * * * *

(d) *Valuation of annuities, interests for life or term of years, and remainder or reversionary interests transferred after November 30, 1983, and before May 1, 1989*—(1) *In general.* (i)(A) Except as otherwise provided in § 25.2512–5(b) and in this paragraph (d)(1)(i)(A), the fair market value of annuities, life estates, terms of years, remainders, and reversions transferred after November 30, 1983, and before May 1, 1989, is the present value of such interests determined under this section. * * *

(B) * * *

* * * The donor may elect to value both interests transferred in 1983 under § 25.2512–5A(c) as if such section applied to all transfers made before January 1, 1984, or the donor may elect to have both interests transferred valued under this section. * * *

(C) * * *

* * * The donor may elect to value the interest transferred in 1984 under § 25.2512–5A(c) as if such section applied to all transfers made before January 1, 1985, or the donor may elect to have the transfer valued under this section. If the donor elects to value the interest transferred in 1984 under § 25.2512–5A(c), the donor shall indicate that the election is being made by attaching a statement to the donor's gift tax return for 1984. * * *

* * * * *

(iii) In all examples set forth in this section, the interest is assumed to have been transferred after November 30, 1983, and before May 1, 1989.

* * * * *

(5) * * * The factor is to be computed on the basis of interest at the rate of 10 percent a year, compounded annually, and life contingencies are determined for each person involved from the values of *lx* that are set forth in column 2 of Table LN in § 20.2031–7A(d)(6) of this chapter. Table LN contains values of *lx* taken from the life table for the total population appearing as Table 1 in United States Life Tables: 1969–71, published by the Department of Health and Human Services, Public Health Service.

* * * * *

(6) *Tables.* (i) For actuarial factors showing the present worth at 10 percent of a single life annuity, a life interest, and a remainder interest postponed for a single life, see § 20.2031–7A(d)(6) of this chapter, Table A, of the Estate Tax Regulations.

(ii) For actuarial factors showing the present worth at 10 percent of an annuity for a term certain, an income interest for a term certain, and a remainder interest postponed for a term certain, see § 20.2031–7A(d)(6) of this chapter, Table B, of the Estate Tax Regulations.

Par. 30. New § 25.2512–5 is added to read as follows:

§ 25.2512–5 Valuation of annuities, unitrust interests, interests for life or term of years, and remainder or reversionary interests transferred after April 30, 1989.

(a) *In general.* Except as otherwise provided in paragraph (b) of this section and § 25.7520–3(b), the fair market value of annuities, unitrust interests, life estates, terms of years, remainders, and reversions transferred by gift is the present value of the interests determined under paragraph (d) of this section. Section 20.2031–7 of this chapter (Estate Tax Regulations) and related sections provide tables with standard actuarial factors and examples that illustrate how to use the tables to compute the present value of ordinary annuity, life, and remainder interests in property. These sections also refer to standard and special actuarial factors that may be necessary to compute the present value of similar interests in more unusual fact situations. These factors and examples are also generally applicable for gift tax purposes in computing the values of taxable gifts.

(b) *Commercial annuities and insurance contracts.* The value of life insurance contracts and contracts for the payment of annuities issued by companies regularly engaged in their sale is determined under § 25.2512–6.

(c) *Actuarial valuations before May 1, 1989.* The present value of annuities, unitrust interests, life estates, terms of years, remainders, and reversions transferred by gift before May 1, 1989, is determined under the following sections:

Transfers			Applicable
After	Before	Regulations	
Dec. 31, 1951	Jan. 1, 1952	25.2512–5A(a)	
Dec. 31, 1970	Jan. 1, 1971	25.2512–5A(b)	
Dec. 31, 1983	Dec. 1, 1983	25.2512–5A(c)	
	May 1, 1989	25.2512–5A(d)	

(d) *Annuities, interests, etc., after April 30, 1989*—(1) *In general.* Except as otherwise provided in paragraph (b) of this section and § 25.7520–3(b) (relating to exceptions to the use of prescribed tables under certain circumstances), if the valuation date for the gift is after April 30, 1989, the fair market value of annuities, life estates, terms of years, remainders, and reversions transferred after April 30, 1989, is the present value of such interests determined by use of standard or special section 7520 actuarial factors. These factors are derived by using the appropriate section 7520 interest rate and, if applicable, the mortality component for the valuation date of the interest that is being valued. See §§ 25.7520–1 through 25.7520–4. The fair market value of a qualified annuity interest described in section 2702(b)(1) and a qualified unitrust interest described in section 2702(b)(2) is the present value of such interests determined under § 25.7520–1(c).

(2) *Specific interests.* When the donor transfers property in trust or otherwise and retains an interest therein, generally, the value of the gift is the value of the property transferred less the value of the donor's retained interest. However, if the donor transfers property after October 8, 1990, to or for the benefit of a member of the donor's family, the value of the gift is the value of the property transferred less the value of the donor's retained interest as determined under section 2702. If the

donor assigns or relinquishes an annuity, life estate, remainder, or reversion that the donor holds by virtue of a transfer previously made by the donor or another, the value of the gift is the value of the interest transferred. However, see section 2519 for a special rule in the case of the assignment of an income interest by a person who received the interest from a spouse.

(ii) *Charitable remainder trusts.* The fair market value of a remainder interest in a pooled income fund, as defined in § 1.642(c)–5 of this chapter (Income Tax Regulations), is its value determined under § 1.642(c)–6(e) of this chapter. The fair market value of a remainder interest in a charitable remainder annuity trust, as described in § 1.664–2(a) of this chapter, is its present value determined under § 1.664–2(c) of this chapter. The fair market value of a remainder interest in a charitable remainder unitrust, as defined in § 1.664–3 of this chapter, is its present value determined under § 1.664–4(e) of this chapter. The fair market value of a life interest or term for years in a charitable remainder unitrust is the fair market value of the property as of the date of transfer less the fair market value of the remainder interest, determined under § 1.664–4(e) of this chapter.

(iii) *Ordinary remainder and reversionary interests.* If the interest to be valued is to take effect after a definite number of years or after the death of one individual, the present value of the interest is computed by multiplying the value of the property by the appropriate remainder interest actuarial factor (that corresponds to the applicable section 7520 interest rate and remainder interest period) in Table B (for a term certain) or Table S (for one measuring life), as the case may be. Tables B and S are included in § 20.2031–7(d)(6) of this chapter (Estate Tax Regulations) and in Internal Revenue Service Publication 1457. For information about obtaining actuarial factors for other types of remainder interests, see paragraph (d)(4) of this section.

(iii) *Ordinary term-of-years and life interests.* If the interest to be valued is the right of a person to receive the income of certain property, or to use certain nonincome-producing property, for a term of years or for the life of one individual, the present value of the interest is computed by multiplying the value of the property by the appropriate term-of-years or life interest actuarial factor (that corresponds to the applicable section 7520 interest rate and term-of-years or life interest period) Internal Revenue Service Publication 1457 includes actuarial factors for an interest for a term of years in Table B and for the life of one individual in Table S. However, term-of-years and life interest actuarial factors are not included in Table B or Table S in § 20.2031–7(d)(6) of this chapter. If Internal Revenue Service Publication 1457 (or any other reliable source of term-of-years and life interest actuarial factors) is not conveniently available, an actuarial factor for the interest may be derived mathematically. This actuarial factor may be derived by subtracting the correlative remainder factor (that corresponds to the applicable section 7520 interest rate and the term of years or the life) in Table B (for a term of years) or in Table S (for the life of one individual) in § 20.2031–7(d)(6), as the case may be, from 1.000000. For information about obtaining actuarial factors for other types of term-of-years and life interests, see paragraph (d)(4) of this section.

(iv) *Annuities.* (A) If the interest to be valued is the right of a person to receive an annuity that is payable at the end of each year for a term of years or for the life of one individual, the present value of the interest is computed by multiplying the aggregate amount payable annually by the appropriate annuity actuarial factor (that corresponds to the applicable section 7520 interest rate and annuity period) Internal Revenue Service Publication 1457 includes actuarial factors in Table B (for an annuity payable for a term of years) and in Table S (for an annuity payable for the life of one individual). However, annuity actuarial factors are not included in Table B or Table S in § 20.2031–7(d)(6) of this chapter. If Internal Revenue Service Publication 1457 (or any other reliable source of annuity actuarial factors) is not conveniently available, an annuity factor for a term of years or for one life may be derived mathematically. This annuity factor may be derived by subtracting the applicable remainder factor (that corresponds to the applicable section 7520 interest rate and annuity period) in Table B (in the case of a term-of-years annuity) or in Table S (in the case of a one-life annuity) in § 20.2031–7(d)(6), as the case may be, from 1.000000 and then dividing the result by the applicable section 7520 interest rate expressed as a decimal number. See § 20.2031–7(d)(2)(iv) of this chapter for an example that illustrates the computation of the present value of an annuity.

(B) If the annuity is payable at the end of semiannual, quarterly, monthly, or weekly periods, the product obtained by multiplying the annuity factor by the aggregate amount payable annually is then multiplied by the applicable adjustment factor set forth in Table K in § 20.2031–7(d)(6) of this chapter at the appropriate interest rate component for payments made at the end of the specified periods. The provisions of this paragraph (d)(2)(iv)(B) are illustrated by the following example:

Example. On July 1, 1989, the donor agrees to pay the annuitant the sum of $10,000 per year, payable in equal semiannual installments at the end of each period. The semiannual installments are to be made on each December 31st and June 30th. The annuity is payable until the annuitant's death. On July 1, 1989, the annuitant is 68 years and 6 months old. The donee annuitant's age is taken as 68 for purposes of computing the present value of the retained annuity. The section 7520 rate for July 1989 is 10.6 percent. Under Table S, the factor at 10.6 percent for determining the present value of a remainder interest payable at the death of an individual aged 68 is .31371. Converting the remainder factor to an annuity factor, as described above, the annuity factor for determining the present value of an annuity transferred to an individual age 68 is 6.4744 (1.00000 minus .31371 divided by 10.6). The adjustment factor from Table K in the column for payments made at the end of each semiannual period at the rate of 10.6 percent is 1.0258. The aggregate annual amount of the annuity, $10,000, is multiplied by the factor 6.4744 and the product multiplied by 1.0258. The present value of the annuity beneficiary's interest is, therefore, $66,414 ($10,000×6.4744×1.0258).

(C) If an annuity is payable at the beginning of annual, semiannual, quarterly, monthly, or weekly periods for a term of years, the value of the annuity is computed by multiplying the aggregate amount payable annually by the annuity factor described in paragraph (d)(2)(iv)(A) of this section, and the product so obtained is then multiplied by the adjustment factor in Table J in § 20.2031–7(d)(6) of this chapter at the appropriate interest rate component for payments made at the beginning of specified periods. If an annuity is payable at the beginning of annual, semiannual, quarterly, monthly, or weekly periods for one or more lives, the value of the annuity is the sum of the first payment plus the present value of a similar annuity, the first payment of which is not to be made until the end of the payment period, determined as provided in paragraph (d)(2)(iv)(B) of this section.

(v) *Annuity and unitrust interests for a term of years or until the prior death of an individual*—(A) *Annuity interests.* The present value of an annuity interest that is payable until the earlier to occur of the lapse of a specific number of years or the death of an individual may be computed with values from the tables

in 20.2031–7(d)(6) as described in the following example:

Example. On January 1, 1991, the donor transfers $100,000 into a trust and retains the right to receive an annuity from the trust in the amount of $6,000 per year, payable in equal semiannual installments at the end of each period. The semiannual installments are to be made on each June 30th and December 31st. The annuity is payable for 10 years or until the donor's prior death. On January 1, 1991, the donor is 59 years and 6 months old. The donor's age is taken as 60 for purposes of computing the present value of the retained annuity. The section 7520 rate for January 1991 is 9.8 percent. The present value of the annuity beneficiary's interst is $35,424.00, determined as follows:

Table S value at 9.8 percent, age 60	.23158
Table S value at 9.8 percent, age 70	.36468
Table 80CNSMT value at age 70	.68248
Table 80CNSMT value at age 60	.83726
Table B value at 9.8 percent, 10 years	.392624
Table K value at 9.8 percent,	1.0239

Factor for annuity beneficiary's interest at 9.8 percent:

$$\frac{(1.00000-.23158)-(.392624\times(68248/83726)\times(1.00000-.36468))=5.7662}{.098}$$

Present value of annuity beneficiary's interest: ($6,000×5.7662×1.0233)	$35,424.07

(B) *Unitrust interests.* The present value of a unitrust interest that is payable until the earlier to occur of the lapse of a specific number of years or the death of an individual may be computed with values from the tables in § 1.664–4(e)(6) as described in the following example:

Example. The donor who, as of the nearest birthday, is 60 years old transfers $100,000 to a unitrust on January 1, 1991. The trust instrument requires that each year the trust pay to the donor, in equal semiannual installments on June 30th and December 31st, 6 percent of the fair market value of the trust assets, valued as of January 1st each year, for 10 years or until the prior death of the donor. The section 7520 rate for January 1991 is 9.8 percent. Under Table F(9.8), the appropriate adjustment factor is .932539 for semiannual payments payable at the end of the semiannual period. The adjusted payout rate is 5.595 percent (6% × .932539). The present value of the unitrust beneficiary's interest is $40,495.00 determined as follows:

Table U(1) value at 5.6 percent, age 60	.37017
Table U(1) value at 5.6 percent, age 70	.50971
Table 80CNSMT value at age 70	.68248
Table 80CNSMT value at age 60	.83726
Table D value at 5.6 percent, 10 years	.561979

Factor for the unitrust beneficiary's interest at 5.6 percent:

$$(1.000000-.37017)-(.561979\times(68248/83726)\times(1.000000-.50971))=.40523$$

Table U(1) value at 5.4 percent, age 60	.38183
Table U(1) value at 5.4 percent, age 70	.52086
Table 80CNSMT value at age 70	.68248
Table 80CNSMT value at age 60	.83726
Table D value at 5.4 percent, 10 years	.573999

Factor for the unitrust beneficiary's interest at 5.4 percent:

$$(1.000000-.38183)-(.573999\times(68248/83726\times(1.000000-.52086))=.39399$$

Difference ... .01124

Interpolation adjustment:

$$\frac{5.595\%-5.4\%}{0.2\%}=\frac{x}{.01124}$$

$$x=.01096$$

Factor at 5.4 percent, age 60	.39399
Plus: Interpolation adjustment	.01096
Interpolated Factor	.40495
Present value of unitrust beneficiary's interest: ($100,000×.40495)	$40,495.00

(2) *Transitional rule.* (i) If the valuation date of a transfer of an interest in property by gift is after April 30, 1989, and before June 10, 1994, a donor can rely on Notice 89–24, 1989–1 C.B. 660, or Notice 89–60, 1989–1 C.B. 700, in valuing the transferred interest. (See § 601.601(d)(2)(ii)(*b*) of this chapter.)

(ii) If a donor transferred an interest in property by gift after December 31, 1988, and before May 1, 1989, retaining an interest in the same property, and after April 30, 1989, and before January 1, 1990, transferred the retained interest in property, the donor may, at the option of the donor, value the transfer of the retained interest under this section or under § 25.2512–5A(d).

(4) *Publications and actuarial computations by the Internal Revenue Service.* Many standard actuarial factors not included in § 20.2031–7(d)(6) of this chapter are included in Internal Revenue Service Publication 1457, "Actuarial Values, Alpha Volume," (8–89). Internal Revenue Service Publication 1457 also includes examples that illustrate how to compute many special factors for more unusual situations. A copy of this publication may be purchased from the Superintendent of Documents, United States Government Printing Office, Washington, DC 20402. If a special factor is required in the case of a completed gift, the Service may furnish the factor to the donor upon a request for a ruling. The request for a ruling must be accompanied by a recitation of the facts including a statement of the date of birth for each measuring life, the date of the gift, any other applicable dates, and a copy of the will, trust, or other relevant documents. A request for a ruling must comply with the instructions for requesting a ruling published periodically in the Internal Revenue Bulletin (see §§ 601.201 and 601.601(d)(2)(ii)(*b*) of this chapter) and include payment of the required user fee.

(e) *Effective date.* This section is effective as of May 1, 1989.

§ 25.2512–9 [Removed]

Par. 31. Section 25.2512–9 is removed.

Par. 32. Section 25.2515–2, paragraph (c) is amended by revising the first and last sentences to read as follows:

§ 25.2515–2 Tenancies by the entirety; transfers treated as gifts; manner of election and valuation.

* * * * *

(c) Factors representing the respective interests of the spouses, under a tenancy by the entirety, at their attained ages at the time of the transaction may be readily computed based on the method described in § 25.2512–5. * * * See § 25.2512–5(d)(4) for the procedure for obtaining special factors from the Internal Revenue Service in appropriate cases.

* * * * *

Par. 33. Section 25.2522(a)–2(a) is amended by revising the fifth sentence to read as set forth below, and by removing the fourth sentence.

§ 25.2522(a)–2 Transfers not exclusively for charitable, etc., purposes in the case of gifts made before August 1, 1969.

(a) * * * If the interest involved is such that its value is to be determined by a special computation, see § 25.2512–5(d)(4). * * *

* * * * *

Par. 34. Section 25.2522(c)–3, paragraph (d)(3) is revised to read as follows:

§ 25.2522(c)–3 Transfers not exclusively for charitable, etc., purposes in the case of gifts made after July 31, 1969.

* * * * *

(d) * * *

(3) *Other transfers.* The present value of an interest not described in paragraph (d)(2) of this section is to be determined under § 25.2512–5.

* * * * *

Par. 35. Immediately following § 25.7101–1, an undesignated center heading and §§ 25.7520–1 through 25.7520–4 are added to read as follows:

General Actuarial Valuations

§ 25.7520–1 Valuation of annuities, unitrust interests, interests for life or term of years, and remainder or reversionary interests.

(a) *General actuarial valuations.* (1) Except as otherwise provided in this section and in § 25.7520–3(b) (relating to exceptions to the use of prescribed tables under certain circumstances), in the case of gifts made after April 30, 1989, the fair market value of annuities, interests for life or for a term of years (including unitrust interests), remainders, and reversions is their present value determined under this section. See § 20.2031–7(d) (and, for certain prior periods, § 20.2031–7A) of this chapter, Estate Tax Regulations, for the computation of the value of annuities, unitrust interests, life estates, terms of years, remainders, and reversions, other than interests described in paragraphs (a)(2) and (a)(3) of this section.

(2) In the case of a gift to a beneficiary of a pooled income fund after April 30, 1989, see § 1.642(c)–6(e) (or, for certain prior periods, § 1.642(c)–6A) of this chapter (Income Tax Regulations) with respect to the valuation of the remainder interest.

(3) In the case of a gift to a beneficiary of a charitable remainder annuity trust after April 30, 1989, see § 1.664–2 of this chapter with respect to the valuation of the remainder interest. See § 1.664–4 (or, for certain prior periods, § 1.664–4A) of this chapter (Income Tax Regulations) with respect to the valuation of the remainder interest in property transferred to a charitable remainder unitrust.

(b) *Components of valuation*—(1) *Interest rate component*— (i) *Section 7520 Interest rate.* The section 7520 interest rate is the rate of return, rounded to the nearest two-tenths of one percent, that is equal to 120 percent of the applicable Federal mid-term rate, compounded annually, for purposes of section 1274(d)(1), for the month in which the valuation date falls. In rounding the rate to the nearest two-tenths of a percent, any rate that is midway between one two-tenths of a percent and another is rounded up to the higher of those two rates. For example, if 120 percent of the applicable Federal mid-term rate is 10.30, the section 7520 interest rate component is 10.4. The section 7520 interest rate is published monthly by the Internal Revenue Service in the Internal Revenue Bulletin (See § 601.601(d)(2)(ii)(*b*) of this chapter).

(ii) *Valuation date.* Generally, the valuation date is the date on which the gift is made. For gift tax purposes, the valuation date is the date on which the gift is complete under § 25.2511–2. For special rules in the case of charitable transfers, see § 25.7520–2.

(2) *Mortality component.* The mortality component reflects the mortality data most recently available from the United States census. As new mortality data becomes available after each decennial census, the mortality component described in this section will be revised periodically and the revised mortality component tables will be published in the regulations at that time. For gifts with valuation dates after April 30, 1989, the mortality component table (Table 80CNSMT) is contained in § 20.2031–7(d) of this chapter (Estate Tax Regulations). See § 20.2031–7A of this chapter for mortality component tables applicable to gifts before May 1, 1989.

(c) *Tables.* The present value on the valuation date of an annuity, life estate, term of years, remainder, or reversion is computed by using the section 7520 interest rate component that is described in paragraph (b)(1) of this section and the mortality component that is described in paragraph (b)(2) of this section. Actuarial factors for determining these present values are included in tables in these regulations and in publications by the Internal Revenue Service. If a special factor is required in order to value an interest, the Internal Revenue Service will furnish the factor upon a request for a ruling. The request for a ruling must be accompanied by a recitation of the facts, including the date of birth for each measuring life and copies of relevant instruments. A request for a ruling must comply with the instructions for requesting a ruling published periodically in the Internal Revenue Bulletin (see Rev. Proc. 94–1, 1994–1 I.R.B. 10, and subsequent updates, and §§ 601.201 and 601.601(d)(2)(ii)(*b*) of this chapter) and include payment of the required user fee.

(1) *Regulation sections containing tables with interest rates between 4.2 and 14 percent.* Section 1.642(c)–6(e)(4) of this chapter contains Table S used for determining the present value of a single life remainder interest in a pooled income fund as defined in § 1.642(c)–5 of this chapter (Income Tax Regulations). Section 1.664–4(e)(6) of this chapter contains Table D (actuarial factors used in determining the present value of a remainder interest postponed for a term of years), Table U(1) (actuarial factors for one life), and Table F (payout factors) used in determining the present value of a remainder interest in a charitable remainder unitrust as defined in § 1.664–3 of this chapter. Section 20.2031–7(d)(6) of this chapter (Estate Tax Regulations) contains Table S (actuarial factors for one life), Table B (actuarial factors used in determining the present value of an interest for a term of years), Table K (annuity end-of-interval adjustment factors), Table J (term certain annuity beginning-of-interval adjustment factors), and Table 80CNSMT (mortality components) used in determining the present value of annuities, life estates, remainders, and reversions. The regulations will be revised periodically to include new mortality component tables and new tables of factors.

(2) *Internal Revenue Service publications containing tables with*

interest rates between 2.2 and 26 percent. The following documents (except for Publication 1459) have been published for sale by the Superintendent of Documents, United States Government Printing Office, Washington, DC 20402:

(i) Internal Revenue Service Publication 1457, "Actuarial Values, Alpha Volume," (8/89). This publication includes tables of valuation factors, as well as examples that show how to compute other valuation factors, for determining the present value of annuities, life estates, terms of years, remainders, and reversions, measured by one or two lives. These factors may also be used in the valuation of interests in a charitable remainder annuity trust as defined in § 1.664–2 of this chapter (Income Tax Regulations) and a pooled income fund as defined in § 1.642(c)–5.

(ii) Internal Revenue Service Publication 1458, "Actuarial Values, Beta Volume," (8/89). This publication includes term certain tables and tables of one and two life valuation factors for determining the present value of remainder interests in a charitable remainder unitrust as defined in § 1.664–3 of this chapter.

(iii) Internal Revenue Service Publication 1459, "Actuarial Values, Gamma Volume," (8–89) is no longer available for purchase from the Superintendent of Documents. However, it may be obtained by requesting a copy from: CC:DOM:CORP:T:R (IRS Publication 1459), room 5228, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. This publication includes tables for computing depreciation adjustment factors. See § 1.170A–12 of this chapter (Income Tax Regulations).

(d) *Effective date.* This section is effective as of May 1, 1989.

§ 25.7520–2 Valuation of charitable interests.

(a) *In general*—(1) *Valuation.* Except as otherwise provided in this section and in § 25.7520–3 (relating to exceptions to the use of prescribed tables under certain circumstances), the fair market value of annuities, interests for life or for a term for years, remainders, and reversions for which a gift tax charitable deduction is allowable is the present value of such interests determined under § 25.7520–1.

(2) *Prior-month election rule.* If any part of the property interest transferred qualifies for a gift tax charitable deduction under section 2522, the donor may elect to compute the present value of the interest transferred by use of the section 7520 interest rate for the month during which the gift is made or the section 7520 interest rate for either of the 2 months preceding the month during which the gift is made. Paragraph (b) of this section explains how a prior-month election is made. The interest rate for the month so elected is the applicable section 7520 interest rate. If the actuarial factor for either or both of the 2 months preceding the month during which the gift is made is based on a mortality experience that is different from the mortality experience at the date of the gift and if the donor elects to use the section 7520 rate for a prior month with the different mortality experience, the donor must use the actuarial factor derived from the mortality experience in effect during the month of the section 7520 rate elected. All actuarial computations relating to the gift must be made by applying the interest rate component and the mortality component of the month elected by the donor.

(3) *Gifts of more than one interest in the same property.* If a donor makes a gift of more than one interest in the same property at the same time, the donor must, for purposes of valuing the gifts, use the same interest rate and mortality components for the gift of each interest in the property. If the donor has made gifts of more than one interest in the same property at different times, the donor must determine the value of the gift by the use of the interest rate component and mortality component in effect during the month of that gift or, if applicable under paragraph (a)(2) of this section, either of the two months preceding the month of the gift.

(4) *Information required with tax return.* The following information must be attached to the gift tax return (or to the amended return) if the donor claims a charitable deduction for the present value of a temporary or remainder interest in property—

(i) A complete description of the interest that is transferred, including a copy of the instrument of transfer;

(ii) The valuation date of the transfer;

(iii) The names and identification numbers of the beneficiaries of the transferred interest;

(iv) The names and birthdates of any measuring lives, a description of any relevant terminal illness condition of any measuring life, and (if applicable) an explanation of how any terminal illness condition was taken into account in valuing the interest; and

(v) A computation of the deduction showing the applicable section 7520 interest rate that is used to value the transferred interest.

(5) *Place for filing returns.* See section 6091 of the Internal Revenue Code and the regulations thereunder for the place for filing the return or other document required by this section.

(b) *Election of interest rate component*—(1) *Time for making election.* A taxpayer makes a prior-month election under paragraph (a)(2) of this section by attaching the information described in paragraph (b)(2) of this section to the donor's gift tax return or to an amended return for that year that is filed within 24 months after the later of the date the original return for the year was filed or the due date for filing the return.

(2) *Manner of making election.* A statement that the prior-month election under section 7520(a) of the Internal Revenue Code is being made and that identifies the elected month must be attached to the gift tax return (or to the amended return).

(3) *Revocability.* The prior-month election may be revoked by filing an amended return within 24 months after the later of the date the original return of tax for that year was filed or the due date for filing the return. The revocation must be filed in the place referred to in paragraph (a)(5) of this section.

(c) *Effective dates.* Paragraph (a) of this section is effective as of May 1, 1989. Paragraph (b) of this section is effective for elections made after June 10, 1994.

§ 25.7520–3 Limitation on the application of section 7520.

(a) *Internal Revenue Code sections to which section 7520 does not apply.* Section 7520 of the Internal Revenue Code does not apply for purposes of—

(1) Part I, subchapter D of subtitle A (section 401 et. seq.), relating to the income tax treatment of certain qualified plans. (However, section 7520 does apply to the estate and gift tax treatment of certain qualified plans and for purposes of determining excess accumulations under section 4980A);

(2) Sections 72 and 101(b), relating to the income taxation of life insurance, endowment, and annuity contracts, unless otherwise provided for in the regulations under sections 72, 101, and 1011 (see, particularly, §§ 1.101–2(e)(1)(iii)(*b*)(*2*), and 1.1011–2(c), *Example 8*);

(3) Sections 83 and 451, unless otherwise provided for in the regulations under those sections;

(4) Section 457, relating to the valuation of deferred compensation, unless otherwise provided for in the regulations under section 457;

(5) Sections 3121(v) and 3306(r), relating to the valuation of deferred

amounts, unless otherwise provided for in the regulations under those sections;

(6) Section 6058, relating to valuation statements evidencing compliance with qualified plan requirements, unless otherwise provided for in the regulations under section 6058;

(7) Section 7872, relating to income and gift taxation of interest-free loans and loans with below-market interest rates, unless otherwise provided for in the regulations under section 7872; or

(8) Section 2702(a)(2)(A), relating to the value of a nonqualified retained interest upon a transfer of an interest in trust to or for the benefit of a member of the transferor's family; and

(9) Any other section of the Internal Revenue Code to the extent provided by the Internal Revenue Service in revenue rulings or revenue procedures. (See §§ 601.201 and 601.601 of this chapter).

(b) *Other limitations on the application of section 7520.* [reserved]

(c) *Effective date.* Section 25.7520–3(a) is effective as of May 1, 1989.

§ 25.7520–4 Transitional rules.

(a) *Reliance.* If the valuation date is after April 30, 1989, and before June 10, 1994, a donor can rely on Notice 89–24, 1989–1 C.B. 660, or Notice 89–60, 1989–1 C.B 700 (See § 601.601(d)(2)(ii)(*b*) of this chapter), in valuing the transferred interest.

(b) *Transfers in 1989.* If a donor transferred an interest in property by gift after December 31, 1988, and before May 1, 1989, retaining an interest in the same property and, after April 30, 1989, and before January 1, 1990, transferred the retained interest in the property, the donor may, at the donor's option, value the transfer of the retained interest under either § 25.2512–5(d) or § 25.2512–5A(d).

(c) *Effective date.* This section is effective as of May 1, 1989.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 36. The authority citation for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 37. Section 602.101 (c) is amended by adding entries in numerical order to the table to read as follows:

§ 602.101 OMB Control numbers.

RIN 1545–AR56

Actuarial Tables Exceptions

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed amendments to the income, estate, and gift tax regulations under the Internal Revenue Code relating to exceptions to the use of standard valuation tables for valuing annuities, interests for life or a term of years, and remainder or reversionary interests. These amendments are necessary in order to provide guidance consistent with court decisions that call for deviation from the use of standard valuation tables in valuing those interests. The proposed regulations would apply in valuing all interests that would, but for the exceptions, be valued under section 7520 of the Code.

DATES: Written comments and requests for a public hearing must be received by August 9, 1994.

ADDRESSES: Send submissions to: CC:DOM:CORP:T:R ([PS–26–93]), room 5228, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. In the alternative, submissions may be hand delivered to: CC:DOM:CORP:T:R ([PS–26–93]), room 5228, Internal Revenue Service, 1111 Constitution Avenue NW, Washington, DC.

FOR FURTHER INFORMATION CONTACT: William L. Blodgett, telephone (202) 622–3090 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed regulations (26 CFR 1.7520–3(b), 20.7520–3(b), and 25.7520–3(b)) for the valuation of certain partial interests in property under section 7520 of the Internal Revenue Code (Code), as added by section 5031 of the Technical and Miscellaneous Revenue Act of 1988, when the use of standard actuarial tables would produce unreasonable results.

The regulations are proposed to be effective for valuation dates occurring after the date the regulations are published as final regulations in the **Federal Register**.

Explanation of Provisions

Section 7520(a), which is effective after April 30, 1989, provides that the value of annuities, interests for life or a term of years, and remainder or reversionary interests is to be determined under tables published by the IRS based on an interest rate equal to 120 percent of the applicable Federal mid-term rate (rounded to the nearest two-tenths of one percent) in effect under section 1274(d)(1) for the month in which the valuation date falls. Section 7520(b) provides that section 7520 shall not apply for purposes of any provision specified in regulations. The Conference Report to the Technical and Miscellaneous Revenue Act of 1988, H.R. Conf. Rep. No. 1104, 100th Cong., 2d Sess. 113 (1988), 1988–3 C.B. 603, explains that section 7520 does not apply to "situations specified in Treasury regulations."

The IRS has never attempted to include in the regulations all of the different actuarial factors that could apply to the many different kinds of vested and contingent annuity, income, and remainder interests that can arise in tax administration. The actuarial tables that have been set forth in the regulations from time to time have listed only those factors that are most frequently needed by taxpayers. Generally, these actuarial tables have included the one-life annuity, income, and remainder factors for ages 0 through 109 and the term-certain annuity, income, and remainder factors for periods of 1 through 60 years. These one-life and term-certain factors are often referred to in this notice of proposed rulemaking as "standard actuarial factors" or "standard section 7520 actuarial factors."

Other standard actuarial factors that are less frequently needed by taxpayers are included in tables that have been separately published by the IRS from time to time and that may be purchased from the Government Printing Office. The tables in these books include two-life actuarial factors, as well as many one-life factors and term-certain factors not found in the regulations tables. These publications also include a number of examples that illustrate how to compute special section 7520 actuarial factors such as the annuity, income, or remainder factor for a period limited to the lesser of a term certain or a lifetime. Special actuarial factors have for many years been referred to as such in the regulations. See, for example, § 20.2055–2(f)(5).

Other special section 7520 actuarial factors that may apply to more unusual situations may be computed by the taxpayer or, upon request, by the Internal Revenue Service for the taxpayer, by using actuarial methods consistent with those used to compute the standard section 7520 actuarial factors that appear in the tables in the regulations and in the Service's publications. Examples of these more unusual situations include an annuity payable for more than two lives, a right to income for a term certain or until the prior death of the first to die of two individuals, and the right to receive a remainder after a term certain if an individual survives the term.

In calculating a standard section 7520 actuarial factor, certain assumptions are made. For all standard section 7520 actuarial factors in the single-life and term-certain tables in § 20.2031–7(d), the interest rate for enjoyment or the postponement of enjoyment is the applicable section 7520 rate. In the case of a life annuity, income, or remainder factor, the basis for mortality rates for measuring lives is the data in Table 80 CNSMT. However, in unusual situations, where special section 7520 actuarial factors must be computed, one or more alternative assumptions may be appropriate. For example, if the actual income is known to be below applicable standards, the section 7520 interest rate may not be used to project the trust income yield. Similarly, if a measuring life is classified as terminally ill, the standard mortality data from Table 80 CNSMT may not be used as the mortality basis. But, even though one or both of these exceptions is applicable in a case, the section 7520 interest rate will ordinarily be used to discount the value of the right to any postponed enjoyment.

In cases requiring the valuation of ordinary annuities, income interests, and remainder and reversionary interests, the courts have consistently recognized the need to use the standard actuarial factors prescribed by the regulations. *See Ithaca Trust* v. *United States*, 279 U.S. 151 (1929).

However, the courts have recognized that the use of the standard actuarial factors is inappropriate in certain cases. *Robinette* v. *Helvering*, 318 U.S. 184 (1943) (reversionary interest with several interdependent contingencies); *Stark* v. *United States*, 477 F.2d 131 (8th Cir. 1973), *cert. denied*, 414 U.S. 975 (1973) (closely held stock that was not publicly traded and paid no dividends); *O'Reilly* v. *Commissioner*, 973 F.2d 1403 (8th Cir. 1992), *rem'd*, T.C.M. 1994–61 (disparity between .2 percent yield and 10 percent tables produced unrealistic and unreasonable result); and *Commissioner* v. *Estate of Sternberger*, 348 U.S. 187 (1955) (charitable bequest that would occur

only if decedent's unmarried daughter died without issue surviving her and her mother). In addition, the courts have held that the standard actuarial factors cannot be used if the measuring life is terminally ill. *Estate of McLendon* v. *Commissioner*, T.C.M. 1993–459; *Estate of Jennings* v. *Commissioner*, 10 T.C. 323 (1948); and *Estate of Denbigh* v. *Commissioner*, 7 T.C. 387 (1946). See Rev. Rul. 80–80, 1980–1 C.B. 194, which provides that, in cases where the individual's death is imminent, the taxpayer may not use standard actuarial factors prescribed by the regulations. See also *Carter* v. *United States*, 921 F.2d 63 (5th Cir. 1991), where the court refused to ascribe value to an income interest for purposes of the section 2013 credit where death of the measuring life was simultaneous with that of the decedent.

In *Shapiro* v. *Commissioner*, T.C. Memo 1993–483 (1993), the Tax Court allowed the taxpayer to improperly value an annuity with a standard one-life annuity actuarial factor from Table A in § 20.2031–7(f) in a situation in which the annuity could have exhausted the fund from which the annuity was to be paid before the death of the annuitant. The Internal Revenue Service believes that the annuity factor that should have been used in this case is a special annuity factor for the right to receive annual payments for 4 years or until the prior death of the annuitant. See Rev. Rul. 77–454, 1977–2 C.B. 351. See also *Moffett* v. *Commissioner*, 269 F.2d 738 (4th Cir. 1959), and *United States* v. *Dean*, 224 F.2d 26 (1st Cir. 1955). Therefore, the Service will not follow the result in *Shapiro*.

Sections 1.7520–3(a), 20.7520–3(a), and 25.7520–3(a) set forth specific Code sections that are exempt from the valuation rules of section 7520. The proposed regulations contained in this notice describe other areas in which the valuation methodology applicable to standard and special section 7520 actuarial factors is not to be used. Generally, if the interest in property that is to be valued is not an ordinary annuity, income interest, or remainder interest, the standard annuity, income and remainder factors in the tables of factors set forth in the regulations and IRS publications cannot be used. In some cases in which the standard factors from the regulations and publications tables cannot be used, a special factor may be computed by the taxpayer or by the Service upon the request of the taxpayer. In other cases where standard or special factors may not be used, the property interest may be valued using other valuation techniques. Depending upon the facts and circumstances, a property interest that cannot be valued using the standard or special section 7520 factors may have no ascertainable value.

The proposed regulations establish two primary tests to determine whether the fair market value of the interest is computed by use of the standard section 7520 actuarial factors found in the regulations and IRS publications. The first test is whether the instrument of transfer provides the beneficiary with the degree of beneficial enjoyment that is consistent with the type of property interest that the standard valuation tables are designed to measure. In this regard, the rights of an annuity beneficiary must be adequately defined and, if the annuity is payable from a group of assets, the value of the assets must be sufficient to support all of the annuity payments. Similarly, the rights of an income beneficiary must be consistent with the rights of an outright owner of the property interest for the same period of time, and the rights of a remainder or reversionary beneficiary must be protected against invasion or erosion of the corpus.

The second test in the proposed regulations addresses the mortality component of the transferred interest. The Internal Revenue Service previously addressed this issue in Rev. Rul. 66–307, 1966–2 C.B. 429, and Rev. Rul. 80–80. Rev. Rul. 66–307 set forth the rule that the value of a life or remainder interest would be determined by taking into account the health of the life tenant if it was known on the valuation date that the life tenant was afflicted with a fatal and incurable disease in its advanced stages and that the life tenant could not survive for more than a brief period of time. Rev. Rul. 80–80 clarified the "brief period" test in Rev. Rul. 66–307, and stated that the standard life actuarial factors are to be applied to value the interest unless death is clearly imminent. In the view of the Service, because the test for determining whether death is imminent set forth in Rev. Rul. 66–307 and Rev. Rul. 80–80 does not satisfactorily quantify the probability of death occurring within 1 year from the valuation date, this test may permit the use of standard actuarial factors in inappropriate situations. These regulations propose to explicitly quantify the applicable standard for purposes of applying this test.

Under the proposed regulations, if an individual who is a measuring life of the interest being transferred is known to be terminally ill, the mortality test of the proposed regulations is not satisfied and a special section 7502 actuarial factor rather than a standard actuarial factor must be used in valuing the interest. Terminal illness is defined in the proposed regulations as an incurable illness or other deteriorating physical condition that would substantially reduce a person's life expectancy to the extent that there is at least a 50 percent probability that the individual will not survive for more than 1 year from the valuation date. Exceptions are made in the regulations for special situations under sections 2013, 2037, and 2042.

In the case of the simultaneous death of the transferor and an individual who is the measuring life of a property interest, the proposed regulations specifically preclude use of the standard factors in the tables to value that interest. This is pertinent in determining the previously taxed property credit under section 2013 and reaffirms the position of the Fifth Circuit in the *Carter* case.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in EO 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments that are submitted timely (preferably a signed original and eight copies) to the Internal Revenue Service. In particular, the Service requests comments on whether the proposed definition of terminal illness adequately deals with certain illnesses that are known to cause death in a short period of time but are not likely to cause death within 1 year from death. All comments will be available for public inspection and copying. A public hearing may be scheduled if requested in writing by a person that timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is William L. Blodgett, Office of Assistant Chief Counsel (Passthroughs and Special Industries), Internal Revenue Service. However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 20

Estate taxes, Reporting and recordkeeping requirements.

26 CFR Part 25

Gift taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR parts 1, 20 and 25 are proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 1.7520–3 is amended by adding the text of paragraph (b) to read as follows:

§ 1.7520–3 Limitation on the application of section 7520.

* * * * *

(b) *Other limitations on the application of section 7520*— (1) *In general*—(i) *Ordinary beneficial interests.* For purposes of this section:

(A) An *ordinary annuity interest* is the right to receive a fixed dollar amount at the end of each year during one or more measuring lives or for some other defined period. A standard section 7520 annuity factor for an ordinary annuity interest represents the present worth of the right to receive $1.00 per year for a defined period, using the interest rate prescribed under section 7520 for the appropriate month. If an annuity interest is payable more often than annually or is payable at the beginning of each period, a special adjustment must be made in any computation with a standard section 7520 annuity factor.

(B) An *ordinary income interest* is the right to receive the income from, the use of, property during one or more measuring lives or for some other defined period. A standard section 7520 income factor for an ordinary income interest represents the present worth of the right to receive the income from $1.00 for a defined period, using the interest rate prescribed under section 7520 for the appropriate month.

(C) An *ordinary remainder or reversionary interest* is the right to receive an interest in property at the end of one or more measuring lives or for some other defined period. A standard section 7520 remainder factor for an ordinary remainder or reversionary interest represents the present worth of the right to receive $1.00 at the end of a defined period, using the interest rate prescribed under section 7520 for the appropriate month.

(ii) *Certain restricted beneficial interests.* A *restricted beneficial interest* is an annuity, income, remainder, or reversionary interest that is subject to a contingency, power, or other restriction, whether the restriction is provided for by the terms of the trust, will, or other governing instrument or is caused by other circumstances. In general, a standard section 7520 annuity, income, or remainder factor may not be used to value a restricted beneficial interest. However, a special section 7520 annuity, income, or remainder factor may be used to value a restricted beneficial interest under some circumstances. See *Example 2* in § 1.7520–3(b)(4), which illustrates a situation where a special section 7520 actuarial factor is needed to take into account the shorter life expectancy of the terminally ill measuring life. See § 1.7520–1(c) for requesting a special factor from the Internal Revenue Service.

(iii) *Other beneficial interests.* If, under the provisions of § 1.7520–3(b), the interest rate and mortality components prescribed under section 7520 are not applicable in determining the value of any annuity, income, remainder, or reversionary interest, the actual fair market value of the interest (determined without regard to section 7520) is based on all of the facts and circumstances if and to the extent permitted by the Internal Revenue Code provision applicable to the property interest.

(2) *Provisions of governing instrument and other limitations on source of payment*—(i) *Annuities.* A standard section 7520 annuity factor is not to be used to determine the present value of an annuity for a specified term of years or the life of one or more individuals unless the effect of the trust, will, or other governing instrument is to ensure that the annuity will be paid for the entire defined period. In the case of an annuity payable from a trust or other limited fund, the annuity is not considered payable for the entire defined period if, considering the applicable section 7520 interest rate, the annuity is expected to exhaust the fund before the last possible annuity payment is made in full. For this purpose, it must be assumed that it is possible for each measuring life to survive until age 110, because every standard section 7520 life annuity factor is calculated on the basis of that assumption. If it is determined that the trust or other fund from which an annuity is to be paid may exhaust before the end of the defined period of the annuity, it will be necessary to calculate a special section 7520 annuity factor that takes into account the facts and circumstances that may exhaust the trust or fund.

(ii) *Income and similar interests*—(A) *Beneficial enjoyment.* A standard section 7520 income factor for an ordinary income interest is not to be used to determine the present value of an income or similar interest in trust for a term of years or for the life of one or more individuals unless the effect of the trust, will, or other governing instrument is to provide the income beneficiary with that degree of beneficial enjoyment of the property during the term of the income interest that the principles of the law of trusts accord to a person who is unqualifiedly designated as the income beneficiary of a trust for a similar period of time. This degree of beneficial enjoyment is provided only if it was the transferor's intent, as manifested by the provisions of the governing instrument and the surrounding circumstances, that the trust provide an income interest for the income beneficiary during the specified period of time that is consistent with the value of the trust corpus and with its preservation. In determining whether a trust arrangement evidences that intention, the treatment required or permitted with respect to individual items must be considered in relation to the entire system provided for in the administration of the subject trust. Similarly, in determining the present value of the right to use tangible property (whether or not in trust) for one or more measuring lives or other specified period of time, the interest rate component prescribed under section 7520 and § 1.7520–1 is not to be used unless, during the specified period, the beneficiary is entitled to that degree of use, possession, and enjoyment of the property that an outright owner would be entitled to exercise during a similar period of time.

(B) *Diversions of income and corpus.* A standard section 7520 income factor for an ordinary income interest is not to be used to value an income interest or

similar interest in property for a term of years or for one or more measuring lives if—

(1) The trust, will, or other governing instrument requires or permits the beneficiary's income or other enjoyment to be withheld, diverted, or accumulated for another person's benefit without the consent of the income beneficiary; or

(2) The governing instrument requires or permits trust corpus to be withdrawn from the trust for another person's benefit during the income beneficiary's term of enjoyment without the consent of and accountability to the income beneficiary for such diversion.

(iii) *Remainder and reversionary interests.* A standard section 7520 remainder interest factor for an ordinary remainder or reversionary interest is not to be used to determine the present value of a remainder or reversionary interest (whether in trust or otherwise) unless, consistent with the preservation and protection that the law of trusts would provide for a person who is unqualifiedly designated as the remainder beneficiary of a trust for a similar duration, the effect of the administrative and dispositive provisions for the interest or interests that precede the remainder or reversionary interest is to assure that the property will be adequately preserved and protected from erosion, invasion, depletion, or damage until the remainder or reversionary interest takes effect in possession and enjoyment. This degree of preservation and protection is provided only if it was the transferor's intent, as manifested by the provisions of the arrangement and the surrounding circumstances, that the entire disposition provide the remainder or reversionary beneficiary with an undiminished interest in the property transferred.

(iv) *Pooled income fund interests.* In general, pooled income funds are created and administered to achieve a special rate of return. A beneficial interest in a pooled income fund is not ordinarily valued using a standard section 7520 income or remainder interest factor. The present value of a beneficial interest in a pooled income fund is determined according to rules and special remainder factors prescribed at § 1.642(c)–6.

(3) *Mortality component.* The mortality component prescribed under section 7520 is not to be used to determine the present value of an annuity, income interest, remainder interest, or reversionary interest if an individual who is a measuring life for the interest dies or is terminally ill at the time of the transaction. For purposes of this paragraph (b)(3), an individual who is known to have an incurable illness or other deteriorating physical condition is considered terminally ill if there is at least a 50 percent probability that the individual will die within 1 year.

(4) *Examples.* The provisions of this paragraph (b) are illustrated by the following examples:

Example 1.—Annuity funded with unproductive property. The taxpayer transfers corporation stock worth $1,000,000 to a trust. The trust provides for a 6 percent ($60,000 per year) annuity in cash or other property to be paid to a charitable organization for 25 years and for the remainder to be distributed to the donor's child. The trust specifically authorizes, but does not require, the trustee to retain the shares of stock. The section 7520 interest rate for the month of the transfer is 8.2 percent. The corporation has paid no dividends on this stock during the past 5 years, and there is no indication that this policy will change in the near future. Under applicable state law, the corporation is considered to be a sound investment for a trust with diversified investments because the corporation's practice of retaining its earnings has caused the value of the corporation stock to grow commensurately each year. Considering the 6 percent annuity payout rate and the 8.2 percent section 7520 interest rate, the trust corpus is considered sufficient to pay this annuity for the entire 25-year term of the trust, or even indefinitely. Thus, though the trust assets not likely to earn dividend income during the term of the trust, the assets would be assumed to appreciate at the rate of 8.2 percent per year if there were no income. Therefore, the trust's sole investment in this corporation is not expected to adversely affect the interest of either the annuitant or the remainder beneficiary. Although it appears that neither beneficiary would be able to compel the trustee to make the trust corpus produce investment income, the annuity interest in this case is considered to be an ordinary annuity interest, and the standard section 7520 annuity factor may be used to determine the present value of the annuity. In this case, the section 7520 annuity factor would represent the right to receive $1.00 per year for a term of 25 years.

Example 2.—Terminal illness. The taxpayer transfers property worth $1,000,000 to a charitable remainder unitrust described in section 664(d)(2) and § 1.664–2. The trust provides for a fixed-percentage 7 percent annual benefit (each annual payment is equal to 7 percent of the trust assets as valued at the beginning of each year) to be paid annually to an individual beneficiary for life and for the remainder to be distributed to a charitable organization. At the time the trust is created, the individual beneficiary is age 60 and has been diagnosed with an incurable illness and there is at least a 50 percent probability of the individual dying within 1 year. Because there is at least a 50 percent probability that this beneficiary will die within 1 year, the standard section 7520 unitrust remainder factor for a person age 60 from the valuation tables may not be used to determine the present value of the charitable remainder interest. Instead, a special unitrust remainder factor must be computed that is based on the section 7520 interest rate and that takes into account the projection of the individual beneficiary's actual life expectancy.

(5) *Additional limitations.* Section 7520 does not apply to the extent provided by the Internal Revenue Service in revenue rulings or revenue procedures.

(6) *Effective date.* The provisions of paragraph (b) of this section are effective with respect to transactions after the date these regulations are published as final regulations in the **Federal Register**.

PART 20—ESTATE TAX; ESTATES OF DECEDENTS DYING AFTER AUGUST 16, 1954

Par. 3. The authority citation for part 20 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 4. Section 20.7520–3 is amended by adding the text of paragraph (b) to read as follows:

§ 20.7520–3 Limitation on the application of section 7520.

* * * * *

(b) *Other limitations on the application of section 7520—(1) In general—(i) Ordinary beneficial interests.* For purposes of this section—

(A) An *ordinary annuity interest* is the right to receive a fixed dollar amount at the end of each year during one or more measuring lives or for some other defined period. A standard section 7520 annuity factor for an ordinary annuity interest represents the present worth of the right to receive $1.00 per year for a defined period, using the interest rate prescribed under section 7520 for the appropriate month. If an annuity interest is payable more often than annually or is payable at the beginning of each period, a special adjustment must be made in any computation with a standard section 7520 annuity factor.

(B) An *ordinary income interest* is the right to receive the income from or the use of property during one or more measuring lives or for some other defined period. A standard section 7520 income factor for an ordinary income interest represents the present worth of the right to receive the income from $1.00 for a defined period, using the interest rate prescribed under section 7520 for the appropriate month.

(C) An *ordinary remainder or reversionary interest* is the right to receive an interest in property at the end of one or more measuring lives or for some other defined period. A standard section 7520 remainder factor for an

ordinary remainder or reversionary interest represents the present worth of the right to receive $1.00 at the end of a defined period, using the interest rate prescribed under section 7520 for the appropriate month.

(ii) *Certain restricted beneficial interests—A restricted beneficial interest* is an annuity, income, remainder, or reversionary interest that is subject to any contingency, power, or other restriction, whether the restriction is provided for by the terms of the trust, will, or other governing instrument or is caused by other circumstances. In general, a standard section 7520 annuity, income, or remainder factor may not be used to value a restricted beneficial interest. However, a special section 7520 annuity, income, or remainder factor may be used to value a restricted beneficial interest under some circumstances. See *Example 4* in § 20.7520–3(b)(2)(iv) and *Example 2* in § 20.7520–3(b)(4), which illustrate situations where special section 7520 actuarial factors are needed to take into account limitations on beneficial interests. See § 20.7520–1(c) for requesting a special factor from the Internal Revenue Service.

(iii) *Other beneficial interests.* If, under the provisions of § 20.7520–3(b), the interest rate and mortality components prescribed under section 7520 are not applicable in determining the value of any annuity, income, remainder, or reversionary interest, the actual fair market value of the interest (determined without regard to section 7520) is based on all of the facts and circumstances if and to the extent permitted by the Code provision applicable to the property interest.

(2) *Provisions of governing instrument and other limitations on source of payment*—(i) *Annuities.* A standard section 7520 annuity factor is not to be used to determine the present value of an annuity for a specified term of years or the life of one or more individuals unless the effect of the trust, will, or other governing instrument is to ensure that the annuity will be paid for the entire defined period. In the case of an annuity payable from a trust or other limited fund, the annuity is not considered payable for the entire defined period if, considering the applicable section 7520 interest rate, the annuity is expected to exhaust the fund before the last possible annuity payment is made in full. For this purpose, it must be assumed that it is possible for each measuring life to survive until age 110, because every standard section 7520 annuity factor is calculated on the basis of that assumption. If it is determined that the trust or other fund from which an annuity is to be paid may exhaust before the end of the defined period of the annuity, it will be necessary to calculate a special section 7520 annuity factor that takes into account the facts and circumstances that may exhaust the trust or fund.

(ii) *Income and Similar Interests*—(A) *Beneficial enjoyment.* A standard section 7520 income factor for an ordinary income interest is not to be used to determine the present value of an income or similar interest in trust for a term of years, or for the life of one or more individuals, unless the effect of the trust, will, or other governing instrument is to provide the income beneficiary with that degree of beneficial enjoyment of the property during the term of the income interest that the principles of the law of trusts accord to a person who is unqualifiedly designated as the income beneficiary of a trust for a similar period of time. This degree of beneficial enjoyment is provided only if it was the transferor's intent, as manifested by the provisions of the governing instrument and the surrounding circumstances, that the trust provide an income interest for the income beneficiary during the specified period of time that is consistent with the value of the trust corpus and with its preservation. In determining whether a trust arrangement evidences that intention, the treatment required or permitted with respect to individual items must be considered in relation to the entire system provided for in the administration of the subject trust. Similarly, in determining the present value of the right to use tangible property (whether or not in trust) for one or more measuring lives or other specified period of time, the interest rate component prescribed under section 7520 and § 20.7520–1 is not to be used unless, during the specified period, the beneficiary is entitled to that degree of use, possession, and enjoyment of the property that an outright owner would be entitled to exercise during a similar period of time.

(B) *Diversions of income and corpus.* A standard section 7520 income factor for an ordinary income interest is not to be used to value an income interest or similar interest in property for a term of years, or for one or more measuring lives, if—

(*1*) The trust, will, or other governing instrument requires or permits the beneficiary's income or other enjoyment to be withheld, diverted, or accumulated for another person's benefit without the consent of the income beneficiary; or

(*2*) The governing instrument requires or permits trust corpus to be withdrawn from the trust for another person's benefit without the consent of the income beneficiary during the income beneficiary's term of enjoyment and without accountability to the income beneficiary for such diversion.

(iii) *Remainder and reversionary interests.* A standard section 7520 remainder interest factor for an ordinary remainder or reversionary interest is not to be used to determine the present value of a remainder or reversionary interest (whether in trust or otherwise) unless, consistent with the preservation and protection that the law of trusts would provide for a person who is unqualifiedly designated as the remainder beneficiary of a trust for a similar duration, the effect of the administrative and dispositive provisions for the interest or interests that precede the remainder or reversionary interest is to assure that the property will be adequately preserved and protected from erosion, invasion, depletion, or damage until the remainder or reversionary interest takes effect in possession and enjoyment. This degree of preservation and protection is provided only if it was the transferor's intent, as manifested by the provisions of the arrangement and the surrounding circumstances, that the entire disposition provide the remainder or reversionary beneficiary with an undiminished interest in the property transferred.

(iv) *Pooled income fund interests.* In general, pooled income funds are created and administered to achieve a special rate of return. A beneficial interest in a pooled income fund is not ordinarily valued using a standard section 7520 income or remainder interest factor. The present value of a beneficial interest in a pooled income fund is determined according to rules and special remainder factors prescribed in § 1.642(c)–6 of this chapter (Income Tax Regulations).

(v) *Examples.* The provisions of this paragraph (b)(2) are illustrated by the following examples:

Example 1.—Unproductive property. The decedent's will provides for a bequest of corporation stock to a trust under the terms of which all of the trust income is payable to the decedent's child for life. After the death of the life income beneficiary, the trust is to terminate and the trust property is to be distributed to the decedent's grandchild. The trust specifically authorizes, but does not require, the trustee to retain the shares of stock. The corporation has paid no dividends on this stock during the past 5 years, and there is no indication that this policy will change in the near future. Under applicable state law, the corporation is considered to be an adequately sound growth investment for a trust with diversified investments because

the corporation's practice of retaining its earnings has caused the value of the corporation stock to increase commensurately each year. The facts and circumstances, including applicable state law, indicate that the life income beneficiary would not be able to compel the trustee to make the trust corpus productive in conformity with the requirements for a lifetime trust income interest under applicable local law. Therefore, the life income interest in this case is considered nonproductive. Consequently, the income interest may not be valued actuarially under this section.

Example 2.—Beneficiary's right to make trust productive. The facts are the same as in *Example 1*, except that the trustee is not specifically authorized to retain the shares of stock. Further, the terms of the trust specifically provide that the life income beneficiary may require the trustee to make the trust corpus productive consistent with income yield standards for trusts under applicable state law. Under that law, the minimum rate of income that a productive trust may produce is substantially below the section 7520 interest rate for the month of the decedent's death. In this case, because the income beneficiary has the right to compel the trustee to make the trust productive for purposes of applicable local law during the beneficiary's lifetime, the income interest is considered an ordinary income interest for purposes of this paragraph, and the standard section 7520 life income interest factor may be used to determine the present value of the income interest.

Example 3.—Discretionary invasion of corpus. The decedent transfers property to a trust under the terms of which all of the trust income is to be paid to the decedent's child for life and the remainder of the trust is to be distributed to a grandchild. The trust authorizes the trustee without restriction to distribute corpus to the decedent's surviving spouse for the spouse's comfort and happiness. In this case, because the trustee's power to invade trust corpus is unrestricted, the exercise of the power could result in the termination of the income interest at any time. Consequently, the income interest is not considered an ordinary income interest for purposes of this paragraph and may not be valued actuarially under this section.

Example 4.—Limited invasion of corpus. The decedent bequeaths property to a trust under the terms of which all of the trust income is to be paid to the decedent's child for life and the remainder is to be distributed to the decedent's grandchild. The trust authorizes the child to withdraw up to $5,000 per year from the trust corpus. In this case, the child's power to invade trust corpus is limited to an ascertainable amount each year. Annual invasions of any amount would be expected to progressively diminish the property from which the child's income is paid. Consequently, the income interest is not considered an ordinary income interest for purposes of this paragraph, and the standard section 7520 income interest factor may not be used to determine the present value of the income interest. Nevertheless, the present value of the child's income interest is ascertainable by making a special actuarial calculation that would take into account not only the initial value of the trust corpus, the section 7520 interest rate for the month of the transfer, and the mortality component for the child's age, but also the assumption that the trust corpus will decline at the rate of $5,000 each year during the child's lifetime. The child's right to receive an amount not in excess of $5,000 per year may be separately valued in this instance and, assuming the trust corpus would not exhaust before the child would attain age 110, would be considered an ordinary annuity interest.

Example 5.—Power to consume. The decedent devises a life estate in 3 parcels of real estate to the surviving spouse with the remainder to a child. The decedent also confers upon the spouse an unrestricted power to consume the property, which includes the right to sell part or all of the property and to use the proceeds for the spouse's support, comfort, happiness, and other purposes. Any portion of the property or its sale proceeds remaining at the death of the surviving spouse is to vest by operation of law in the child at that time. In this case, the surviving spouse's power to consume the corpus is unrestricted, and the exercise of the power could entirely exhaust the remainder interest during the life of the spouse. Consequently, the remainder interest is not considered an ordinary remainder interest for purposes of this paragraph and may not be valued actuarially under this section.

(3) *Mortality component—(i) Terminal illness cases.* Except as provided in paragraph (b)(3)(ii) of this section, the mortality component prescribed under section 7520 is not to be used to determine the present value of an annuity, income interest, remainder interest, or reversionary interest if an individual who is a measuring life dies or is terminally ill at the time of the decedent's death. For purposes of this paragraph (b)(3), an individual who is known to have an incurable illness or other deteriorating physical condition is considered terminally ill if there is at least a 50 percent probability that the individual will die within 1 year.

(ii) *Exceptions.* If, in the case of the allowance of the credit for tax on a prior transfer under section 2013, the tax in the transferor's estate was finally determined without regard to the fact that one or more measuring lives were terminally ill at the time of the transferor's death, the value of any transferred interest dependent on any of those lives shall be determined for purposes of section 2013 without regard to the fact that those measuring lives were terminally ill. In addition, the value of a decedent's reversionary interest under section 2037(b) or 2042(2) shall be determined without regard to the physical condition of the decedent immediately before death.

(4) *Examples.* The provisions of paragraph (b)(3) of this section are illustrated by the following examples:

Example 1.—Simultaneous deaths. The decedent's will establishes a trust to pay income to the decedent's surviving spouse for life. The will provides that, upon the spouse's death or if the spouse fails to survive the decedent, the trust property is to pass to the decedent's children. The decedent and the decedent's spouse die simultaneously in an accident under circumstances in which it was impossible to determine who survived the other. Applicable state law presumes that the decedent died first with the result that the property interest is considered to have passed in trust for the benefit of the spouse for life, after which the remainder is to be distributed to the decedent's children. Therefore, the spouse's life income interest may not be valued under this section.

Example 2.—Terminal illness. The decedent bequeaths $1,000,000 to a trust under the terms of which the trustee is to pay $103,000 per year to a charitable organization during the life of the decedent's child. Upon the death of the child, the remainder in the trust is to be distributed to the decedent's grandchild. The child, who is age 60, has been diagnosed with an incurable illness, and there is at least a 50 percent probability of the child dying within 1 year. The section 7520 interest rate for the month of the decedent's death is 10.6 percent. The standard life annuity factor for a person age 60 (7.4230) may not be used to determine the present value of the charitable organization's annuity interest because there is at least a 50 percent probability that the measuring life will die within 1 year. Instead, a special section 7520 annuity factor must be computed that takes into account the projection of the child's actual life expectancy.

(5) *Additional Limitations.* Section 7520 does not apply to the extent provided by the Internal Revenue Service in revenue rulings or revenue procedures.

(c) *Effective date.* The provisions of this paragraph (b) are effective with respect to estates of decedents dying after the date these regulations are published as final regulations in the Federal Register.

PART 25—GIFT TAX; GIFTS MADE AFTER DECEMBER 31, 1954

Par. 5. The authority citation for part 25 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 6. Section 25.7520–3 is amended by adding the text of paragraph (b) to read as follows:

§ 25.7520–3 Limitation on the application of section 7520.

* * * * *

(b) *Other limitations on the application of section 7520—(1) In*

general—(i) *Ordinary beneficial interests.* For purposes of this section,

(A) An *ordinary annuity interest* is the right to receive a fixed dollar amount at the end of each year during one or more measuring lives or for some other defined period. A standard section 7520 annuity factor for an ordinary annuity interest represents the present worth of the right to receive $1.00 per year for a defined period, using the interest rate prescribed under section 7520 for the appropriate month. If an annuity interest is payable more often than annually or is payable at the beginning of each period, a special adjustment must be made in any computation with a standard section 7520 annuity factor.

(B) An *ordinary income interest* is the right to receive the income from or the use of property during one or more measuring lives or for some other defined period. A standard section 7520 income factor for an ordinary income interest represents the present worth of the right to receive the income from $1.00 for a defined period, using the interest rate prescribed under section 7520 for the appropriate month. However, in the case of certain gifts made after October 8, 1990, if the donor does not retain a qualified annuity, unitrust, or reversionary interest, the value of any interest retained by the donor is considered to be zero if the remainder beneficiary is a member of the donor's family. See § 25.2702-2.

(C) An *ordinary remainder or reversionary interest* is the right to receive an interest in property at the end of one or more measuring lives or for some other defined period. A standard section 7520 remainder factor for an ordinary remainder or reversionary interest represents the present worth of the right to receive $1.00 at the end of a defined period, using the interest rate prescribed under section 7520 for the appropriate month.

(ii) *Certain restricted beneficial interests.* A *restricted beneficial interest* is an annuity, income, remainder, or reversionary interest that is subject to any contingency, power, or other restriction, whether the restriction is provided for by the terms of the trust, will, or other governing instrument or is imposed by other circumstances. In general, a standard section 7520 annuity, income, or remainder factor may not be used to value a restricted beneficial interest. However, a special section 7520 annuity, income, or remainder factor may be used to value a restricted beneficial interest under some circumstances. See *Examples 3, 4,* and *5* in § 25.7520–3(b)(2)(iv) and the *Example* in § 25.7520–3(b)(4), which illustrate situations in which special section 7520 actuarial factors are needed to take into account limitations on beneficial interests. See § 25.7520–1(c) for requesting a special factor from the Internal Revenue Service.

(iii) *Other beneficial interests.* If, under the provisions of § 25.7520–3(b), the interest rate and mortality components prescribed under section 7520 are not applicable in determining the value of any annuity, income, remainder, or reversionary interest, the actual fair market value of the interest (determined without regard to section 7520) is based on all of the facts and circumstances if and to the extent permitted by the Internal Revenue Code provisions applicable to the property interest.

(2) *Provisions of governing instrument and other limitations on source of payment*—(i) *Annuities.* A standard section 7520 annuity factor is not to be used to determine the present value of an annuity for a specified term of years or the life of one or more individuals unless the effect of the trust, will, or other governing instrument is to ensure that the annuity will be paid for the entire defined period. In the case of an annuity payable from a trust or other limited fund, the annuity is not considered payable for the entire defined period if, considering the applicable section 7520 interest rate, the annuity is expected to exhaust the fund before the last possible annuity payment is made in full. For this purpose, it must be assumed that it is possible for each measuring life to survive until age 110, because every standard section 7520 annuity factor is calculated on the basis of that assumption. If it is determined that the trust or other fund from which an annuity is to be paid may exhaust before the end of the defined period of the annuity, it will be necessary to calculate a special section 7520 annuity factor that takes into account the facts and circumstances that may exhaust the trust or fund.

(ii) *Income and similar interests.*—(A) *Beneficial enjoyment.* A standard section 7520 income factor for an ordinary income interest is not to be used to determine the present value of an income or similar interest in trust for a term of years, or for the life of one or more individuals, unless the effect of the trust, will, or other governing instrument is to provide the income beneficiary with that degree of beneficial enjoyment of the property during the term of the income interest that the principles of the law of trusts accord to a person who is unqualifiedly designated as the income beneficiary of a trust for a similar period of time. This degree of beneficial enjoyment is provided only if it was the transferor's intent, as manifested by the provisions of the governing instrument and the surrounding circumstances, that the trust provide an income interest for the income beneficiary during the specified period of time that is consistent with the value of the trust corpus and with its preservation. In determining whether a trust arrangement evidences that intention, the treatment required or permitted with respect to individual items must be considered in relation to the entire system provided for in the administration of the subject trust. Similarly, in determining the present value of the right to use tangible property (whether or not in trust) for one or more measuring lives or other specified period of time, the interest rate component prescribed under section 7520 and § 25.7520–1 is not to be used unless, during the specified period, the beneficiary is entitled to that degree of use, possession, and enjoyment of the property that an outright owner would be entitled to exercise during a similar period of time.

(B) *Diversions of income and corpus.* A standard section 7520 income factor for an ordinary income interest is not to be used to value an income interest or similar interest in property for a term of years, or for one or more measuring lives, if—

(*1*) The trust, will, or other governing instrument requires or permits the beneficiary's income or other enjoyment to be withheld, diverted, or accumulated for another person's benefit without the consent of the income beneficiary; or

(*2*) The governing instrument requires or permits trust corpus to be withdrawn from the trust for another person's benefit without the consent of the income beneficiary during the income beneficiary's term of enjoyment and without accountability to the income beneficiary for such diversion.

(iii) *Remainder and reversionary interests.* A standard section 7520 remainder interest factor for an ordinary remainder or reversionary interest is not to be used to determine the present value of a remainder or reversionary interest (whether in trust or otherwise) unless, consistent with the preservation and protection that the law of trusts would provide for a person who is unqualifiedly designated as the remainder beneficiary of a trust for a similar duration, the effect of the administrative and dispositive provisions for the interest or interests that precede the remainder or reversionary interest is to assure that the property will be adequately preserved and protected from erosion, invasion,

depletion, or damage until the remainder or reversionary interest takes effect in possession and enjoyment. This degree of preservation and protection is [illegible] only if it was the transferor's intent, as manifested by the provisions [illegible] that the [illegible] disposition provide the remainder or [illegible] undiminished interest in the property [illegible].

(iv) *Pooled income fund interests.* In general, pooled income funds are created and administered to achieve a special rate of return. A beneficial interest in a pooled income fund is not ordinarily valued using a standard section 7520 income or remainder interest factor. The present value of a beneficial interest in a pooled income fund is determined according to rules and special remainder factors prescribed in § 1.642(c)–6 of this chapter (Income Tax Regulations).

(v) *Examples.* The provisions of this paragraph (b)(2) are illustrated by the following examples:

Example 1.—Unproductive property. The donor transfers corporation stock to a trust under the terms of which all of the trust income is payable to a child for life. After the death of the life income beneficiary, the trust is to terminate and the trust property is to be distributed to a grandchild. The trust specifically authorizes, but does not require, the trustee to retain the shares of stock. The corporation has paid no dividends on this stock during the past 5 years, and there is no indication that this policy will change in the near future. Under applicable state law, the corporation is considered to be an adequately sound growth investment for a trust with diversified investments because the corporation's practice of retaining its earnings has caused the value of the corporation stock to increase commensurately each year. The facts and circumstances, including applicable state law, indicate that the income beneficiary would not have the legal right to compel the trustee to make the trust corpus productive in conformity with the requirements for a lifetime trust income interest under applicable local law. Therefore, the life income interest in this case is considered nonproductive. Consequently, the income interest may not be valued actuarially under this section.

Example 2.—Beneficiary's right to make trust productive. The facts are the same as in *Example 1*, except that the trustee is not specifically authorized to retain the shares of corporation stock. Further, the terms of the trust specifically provide that the life income beneficiary may require the trustee to make the trust corpus productive consistent with income yield standards for trusts under applicable state law. Under that law, the minimum rate of income that a productive trust may produce is substantially below the section 7520 interest rate on the valuation date. In this case, because the income beneficiary has the right to compel the trustee to make the trust productive for purposes of applicable local law during the beneficiary's lifetime, the income interest is considered an ordinary income interest for purposes of this paragraph, and the standard section 7520 life income factor may be used to determine the value of the income interest. However, in the case of gifts made [illegible] October 8, 1990, if the donor were [illegible] income beneficiary, the value of the income interest would be considered to be zero in this situation. See § 25.2702–2.

[illegible] *unproductive property.* The donor who is age 60 transfers corporation stock worth $1,000,000 to a trust. The trust will pay a 9 percent ($90,000 per year) annuity in cash or other property to the donor for 10 years or until the donor's prior death. Upon the termination of the trust, the trust property is to be distributed to the donor's child. The section 7520 rate for the month of the transfer is 8.2 percent. The corporation has paid no dividends on the stock during the past 5 years, and there is no indication that this policy will change in the near future. Under applicable state law, the corporation is considered to be a sound investment for a trust with diversified investments because the corporation's practice of retaining its earnings has caused the value of the corporation stock to grow commensurately each year. Considering the 6 percent annuity payout rate and the 8.2 percent section 7520 interest rate, the trust corpus is considered sufficient to pay this annuity for the entire 10-year term of the trust, or even indefinitely. Thus, though the trust assets not likely to earn dividend income during the term of the trust, the assets would be assumed to appreciate at the rate of 8.2 percent per year if there were no income. Therefore, the trust's sole investment in this corporation is not expected to adversely affect the interest of either the annuity beneficiary or the remainder beneficiary. The trust specifically authorizes, but does not require, the trustee to retain the shares of stock. Although it appears that neither beneficiary would be able to compel the trustee to make the trust corpus produce investment income, the annuity interest in this case is considered to be an ordinary annuity interest, and a section 7520 annuity factor may be used to determine the present value of the annuity. In this case, the section 7520 annuity factor would represent the right to receive $1.00 per year for a term of 10 years or the prior death of a person age 60.

Example 4.—Unitrust funded with unproductive property. The facts are the same as in *Example 3*, except that the donor has retained a unitrust interest equal to 7 percent of the value of the trust property, valued as of the beginning of each year. Although the trust corpus is nonproductive, the present value of the donor's retained unitrust interest may be determined by using the section 7520 unitrust factor for a term of years or a prior death.

Example 5.—Eroding corpus to an annuity trust. The donor, who is age 60 and in normal health, transfers property worth $1,000,000 to a trust. The trust will pay a 10 percent ($100,000 per year) annuity to a charitable organization for the life of the donor, and the remainder is to be distributed to the donor's child. The section 7520 rate for the month of the transfer is 6.8 percent. Because the 10 percent annuity payout rate exceeds the 6.8 percent income and growth rate [illegible] is expected to erode [illegible] annuity payments [illegible] progressively [illegible] the [illegible] interest rate of 6.8 [illegible] of $100,000 per year, [illegible] $1,000,000 trust corpus in 18 years. The [illegible] payment at the end of the 18th year will consist of a partial payment of $32,712. Under section 7520, the standard life annuity factors are based on the assumption that any person may survive until age 110. This means that the standard life annuity factor for age 60 (9.8585) takes into account the separate probabilities that a person age 60 may survive to receive each of 50 different annuity payments. However, in the present case, because of the eroding corpus, the person age 60 can be assumed to receive no more than 17 $100,000 annuity payments, regardless of how long that person might survive. Therefore, the standard life annuity factor for a person age 60 (9.8585) is not applicable in this case, and special section 7520 annuity factors that take into account the 18-year limitation on the annuity payout must be used. The special annuity factor for the present value of the right to receive $1.00 per year for 17 years or until the prior death of a person age 60 is $8.6121, and the special factor for the present value of the right to receive $1.00 in 18 years if a person age 60 survives is $.1836. The present value of the charitable annuity interest is $867,269 ($100,000 X 8.6121 plus $32,712 X .1836).

(3) *Mortality component.* The mortality component prescribed under section 7520 is not to be used to determine the present value of an annuity, income interest, remainder interest, or reversionary interest if an individual who is a measuring life dies or is terminally ill at the time the gift is completed. For purposes of this paragraph (b)(3), an individual who is known to have an incurable illness or other deteriorating physical condition is considered terminally ill if there is at least a 50 percent probability that the individual will die within 1 year.

(4) *Example.* The provisions of paragraph (b)(3) of this section are illustrated by the following example:

Example.—Terminal illness. The donor transfers property worth $1,000,000 to a child in exchange for the child's promise to pay the donor $104,000 per year for [illegible] diagnosed with an incurable illness and has a [illegible] at least a 50 percent probability of dying within 1 year. The [illegible] on 7520 rate prior for the month of the transfer is 10.6 percent and the standard annuity factor at that interest rate for a person age 60 in normal health is 7.4230. Thus, if the donor were not terminally ill, the present value of the annuity would be $764,569 ($103,000 X 7.4230). Because there is at least a 50 percent

probability that the donor will not survive for one more year, the standard section 7520 annuity factor may not be used to determine the present value of the donor's annuity interest. Instead, a special section 7520 annuity factor must be computed that takes into account the projection of the donor's actual life expectancy.

(5) *Additional limitations.* Section 7520 does not apply to the extent provided by the Internal Revenue Service in revenue rulings or revenue procedures.

(6) *Effective date.* The provisions of this paragraph are effective with respect to gifts made after [the date these regulations are published as final regulations in the **Federal Register**].

Margaret Milner Richardson,

Commissioner of Internal Revenue

DEPARTMENT OF EDUCATION

Direct Grant Programs and Fellowship Programs

AGENCY: Department of Education.

ACTION: Notice inviting applications for new awards for fiscal year 1995.

SUMMARY: The Secretary invites applications for new awards for fiscal year (FY) 1995 under some of the Department's direct grant and fellowship programs and announces deadline dates for the transmittal of applications under these programs. This combined application notice contains fiscal and programmatic information for potential applicants under the Department's programs announced in this issue of the **Federal Register**. This notice also lists FY 1995 programs previously announced in the **Federal Register**.

DATES: The chart for each principal office (Charts 1 through 6) includes the following dates for each program or competition: the date on which applications will be available, the deadline for submission of applications, and—for programs subject to Executive Order (EO) 12372 (Intergovernmental Review of Federal Programs)—the deadline date for transmittal of State Process Recommendations by State Single Points of Contact (SPOCs) and comments by other interested parties.

ADDRESSES: *For Applications or Further Information:* The address and telephone number for obtaining applications for, or further information about, a program are in the application notice for that program.

For Users of TDD or FIRS: Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number, if any, listed in the individual application notices. If a TDD number is not listed for a given program, individuals who use a TDD may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

For Intergovernmental Review: The address for transmitting recommendations and comments under intergovernmental review is in the appendix to this notice. The appendix also contains the addresses of individual SPOCs.

For Electronic Access to Information: Information about the Department's funding opportunities, including copies of application notices for discretionary grant competitions, can be viewed on the Department's electronic bulletin board (ED Board), telephone (202) 260–9950; or on the Internet Gopher Server at GOPHER.ED.GOV (under Announcements, Bulletins and Press Releases). However, the official application notice for a discretionary grant competition is the notice published in the **Federal Register**.

SUPPLEMENTARY INFORMATION: The Department's first combined application notice was published in September 1989. It was based on the idea—subsequently affirmed by numerous parties in the educational community—that placing as many application notices as possible in a single notice would assist potential applicants in planning projects and activities. In the intervening years, other issues affecting the application and grant award processes were identified, including the view of a number of potential applicants that the Department's schedule for grant awards did not allow grantees sufficient time to implement departmentally assisted projects before the start of the academic year.

As part of the Administration's goal to "reinvent" the Federal Government, a departmentwide Quality Improvement Team examined the Department's grant procedures and how these procedures affect the timely award of grants. The team's recommendations, which have been adopted by the Secretary, will result in a number of changes in the way the Department announces and awards grants under the Department's programs.

In order to announce and award grants to accommodate the academic year, the Secretary determined that grants should be awarded during the preceding spring, to the maximum extent possible. To allow applicants more time to prepare applications and the Department the necessary time to process those applications, the Secretary further determined that application announcements should be published in the spring preceding the year in which the grants will be awarded.

Thus, it is the Secretary's intent to publish the Department's annual combined application notice in the spring rather than in September, as has been the case until now. This policy will take full effect with the announcement of grants for FY 1996. For this transition year the combined notice for FY 1995 is being published in two sections—one now, announcing as many programs and competitions as possible at this time, and the other in September, announcing the remainder of the Department's programs and competitions.

Thus, this notice contains those application announcements that the Department is able to publish at this time, and references application notices for FY 1995 that were published before this combined notice. Readers should note that, unlike previous combined notices, this notice does not list—or give estimated dates for—programs and competitions for which application notices are to be published at a later date. Those programs and competitions will be listed in the September combined notice.

Among the programs and competitions omitted from this notice are those governed by statutes that are undergoing congressional reauthorization. These include programs administered by the Office of Bilingual Education and Minority Languages Affairs and the Office of Elementary and Secondary Education, and some programs of the Office of Educational Research and Improvement.

Also omitted from this notice are programs and competitions to be governed by new regulations or funding priorities that have not yet been issued in final form. In addition, this notice does not contain programs and competitions that will use application forms not yet approved by the Office of Management and Budget under the Paperwork Reduction Act of 1980.

The Secretary anticipates that most of the Department's remaining application notices for new awards for FY 1995 will be included in the second section of the combined notice, to be issued in September 1994, or published as separate application notices before then. The September document will reference all programs and competitions announced in this notice, as well as any for which application notices will have been published in the interim.

Within the next month the Secretary intends to publish in the **Federal Register** amendments to the Education Department General Administrative Regulations (EDGAR) that will change how the Department makes non-competing continuation discretionary grant awards for multi-year projects. The amendments will eliminate the requirement that a recipient submit an application for a continuation award. Instead, the due dates for performance reports will be adjusted so that they can be used to determine whether the recipient has met the criteria for receiving the continuation award. This action is being taken to improve the effectiveness, integrity, and quality of the grant award process and the projects that the Department funds.

The amendments will affect the information that an applicant must submit to the Department when it applies for a new grant for a multi-year project. Specifically, the applicant would submit a detailed budget for the entire project period, rather than for only the first budget period of the project. This combined application notice announces the amount the Secretary intends to award for only the first budget period of a multi-year project. In the application package for an individual program or competition, applicants will receive information about the amount the Secretary intends to make available for each year of a multi-year project. That will enable an applicant to provide a detailed budget for each year of the grant, as will be required by the amended regulations.

Organization of Notice

Each principal program office is assigned a separate chart as follows:

Chart 1—Office of Bilingual Education and Minority Languages Affairs.

Chart 2—Office of Educational Research and Improvement.

Chart 3—Office of Elementary and Secondary Education.

Chart 4—Office of Postsecondary Education.

Chart 5—Office of Special Education and Rehabilitative Services.

Chart 6—Office of Vocational and Adult Education.

Each of the charts that lists individual programs or competitions contains the following information:

- The CFDA number and the name of each affected program.
- The date of availability of applications.
- The deadline date for transmitting applications.
- For any program subject to the requirements of EO 12372 and the regulations in 34 CFR part 79, the deadline date for transmitting comments under intergovernmental review.
- The estimated range of awards.
- The estimated average size of awards.
- The estimated number of awards.

For programs or competitions that have already published in the **Federal Register** application notices for FY 1995 grants, the chart references the date and page number of the notice.

Following the chart for each principal program office are additional details for each affected program with an application notice in this combined notice, including—

- A brief statement of the purpose of the program;
- A list of eligible applicants;
- A list of regulations applicable to the program;
- Information regarding priorities, if any;
- Supplemental information, if necessary, regarding selection criteria, any fiscal matters peculiar to the program or competition, or other matters;
- The project period in months;
- The name, address, and telephone number of the person or office at the Department to contact for applications or information; and
- A citation of the statutory or other legal authority for the program.

In addition, some programs have listed an estimated award date.

Available Funds

The Congress has not yet enacted a fiscal year 1995 appropriation for the Department of Education. However, the Department is publishing this notice in order to give potential applicants adequate time to prepare applications. Estimates of the amount of funds available for these programs are based in part on the President's 1995 budget request and in part on the level of funding available for fiscal year 1994. The Department of Education is not Bound by any of the Estimates in this Notice.

National Education Goals

On March 31, 1994, the President signed into law the Goals 2000: Educate America Act (Pub. L. 103–227). The Act enunciates eight National Education Goals for the year 2000:

- All children in America will start school ready to learn.
- The high school graduation rate will increase to at least 90 percent.
- All students will leave grades 4, 8, and 12 having demonstrated competency in challenging subject matter, including English, mathematics, science, foreign languages, civics and government, economics, arts, history, and geography; and every school in America will ensure that all students learn to use their minds well, so they may be prepared for responsible citizenship, further learning, and productive employment in our Nation's modern economy.
- United States students will be first in the world in mathematics and science achievement.
- Every adult American will be literate and will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship.
- Every school in the United States will be free of drugs, violence, and the unauthorized presence of firearms and alcohol and will offer a disciplined environment conducive to learning.
- The Nation's teaching force will have access to programs for the continued improvement of their professional skills and the opportunity to acquire the knowledge and skills needed to instruct and prepare all American students for the next century.
- Every school will promote partnerships that will increase parental involvement and participation in promoting the social, emotional, and academic growth of children.

In developing this combined application notice the Department has sought to ensure that programs awarding grants during FY 1995 will further achievement of the National Education Goals. The Secretary encourages applicants under these programs to consider the National Education Goals in developing their applications.

Applicability of Section 5301 of the Anti-Drug Abuse Act of 1988

Some programs included in this combined application notice may provide that a grant, fellowship, traineeship, or other monetary benefit may be awarded to an individual. This award may be made to the individual either directly by the Department or by a grantee that receives Federal funds for the purpose of providing, for example, fellowships, traineeships, or other awards to individuals.

Section 5301 of the Anti-Drug Abuse Act of 1988 (Pub. L. 100–690, redesignated as section 421 of the Controlled Substances Act, 21 U.S.C. 862) provides that a sentencing court may deny eligibility for certain Federal benefits to an individual convicted of drug trafficking or possession. Thus, an individual who applies for a grant, fellowship, or other monetary benefit under a program covered by this notice should understand that, if convicted of drug trafficking or possession, he or she is subject to denial of eligibility for that benefit if the sentencing court imposes such a sanction.

This denial applies whether the Federal benefit is provided to the individual directly by the Department or is provided through a grant, fellowship, traineeship, or other award made available with Federal funds by a grantee.

Any persons determined to be ineligible for Federal benefits under the provisions of section 5301 are listed in the General Services Administration's "Lists of Parties Excluded from Federal Procurement or Nonprocurement Programs."

Applicability of the Federal Debt Collection Procedures Act of 1990

The programs announced in this notice make discretionary awards subject to the eligibility requirements of the Federal Debt Collection Procedures

Act of 1990 (Pub. L. 101–647; 28 U.S.C. 3201). The Act provides that if there is a judgment lien against a debtor's property for a debt to the United States, the debtor is not eligible to receive a Federal grant or loan, except direct payments to which the debtor is entitled as beneficiary, until the judgment is paid in full or otherwise satisfied.

Intergovernmental Review of Federal Programs

Certain programs in this notice are subject to the requirements of EO 12372 and the regulations in 34 CFR part 79. These programs are identified in Charts 1 through 6 with a date in the column headed "Deadline for intergovernmental review." For further information, an applicant under a program subject to the Executive order and other parties interested in that program—are directed to the appendix to this notice.

Program: International Education Exchange Program

Purpose of Program: To provide grants to strengthen and improve undergraduate instruction in international studies and foreign languages in the United States.

Eligible applicants: Institutions of higher education; combinations of institutions of higher education; and public and nonprofit private agencies and organizations, including professional and scholarly associations.

Applicable regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 82, 85 and 86; and (b) The regulations for this program in 34 CFR parts 655 and 658, as amended in the **Federal Register** on June 10, 1993 (58 FR 32574).

Priority: Under 34 CFR 658.35, and section 604(a)(4) of title VI of the Higher Education Act of 1965, as amended by the Higher Education Amendments of 1992, the Secretary gives preference to applications that meet the following competitive priority. The Secretary awards five points to an application that meets this competitive priority in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for the program:

Applications from institutions of higher education or combinations of institutions that—

(a) Require entering students to have successfully completed at least two years of secondary school foreign language instruction;

(b) Require each graduating student to earn two years of postsecondary credit in a foreign language or have demonstrated equivalent competence in the foreign language, or

(c) In the case of a two-year degree granting institution, offer two years of postsecondary credit in a foreign language.

Supplementary information: An institutional grantee shall pay a minimum of 50 percent of the cost of the project for each fiscal year.

Project period: 24 to 36 months.

For Applications or Information Contact: Christine Corey, U.S. Department of Education, 400 Maryland Avenue, SW., Washington, DC 20202–5332. Telephone: (202) 732–6061.

Program Authority: 20 U.S.C. 1124.

84.017A International Research and Studies Program

Purpose of Program: To provide grants to conduct research and studies to improve and strengthen instruction in modern foreign languages, area studies, and other international fields to provide full understanding of the places in which the foreign languages are commonly used.

Eligible Applicants: Public and private agencies, organizations, and institutions; and individuals.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 80, 82, 85, and 86; and (b) The regulations for this program in 34 CFR parts 655 and 660, as amended in the **Federal Register** on June 10, 1993 (58 FR 32674)

Priorities: Under 34 CFR 75.105(c)(2)(i), and 34 CFR 660.34 and 660.10, the Secretary gives preference to applications that meet either of the following competitive priorities. The Secretary awards five points to an application that meets either of these competitive priorities in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for the program:

(a) Studies and surveys to determine needs for increased or improved instruction in foreign language, area studies, or other international fields, including the demand for foreign language, area, and international specialists in government, education, and the private sector.

(b) Studies and surveys to assess the uses of graduates of programs supported under title VI of the Higher Education Act, as amended, by government, educational, and private sector organizations; and other studies assessing the outcomes and effectiveness of programs supported under title VI.

Project Period: 12 to 36 months.

For Applications or Information Contact: Jose L. Martinez, U.S. Department of Education, 400 Maryland Avenue, SW., Washington, DC 20202–5331. Telephone: (202) 732–6072.

Program Authority: 20 U.S.C. 1125

84.019A Fulbright-Hays Faculty Research Abroad Program

84.022A Fulbright-Hays Doctoral Dissertation Research Abroad Program

Purpose of Programs: (a) The Faculty Research Abroad Program offers opportunities to faculty members of higher education for research and study in modern foreign languages and area studies. (b) The Doctoral Dissertation Research Abroad Fellowship Program provides opportunities for graduate students to engage in full time dissertation research abroad in modern foreign languages and area studies.

Eligible Applicants: Institutions of higher education.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR), 34 CFR parts 74, 75, 77, 81, 82, 85 and 86; and (b) The regulations for these programs in 34 CFR parts 662 and 663

Priorities: Under 34 CFR 75.105(c)(3), 34 CFR 663.32(c) (Higher Education Programs in Modern Foreign Language Training and Area Studies—Faculty Research Abroad Fellowship Program), and 34 CFR 663.32(c) (Higher Education Programs in Modern Foreign Language Training and Area Studies—Doctoral Dissertation Research Abroad Fellowship Program) the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds only applications that meet this absolute priority:

Research projects that focus on one or more of the following: Africa, East Asia, Southeast Asia and the Pacific, South Asia, the Near East, East Central Europe and Eurasia, and the Western Hemisphere.

Note: Applications that propose projects focused on Western Europe will not be funded.

Project Period: Three to 12 months for Faculty Research Abroad; and 6 to 12 months for Doctoral Dissertation Research Abroad.

For Applications or Information Contact: For Faculty Research Abroad Program: Eliza Washington, U.S. Department of Education, 400 Maryland Avenue, SW., Washington, DC 20202–5331. Telephone: (202) 732–5075.

For Doctoral Dissertation Research Abroad Program: Karla Ver Beek Black, U.S. Department of Education, 400 Maryland Avenue, SW., Washington, DC 20202–5331. Telephone: (202) 732–5063.

Program Authority: 22 U.S.C. 2452(b)(6).

84.021A Fulbright-Hays Group Projects Abroad Program

Purpose of Program: To provide grants to support overseas projects in training, research, and curriculum development in modern foreign languages and area studies by teachers, students, and faculty engaged in a common endeavor. Projects may include short-term seminars, curriculum development, group research or study, or advanced intensive language projects.

Eligible Applicants: Institutions of higher education; State departments of education; nonprofit private educational organizations; and consortia of these types of institutions, departments, and organizations.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR), 34 CFR parts 74, 75, 77, 80, 81, 82, 85, and 86; (b) The regulations for this program in 34 CFR part 664

Priorities

Absolute Priorities: Under 34 CFR 75.105(c)(3) and 34 CFR 664.32 the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds only applications that meet this absolute priority:

Group projects that focus on one or more of the following: Africa, East Asia, the Western Hemisphere, Southeast Asia and the Pacific, East Central Europe and Eurasia, the Near East, and South Asia.

Note: Applications that propose projects focused on Western Europe will not be funded.

Competitive Priority: Within the absolute priority specified in this notice, the Secretary, under 34 CFR 75.105(c)(2)(i) and 34 CFR 664.32, gives preference to applications that meet the following competitive priority. The Secretary awards up to five points to an application that meets this competitive priority in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for the program:

Short-term seminars that develop and improve foreign language and area studies at elementary and secondary schools.

Invitational Priority: Within the absolute priority for and the Western Hemisphere, the Secretary is particularly interested in applications that meet the following invitational priority. However, under 34 CFR 75.105(c)(1) an application that meets this invitational priority does not receive competitive or absolute preference over other applications.

Projects that focus on Mexico

Project Periods:

For short-term seminar projects: five weeks.

For curriculum development projects: six to eight weeks.

For group research or study projects: two to twelve months.

For Applications or Information Contact: Dr. Lungching Chiao, U.S. Department of Education, 400 Maryland Avenue, SW., Washington, DC 20202–5332. Telephone: (202) 732–6061

Program Authority: 22 U.S.C. 2452(b)(6)

84.031G Endowment Challenge Grant Program

Purpose of Program. To provide [illegible] of higher education to establish or increase their endowment funds.

Eligible Applicants. Institutions of higher education that are designated a[illegible]ble. The Secretary publishes separately in the Federal Register a notice informing interested parties how to be designated as eligible to apply for [illegible].

Applicable Regulations: (a) The [illegible] 34 CFR 74.61(b) or 34 CFR 80.26(and the appendix to 34 CFR part 80), as applicable; 74.30, 74.84 and 74.85; 75.100 through 75.102 and 75.217; and in 34 CFR parts 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 628.

Project Period: 240 months (20 years)

Fundraising Period: 18 months (September 1995–March 1997).

For Applications or Information Contact: Anne Price-Collins, U.S. Department of Education, 400 Maryland Avenue, SW., room 3042, ROB–3. Washington, DC 20202–5337. Telephone: (202) 708–8866. Applications will be sent to those institutions designated as eligible under the title III programs.

Program Authority: 20 U.S.C. 1065

84.055A Cooperative Education Program—Administration, Part A Projects

Purpose of Program: To provide grants for new projects to encourage institutions of higher education to offer their students work experiences that will aid these students in their future careers and support them financially while in school.

Eligible Applicants: Institutions of higher education (IHEs), as defined in section 1201(a) of the Higher Education Act of 1965, as amended; and combinations of IHEs.

Note: The Secretary awards a grant for a new project to an institution, or combination of institutions, that has not received an administration project grant in the 10-year period immediately preceding the date for which the institution, or combination of institutions, requests a grant under this part.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 82, 85, and 86; and (b) The regulations for this program in 34 CFR parts 631 and 632, published in the Federal Register on August 11, 1993 (58 FR 42651).

Project Period: Up to 60 months.

For Applications or Information Contact: [illegible] U.S. Department of Education, 400 Maryland Avenue, SW., Courtyard Suite C–80, Portals Building, Washington, DC [illegible]

[illegible]

84.055B Cooperative Education Program—Demonstration Projects

Purpose of Program. To provide grants to demonstrate or determine the feasibility or value of innovative cooperative education projects, as well as to disseminate information about effective innovative projects.

Eligible Applicants. Institutions of higher education (IHEs), as defined in section 1201(a) of the Higher Education Act of 1965, as amended; combinations of IHEs; and public and nonprofit private agencies and organizations.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 82, 85, and 86; and (b) The regulations for this program in 34 CFR parts 631 and 633, published in the Federal Register on August 11, 1993 (58 FR 42651).

Priorities: Under 34 CFR 75.105(c)(3) and 34 CFR 633.21(a) the Secretary gives an absolute preference to applications that meet one or more of the following priorities. The Secretary funds under this competition only applications that meet one or more of these absolute priorities:

Absolute Priority 1: Model cooperative education projects in the fields of science and mathematics for women and minorities who are underrepresented in those fields.

Absolute Priority 2. Model cooperative education projects specializing in developing technical and professional work force skills for nontraditional students and students from special or underrepresented populations.

Absolute Priority 3: Model cooperative education projects that focus on developing and establishing articulation and other cooperative arrangements between or among secondary and postsecondary educational institutions.

Project Period: Up to 36 months.

For Applications or Information Contact: Dr. John E. Bonas, U.S. Department of Education, 400 Maryland Avenue, SW., Courtyard Suite C–80, Portals Building, Washington, DC 20202–5329. Telephone: (202) 260–3265.

Program Authority: 20 U.S.C. 1133, 1133a, 1133c.

84.055C Cooperative Education Program—Research Projects

Purpose of Program. To provide grants to conduct studies to improve [illegible] of cooperative education methods of cooperative education for the benefit of the cooperative education community.

Eligible Applicants. Institutions of higher education (IHEs), as defined in section 1201(a) of the Higher Education [illegible] of IHEs and public and nonprofit agencies and organizations.

Applicable Regulations. (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 82, 85, and 86; and (b) The regulations for this program in 34 CFR parts 631 and 634, published in the Federal Register on August 11, 1993 (58 FR 42651).

Priorities: Under 34 CFR 75.105(c)(3) and 34 CFR 634.21(a) the Secretary gives an absolute preference to applications that meet one or more of the following priorities. The Secretary funds under this competition only applications that meet one or more of these absolute priorities:

Absolute Priority 1: Longitudinal studies on former cooperative education students and non-cooperative education students to determine the relationship between the students' cooperative education work experiences and one or more of the following:

(a) Initial job placement.

(b) Job advancement.

(c) Long-term earnings.

Absolute Priority 2: Assessment of the impact of cooperative education on college retention rates and on the academic achievement of students participating in cooperative education, compared to nonparticipants.

Absolute Priority 3: Assessment of the impact of comprehensive cooperative education projects on—

(a) The institution;

(b) Students at the institution;

(c) Faculty;

(d) Employment opportunities; and

(e) Factors influencing the successes and failures of comprehensive cooperative education projects.

Absolute Priority 4. Identification and assessment of incentives and factors that influence an IHE to continue its cooperative education project successfully after Federal financial assistance has ended.

Project Period: Up to 36 months.

For Applications or Information Contact: Dr. John E. Bonas, U.S. Department of Education, 400 Maryland Avenue, SW., Courtyard Suite C–80, Portals Building, Washington, DC 20202–5329. Telephone: (202) 260–3265.

Program Authority: 20 U.S.C. 1131, 1133a, 1133c

84.055D Cooperative Education Program—Training and Resource Center Projects

Purpose of Program: To provide grants to train and assist individuals who participate in or are planning to participate in the planning, establishment, and administration of cooperative education projects.

Eligible Applicants: Institutions of higher education (IHEs), as defined in section 1201(a) of the Higher Education Act of 1965, as amended; combinations of IHEs; and public and private nonprofit agencies and organizations.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 82, 85, and 86; and (b) The regulations for this program in 34 CFR parts 631 and 635, published in the **Federal Register** on August 11, 1993 (58 FR 42651).

Priority: Under 34 CFR 75.105(c)(2)(ii) and 34 CFR 635.4(b)(5) and 34 CFR 635.21(a) the Secretary gives preference to applications that meet the following competitive priority. An application that meets this competitive priority is selected by the Secretary over applications of comparable merit that do not meet the priority:

Supporting partnerships in which an institution with an existing comprehensive cooperative education program assists one or more institutions to—

(a) Improve their existing cooperative education program; or

(b) Establish, expand, or improve a comprehensive cooperative education program.

Project Period: Up to 36 months

For Applications or Information Contact: Dr. John E. Bonas, U.S. Department of Education, 400 Maryland Avenue, SW., Courtyard Suite C–80, Portals Building, Washington, DC 20202–5329. Telephone: (202) 260–3265.

Program Authority: 20 U.S.C. 1133, 1133a, 1133c.

84.055E Cooperative Education Program—Administration, Part B Projects

Purpose of Program: To provide grants for existing projects to encourage individual institutions of higher education to offer their students work experiences that will aid these students in their future careers and support them financially while in school.

Eligible Applicants: Individual institutions of higher education, as defined in section 1201(a) of the Higher Education Act of 1965, as amended.

Note: The Secretary awards a grant for an existing project to an institution that is operating a cooperative education program, as defined under 34 CFR 631.5(b).

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 82, 85, and 86; and (b) The regulations for this program in 34 CFR parts 631 and 632, published in the **Federal Register** on August 11, 1993 (58 FR 42651).

Project Period: Up to 60 months

For Applications or Information Contact: Dr. John E. Bonas, U.S. Department of Education, 400 Maryland Avenue, SW., Courtyard Suite C–80, Portals Building, Washington, DC 20202–5329. Telephone: (202) 260–3265.

Program Authority: 20 U.S.C. 1133–1133b.

84.097A Law School Clinical Experience Program

Purpose of Program: To provide grants to continue, expand, or establish programs that provide clinical experience to students in the practice of law.

Eligible Applicants: Individual law schools that have been accredited by a nationally recognized agency approved by the Secretary; and combinations and consortiums of accredited law schools.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 82, 85, and 86; and (b) the regulations of this program in 34 CFR part 639.

Priorities: Under 34 CFR 75.105(c) and 34 CFR 639.11 the Secretary gives an absolute preference to applications that meet both of the following priorities. The Secretary funds under this program only those competing applications that meet both of these absolute priorities.

Projects that—

(a) Provide legal experience in the preparation and trial of actual cases, including administrative cases and the settlement of controversies outside the courtroom; and

(b) Provide service to persons who have difficulty in gaining access to legal representation.

Supplementary Information: The authorizing statute for the program permits the Secretary to pay up to 90 percent of the costs of projects at law schools (20 U.S.C. 1134u(a)). The program regulations permit the Secretary to establish annually a lower maximum Federal share (34 CFR 639.40(a)(2)). For fiscal year 1995 the Secretary sets the maximum Federal share at 65 percent to establish programs, 50 percent to expand programs, and 35 percent to continue programs of legal clinical experience.

Project Period: Up to 36 months

For Applications or Information Contact: John J. Lank, U.S. Department of Education, 400 Maryland Avenue, SW., Courtyard Suite C–80, Portals Building, Washington, DC 20202–5129. Telephone: (202) 260–3281.

Program Authority: 20 U.S.C. 1134u, 1134v.

84.120 Minority Science Improvement Program—Institutional, Design, Special, and Cooperative Projects

Purpose of Program: To effect long-range improvement in science education at predominantly minority institutions and to increase the flow of underrepresented ethnic minorities, particularly minority women, into scientific careers.

Eligible Applicants

(a) *For institutional, design, and special projects described in 34 CFR 637.14(a), (b) and (c):* Public and nonprofit private minority institutions.

Note: A minority institution is defined in 34 CFR 637.4(b) as an accredited college or university whose enrollment of a single minority group or combination of minority groups, as defined in 34 CFR 637.4(b), exceeds 50 percent of the total enrollment.

(b) *For institutional, design, and special projects described in 34 CFR 637.14(b) and (c):* Non-profit science-oriented organizations; professional scientific societies; and nonprofit accredited colleges and universities that render a needed service to a group of eligible minority institutions, as defined in 34 CFR 637.4(b), or that provide inservice training of project directors, scientists, and engineers from eligible minority institutions.

(c) *For cooperative projects.* Groups of nonprofit accredited colleges and universities whose primary fiscal agent is an eligible minority institution, as defined in 34 CFR 637.4(b).

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 637.

Project Period: Up to 36 months

For Applications or Information Contact: Dr. Argelia Velez-Rodriguez, U.S. Department of Education, 400 Maryland Avenue, SW., Courtyard Suite C–80, Portals Building, Washington, DC 20202–5329. Telephone: (202) 260–3261

Program Authority: 20 U.S.C. 1135b–1135b–3, 1135d–1135d–6.

84.153A Business and International Education Program

Purpose of Program: To provide grants both to enhance international business education programs and expand the capacity of the business community to engage in international economic activities.

Eligible Applicants: Institutions of higher education that have entered into agreements with business enterprises, trade organizations, or associations engaged in international economic activity.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 82, 85 and 86; and (b) The regulations for this program in 34 CFR parts 655 and 661.

Supplementary Information: A grantee shall pay a minimum of 50 percent of the cost of the project for each fiscal year.

Project Period: 24 months.

For Applications or Information Contact: Susanna C. Easton or Sarah T. Beaton, U.S. Department of Education, 400 Maryland Avenue SW., Washington, DC 20202–5332. Telephone: (202) 732–6061.

Program Authority: 20 U.S.C. 1130–1130b.

84.220A Centers for International Business Education Program

Purpose of Program: To provide grants to eligible applicants to pay the Federal share of the cost of planning, establishing, and operating centers for international business.

Eligible Applicants: Institutions of higher education; and combinations of institutions of higher education.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 82, 85, 86; and (b) Because there are no program-specific regulations for this program, applicants are encouraged to read the authorizing statute for the Centers for International Business Education Program, under section 612 of part B, title VI, of the Higher Education Act of 1965, as amended by section 6261 of the Omnibus Trade and Competitiveness Act of 1988 (Pub.L. 100–418).

Project Period: 36 months.

For Applications or Information Contact: Susanna C. Easton, U.S. Department of Education, 400 Maryland Avenue, SW., Washington, DC 20202–5332. Telephone: (202) 732–6061.

Program Authority: 20 U.S.C. 1130–1.

For Applications or Additional Information Contact: Vicki V. Payne, U.S. Department of Education, 400 Maryland Avenue, SW., Courtyard Suite C–80, Portals Building, Washington, DC 20202–5329. Telephone: (202) 260–3291.

Program Authority: 20 U.S.C. 1134–1134c–2.

84.261A Dwight D. Eisenhower Leadership Development Program

Purpose of Program: To provide grants that establish prototypes that reach out to young Americans and promote the practical study and teachings of leadership through programs specially prepared to foster the development of new generations of leaders in the areas of national and international affairs.

Eligible Applicants: Institutions of higher education (IHEs), as defined in section 1201 of the Higher Education Act of 1965, as amended; and nonprofit private organizations in combination with IHEs.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 82, 85, 86; and (b) Because there are no program-specific regulations for this program, applicants are encouraged to read the authorizing statute for the Dwight D. Eisenhower Leadership Development Act, under part D, title X of the Higher Education Act of 1965, as amended (Pub. L. 102–325).

Project Period: Up to 24 months.

For Applications or Information Contact: Dr. Donald N. Bigelow, U.S. Department of Education, 400 Maryland Avenue, SW., Washington, DC 20202–5247. Telephone: (202) 732–6070.

Program Authority: 29 U.S.C. 1135f.

84.116F Fund for the Improvement of Postsecondary Education—Innovative Projects for Community Service

Purpose of Program: To provide grants to support projects encouraging students to participate in community service activities.

Eligible Applicants: Institutions of higher education (IHEs); combinations of IHEs; and other public and nonprofit private institutions and agencies.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 82, 85, and 86, with the exceptions noted in 34 CFR 630.4(a); and (b) The regulations for this program in 34 CFR part 630.

Selection Criteria: In evaluating applications for grants under this program competition, the Secretary uses the following selection criteria chosen from those listed in 34 CFR 630.32.

(a) *Significance for Postsecondary Education.* The Secretary reviews each proposed project for its significance in improving postsecondary education by determining the extent to which it would—

(1) Achieve the purpose of the Innovative Projects for Community Service Program as referenced in 34 CFR 630.11(c);

(2) Address an important problem or need;

(3) Represent an improvement upon, or important departure from, existing practice; and

(4) Achieve far-reaching impact through improvements that will be useful in a variety of ways and in a variety of settings.

(b) *Feasibility.* The Secretary reviews each proposed project for its feasibility by determining the extent to which—

(1) The proposed project represents an appropriate response to the problem or need addressed;

(2) The applicant is capable of carrying out the proposed project as evidenced by, for example—

(i) The applicant's understanding of the problem or need;

(ii) The quality of the project design, including objectives, approaches, and evaluation plan;

(iii) The adequacy of resources, including money, personnel, facilities, equipment, and supplies;

(iv) The qualifications of key personnel who would conduct the project; and

(v) The applicant's relevant prior experience;

(3) The applicant and any other participating organizations are committed to the success of the proposed project, as evidenced by, for example—

(i) Contribution of resources by the applicant and by participating organizations;

(ii) Their prior work in the area; and

(iii) The potential for continuation of the proposed project beyond the period of funding (unless the project would be self-terminating); and

(4) The proposed project demonstrates potential for dissemination to or adaptation by other organizations, and shows evidence of interest by potential users.

(c) *Appropriateness of funding projects.* The Secretary reviews each application to determine whether support of the proposed project by the Secretary is appropriate in terms of the availability of other funding sources for the proposed activities.

The Secretary gives equal weight to the selection criteria on significance, feasibility, and appropriateness. Within

each of these criteria, the Secretary gives equal weight to each of the subcriteria. In applying the criteria, the Secretary first analyzes an application in terms of each individual criterion. The Secretary then bases the final judgment of an application on the overall assessment of the degree to which the applicant addresses all selection criteria.

Project Period: 12 to 36 months.

For Applications and Information Contact: FIPSE, 400 Maryland Avenue, SW., room 3100, ROB–3, Washington, DC 20202–5175. Telephone: (202) 205–0082 to order applications; or (202) 708–5750 for information.

Program Authority: 20 U.S.C. 1137–1137a.

CHART 5.—OFFICE OF SPECIAL EDUCATION AND REHABILITATIVE SERVICES

84.023A, C, E, and N Research in Education of Individuals With Disabilities Program

Purpose of Program: To advance and improve the knowledge base and improve the practice of professionals, parents, and others providing early intervention, special education, and related services—including professionals in regular education environments—to provide children with disabilities effective instruction and enable these children to learn successfully.

Eligible Applicants: State and local educational agencies; institutions of higher education; and other public agencies and nonprofit private organizations.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 324.

Priorities: Under 34 CFR 75.105(c)(3) and 34 CFR 324.10 the Secretary gives an absolute preference to applications that meet the following priorities. The Secretary funds under these competitions only applications that meet one of these absolute priorities:

Absolute Priority 1—Advancing and Improving the Research Knowledge Base (84.023A). This priority supports a wide range of research and related activities that support innovation, development, exchange, and use of advancements in knowledge and practice designed to contribute to the improvement of instruction and learning of infants, toddlers, children, and youth with disabilities.

Invitational Priority: Within Absolute Priority 1 the Secretary is particularly interested in applications that meet one or more of the following invitational priorities. However, under 34 CFR 75.105(c)(1) an application that meets one or more of these invitational priorities does not receive competitive or absolute preference over other applications:

The Secretary is particularly interested in pilot studies, projects that employ new methodologies, descriptive studies, projects to advance assessment, projects that synthesize state-of-the-art research and practice, projects for research dissemination and utilization, and projects that analyze extant data bases. The Secretary further encourages studies that use these approaches to foster the full participation and maximize the achievement of students with disabilities in education reform efforts related to the Goals 2000: Educate America Act.

Project Period: Up to 12 months.

Supplementary Information: No project will be funded at an amount more than the high end of the range specified in Chart 5. Any project approved by reviewers that exceeds this amount will be required to be performed, as proposed, within the award amount.

Absolute Priority 2—Field-Initiated Research Projects (84.023C). This priority provides support for field-initiated research projects focusing on special education and related services for children and youth with disabilities and early intervention services for infants and toddlers, consistent with the purposes of the program, as described in 34 CFR 324.1.

Supplementary Information: No project will be funded at an amount more than the high end of the range specified in Chart 5. Any project approved by reviewers that exceeds this amount will be required to be performed, as proposed, within the award amount.

Project Period: Up to 60 months.

Absolute Priority 3—Synthesize and Communicate a Professional Knowledge Base: Contributions to Research and Practice (84.023E). A project must—

(a) In conducting a synthesis of the literature—

(1) Identify and implement rigorous social science methods for synthesizing the professional knowledge base (e.g., integrative reviews (Cooper, 1982), best-evidence synthesis (Slavin, 1989), meta-analysis (Glass, 1977), multi-vocal approach (Ogawa & Malen, 1991), and National Institute of Mental Health consensus development program (Huberman, 1977));

(2) Identify the topical focus and the relevant and irrelevant concepts under review, and pose hypotheses around which the synthesis would be conducted;

(3) Develop hypotheses with input from potential consumers of the synthesis to enhance the usability and validity of project efforts. Consumers include researchers, policymakers, educators, other relevant practitioners, individuals with disabilities, and parents;

(4) Develop and implement procedures for locating and organizing the extant literature and ensure that these procedures address and guard against potential threats to the integrity and generalizability of findings;

(5) Establish criteria and procedures for judging the appropriateness of studies;

(6) Meet with the Office of Special Education Programs and with the other projects funded under this priority to review their topical focus and methodological approach for conducting the synthesis prior to the start of their respective synthesis; and

(7) Analyze and interpret the professional knowledge base, including identification of general trends in the literature, points of consensus and conflict among the findings, and areas of evidence where the literature base is lacking. The interpretation of the literature base must address the contributions of the findings for improving the practice of professionals educating children and youth with disabilities; and

(b) In communicating its findings—

(1)(i) Cooperate with OSEP to convene a forum—to be held in Washington, DC between the 18th and 21st months of the project—at which the project would exchange findings from the synthesis activity with researchers, policymakers, educators, other relevant practitioners, individuals with disabilities, and parents; and

(ii) Provide draft copies of its analysis and interpretations to participants;

(2) Based on discussion and feedback from forum participants, prepare final synthesis documents; and

(3)(i) Develop the information products that have the greatest potential for use by national professional education and parent organizations in their existing communication systems and member networks;

(ii) In developing the information products the project must propose products appropriate for the topical focus and audience, provide a rationale for those proposed types of products, and propose communication strategies for fostering the use of the products by the appropriate audience; and

(iii) The project must coordinate with OSEP to finalize information products for various systems and networks.

Each project must budget for—

(1) A two-day meeting in Washington, DC, during the first year, as described under paragraph (b)(1) of this priority;

(2) The two-day Research Project Directors' meeting to be held in Washington, DC, each year of the project; and

(3) Two trips for up to two days each to Washington, DC for the activity described under paragraph (b)(3)(iii) of this priority.

Supplementary Information: The estimated average size of award specified in Chart 5 is for year one only. Year two is estimated at $50,000.

Project Period: Up to 24 months.

Absolute Priority 4—Initial Career Awards (84.023N).

(a) To be considered for funding under this priority, a project must—

(a) Pursue a line of inquiry that reflects a programmatic strand of research emanating either from theory or a conceptual framework. The line of research must be evidenced by a series of related questions that establish directions for designing future studies extending beyond the support of this award. The project is not intended to represent all inquiry related to the particular theory or conceptual framework; rather, it is expected to initiate a new line or advance an existing one;

(b) Include, in its design and conduct, sustained involvement with nationally recognized experts having substantive or methodological knowledge and expertise relevant to the proposed research. Experts do not have to be at the same institution or agency at which the project is located, but the interaction must be sufficient to develop the capacity of the researcher to effectively pursue the research into mid-career activities. At least 50 percent of the researcher's time must be devoted to the project;

(c) Prepare its procedures, findings, and conclusions in a manner that informs other interested researchers and is useful for advancing professional practice or improving programs and services to infants, toddlers, children, and youth with disabilities and their families; and

(d) Disseminate project procedures, findings, and conclusions to appropriate research institutes, clearinghouses, and technical assistance providers.

A project must budget for the two-day Research Project Directors' meeting to be held in Washington, DC each year of the project.

Competitive Priority: Within Absolute Priority 4, the Secretary, under 34 CFR 75.105(c)(2)(i), gives preference to applications that meet the following competitive priority. The Secretary awards up to 10 points to an application that meets this competitive priority in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for the program:

A project that would give a priority to providing support for individuals who are members of groups that have been underrepresented in the field of special education research, such as members of racial or ethnic minority groups (e.g. Black, Hispanic, American Indian, or Alaskan Native, Asian or Pacific Islander), and individuals with disabilities.

Project Period: Up to 36 months

For Applications and General Information Contact: Darlene Crumbley, U.S. Department of Education, 400 Maryland Avenue, SW., room 3525, Switzer Building, Washington, DC 20202–2641. Telephone (202) 205–8653, or FAX: (202) 205–8105.

For Technical Information Contact: For Advancing and Improving the Research Knowledge Base (CFDA 84.023A): Judith Fein, U.S. Department of Education, 400 Maryland Avenue, SW., room 3524, Switzer Building, Washington, DC 20202–2641 Telephone: (202) 205–8116.

For Field-Initiated Research Projects (CFDA 84.023C): Dr. Tom V. Hanley U.S. Department of Education, 400 Maryland Avenue, SW., room 3526, Switzer Building, Washington, DC 20202–2641. Telephone: (202) 205–8110.

For Synthesize and Communicate a Professional Knowledge Base: Contributions to Research and Practice (CFDA 84.023E): Ellen Schiller, U.S. Department of Education, 400 Maryland Avenue, SW., room 3523, Switzer Building, Washington, DC 20202–2641 Telephone: (202) 205–8123.

For Initial Career Awards (84.023N): Melville J. Appell, U.S. Department of Education, 400 Maryland Avenue, SW., room 3525, Switzer Building, Washington, DC 20202–2640. Telephone: (202) 205–8113.

Program Authority: 20 U.S.C. 1441–1443.

84.024B and P Early Education Program for Children With Disabilities

Purpose of Program: To provide Federal financial assistance (a) to address the special needs of children with disabilities, birth through age eight, and their families; and (b) to assist State and local entities in expanding and improving programs and services for these children and their families.

Eligible Applicants: Public agencies and nonprofit private organizations. In addition, profit-making organizations are eligible to apply under Early Childhood Model Inservice Training Projects (84.024P).

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 309.

Priorities. Under 34 CFR 75.105(c)(3) and 34 CFR part 309 the Secretary gives an absolute preference to applications that meet the following priorities. The

Secretary funds under these competitions only applications that meet one of these absolute priorities:

Absolute Priority 1—Model Demonstration Projects for Young Children with Disabilities (84.024B). (a) A model demonstration project funded under this priority must—

(1) Address a specific service problem or issue;

(2) Address specific components or strategies and the rationale—based on theory, research, or evaluation—for those components or strategies;

(3) Delineate a specific population of children—i.e., by age, disability, diagnosis, level of functioning, and membership in a special population, if appropriate—and their families;

(4) Produce detailed procedures and materials that enable others to replicate the model as implemented at the original site;

(5) As appropriate, develop and evaluate the model in integrated, age-appropriate settings that facilitate the interaction between project participants and their peers without disabilities, including models developed for use in home or in hospital settings (such as neonatal intensive care units); and

(6) Evaluate the model at the original model development site and—if approved for funding beyond the initial three years of the project period—at other sites to determine whether the model can be adopted by other sites and yield similar positive results. In its evaluation, a project must use multiple outcome measures to determine the effectiveness of the model and its component strategies, including measures of multiple, functional child and family outcomes, other indices of the effects of the model, and cost data associated with implementing the model.

(b) In determining whether to continue a project for the fourth and fifth years of the project period, in addition to considering factors in 34 CFR 75.253(a), the Secretary considers the following:

(1) The degree to which the model developed by the project is, or would be by the end of year three, designed soundly and replicable by other agencies, and provides state-of-the-art interventions for the target population.

(2) The extent to which dissemination of the model would meet a significant or unique service need in other geographic locations.

(3) The degree to which the project has initially produced compelling, quantifiable evidence of the effectiveness of the model as implemented at the original development site.

(4) Availability of funding for the model from sources other than the Early Education Program for Children with Disabilities to support the operation of the model at the original development site during years four and five.

(5) The extent to which the project has documented the commitment of other agencies not affiliated with the original project to adopt its model and participate in evaluation of the model during years four and five of the project period.

(6) The extent to which the project has sound plans for aiding in replication and for evaluating its model at replication sites during years four and five of the project period.

A project that applies for funding for the fourth and fifth years must set aside in its budget for the third year funds to cover costs associated with the services to be performed by the review team appointed by the Secretary to evaluate the project in the third year. These funds are estimated to be approximately $4,000.

Competitive Priority. Within Absolute Priority 1, the Secretary, under 34 CFR 75.105(c)(2)(i), gives preference to applications that meet the following competitive priority. The Secretary awards up to 10 points to an application that meets this competitive priority in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for the program:

Projects designed to develop, implement, evaluate, and disseminate models that—

(a) Incorporate the appropriate use of assistive technology to enhance services to young children with disabilities; or

(b) Address the unique needs of young children with low incidence disabilities, such as deaf-blindness.

Project Period: Up to 60 months.

Absolute Priority 2—Early Childhood Model Inservice Training Projects (84.024P). A model inservice training project considered for funding under this priority must—

(a) Identify the target population to be trained, including their roles and responsibilities, and the national needs addressed by the model;

(b) Delineate a conceptual framework upon which the training model is to be based, including the changes in personnel roles and responsibilities and the skills needed to implement the new roles or responsibilities;

(c) Identify the content of training and the format for delivery of training and other activities of the model;

(d) Develop and demonstrate an inservice training model for professionals, paraprofessionals, or both, who are currently providing services to infants, toddlers, and preschool-aged children with disabilities and their families, or to those individuals who through retraining could provide those services;

(e) Include goals, objectives, and activities to ensure that personnel participating in the training acquire skills to work effectively with children and families who are members of cultural, linguistic, and racial minority groups.

(f) Include within the model an array of follow-up and support activities that ensure that personnel participating in the training acquire the skills being taught and use that knowledge in meeting the service needs of young children with disabilities and their families;

(g) Coordinate with the State agencies responsible for the Comprehensive System of Personnel Development (CSPD) under part H or part B of IDEA, and arrange for credit to be granted to trainees by appropriate agencies, organizations, or institutions of higher education; and

(h) Evaluate the inservice training model through direct assessment of participants' skills following the training and, after a period of time, include some direct observation measures of trainees in the service setting using standardized observational rating techniques.

Competitive Priority. Within Absolute Priority 2, the Secretary, under 34 CFR 75.105(c)(2)(i), gives preference to applications that meet the following competitive priority. The Secretary awards up to 10 points to an application that meets this competitive priority in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for the program:

Projects that provide evidence that they will develop, demonstrate, evaluate, and disseminate models that—

(a) Incorporate collaborative, multi-disciplinary, team training approaches to personnel development; or

(b) Focus on paraprofessionals and address their unique training needs.

Project Period: Up to 36 months.

For Applications and General Information Contact: Sonja Jenkins, U.S. Department of Education, 400 Maryland Avenue, SW., room 4716, Switzer Building, Washington, DC 20202–2732. Telephone (202) 205–9377. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–8169.

For Technical Information Contact: Gail Houle, U.S. Department of Education, 400 Maryland Avenue, SW.,

room 4613, Switzer Building, Washington, DC 20202–2644. Telephone: (202) 205–9045. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–8169.

Program Authority: 20 U.S.C. 1423.

84.025A and E Services for Children With Deaf-Blindness Program

Purpose of Program: To provide Federal assistance to address the special needs of infants, toddlers, children, and youth with deaf-blindness.

Eligible Applicants: Public or nonprofit private agencies, institutions, or organizations, including an Indian tribe and the Bureau of Indian Affairs of the Department of the Interior (if acting on behalf of schools operated by the Bureau for children and students on Indian reservations); and tribally controlled schools funded by the Department of the Interior.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 307.

Priorities. Under 34 CFR 75.105(c)(3) and 34 CFR part 307, the Secretary gives an absolute preference to applications that meet the following priorities. The Secretary funds under these competitions only applications that meet one of these absolute priorities:

Absolute Priority 1(a)—State and Multi-State Projects for Children Who Are Deaf-Blind; and 1(b)—Optional Pilot Projects for Children Who Are Deaf-Blind (84.025A). This priority supports two types of projects:

(a) State and Multi-State Projects for Children who are Deaf-Blind. These projects may provide services to infants, toddlers, children, and youth with deaf-blindness and technical assistance to public and private agencies, institutions, and organizations providing early intervention, educational, transitional, vocational, early identification, and related services to children with deaf-blindness, as described in 34 CFR 307.11.

(b) Optional Pilot Projects for Children who are Deaf-Blind.

(**Note:** Only successful applicants under State and Multi-State Projects (Absolute Priority 1(a)) are considered for funding under Optional Pilot Projects (Absolute Priority 1(b).) These projects are designed to expand local educational agency capabilities by providing services to children with deaf-blindness that supplement services already provided to children and youth through State and local resources, and encourage eventual assumption of funding responsibility by State and local authorities, as described in 34 CFR 307.10(d) and 307.14.

Invitational Priority. Within Absolute Priority 1(b) (Optional Pilot Projects for Children Who Are Deaf-Blind), the Secretary is particularly interested in applications that meet one or more of the following invitational priorities. However, under 34 CFR 75.105(c)(1), an application that meets one or more of these invitational priorities does not receive competitive or absolute preference over other applications:

Projects that propose to provide validated effective practices related to—

(a) Transition from school to adult life in the community;

(b) Early identification and intervention for infants and toddlers who are deaf-blind;

(c) Strategies that facilitate the integration of students who are deaf-blind into neighborhood schools;

(d) Acquisition of communication or orientation and mobility skills; or

(e) Facilitation of family involvement.

Supplementary Information: Applicants seeking support for both 1(a) State and Multi-State Projects for Children who are Deaf-Blind and 1(b) Optional Pilot Projects for Children who are Deaf-Blind must submit a two-part application, each complete by itself and containing its individual budget.

The Secretary evaluates applications for State and Multi-State Projects using criteria in 34 CFR 307.33.

The Secretary evaluates applications for Optional Pilot Projects using criteria in 34 CFR 307.36.

Project Period: Up to 48 months.

Absolute Priority 2—Technical Assistance for Transitional Services for Children and Youth Who Are Deaf-Blind (84.025E). This priority supports a project to provide technical assistance to State educational agencies in making available to adolescents and young adults who are deaf-blind, programs and services to facilitate their transition from education to employment and other services such as vocational, independent living, and other postsecondary services. The project must provide technical assistance, training or inservice training, and assistance in the development or replication of successful innovative approaches, to assist adolescents and young adults who are deaf-blind transition to adult living. (34 CFR 307.13)

Project Period: 12 months.

For Applications and General Information Contact: Robin Buckler, U.S. Department of Education, 400 Maryland Avenue, SW., room 4617, Switzer Building, Washington, DC 20202–2732. Telephone (202) 205–8168. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–8169.

For Technical Information Contact: Charles Freeman, U.S. Department of Education, 400 Maryland Avenue, SW., room 4617, Switzer Building, Washington, DC 20202–2644. Telephone: (202) 205–8165. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–8169.

Program Authority: 20 U.S.C. 1422.

84.029A–Q Training Personnel for the Education of Individuals With Disabilities—Grants for Personnel Training and Parent Training and Information Centers

Purpose of Program: (a) The purpose of Grants for Personnel Training is to increase the quantity and improve the quality of personnel available to serve infants, toddlers, children, and youth with disabilities. (b) The purpose of Parent Training and Information Centers is to enable parents to work more effectively with professionals in meeting the needs of infants, toddlers, children, and youth with disabilities.

Eligible Applicants: Under Absolute Priorities 1, 2, 3, 4, 5, 7, and 10 (Grants for Personnel Training): institutions of higher education; and appropriate nonprofit agencies.

Under Absolute Priority 6 (Special Projects): institutions of higher education; State agencies; and other appropriate nonprofit agencies.

Under Absolute Priorities 8 (Parent Training and Information Centers) and 9 (Experimental Parent Centers): parent organizations, as defined in 34 CFR 316.5(a).

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 76, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR parts 316 and 318.

Priorities: Under 34 CFR 75.105(c)(3), 34 CFR 316, and 34 CFR 318, the Secretary gives an absolute preference to applications that meet the following priorities. The Secretary funds under this program only those applications that meet any one of these absolute priorities:

(**Note:** If an applicant wishes to apply under more than one of these absolute priorities, the applicant must submit a separate application under each affected priority.)

Absolute Priority 1—Training Personnel to Serve Low Incidence Disabilities (84.029A). This priority supports projects to train teachers of children with visual impairments,

including blindness; hearing impairments, including deafness, orthopedic impairments, other health impairments, autism, traumatic brain injury, and severe and multiple disabilities. (34 CFR 318.11(a)(10)).

Competitive Priorities: Within Absolute Priority 1, the Secretary, under 34 CFR 75.105(c)(2)(i), gives preference to applications that meet one or more of the following competitive priorities. The Secretary awards up to 10 additional points to an application that meets one or more of these competitive priorities in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for the program:

(a) Training personnel to provide transition assistance from school to adult roles (34 CFR 318.11(a)(12))

(b) Preparing personnel to meet the National Education Goals (34 CFR 318.11(a)(17)).

(c) Utilizing innovative recruitment and retention strategies (34 CFR 318.11(a)(8)).

Project Period: Up to 36 months.

Absolute Priority 2—Preparation of Personnel for Careers in Special Education (84.029B). This priority supports preservice preparation of personnel for careers in special education. Preservice training includes additional training for currently employed teachers seeking additional degrees, certifications, or endorsements. Training at the baccalaureate, masters, or specialist level is appropriate. Under this priority, "personnel" includes special education teachers, speech-language pathologists, audiologists, adapted physical education teachers, vocational educators, and instructive and assistive technology specialists (34 CFR 318.11(a)(1)).

Competitive Priorities: Within Absolute Priority 2, the Secretary, under 34 CFR 75.105(c)(2)(i), gives preference to applications that meet one or more of the following competitive priorities. The Secretary awards up to 10 additional points to an application that meets one or more of these competitive priorities in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for the program:

(a) Training personnel to provide transition assistance from school to adult roles (34 CFR 318.11(a)(12))

(b) Preparing personnel to meet the National Education Goals (34 CFR 318.11(a)(17)).

(c) Promoting full qualifications for personnel serving infants, toddlers, children, and youth with disabilities (34 CFR 318.11(a)(9).

Project Period: Up to 36 months

Absolute Priority 3—Preparation of Leadership Personnel (84.029D). This priority supports projects designed to provide preservice professional preparation of leadership personnel in special education, related services, and early intervention. Leadership training is considered to be preparation in—

(a) Supervision and administration at the advanced graduate, doctoral, and post-doctoral levels;

(b) Research; and

(c) Personnel preparation at the doctoral and post-doctoral levels (34 CFR 318.11(a)(4)).

Competitive Priorities: Within Absolute Priority 3, the Secretary, under 34 CFR 75.105(c)(2)(i), gives preference to applications that meet one or more of the following competitive priorities. The Secretary awards up to 10 additional points to an application that meets one or more of these competitive priorities in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for the program:

(a) Training personnel to provide transition assistance from school to adult roles (34 CFR 318.11(a)(12)).

(b) Preparing personnel to meet the National Education Goals (34 CFR 318.11(a)(17)).

Project Period: Up to 48 months

Absolute Priority 4—Minority Institutions Personnel (84.029E). This priority supports awards to Historically Black Colleges and Universities and other institutions of higher education whose minority student enrollment is at least 25 percent. Awards may provide training of personnel in all areas noted in § 318.10(a)(1) and (2) and must be designed to increase the capabilities of the institution in appropriate training areas (34 CFR 318(a)(17))

Competitive Priorities: Within Absolute Priority 4, the Secretary, under 34 CFR 75.105(c)(2)(i), gives preference to applications that meet one or more of the following competitive priorities. The Secretary awards up to 10 additional points to an application that meets one or more of these competitive priorities in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for the program:

(a) Training personnel to provide transition assistance from school to adult roles (34 CFR 318.11(a)(12)).

(b) Preparing personnel to meet the National Education Goals (34 CFR 318.11(a)(17)).

Project Period: Up to 36 months

Absolute Priority 5—Preparation of Related Services Personnel (84.029F) This priority supports preservice preparation of individuals to provide developmental, corrective, and other supportive services that assist children and youth with disabilities to benefit from special education. These include paraprofessional personnel, therapeutic recreation specialists, school social workers, health service providers, physical therapists, occupational therapists, school psychologists, counselors (including rehabilitation counselors), interpreters, orientation and mobility specialists, respite care providers, art therapists, volunteers, physicians, and other related services personnel.

- Projects to train personnel identified as special education personnel in the regulations in this part are not appropriate, even if those personnel may be considered related services personnel in other settings.
- This priority is not designed for general training. Projects must include inducements and preparation to increase the probability that graduates will direct their efforts toward supportive services to special education. For example, a project in occupational therapy (OT) might support a special component on pediatric or juvenile psychiatric OT, support those students whose career goal is OT in the schools, or provide for practica and internships in school settings. (See 34 CFR 318.11(a)(2).)

Competitive Priorities: Within Absolute Priority 5, the Secretary, under 34 CFR 75.105(c)(2)(i), gives preference to applications that meet one or more of the following competitive priorities. The Secretary awards up to 10 additional points to an application that meets one or more of these competitive priorities in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for the program:

(a) Training personnel to provide transition assistance from school to adult roles (34 CFR 318.11(a)(12)).

(b) Preparing personnel to meet the National Education Goals (34 CFR 318.11(a)(17)).

(c) Utilizing innovative recruitment and retention strategies (34 CFR 318.11(a)(8));

Project Period: Up to 36 months

Absolute Priority 6: Special Projects (84.029K). This priority supports projects that include development, evaluation, and distribution of innovative approaches to personnel preparation; development of curriculum materials to prepare personnel to educate or provide early intervention services; and other projects of national significance related to the preparation of personnel needed to serve infants,

toddlers, children, and youth with disabilities.

(a) Appropriate areas of [illegible] include—

(1) Preservice training programs to prepare special [illegible] children and youth with disabilities and their families;

(2) Training teachers to work in community and school settings with children and youth with disabilities and their families;

(3) Inservice and preservice training of personnel to work with infants, toddlers, children, and youth with disabilities and their families;

(4) Inservice and preservice training of personnel to work with minority infants, toddlers, children, and youth with disabilities and their families;

(5) Preservice and inservice training of special education and related services personnel in instructive and assistive technology to benefit infants, toddlers, children, and youth with disabilities; and

(6) Recruitment and retention of special education, related services, and early intervention personnel.

(b) Both inservice and preservice training must include a component that addresses the coordination among all service providers, including regular educators. (See 34 CFR 318(a)(5).)

Competitive Priorities: Within Absolute Priority 6, the Secretary, under 34 CFR 75.105(c)(2)(i), gives preference to applications that meet one or more of the following competitive priorities. The Secretary awards up to 10 additional points to an application that meets one or more of these competitive priorities in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for the program:

(a) Training personnel to provide transition assistance from school to adult roles (34 CFR 318.11(a)(12)).

(b) Preparing personnel to meet the National Education Goals (34 CFR 318.11(a)(17)).

Project Period: Up to 36 months

Absolute Priority 7—Training Educational Interpreters (84.029L). This priority supports projects to establish or continue programs to train educational interpreters to meet effectively the various communication needs of elementary and secondary students who are deaf or deaf-blind. These programs may also support training or retraining on the role of educational interpreters (including short-term and inservice training) of regular education teachers who are not certified teachers of individuals who are deaf and other personnel who teach or work with them (34 CFR 318.11(a)(18)).

Project Period: Up to 36 months.

Absolute Priority 8—Parent Training and Information Centers (84.029M). Parent training and information centers assisted under § 316.3(a) must assist parents to—

(a) better understand the nature and needs of the disabling conditions of their children with disabilities;

(b) Provide follow-up support for the educational programs of their children with disabilities;

(c) Communicate more effectively with special and regular educators, administrators, related services personnel, and other relevant professionals;

(d) Participate fully in educational decision-making processes, including the development of the individualized education program, for a child with a disability;

(e) Obtain information about the range of options, programs, services, and resources available at the national, State, and local levels to children with disabilities and their families; and

(f) Understand the provisions for educating children with disabilities under the [Individuals with Disabilities Education] Act (34 CFR 316.3(a)).

Project Period: Up to 60 months.

Absolute Priority 9—Experimental Parent Centers (84.029P). This priority supports both experimental urban and rural parent centers. Experimental urban centers must serve large numbers of parents of children with disabilities located in high density areas. Experimental rural centers must serve large numbers of parents of children with disabilities located in rural areas. The centers may focus on particular aspects of parent training and information services, including but not limited to those activities required under 34 CFR 316.10(a). Experimental projects may include a planning and development phase. (See 34 CFR 316.10(b).)

Project Period: Up to 36 months

Absolute Priority 10—Training Early Intervention and Preschool Personnel (84.029Q). This priority supports projects that are designed to provide preservice preparation of personnel who serve infants, toddlers, and preschool children with disabilities, and their families. Personnel may be prepared to provide short-term services or long-term services that extend into a child's school program. The proposed training program must have a clear and limited focus on the special needs of children within the age range from birth through five, and must include consideration that this priority must have a significant interdisciplinary focus. (See 34 CFR 318(a)(3).)

Competitive Priorities: Within Absolute Priority 10, the Secretary, under 34 CFR 75.105(c)(2)(i), gives preference to applications that meet one or more of the following competitive priorities. The Secretary awards up to 10 additional points to an application that meets one or more of these competitive priorities in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for the program:

(a) Preparing personnel to meet the National Education Goals (34 CFR 318.11(a)(17)).

(b) Promoting full qualifications for personnel serving infants, toddlers, children and youth with disabilities (34 CFR 318.11(a)(9)).

Project Period. Up to 36 months.

For Applications Contact: Cecelia Aldridge, U.S. Department of Education, 400 Maryland Avenue SW., room 3072 Switzer Building, Washington, DC 20202–2651. Telephone: 205–9979. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–9999.

For Technical Information Contact Dr. Norm Howe, U.S. Department of Education, 400 Maryland Avenue SW., room 3072, Switzer Building, Washington, DC 20202–2651. Telephone: (202) 205–9554. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–9999.

Program Authority: 20 U.S.C. 1441

84.078 Postsecondary Education Programs for Individuals With Disabilities

Purpose of Program: To provide assistance for the development, operation, and dissemination of specially designed model programs of postsecondary, vocational, technical, continuing, or adult education for individuals with disabilities.

Eligible Applicants: State educational agencies; institutions of higher education; junior and community colleges; vocational and technical institutions; and other appropriate nonprofit educational agencies.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 338.

Priorities. Under 34 CFR 75.105(c)(3) and 34 CFR part 338, the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under this competition

only applications that meet this absolute priority:

Absolute Priority—Model Demonstration Projects to Improve the Delivery and Outcomes of Postsecondary Education for Individuals with Disabilities (84.078C). A model demonstration project must—

(a) Develop and implement programs that address one or more of the three specific service issues described in the background of this priority (for background, see notice of final funding priority for fiscal years 1994 and 1995, published in the **Federal Register** on September 14, 1993 (58 FR 48250));

(b) Develop and implement programs with specific project components or strategies that are based on theory, research, or evaluation;

(c) Produce detailed procedures and materials that would enable others to successfully replicate the model as implemented in the original site. Materials must include a manual or guide describing the components or strategies developed to address the specific issues; and

(d) Evaluate the model by using multiple outcome measures to determine the effectiveness of the model and its components or strategies, as well as a design that includes measures of multiple, functional student outcomes, other indices of the effects of the model, and cost data associated with implementing the model.

Competitive Priority. Within the absolute priority in this notice, the Secretary, under 34 CFR 75.105(c)(2)(i), gives preference to applications that meet the following competitive priority. The Secretary awards up to 10 points to an application that meets this competitive priority in a particularly effective way. These points would be in addition to any points the application earns under the selection criteria for this program.

Projects that would develop models for serving students with disabilities who are also members of minority groups (e.g., Black, Hispanic, American Indian or Alaskan Native, Asian or Pacific Islander).

Project Period: Up to 36 months

For Applications and General Information Contact: Oneida Jennings, U.S. Department of Education, 400 Maryland Avenue, SW., room 4627, Switzer Building, Washington, DC 20202–2732. Telephone (202) 205–9058. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–8169.

For Technical Information Contact: Joseph Clair, U.S. Department of Education, 400 Maryland Avenue, SW., room 4622, Switzer Building, Washington, DC 20202–2644. Telephone: (202) 205–9503. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–8169.

Program Authority: 20 U.S.C. 1424a

84.086D, I, and U Program for Children With Severe Disabilities

Purpose of Program. To provide Federal assistance to address the special needs of infants, toddlers, children, and youth with severe disabilities—including children with deaf-blindness—and their families.

Eligible Applicants: Public or nonprofit private organizations and [illegible]

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 315.

Priorities. Under 34 CFR 75.105(c)(3) and 34 CFR part 315, the Secretary gives an absolute preference to applications that meet one of these absolute priorities. The Secretary funds under these competitions only applications that meet one of these absolute priorities.

Absolute Priority 1—Research Projects for Educating Children with Severe Disabilities in Inclusive Settings (84.086D). To be considered for funding under this priority, a research project must—

(a) Address one or more of the issues identified in the background section of this priority (for background, see notice of final funding priorities for fiscal years 1994 and 1995, published in the **Federal Register** on September 22, 1993 (58 FR [illegible]);

(b) Identify specific interventions or strategies to be investigated;

(c) Design the research activities in a manner that is likely to improve results for students with severe disabilities and, if appropriate, their families;

(d) Carry out the research within a conceptual framework, based on previous research or theory, that provides a basis for the interventions or strategies to be studied, the research design, and the target population;

(e) Conduct the research in typical, inclusive school and, if appropriate, community settings;

(f) Conduct the research using methodological procedures designed to produce unambiguous findings—

(1) Regarding the effects of the interventions or strategies and interaction effects between particular approaches and particular groups of students or particular contexts; and

(2) For use in national, State, and local policy analysis contexts; and

(g) Produce a variety of descriptive and outcome data, including—

(1) Information regarding the settings, the service providers, the students, and, if applicable, their families, targeted by the project (e.g., age, disabilities, skill and ability levels, and membership in a special population, if appropriate); and

(2) Multiple, performance outcome data regarding the students who are the focus of the interventions or strategies.

Competitive Priority. Within Absolute Priority 1, the Secretary, under 34 CFR 75.105(c)(2)(i), gives preference to applications that meet the following competitive priority. The Secretary awards up to 10 points to an application that meets this competitive priority in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for this program.

Research projects that identify effective interventions or strategies enabling students with severe disabilities to be educated in general education classes—

(a) At the middle or secondary school levels, or

(b) In urban or rural school districts, or both.

Project Period: Up to 36 months

Absolute Priority 2—Statewide Systems Change: Children with Severe Disabilities (84.086J). To be considered for funding under this priority, a Statewide systems change project must—

(a) Establish a project advisory board that—

(1) Is responsible for providing significant recommendations on project planning, implementation, and evaluation activities; and

(2) Has representation by parents of children participating in the project, service providers (both general education and special education), and providers of related services), institutions of higher education, relevant professional organizations, and State agency staff;

(b) Determine the resources, both human and fiscal, available at the community level to provide quality services to children with severe disabilities as well as resources available through other agencies or parties;

(c) Carry out activities that would assist children with severe disabilities to achieve their highest potential outcomes in general education settings within their neighborhoods—or, in the case of infants and toddlers, in natural environments, including nonsegregated settings—by implementing planned,

capacity building activities that result in systematic and systemic change. These activities must include, but need not be limited to—

(1) Policy analysis and, if necessary, policy revision or further policy development, including development of necessary interagency agreements;

(2) Public awareness;

(3) Product development and dissemination;

(4) Site development;

(5) Staff and parent training;

(6) Technical assistance; and

(7) Analysis and, if necessary, revision of existing teacher training programs including inservice training of faculty of institutions of higher education;

(d) Disseminate formal, written policies and procedures to relevant State agencies, institutions of higher education, local education agencies, other relevant community agencies, and professional and parent organizations for coordinating services to the target population of children with severe disabilities;

(e) Coordinate activities with the State and Multi-State Services Projects for Children with Deaf-Blindness, the State educational agency (including the State coordinator of services for children with severe disabilities, the coordinator for the comprehensive system of personnel development, and the State's transition project, if the State has a federally funded grant under State Systems for Transition Services), the lead agency for part H of IDEA for early intervention services, other relevant State agencies, and institutions of higher education, as well as with technical assistance, information, and personnel development networks within the State, the Early Childhood Research Institute on Integration, the National Early Childhood Technical Assistance System, and the Institute on Implementing Inclusive Education for Children with Severe Disabilities; and

(f) Implement an evaluation plan that includes performance measures for—

(1) Changes in the delivery of special education and related services to the target population, and, in the case of infants and toddlers, changes in the delivery of early intervention services;

(2) The movement of children and youth with severe disabilities in the State from segregated settings to neighborhood general education settings—alongside their peers of the same age—and, in the case of infants and toddlers, to natural environments;

(3) The effectiveness of the training and technical assistance products and procedures; and

(4) The types and numbers of sites where activities are conducted, number and types of persons trained, types of follow-up activities, and number of children and families served at the site where activities were conducted.

Competitive Priority: Within Absolute Priority 2, the Secretary, under 34 CFR 75.105(c)(2)(i), gives preference to applications that meet the following competitive priority. The Secretary awards up to 10 points to an application that meets this competitive priority in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for this program:

Statewide Systems Change projects from States that have not received a new Statewide System Change award since 1987.

Project Period: Up to 60 months.

Absolute Priority 3—Outreach Projects: Serving Children with Severe Disabilities in General Education and Community Settings (84.086U). To be considered for funding under this priority, an outreach project must—

(a) Disseminate information about and assist in replicating a proven model or models—or proven components of models—that provide or improve services for children with severe disabilities;

(b) Coordinate its dissemination and replication activities with—

(1) The lead agency for part H of the Individuals with Disabilities Education Act (IDEA) for early intervention services or the State educational agency for special education; as well as

(2) Technical assistance, information, and personnel development networks within the State;

(c) Include—

(1) Approaches relevant to programming in general education and local community settings;

(2) Active involvement of children and their families in the design, implementation, and evaluation of project activities; and

(3) Interagency coordination if multiple agencies are involved in the provision of services;

(d) Ensure that the model or components of models are consistent with part B of the IDEA, are state-of-the-art, match the needs of the proposed sites, and have recent unambiguous evaluation information supporting their effectiveness;

(e) Use activities that include, but need not be limited to, public awareness, product development and dissemination, site development, training, and technical assistance;

(f) Describe the effects of model components (e.g., expected costs, needed personnel, staff training, equipment) on potential users, the sequence of implementation activities, and the criteria for selecting cooperating sites; and

(g) Evaluate the outreach activities to determine their effectiveness. The evaluation must include measures on the number of children and families served at each site, child and family progress, types and numbers of sites where outreach activities are conducted, number of persons trained, types of follow-up activities, and any changes in the model made by sites.

Competitive Priority: Within Absolute Priority 3, the Secretary, under 34 CFR 75.105(c)(2)(i), gives preference to applications that meet the following competitive priority. The Secretary awards up to 10 points to an application that meets this competitive priority in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for this program:

Outreach projects that provide evidence that they will establish implementation sites in urban or rural areas, or both.

Project Period: Up to 36 months.

For Applications and General Information Contact: Robin Buckler, U.S. Department of Education, 400 Maryland Avenue, SW., room 4617, Switzer Building, Washington, DC 20202–2732. Telephone (202) 205–0168. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–8169.

For Technical Information Contact: Dawn Hunter, U.S. Department of Education, 400 Maryland Avenue, SW., room 4620, Switzer Building, Washington, DC 20202–2644. Telephone: (202) 205–5809. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–8159.

Program Authority: 20 U.S.C. 1425.

84.158A State Systems for Transition Services for Youth With Disabilities Program

Purpose of Program: To assist States to develop, implement, and improve systems to provide transition services for youth with disabilities from age 14 through the age they exit school.

Eligible Applicants: A State education agency (SEA) and a State vocational rehabilitation agency that submit a joint application; or, if a vocational rehabilitation agency does not choose to participate, an SEA and a State agency that provides transition services to individuals who are leaving programs under the Individuals with Disabilities

Education Act, that submit a joint application.

Note: Because this is a one-time grant, States that have previously received a grant under this program are not eligible to apply (34 CFR 325.2).

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 325.

Project Period: Up to 60 months.

For Applications and General Information Contact: Oneida Jennings, U.S. Department of Education, 400 Maryland Avenue, SW., room 4627, Switzer Building, Washington, DC 20202–2732. Telephone (202) 205–9058. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–8169.

For Technical Information Contact: Dr. William Halloran, U.S. Department of Education, 400 Maryland Avenue, SW., room 4622, Switzer Building, Washington, DC 20202–2644. Telephone: (202) 205–8112. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–8169.

Program Authority: 20 U.S.C. 1425(e)

84.158D and Q Secondary Education and Transitional Services for Youth with Disabilities Program

Purpose of Program: To assist youth with disabilities in the transition from secondary school to postsecondary environments.

Eligible Applicants: Institutions of higher education; State education agencies; local education agencies; and other public and nonprofit private institutions or agencies (including the State job training coordinating councils and service delivery area administrative entities established under the Job Training Partnership Act).

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 326.

Priorities: Under 34 CFR 75.105(c)(3) and 34 CFR part 326 the Secretary gives an absolute preference to applications that meet the following priorities. The Secretary funds under these competitions only applications that meet one of these absolute priorities:

Absolute Priority 1—Model Demonstration Projects To Identify and Develop Alternatives for Youth with Disabilities Who Have Dropped Out of School or Are At Risk of Dropping Out of School (84.158D). A model demonstration project must—

(a) Build upon specific components or strategies based on theory, research, or evaluation. These components or strategies must include procedures to identify youth who are at risk of dropping out of school and to recruit youth with disabilities who have already dropped out of school;

(b) Include alternatives for engaging students in programs that provide functional literacy skills and employment training and for serving students who refuse to return to their previous school;

(c) Develop working relationships with the private sector, especially employers, rehabilitation personnel, and local Private Industry Councils authorized by the Job Training Partnership Act;

(d) Target services to specific students (i.e., by age, disability, level of functioning, and membership in a special population, if appropriate);

(e) Produce detailed procedures and materials that enable others to successfully replicate the model as implemented in the original site; and

(f) Evaluate the model at the original model development site and, if implemented at other sites, at those sites to determine whether the model can be adopted by other sites and yield similar results. The project must determine the effectiveness of the model and its component or strategies, including multiple, functional student outcomes measures, other indices of the effects of the model, and cost data associated with implementing the model.

Invitational Priority: Within Absolute Priority 1 the Secretary is particularly interested in applications that meet the following invitational priority. However, under 34 CFR 75.105(c)(1), an application that meets this invitational priority does not receive competitive or absolute preference over other applications:

Projects designed to serve minority youth (e.g., Black, Hispanic, American Indian or Alaskan Native, Asian or Pacific Islander) or youth from urban areas with recognized high drop out rates.

Project Period: Up to 36 months.

Absolute Priority 2—Outreach Projects for Services for Youth with Disabilities (84.158Q). An outreach project for services must—

(a) Disseminate information about and assist in replicating proven models, components of models, or exemplary practices that provide or improve transition services for students with disabilities based on the specific needs of the sites selected for outreach;

(b) Develop written plans for implementation;

(c) Coordinate its dissemination and replication activities with relevant State and local educational agencies, consumer organizations, administrative entities established in the service delivery area under the Job Training Partnership Act, and, if appropriate, projects funded under the State Systems for Transition Services for Youth with Disabilities Program, as well as with technical assistance, information, and personnel development networks within the State;

(d) Include—

(1) Services in community-based settings;

(2) Effective involvement of students and adults with disabilities in the design, implementation, and evaluation of project activities;

(3) Coordination with schools, vocational rehabilitation agencies, adult service providers, and potential employers, if appropriate; and

(4) Assistance in identifying funding for assistive devices and services;

(e) Ensure that the model, components of models, or exemplary practices are consistent with part B of the Individuals with Disabilities Education Act, are state-of-the-art, and have recent, unambiguous evaluation information supporting their effectiveness;

(f) Employ activities that include, but need not be limited to, public awareness, product development and dissemination, site development, training, and technical assistance;

(g) Describe the effects of model components (e.g., expected costs, needed personnel, staff training, equipment) on potential users, the sequence of implementation activities, and the criteria for selecting cooperating sites; and

(h) Evaluate the outreach activities to determine their effectiveness. The evaluation designs must include, but need not be limited to, measures of types and numbers of sites where outreach activities are conducted, number of persons trained, types of follow-up activities, number of youth and families served at the site where models were adopted or adapted, youth and family progress information, and changes in the model made by sites.

Project Period: Up to 36 months.

For Applications and General Information Contact: Oneida Jenkins, U.S. Department of Education, 400 Maryland Avenue, SW., room 4627, Switzer Building, Washington, DC 20202–2732. Telephone (202) 205–9058. Individuals who use a telecommunications device for the deaf

(TDD) may call the TDD number at (202) 205–8169.

For Technical Information Contact: Dr. William Halloran, U.S. Department of Education, 400 Maryland Avenue, SW., room 4622, Switzer Building, Washington, DC 20202–2644. Telephone: (202) 205–81[illegible]. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–8169.

Program Authority: 20 U.S.C. 1425.

84.159A, D, and F Special Studies Program

Purpose of Program: To support the collection of data, studies, investigations, and evaluations to assess the impact and effectiveness of programs and projects assisted under the Individuals with Disabilities Education Act (IDEA).

Eligible Applicants: Under Absolute Priorities 1 and 3 (State Agency-Federal Evaluation Studies Projects) (84.159A and 84.159F): State educational agencies (SEA's); and those State agencies designated by the Governor in each State for the purpose of administering an early intervention program under part H of IDEA.

Under Absolute Priority 2 (State and Local Education Efforts to Implement the Transition Requirements in the Individuals with Disabilities Education Act) (84.159D): Public or private agencies, institutions, and organizations; and other appropriate parties.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 77, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 327.

Note: Absolute Priorities 1 and 3 are based on 34 CFR 327.10(c). Absolute Priority 2 is based on 34 CFR 327.10(f) and the notice of final priorities for the Special Studies Program for fiscal years 1994–1995 published in the **Federal Register** on January 20, 1994 (59 FR 2970).

Priorities: Under 34 CFR 75.105(c)(3) and 34 CFR part 327 the Secretary gives an absolute preference to applications that meet the following priorities. The Secretary funds under these competitions only applications that meet one of these absolute priorities:

Absolute Priority 1—State Agency-Federal Evaluation Studies Projects (84.159A). This priority supports cooperative agreements that assess the impact and effectiveness of programs, policies, and procedures assisted under the Individuals with Disabilities Education Act (IDEA) in accordance with sections 618(d)(1) and (2) of the Act.

Invitational Priorities: Within Absolute Priority 1 the Secretary is particularly interested in applications that meet one or more of the following invitational priorities. However, under 34 CFR 75.105(c)(1) an application that meets one or more of these invitational priorities does not receive competitive or absolute preference over other applications:

The Secretary particularly invites projects that evaluate the impact and effectiveness of—

(a) Management and regulatory flexibility that encourages innovative management of schools to expand opportunities for the inclusion of children with disabilities;

(b) Student outcomes and performance of comprehensive, community-based, family-oriented systems of education and support;

(c) Community-supported schools focusing on family participation in activities and services;

(d) Reconfigured relationships and responsibilities of regular and special education staff, and redesigned programs that train personnel for work in schools, for the continued development of all regular and special education personnel in the education of children with disabilities; or

(e) Expanded multi-agency solutions to the collaborative delivery of services for individual children with disabilities and their families.

Supplementary Information: An award under this competition provides not more than 60 percent of the total cost of the project. The State agency receiving the award shall provide an amount not less than 40 percent of the total cost of the project (34 CFR 327.40(a)).

Project Period: Up to 24 months.

Absolute Priority 2—State and Local Education Efforts to Implement the Transition Requirements in the Individuals with Disabilities Education Act (84.159D).

(a) A project funded under this priority must include substudies—or compile extant information that obviates the need for a study—in the following areas:

(1) The range and variation in State and local policies related to the definitional components of transition services;

(2) Student participation in transition planning, and student outcomes associated with implementation of transition services;

(3) State and local policies, practices and procedures related to the implementation of the transition services, with information obtained from local service providers (the substudy may include visits to illustrative sites);

(4) Interagency involvement in transition planning and services, including a description of the impediments associated with interagency involvement in transition planning and provision of services; and

(5) Federal program services (including those of the Department of Labor and the Social Security Administration) and relevant policies related to meeting the transition requirements, including special education, vocational education, rehabilitation services, adult education, postsecondary education, the Job Training Partnership Act, and the Americans with Disabilities Act.

(b) In planning and implementing the substudies, the project must include appropriate policymakers, administrators, and service providers involved in the design and delivery of transition services to youth with disabilities.

(c) The project must submit for approval—

(1) A plan for conducting the substudies and disseminating reports within 60 days of the start of the project;

(2) A report for substudy (1) by the end of year one;

(3) Reports for substudies (2), (3), and (4) by the end of year two;

(4) A report for substudy (5) by the middle of year 3; and

(5) A final report at the end of year three. The final report must include the following: an executive summary, introduction, project objectives, methodology, findings organized by substudy, summary, and conclusions regarding the progress being made by State and local agencies to implement the IDEA transition requirements.

The project must budget for two trips annually to Washington, DC for (1) a two-day Research Project Directors' meeting; and (2) another two-day meeting to meet with the project officer of the Office of Special Education Programs (OSEP) and with other OSEP work groups, as appropriate, to plan and review project activities and progress.

Project Period: Up to 36 months.

Absolute Priority 3—State Agency-Federal Evaluation Studies Projects (84.159F). This priority supports cooperative agreements that assess the impact and effectiveness of programs, policies, and procedures assisted under the Individuals with Disabilities Education Act (IDEA) in accordance with sections 618(d)(1) and (2) of the Act.

Invitational Priority: Within Absolute Priority 3 the Secretary is particularly interested in applications that meet the

following invitational priority. However, under 34 CFR 75.105(c)(1) an application that meets this invitational priority does not receive competitive or absolute preference over other applications:

The Secretary particularly invites projects that perform feasibility studies that develop the conceptual framework for an evaluation study about a specific issue or question concerning the impact and effectiveness of special education and related services, and determine if the conceptual framework is workable. Feasibility studies identify topics that have significant potential for evaluation, but that require preliminary study to determine feasibility related to identification of the issue, study designs, measurement, and analysis.

While collection and reporting of generalizable impact and effectiveness data are not expected for feasibility studies, the Secretary particularly encourages pilot tests of data collection instruments and procedures to determine the implications of these results for the study design, measurement and analysis.

The Secretary particularly encourages projects that address the feasibility of designs to evaluate the impact and effectiveness of:

(a) Management and regulatory flexibility that encourages innovative management of schools to expand opportunities for the inclusion of children with disabilities;

(b) Student outcomes and performance of comprehensive, community-based, family-oriented systems of education and support;

(c) Community-supported schools focusing on family participation in activities and services;

(d) Reconfigured relationships and responsibilities of regular and special education staff, and redesigned programs that train personnel for work in schools, for the continued development of all regular and special education personnel in the education of children with disabilities; or

(e) Expanded multi-agency solutions to the collaborative delivery of services for individual children with disabilities and their families.

Supplementary Information: An award under this competition provides not more than 60 percent of the total cost of the project. The State agency receiving the award shall provide an amount not less than 40 percent of the total cost of the project (34 CFR 327.40(a)).

Project Period: Up to 12 months.

For Applications and General Information Contact: Darlene Crumblin, U.S. Department of Education, 400 Maryland Avenue, SW., room 3525, Switzer Building, Washington, DC 20202–2641. Telephone (202) 205–8953; or FAX: (202) 205–8105.

For Technical Information Contact: Susan Sanchez, U.S. Department of Education, 400 Maryland Avenue, SW., room 3528, Switzer Building, Washington, DC 20202–2641. Telephone: (202) 205–8998.

Program Authority: 20 U.S.C. 1418.

84.180 Technology, Educational Media, and Materials for Individuals with Disabilities Program

Purpose of Program: To support projects and centers for advancing the availability, quality, use, and effectiveness of technology, educational media, and materials in the education of children and youth with disabilities and the provision of related services and early intervention services to infants and toddlers with disabilities.

Eligible Applicants: Institutions of higher education; State educational agencies; local educational agencies; public agencies; and nonprofit or for-profit private organizations.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 333.

Priority: Under 34 CFR 75.105(c)(3) and 34 CFR 333.1 and 333.3, the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under this program only applications that meet this absolute priority:

Absolute Priority—Technology, Educational Media, and Materials Research Projects that Promote Literacy (84.180G). This priority provides support for research projects that examine how advancing the availability, quality, use, and effectiveness of technology, educational media, and materials can address the problem of illiteracy among individuals with disabilities.

Invitational Priority: Within the absolute priority specified in this notice, the Secretary is particularly interested in applications that meet the following invitational priority. However, under 34 CFR 75.105(c)(1) an application that meets this invitational priority does not receive competitive or absolute preference over other applications:

The Secretary is particularly interested in projects that—

(a) Define literacy as: to read, to communicate, to compute, to make judgments, and to take appropriate action;

(b) Are of rigorous design and employ clearly explicated quantitative or qualitative methodologies, or both, appropriate to the purpose of the project; and

(c) Consider learning and psychosocial factors in examining the availability, quality, and use of specified technology, educational media, and materials, and in examining their effectiveness in providing experiences and opportunities that improve the literacy of children and youth with disabilities.

Project Period: Up to 36 months.

For Applications and General Information Contact: Darlene Crumblin, U.S. Department of Education, 400 Maryland Avenue, SW., room 3525, Switzer Building, Washington, DC 20202–2641. Telephone (202) 205–8953; or FAX: (202) 205–8105.

For Technical Information Contact: Jane Hauser, U.S. Department of Education, 400 Maryland Avenue, SW., room 3521, Switzer Building, Washington, DC 20202–2640. Telephone: (202) 205–8126.

Program Authority: 20 U.S.C. 1461.

84.237 Program for Children and Youth with Serious Emotional Disturbance

Purpose of Program: To support projects designed to improve special education and related services to children and youth with serious emotional disturbance. Types of projects that may be supported under the program include, but are not limited to, research, development, and demonstration projects. Funds may also be used to develop and demonstrate approaches to assist and prevent children with emotional and behavioral problems from developing serious emotional disturbance.

Eligible Applicants: Institutions of higher education; State educational agencies; local educational agencies; and other appropriate public and nonprofit private institutions or agencies.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 328.

Priority: Under 34 CFR 75.105(c)(3) and 34 CFR 328.3(a)(5) the Secretary gives an absolute preference to applications that meet the following priority. The Secretary will fund under this competition only applications that meet this absolute priority:

Absolute Priority—Preventing the Development of Serious Emotional Disturbance Among Children and Youth

with Emotional and Behavioral Problems (84.237F). To be considered for funding under this priority, a project must—

(a) Provide a conceptual framework for the proposed preventive approach. The conceptual framework must reflect findings from multi-disciplinary research, as well as validated interventions and strategies relevant for promoting personal and social development of children with emotional and behavioral problems;

(b) As part of the conceptual framework—

(1) Address the challenge and diversity of mental health, psychological, and social characteristics so as to assist children with emotional and behavioral problems from developing serious emotional disturbance;

(2) Identify and define the outcomes related to personal and social development that would comprise the basis for the design of the proposed preventive components;

(3) Document the rationale for each outcome construct; and

(4) describe means for measuring these outcomes;

(c) Propose interventions that—

(1) Are comprehensive and positive;

(2) Promote the social and emotional development of students with emotional and behavioral problems; and

(3) Provide the cornerstone for building school-wide capacity for meeting the social and emotional needs of children with emotional and behavioral problems. The interventions must encompass an array of experiences that ensure that children with emotional and behavioral problems acquire and demonstrate in various settings the competencies needed to achieve the measurable desired outcomes related to personal and social development;

(d) Provide and assess interventions within the general education environment and expand these to include home-based and community-based components appropriate to the proposed approach;

(e) Implement interventions that involve the active participation of a broad range of constituents, including school personnel, parents, and community agencies, and that acknowledge and consider the interaction between regular and special education;

(f) Assess the efficacy of the proposed interventions for improving personal and social outcomes for students with emotional and behavioral problems; and

(g) Evaluate the implementation of the proposed interventions to enhance the personal and social adjustment of students with emotional and behavioral problems across school environments.

A project must budget for two trips annually to Washington, DC for (1) a two-day Research Project Directors' meeting; and (2) another two-day meeting to meet with the project director of the Office of Special Education Programs and the other projects funded under this priority to share their approaches, designs, and experiences, and to design collaborative products.

Project Period: Up to 48 months.

For Applications and General Information Contact: Darlene Crumblin, U.S. Department of Education, 400 Maryland Avenue, SW., room 3525, Switzer Building, Washington, DC 20202–2641. Telephone: (202) 205–8953; or FAX: (202) 205–8105.

For Technical Information Contact: Dr. Helen Thornton, U.S. Department of Education, 400 Maryland Avenue, SW., room 3520, Switzer Building, Washington, DC 20202–2641. Telephone: (202) 205–5910.

Program Authority: 20 U.S.C. 1426.

Rehabilitation Services Administration

84.128G Vocational Rehabilitation Service Projects for Migratory Agricultural and Seasonal Farmworkers With Disabilities

Purpose of Program: To provide grants for vocational rehabilitation services for migratory agricultural workers or seasonal farmworkers with disabilities.

Eligible Applicants: State vocational rehabilitation agencies (SVRAs); nonprofit agencies working in collaboration with SVRAs; local agencies administering vocational rehabilitation programs under written agreements with SVRAs; and SVRAs that enter into agreements with the State vocational rehabilitation agencies of one or more other States to develop cooperative programs for the provision of vocational rehabilitation services.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85 and 86; and (b) The regulations for this program in 34 CFR parts 369 and 375.

Project Period: Up to 36 months.

For Applications or Information Contact: Tony Cavataio, U.S. Department of Education, 400 Maryland Avenue, SW., room 3411, Switzer Building, Washington, DC 20202–2650. Telephone: (202) 205–9343 to order applications; or (202) 205–8206 for information.

Program Authority: 29 U.S.C. 777b.

84.128T Special Projects and Demonstrations for Providing Supported Employment Services to Individuals with the Most Severe Disabilities and Technical Assistance Projects—Community-Based Projects

Purpose of Program: To provide grants for community-based special projects and demonstrations to (a) stimulate the development of innovative approaches for improving and expanding the provision of supported employment services to individuals with the most severe disabilities; and (b) enhance local capacity to provide supported employment services.

Eligible Applicants: Public and nonprofit community rehabilitation programs; designated State units; and other public and private agencies and organizations.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85 and 86; and (b) The regulations for this program in 34 CFR part 380.

Project Period: Up to 36 months.

For Applications or Information Contact: Ted Gonzales, U.S. Department of Education, 400 Maryland Avenue, SW., room 3320, Switzer Building, Washington, DC 20202–2650. Telephone: (202) 205–9343 to order applications; or (202) 205–8321 for information.

Program Authority: 29 U.S.C. 777a(c).

84.129A–R Rehabilitation Training—Rehabilitation Long-Term Training

Purpose of Program: To provide grants for (1) projects that provide basic or advanced training leading to an academic degree in one of the fields of study identified in the Absolute Priorities section of this notice; (2) projects that provide a specified series of courses or program of study leading to award of a certificate in one of the fields of study identified in the Absolute Priorities section of this notice; and (3) projects that provide support for medical residents enrolled in residency training programs in the specialty of physical medicine and rehabilitation.

Eligible Applicants: State agencies; and other public or nonprofit private agencies and organizations, including institutions of higher education.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR parts 385 and 386.

Priorities:

Absolute Priorities: Under 34 CFR 75.105(c)(3) and 34 CFR 386.1, the

Secretary gives an absolute preference to applications that meet one of the following priorities. The Secretary funds under this competition only applications that meet one of these absolute priorities:

Projects that propose to provide training in one of the following areas of personnel shortages:

Rehabilitation medicine (CFDA No 84.129A–1).

Prosthetics and orthotics (CFDA No 84.129A–5).

Rehabilitation counseling (CFDA No 84.129B).

Physical therapy (CFDA No. 129D–1).

Rehabilitation technology (CFDA No. 129E)

Vocational evaluation and work adjustment (CFDA No. 84.129F);

Rehabilitation of individuals who are mentally ill (CFDA No. 84.129H)

Undergraduate education in rehabilitation services (CFDA No 84.129L).

Specialized personnel for individuals who are blind or have vision impairment (currently: Rehabilitation of individuals who are blind) (CFDA No 84.129P).

Rehabilitation of individuals who are deaf or hard of hearing (currently Rehabilitation of individuals who are deaf) (CFDA No. 84.129Q).

Rehabilitation job development and placement (CFDA No. 84.129R).

Invitational Priorities: Under 34 CFR 75.105(c)(1) the Secretary is particularly interested in applications that meet one of the following invitational priorities. However, an application that meets one of these invitational priorities does not receive competitive or absolute preference over other applications

Invitational Priority 1: Within the absolute priorities specified in this notice, projects designed to provide financial assistance to individuals with disabilities from minority backgrounds for long-term academic training in certificate- or degree-granting courses of study

Invitational Priority 2: Within the absolute priority of Rehabilitation Counseling, projects that provide academic training to individuals at both the master's degree level and the doctoral degree level.

Project Period: Up to 36 months, except for Rehabilitation Counseling (84.129B), which is up to 60 months

For Applications or Information Contact: Richard Melia, U.S Department of Education, 400 Maryland Avenue, SW., room 3324, Switzer Building, Washington, DC 20202–2649 Telephone: (202) 205–9343 to order applications; or (202) 205–9400 for information.

Program Authority: 29 U.S.C. 774

84.250E Vocational Rehabilitation Services Projects for American Indians With Disabilities

Purpose of Program: To provide grants for vocational rehabilitation services to American Indians with disabilities who reside on Federal or State reservations.

Eligible Applicants: Governing bodies of Indian tribes; and consortia of these governing bodies located on Federal and State reservations.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 77, 80, 81, 82, and 85 and (b) The regulations for this program in 34 CFR parts 369 and 371.

Project Period: Up to 36 months

For Applications or Information Contact: Barbara Sweeney, U.S Department of Education, 400 Maryland Avenue, SW., room 3225, Switzer Building, Washington, DC 20202–2650 Telephone: (202) 205–9343 to order applications; or (202) 205–9544 for information.

Program Authority: 29 U.S.C. 750

84.263 Rehabilitation Training—Experimental and Innovative Training

Purpose of Program: To support pilot projects that develop new types of training programs for rehabilitation personnel or that develop new and improved methods of training rehabilitation personnel.

Eligible Applicants: State agencies, and other public or nonprofit private agencies and organizations, including institutions of higher education.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82 85, and 86, and (b) The regulations for this program in 34 CFR parts 385 and 387

Priority: Under 34 CFR 75.105(c)(1), the Secretary is particularly interested in applications that meet the following invitational priority. However, an application that meets this invitational priority does not receive competitive or absolute preference over other applications.

Projects designed to train rehabilitation counselors, practitioners, educators, and individuals with disabilities on rehabilitation needs of individuals who are HIV positive or who have Acquired Immune Deficiency Syndrome (AIDS).

Project Period: Up to 36 months

For Applications or Information Contact: Beverly Brightly, U.S Department of Education, 400 Maryland Avenue, SW., room 3322, Switzer Building, Washington, DC 20202–2649 Telephone: (202) 205–9343 to order applications; or (202) 205–9561 for information

Program Authority: 29 U.S.C. 774

84.264A Rehabilitation Continuing Education Programs (for Region V Only)

Purpose of Program: To support cooperative agreements for training centers that (1) serve either a Federal region or another geographic area and (2) provide a broad, integrated sequence of training activities that focus on meeting recurrent and common training needs of employed rehabilitation personnel throughout a multi-State geographical area

Eligible Applicants: State agencies and other public or nonprofit agencies and organizations, including institutions of higher education

Note: Applications are invited for the provision of training for Department of Education Region V only

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR parts 385 and 389, as amended on February 18, 1994 [illegible]

Fiscal Information: Applicants will be subject to a four percent cost-share requirement on awards

Project Period: Up to 60 months

For Applications or Information Contact: Ellen Chesley, U.S Department of Education, 400 Maryland Avenue SW., room 3318, Switzer Building, Washington, DC 20202–2649 Telephone: (202) 205–9343 to order applications; or (202) 205–9481 for information

Program Authority: 29 U.S.C. 774

Invitation To Comment

The Secretary welcomes comments and suggestions for improving [illegible] notice.

Please direct any comments and suggestions to Steven N. Schatken, Assistant General Counsel for Regulations, U.S. Department of Education, 400 Maryland Avenue, SW (room 5131, FOB–6), Washington, DC 20202–2241.

Dated: June 3, 1994

Richard W. Riley,

Secretary of Education

Appendix

Intergovernmental Review of Federal Programs

This appendix applies to each program that is subject to the requirements of Executive Order 12372 (Intergovernmental Review of Federal Programs) and the regulations in 34 CFR part 79.

The objective of the Executive order is to foster an intergovernmental partnership and to strengthen federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

Applicants must contact the appropriate State Single Point of Contact to find out about, and to comply with, the State's process under Executive Order 12372. Applicants proposing to perform activities in more than one State should immediately contact the Single Point of Contact for each of those States and follow the procedure established in each of those States under the Executive order. A listing containing the Single Point of Contact for each State is included in this appendix.

In States that have not established a process or chosen a program for review, State, areawide, regional, and local entities may submit comments directly to the Department.

Any State Process Recommendation and other comments submitted by a State Single Point of Contact and any comments from State, areawide, regional, and local entities must be mailed or hand-delivered by the date indicated in this notice to the following address: The Secretary, EO 12372–CFDA# [illegible]. Commenter must insert number—including suffix letter, if any] U.S. Department of Education, room 4161, 400 Maryland Avenue, SW., Washington, DC [illegible].

Proof of mailing will be determined on the same basis as applications (see 34 CFR 75.102). Recommendations or comments may be hand delivered until 4:30 p.m. (Washington, DC time) on the date indicated in this notice.

PLEASE NOTE THAT THE ABOVE ADDRESS IS NOT THE SAME ADDRESS AS THE ONE TO WHICH THE APPLICANT SUBMITS ITS COMPLETED APPLICATION. *DO NOT SEND APPLICATIONS TO THE ABOVE ADDRESS.*

State Single Points of Contact

Note: In accordance with Executive Order #12372, this listing represents the designated State Single Points of Contact. Because participation is voluntary some States no longer participate in the process. These include: Alabama, Alaska, Connecticut, Hawaii, Idaho, Kansas, Louisiana, Minnesota, Montana, Nebraska, Oklahoma, Oregon, Pennsylvania, South Dakota, Virginia, and Washington.

Arizona

Janice Dunn, Arizona State Clearinghouse, 3800 N. Central Avenue, Fourteenth Floor, Phoenix, Arizona 85012, Telephone (602) 280–1315, FAX (602) 280–1305

Arkansas

Mr. Tracy L. Copeland, Manager, State Clearinghouse, Office of Intergovernmental Services, Department of Finance and Administration, 1515 W. 7th Street, room 412, Little Rock, Arkansas 72203, Telephone (501) 682–1074, FAX (501) 682–5206

California

Grants Coordinator, Office of Planning and Research, 1400 Tenth Street, room 121, Sacramento, California 95814, Telephone (916) 323–7480, FAX (916) 323–3018

Colorado

Margaret Dubas, State Single Point of Contact, State Clearinghouse, Division of Local Government, 1313 Sherman Street, room 521, Denver, Colorado 80203, Telephone (303) 866–2156, FAX (303) 866–2251

Delaware

Francine Booth, State Single Point of Contact, Executive Department, Thomas Collins Building, Dover, Delaware 19903, Telephone (302) 739–3326, FAX (302) 739–5661

District of Columbia

Rodney T. Hallman, State Single Point of Contact, Office of Grants Management and Development, 717 14th Street, NW., Suite 500, Washington, DC 20005, Telephone (202) 727–6551, FAX (202) 727–1617

Florida

Suzanne Trenh Mesbar, Florida State Clearinghouse, Intergovernmental Affairs Policy Unit, Executive Office of the Governor, Office of Planning and Budgeting, The Capitol, Tallahassee, Florida 32399–0001, Telephone (904) 488–8114, FAX (904) 488–9005

Georgia

Charles H. Badger, Administrator, Georgia State Clearinghouse, 254 Washington Street, S.W., room 401J, Atlanta, Georgia 30334, Telephone (404) 656–3855 or 656–3829, FAX (404) 656–7938

Illinois

Steve Klokkenga, State Single Point of Contact, Office of the Governor, 107 Stratton Building, Springfield, Illinois 62706, Telephone (217) 782–1671, FAX (217) 782–6620

Indiana

Francis E. Williams, Intergovernmental Grant Coordinator, State Budget Agency, 212 State House, Indianapolis, Indiana 46204, Telephone (317) 232–2972, FAX (317) 233–3323

Iowa

Steven R. McCann, Division for Community Assistance, Iowa Department of Economic Development, 200 East Grand Avenue, Des Moines, Iowa 50309, Telephone (515) 242–4719, FAX (515) 242–4859

Kentucky

Ronald W. Cook, Office of the Governor, Department of Local Government, 1024 Capitol Center Drive, Frankfort, Kentucky 40601–8204, Telephone (502) 573–2382, FAX (502) 573–2512

Maine

Joyce Benson, State Planning Office, State House Station #38, 184 State Street, Augusta, Maine 04333, Telephone (207) 287–3261, FAX (207) 287–6489

Maryland

Mr. Roland E. English III, Chief, State Clearinghouse for Intergovernmental Assistance, Maryland Office of Planning, 301 West Preston Street, room 1104, Baltimore, Maryland 21201–2365, Telephone (410) 225–4490, FAX (410) 225–4480

Massachusetts

Karen Arone, State Clearinghouse, Executive Office of Communities and Development, 100 Cambridge Street, room 1803, Boston, Massachusetts 02202, Telephone (617) 727–7001, ext 443, FAX (617) 727–4259

Michigan

Richard S. Pastula, Director, Office of Federal Grants, Michigan Department of Commerce, P.O. Box 30225, Lansing, Michigan 48909, Telephone (517) 373–[illegible], FAX (517) [illegible]

Part IV

Department of Agriculture

Food and Nutrition Service

7 CFR Parts 210 and 220

National School Lunch Program and School Breakfast Program: Nutrition Objectives for School Meals; Proposed Rule

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 210 and 220

National School Lunch Program and School Breakfast Program: Nutrition Objectives for School Meals

AGENCY: Food and Nutrition Service, USDA.

ACTION: Proposed rule.

SUMMARY: This rule proposes to amend the regulations outlining the nutrition standards for the National School Lunch and School Breakfast Programs. It is part of an integrated, comprehensive plan for promoting the health of children. Specifically, this proposal would update the current nutrition standards to incorporate the Dietary Guidelines for Americans, which reflect medical and scientific consensus on proper nutrition as a vital element in disease prevention and long-term health promotion. This proposal would also adopt meal planning based on analysis of key nutrients (Nutrient Standard Menu Planning) in lieu of the current meal pattern. These changes would be implemented no later than July 1, 1998. The Department will be providing State agencies and school food authorities with technical assistance to enable them to meet this implementation date.

In developing this proposed rule, the Department is responding to an array of medical and scientific evidence linking improper diet with increased incidence of heart disease, strokes and certain cancers. These proposals acknowledge the positive role school programs must play in establishing childhood eating patterns that influence lifelong habits. The Department also considered extensive oral testimony presented at four public hearings and meetings as well as written comments submitted in response to a notice published in the Federal Register on September 13, 1993.

In recognition of the importance of reinventing and streamlining government programs, this proposal would also remove various paperwork burdens associated with the school meal programs and would modify the review requirements for the National School Lunch Program to ensure adequate oversight of the proposed updated nutrition standards. The overriding purpose behind this proposed rule is to serve more nutritious and healthful meals to school children while maintaining access to the meal programs for needy children, and to enhance the flexibility of local schools to administer the programs.

DATES: To be assured of consideration, comments must be postmarked on or before September 8, 1994.

ADDRESSES: Robert M. Eadie, Chief, Policy and Program Development Branch, Child Nutrition Division, Food and Nutrition Service, USDA, 3101 Park Center Drive, Alexandria, Virginia 22302.

FOR FURTHER INFORMATION CONTACT: Robert M. Eadie at the above address or by telephone at 703–305–2620.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This proposed rule is issued in conformance with Executive Order 12866 and has been designated significant.

Included at the end of this proposal is the Regulatory Cost/Benefit Assessment. The Assessment provides the background on the economic, market and benefit impacts of this proposal.

Regulatory Flexibility Act

This proposed rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 through 612). The Administrator of the Food and Nutrition Service (FNS) has certified that this rule will not have a significant economic impact on a substantial number of small entities. In the interest of furthering efforts to reinvent government, this rule proposes a substantial reduction in current State agency administrative burdens and a technical adjustment in the recordkeeping burdens. Moreover, the Department of Agriculture (the Department or USDA) does not anticipate any adverse fiscal impact on local schools. A recent analysis by FNS and the Department's Economic Research Service found that the menu planning aspects of this proposal can be met at the current cost of food in the National School Lunch Program. Therefore, food costs should not be a barrier to implementation of this regulation.

Catalog of Federal Domestic Assistance

The National School Lunch Program and the School Breakfast Program are listed in the Catalog of Federal Domestic Assistance under Nos. 10.555 and 10.553, respectively, and are subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. (7 CFR part 3015, subpart V and final rule-related notice at 48 FR 29112, June 24, 1983.)

Executive Order 12778

This proposed rule has been reviewed under Executive Order 12778, Civil Justice Reform. This proposed rule is intended to have preemptive effect with respect to any State or local laws, regulations or policies which conflict with its provisions or which would otherwise impede its full implementation. This proposed rule is not intended to have retroactive effect unless so specified in the "Effective Date" section of this preamble. Prior to any judicial challenge to the provisions of this proposed rule or the application of the provisions, all applicable administrative procedures must be exhausted. In the National School Lunch Program and School Breakfast Program, the administrative procedures are set forth under the following regulations: (1) School food authority appeals of State agency findings as a result of an administrative review must follow State agency hearing procedures as established pursuant to 7 CFR 210.18(q); (2) School food authority appeals of FNS findings as a result of an administrative review must follow FNS hearing procedures as established pursuant to 7 CFR 210.30(d)(3); and (3) State agency appeals of State Administrative Expense fund sanctions (7 CFR 235.11(b)) must follow the FNS Administrative Review Process as established pursuant to 7 CFR 235.11(f).

Information Collection

This proposed rule contains information collection requirements which are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35). The title, description, and respondent description of the information collections are shown below with an estimate of the annual reporting and recordkeeping burdens. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The Department would like to note that the description of burden hours represents full implementation of the proposed regulation, which would be School Year 1998–9, and only provides for the recordkeeping burden associated with the proposed regulatory changes.

Title: National School Lunch Program and School Breakfast Program: Nutrition Objectives for School Meals.

Description: Under this proposed rule on Nutrition Objectives, some existing recordkeeping activities contained in 7 CFR 210 and 220 would be affected. The

OMB control numbers are 0584–0006 and 0584–0012, respectively

Description of Respondents: State agencies, school food authorities and schools doing on-site preparation of meals.

ESTIMATED ANNUAL RECORDKEEPING BURDEN

Difference				- 2,308,464

[1] The current OMB approved burden is based on 70,455 schools. However, for the purposes of a more accurate comparison, the current burden has been adjusted here to include the same number of schools used to determine the proposed burden.

[2] The current OMB approved burden is based on 49,962 schools. However, for the purposes of a more accurate comparison, the current burden has been adjusted here to include the same number of schools used to determine the proposed burden.

As required by section 3504(h) of the Paperwork Reduction Act of 1980, 44 U.S.C. 3504(h), FNS has submitted a copy of this proposed rule to OMB for review of these information collection requirements. Other organizations and individuals desiring to submit comments regarding this burden estimate or any aspects of these information collection requirements, including suggestions for reducing the burdens, should direct them to the Policy and Program Development Branch, Child Nutrition Division, (address above) and to the Office of Information and Regulatory Affairs, OMB, Room 3208, New Executive Office Building, Washington, DC 20503, Attention: Laura Oliven, Desk Officer for FNS.

Background

Nutrition Standards in the School Meal Programs

The primary purpose of the National School Lunch Program (NSLP), as originally stated by Congress in 1946 in section 2 of the National School Lunch Act (NSLA), 42 U.S.C. 1751, is "to safeguard the health and well-being of the Nation's children * * *." At that time, nutritional concerns in the United States centered on nutrient deficiencies and issues of underconsumption. Over time, meal requirements for the NSLP, 7 CFR 210.10, were designed to provide foods sufficient to approximate one-third of the National Academy of Sciences' Recommended Dietary Allowances (RDA). Participating schools were required to offer meals that complied with general patterns established by the Department. These patterns were developed to provide a balanced meal by focusing on minimum amounts of specific components (meat/meat alternate, bread/bread alternate, vegetables, fruits and dairy products) rather than on the nutrient content of the entire meal. Over the years, virtually no substantive changes have been made to these patterns.

An array of scientific data now augments our knowledge by documenting that excesses in consumption are a major concern because of their relationship to the incidence of chronic disease. The typical diet in the United States is high in fat, saturated-fat and sodium and low in complex carbohydrates and fiber. Nutritional requirements for the NSLP have not kept pace with the growing consensus of the need to modify eating habits. Given the importance of school meals to the nation's children, especially needy children, the Department is committed to meeting its health responsibilities by updating the nutrition standards for school meals to ensure that children have access to a healthful diet as well as an adequate one. To accomplish this task, the Department is proposing to have school meals conform to the 1990 Dietary Guidelines for Americans (hereinafter referred to as the Dietary Guidelines) as well as provide proper levels of nutrients and calories.

Although this proposal would expressly incorporate the 1990 Dietary Guidelines into the school meals programs' nutrition requirements, the Department will consider incorporating into the regulations any updates of the Dietary Guidelines or other scientific recommendations. Specific use of the 1990 Dietary Guidelines will allow the Department to review any revisions of the Dietary Guidelines to determine their applicability to school programs and will avoid any undue burden on State agencies and school food authorities to make the changes without the direction of implementing regulations.

Development of the Dietary Guidelines

Over the past thirty years a large body of evidence based on epidemiological, clinical and laboratory investigation has established that dietary patterns in the

United States are associated with an increased risk of chronic disease including coronary heart disease, stroke, diabetes and certain types of cancer (Surgeon General's Report on Nutrition and Health, 1988; National Academy of Sciences, Diet and Health: Implications for Reducing Chronic Disease Risk, [illegible] Surgeon General's Report [illegible] the ten leading [illegible] with [illegible].

As a result of this [illegible] body of scientific research [illegible] diet/disease links, dietary recommendations for the United States population [illegible] developed in the late 1970's [illegible] Select Committee on Nutrition and Human Needs, established [illegible] for the United States. This was followed closely by The Surgeon General's Report, Healthy People (1979). USDA and the Department of Health and Human Services (DHHS) [illegible] first Dietary Guidelines for Americans [illegible].

The Dietary Guidelines were subsequently updated in 1985 and again in 1990. Also in 1990, Title III of the National Nutrition Monitoring and Related Research Act of 1990 (NNMRRA) (Pub. L. 101-445), 7 U.S.C. 5301, *et seq.*, was enacted. Section 301 of the NNMRRA, 7 U.S.C. 5341(a), requires that the Dietary Guidelines be reviewed at least every five years by a panel of experts in the various fields that contribute to nutrition guidance. The task of the panel is to decide whether there is sufficient evidence for altering the existing Dietary Guidelines and, if so, to recommend specific changes. The Secretaries of the DHHS and USDA then make the final decision on whether or not to incorporate the recommended changes.

The process was first established when the Senate Appropriations Committee, in November, 1985, stipulated that a Dietary Guidelines Advisory Committee be established to review the first edition of the Dietary Guidelines and to make [illegible] recommendations deemed [illegible]. The committee consisted of [illegible] members (three from USDA, three from DHHS, and three selected from a list of nominees recommended by the National Academy of Sciences). In 1985, a second committee composed of nine [illegible] experts in nutrition and health was appointed by the Secretaries of USDA and DHHS. Pursuant to section 301(a) of the NNMRRA, a Dietary Guidelines Advisory Committee will be empaneled in 1995 to determine whether the 1990 Guidelines should be modified.

As a result, the Dietary Guidelines are based on the best available scientific and medical knowledge. Consequently, the Department is proposing to use the Dietary Guidelines as the basis for the nutrition standards for school meals. This established procedure enables medical and scientific experts to continually review and recommend updating of the Dietary Guidelines in light of the most current and highly-regarded data in this area. Moreover, the [illegible] and general public have [illegible] Dietary Guidelines in nutrition education programs, activities and marketing. Because of the widespread [illegible] of the recommendations in the Dietary Guidelines, the Department believes that the transition to using these recommendations as the cornerstone for the school meal programs will be readily accepted.

The 1988 Surgeon General's Report on Nutrition and Health and a 1989 National Academy of Science Report Diet and Health: Implications for Reducing Chronic Disease Risk reinforce the Dietary Guidelines. One common theme runs throughout each of the publications, that is, an improved diet can have positive health consequences.

The most recent Diet and Health report issued by the Food and Nutrition Board of the National Academy of Sciences (1989) provides a very thorough review of the scientific evidence linking diet to disease and gives quantifiable goals for some of the Dietary Guidelines. The report recommends that Americans reduce fat intake to 30% or less of calories, reduce saturated fat intake to less than 10% of calories and reduce the intake of cholesterol to less than 300 mg per day. The report also recommends that sodium intake be limited to 2400 milligrams or less per day.

School Meals' Lack of Compliance With Current Dietary Guidelines

The current Dietary Guidelines recommend that people eat a variety of foods, maintain a healthy weight, [illegible] with plenty of vegetables, fruits, and grain products, and use sugar and sodium in moderation. The Dietary Guidelines also recommend diets low in fat, saturated fat, and cholesterol so that over time, fat comprises 30 percent or less of calorie intake, and saturated fat less than 10 percent of total calories, for persons two years of age and older.

However, information available to the Department consistently shows that children's diets, including meals served in schools, do not conform to the recommendations of the Dietary Guidelines. For example, according to data from the 1989 and 1990 Continuing Survey of Food Intakes by Individuals conducted by USDA, fat composed, on average, 35 per cent of calories for the diets of children ages six to nineteen.

Equally significant were the findings of a nationally representative USDA study entitled the School Nutrition Dietary Assessment (SNDA) Study. Released in October, 1993, the SNDA Study presented findings on the nutrients and foods provided in school meals and described the dietary intakes of students on a typical school day. A [illegible] of 545 schools were surveyed, and [illegible] approximately 3,170 students in grades one through twelve (with assistance from parents for children grades one through three) provided detailed information about foods and beverages consumed in a day that included school attendance. The study compared nutrients provided in school meals with the Dietary Guidelines' recommendations on fat and saturated fat, the National Research Council's (NRC) Diet and Health Recommendations on sodium, cholesterol and carbohydrate intake, and the current objective that the nutrients provided in the NSLP meet one-third of the RDA and that the School Breakfast Program (SBP) meet one-fourth of the RDA.

The SNDA findings showed that, while school lunches meet or exceed one-third of the RDA for key nutrients and food energy, they do not meet the recommended levels of fat and saturated fat established by the Dietary Guidelines. In fact, the report showed that school lunches exceeded the Dietary Guidelines' recommendations for fat and saturated fat. Specifically, the average percentage of calories from total fat was 38 per cent compared with the recommended goal of 30 per cent or less, and the percentage from saturated fat was 15 per cent, compared with the recommended goal of less than 10 per cent. The report also found that children who ate the school lunch consumed a significantly higher amount of calories from fat than children who brought their lunch from home or obtained a lunch from vending machines or elsewhere at school. Further, the report showed that virtually no schools were in compliance with the Dietary Guidelines. In over 40 percent of schools, students could select a meal that met the Dietary Guidelines, but few did so. The SNDA study also showed that while school meals met the NRC recommendation on cholesterol, the meals did not meet the NRC recommendations on sodium and carbohydrate levels. In fact, the level for sodium, at 1,479 milligrams, was nearly two times the lunch target of 800 milligrams.

Even though the SBP did meet most of the recommendations in the Dietary Guidelines, the majority of school meals do not conform to current scientific knowledge of what constitutes a healthful diet. The SNDA findings underscore that the program has not adapted or changed school meal patterns over the years to incorporate scientific knowledge about diet. This situation is cause for concern because it demonstrates the need for significant improvement if the programs are to play their appropriate role in promoting long-term health through proper nutrition.

As the first step toward achieving meaningful improvement in children's diets and, thus, their health and future well being, the Department considers it necessary to update the regulations which establish the specific nutrition criteria for reimbursable school meals to incorporate the RDA for key nutrients, energy allowances for calories, and the most current nutritional standards as outlined in the Dietary Guidelines. In this way, the school meal programs can provide an example of nutritional achievement as well as ensuring that children are served healthful meals.

Before proceeding with a rulemaking, however, the Department recognized the importance of public input. The following is a description of the Department's procedure for obtaining input and a discussion of significant issues raised by commenters.

Providing a Public Forum

To obtain input from the public prior to drafting proposed regulations, the Department solicited comments on nutrition objectives for school meals through public hearings and written comments. In a Notice published in the **Federal Register** (58 FR 47853, September 13, 1993), the Department announced a series of four public hearings. Any person who was interested could register to speak at any of the hearings. Persons unable to testify in person were invited to submit written comments. The Notice identified the following four questions as the focus areas for comments and suggestions:

I. What are the health consequences of children's current dietary patterns?

II. How can the Dietary Guidelines for Americans be used to bring about measurable nutritional improvements in school meals and in children's diets?

III. What are the opportunities and obstacles in meeting current nutrition recommendations in school meal programs?

IV. What actions can the USDA, parents, school food service, food industry and other public and private organizations take to encourage the implementation of current nutrition recommendations in local schools?

The four hearings were held in Atlanta, Georgia on October 13, 1993; in Los Angeles, California on October 27, 1993; in Flint, Michigan on November 12, 1993; and in Washington, DC on December 7, 1993. Each hearing was presided over jointly by officials from USDA and officials from USDA's Federal partners in this effort—the Department of Education (DOEd) and DHHS. The inclusion of representatives from DOEd and DHHS is an important asset in modifying the school meal programs both because of their expertise and their missions. The school meal programs must be considered in the context of the educational framework, as overseen by DOEd, and the national policies regarding health care and disease prevention under the aegis of DHHS. Therefore, USDA is very pleased that a partnership is being forged among all Federal agencies responsible for assisting the nation's schoolchildren. USDA is also pleased to be working with DOEd and DHHS to further their policy initiatives—Goals 2000: Educate America Act (DOEd) and Healthy People 2000: National Health Promotion and Disease Prevention Objectives (DHHS). Of particular concern are solutions to issues such as increasing public awareness of the links between diet and health, familiarizing the public with the need to establish good eating habits in children that will be carried on through their lifetimes and finding innovative ways to incorporate the school meal as a learning experience into daily school curriculums.

A variety of witnesses from the fields of medicine, nutrition and education, food service, production and processors and other food industry representatives, as well as parents, students and other consumers and the general public, testified at each of the hearings. Witnesses were asked to focus their remarks on one of the four questions stated above. A transcript of each hearing was prepared, and witnesses could, if they wished, also submit written testimony and copies of any materials used to prepare their remarks. As noted above, the **Federal Register** Notice also solicited written comments from anyone who could not attend one of the hearings. To be assured of consideration, comments had to be submitted on or before December 15, 1993. The written testimony and all comment letters were reviewed and analyzed by the Department prior to preparation of this proposed regulation. This portion of the preamble provides a summary of the comments.

Summary of Comments Received

The overwhelming majority of commenters, representing a broad range of backgrounds and experiences, called for improvements to school meals. Comments from the public, students, and parents, while expressing serious concerns and supporting change, were general in nature and provided few specific details. However, commenters from the medical, nutrition, and food advocacy communities, State and local food service professionals, and food industry representatives provided detailed information and frequently recommended specific actions.

Commenter Categories

A total of 363 witnesses testified at the hearings, and an additional 2,013 written comments were received by the Department. Of the 2,376 commenters: 21% were medical professionals, nutritionists or dietitians, representatives of public health, nutrition, or food organizations; 21% were from the general public; 21% were parents and students; 16% were school food service personnel, representatives of school food service organizations or representatives from State education/child nutrition agencies; 11% were teachers, school officials or representatives from school associations; 7% were food industry representatives; and 3% were representatives of other State or Federal agencies or members of Congress.

The Department is very pleased that so many persons took the time to testify or to submit written comments and would like to take this opportunity to express its appreciation for their comments and suggestions. The commenters represented an extensive cross-section of perspectives and provided a great variety of opinions and recommendations. Especially gratifying were the number of students and parents who commented. These groups are, after all, the constituency that the Department considers program "customers," and it is these groups the Department is seeking to serve better.

Comment Breakdown

The following number of commenters addressed some aspect of the four basic questions: I. 796; II. 703; III. 752; IV 1,464. Though comments varied greatly in content, the following significant themes emerged: (1) The need to improve school meals in order to improve the health of children; (2) the need for school meals to reflect current nutrition recommendations, specifically reductions in fat and saturated fat as recommended in the Dietary Guidelines;

(3) the importance of an integrated nutrition education program that involves students, parents, teachers, and school food service personnel; (4) the need to revise current commodity programs to provide schools with more nutritious foods; and (5) the need to incorporate nutritional improvements while at the same time improving the appeal of meals offered to ensure that nutritious meals are consumed.

The Department also notes that many commenters raised distinct issues within the four stated questions. For example, many commenters cited the need for vegetarian alternatives; others argued for inclusion of fast food companies in the NSLP, and several specific commodity issues were raised. Therefore, the Department has included an analysis of several of these issues in this preamble. Following are the more prevalent issues raised by the over 2,300 commenters and the number of commenters who addressed them:

(1) Fat levels in school meals: 1,048;

(2) The need for more fruits and vegetables: 829;

(3) The importance of nutrition education: 794;

(4) Concerns about milk and dairy products including the statutory requirement for whole milk and recommendations for a beverage substitute: 687;

(5) The Department's Food Distribution Program and commodities: 493;

(6) The costs and operational difficulties of implementing the Dietary Guidelines: 448;

(7) The need for whole grains in school meals: 387;

(8) Fast foods and fast food companies (both for and against availability in schools): 385;

(9) Vegetarian alternatives for school meals: 263;

(10) Sodium levels in school meals: 213;

(11) The importance of breakfast: 200.

Readers should note that while all comments were taken into consideration, this preamble does not generally discuss individual comments. The preamble does, however, address the common themes which emerged and responds to specific individual comments when they raised significant issues.

Health Consequences Comments

Close to 800 commenters addressed some issue relevant to health consequences and diet. The majority of commenters were from the public and the medical communities. Generally speaking, all of the commenters focused on the link between diet and disease, specifically, cardiovascular disease, obesity, and cancer. The majority of these commenters cited the high incidence of cardiovascular disease in the United States, both among children and adults, and the need to improve the diets of young children in order to prevent the development of heart disease in adulthood.

Many commenters wrote in support of the positions taken by a number of major medical associations. These commenters focused on the importance of improving the diets of children, given the strong evidence that heart disease begins early in life, and emphasized the need to provide foods rich in fiber and complex carbohydrates for the possible prevention of some cancers.

A number of commenters addressed the potential link between diet and learning and behavioral difficulties. These comments ranged from general observations regarding improper nutrition and lack of concentration, to specific concerns addressing functional disabilities, behavioral disturbances, fatigue, and cognitive disabilities.

Commenters also pointed out that nutritional issues are especially vital for under-privileged and ethnic populations. Specifically, commenters cited the poor nutritional intake among low income children and certain minority populations. One commenter indicated that these populations, who are most at risk, do not appear to associate nutritional risk factors with leading causes of death. Commenters also expressed concern over the high incidence of major diseases among low-income, minority populations—specifically, the higher incidence of heart disease and hypertension among African-Americans, obesity among Hispanics and Native Americans, and diabetes among Native Americans.

Finally, a large number of commenters addressed the growing incidence of obesity among children, and the threat this poses to future health. A number of commenters expressed concern over the lack of physical activity in schools as a factor leading to the increase of obesity among school children. Several indicated the need to integrate exercise with other components of good health including school meals. In addition, the unique needs of children with special health problems, the need for proper diet in the prevention of osteoporosis, and the escalating cost of health care and the role of diet as a preventative measure were identified as important concerns.

Dietary Guidelines for Americans' Comments

Over 700 commenters, many from the public and from the school food service community, addressed the issue of school meals meeting nutritional guidelines, the majority of which overwhelmingly agreed that meals should comply with the Dietary Guidelines, especially the recommended limits on fat and saturated fat. Most commenters agreed with the need for school meals to meet the Dietary Guidelines; however, several commenters indicated that compliance with the Dietary Guidelines should be voluntary. With respect to the current meal patterns, many school food service commenters indicated that they could not meet the Dietary Guidelines within the meal pattern requirements, and others indicated that the current meal pattern requirements make it difficult to provide multi-cultural meals to children.

Many commenters supported the implementation of Nutrient Standard Menu Planning (NSMP), a menu planning system that is based on the analysis of nutrients. Commenters believed this system would provide increased flexibility in meal planning as well as consistent analysis of nutrients. Commenters also suggested that this NSMP approach can assist in providing more culturally diverse meals. It must be noted that some commenters expressed concern that some smaller schools may not have or be able to afford the technical capability needed to conduct the analysis. Some commenters also suggested that the Department or State agencies should develop menus that meet the Dietary Guidelines. These menus can be used by smaller and school districts with fewer resources, which may initially have difficulty implementing NSMP.

Nutrition Education Comments

Close to 800 commenters pointed to the need for nutrition education for parents, teachers, children, food service staff, and school administrators. Many commenters came from the nutrition and food service arenas as well as the general public. Commenters supported the idea that nutrition education should be included in comprehensive health education curriculums and should begin at an early age. Commenters also indicated the need for nutrition education to be reinforced by healthful meals in the cafeteria. Commenters pointed to the need for a national nutrition media campaign. Many school food service commenters expressed their desire for national minimum

professional standards which food service personnel would be expected to meet. In addition, a significant number of commenters urged health promotion as a component of health care. Finally, many commenters supported the need for increased funding for the Department's Nutrition Education and Training (NET) program, 7 CFR Part 227.

Taste and Plate Waste Comments

Many commenters from a wide range of commenter categories were quite critical of the current quality of school meals, noting that lack of appeal leads to increased plate waste. Some cautioned, however, that drastic changes in the kinds of food served may drive children away from school meals. These commenters generally supported the need to make meals both appealing to children and nutritious. A number of commenters also cautioned that the increased amount of certain foods that may be necessary to provide a nutritious diet may result in more plate waste if children do not find the meals to be appetizing. Several commenters supported the need to involve culinary institutes and chefs in meal preparation as a way to improve taste and presentation.

Fat in Meals Comments

Nearly one out of two commenters discussed fat in school meals, with most of these commenters coming from the general public and the medical community. The large majority of commenters who addressed the issue of fat content cited the need to lower fat and saturated fat levels in school lunches. Some of the comments were general statements such as "need more low fat foods," while others made specific recommendations detailing the levels of fat and saturated fat that school meals should meet.

A number of medical, public health, and school food service related organizations addressed this issue, all of which were in support of lowering the fat content of meals. A number of commenters recommended that the fat content of meals be set at between 10 to 20 percent of total calories—lower than the current Dietary Guidelines recommendation of 30 percent of calories from fat.

A number of food service workers and directors cautioned that increasing portion sizes of certain foods and serving more expensive fresh produce to meet a 30 percent limit on calories from fat may result in higher costs. Some commenters also expressed concern that lowering fat may result in decreased calories critical for growing children. Several commenters advised that low fat meals need to be appealing so children will consume them.

Several industry representatives indicated that industry is responsive to the need to lower fat and is already making a number of changes to provide more low fat products. A number of commenters, including food service staff, parents and members of the general public made specific recommendations on how to lower fat in school meals, such as trimming or draining fat from meat, eliminating added fats from vegetables, and serving soups more often.

Moreover, many commenters, primarily students and the general public, suggested that the fat content in school meals could be reduced by offering more vegetarian meals, eliminating the whole milk requirement, revising the commodity system to encourage more purchases of low fat items such as fruits and vegetables, and reducing the amount of fast food items and processed foods in school meals.

Meat and Meat Related Comments

The Department received over 200 comments related to meat products, with most comments coming from students, parents and the general public. Many commenters indicated that the current serving size for the meat/meat alternate component is too large and recommended that schools cut down on the amount of meat served. Commenters also indicated that more poultry and fish should be offered. Some commenters recommended that tofu and isolated soy proteins, as well as yogurt, be added to the list of allowable meat alternatives. (The Department wishes to call attention to the fact that isolated soy proteins are currently permitted with some limitations.) On the other hand, several industry representatives cautioned against reducing the amount of meat too much due to its nutritional contributions, specifically, essential amino acids, iron, zinc, and vitamin B6. They also observed that children are familiar with meat and will consume it more readily than some alternative protein sources.

Menu Selection and Variety Comments

The Department received over 250 comments in support of offering more vegetarian meals. Commenters supported the low fat nature of vegetarian meals and their contribution to a healthful diet. Others addressed the need to expose children to more vegetarian foods and foods from diverse cultures at an early age. Some commenters provided specific examples of non-meat items, such as tofu and other plant-based sources, that could be used in school meals, while others simply indicated a general need for more meat-free alternatives. Students as well as school food service personnel indicated the need to offer vegetarian choices as students are requesting them more.

The Department received over 800 comments in support of the use of more fruits, vegetables, or grain products. Commenters gave specific recommendations regarding preparation methods and serving ideas, including offering salad bars more frequently, increasing the variety of fruits and vegetables, and serving more whole grain items. Others recommended the use of more grain and bean products, citing their nutritional benefit as well as low cost. Many school food service commenters expressed concern over serving more and a wider variety of fruits and vegetables as children may not be familiar with them and, therefore, may not consume them.

Breakfast Comments

About 200 commenters, primarily from the medical, school food service, and education communities, addressed breakfast meal issues with a number of these commenters supporting the importance of breakfast to the health of children. A number of food service personnel indicated their success with the SBP and desire to increase participation. Others, while supporting the SBP, expressed concern with the nutritional quality of breakfasts currently offered.

Financial, Paperwork, and Other Operational Obstacles Comments

Over 250 commenters addressed financial and paperwork obstacles, with many of these comments coming from food service (local and State) professionals, the general public, and the nutrition community. A number of commenters indicated that the need to avoid operating at a deficit has prevented food service staff from providing more nutritious meals. Commenters also complained that the amount of paperwork required to administer the feeding programs is excessive and that the review system is cumbersome and inflexible. Specifically, commenters stressed the need to focus more on nutrition and less on meal-by-meal accountability, income verification, and review requirements.

Many commenters expressed concern over the cost of producing meals under the current meal pattern system. Commenters indicated that schools already find it difficult to provide meals within current resources and

maintained that any further nutritional requirements placed on schools would result in additional financial hardship. Commenters specifically noted obstacles such as the increased cost of providing more foods such as fresh fruits and vegetables, low fat and low sodium ingredients, and the increased portion sizes needed to meet the nutrition standards without exceeding the 30% fat limitation. On the other hand, some parents and students indicated that they would be willing to pay extra for more nutritious meals.

A number of commenters indicated that the school meal periods are not adequate, thereby forcing students to throw food away, consume it too quickly, or bring meals from home to prevent waiting in the lunch line. Others expressed concern that more nutritious meals would require larger portions or extra food items that children may not be able to consume during short lunch periods.

Partnerships and Coordination Comments

A number of commenters expressed the need for the Department to establish partnerships with other Federal agencies such as DOEd, DHHS, the Centers for Disease Control and Prevention, as well as with industry representatives, State agencies, school boards, nutrition professionals, extension programs, parents, teachers, and especially students. Commenters also addressed the need for Federal efforts to support, not hamper, local efforts. Commenters indicated that the Department should use its resources and purchasing power to promote change and improve meal quality.

Commodity Comments

The Department received close to 500 comments on various aspects connected with the donation of commodities to schools. The majority of these commenters were from the general public as well as the school food service and industry arenas. Over 250 commenters indicated that a more healthful variety of USDA commodities should be made available to States. The majority encouraged the Department to reduce the amount of fat, cholesterol, and/or sodium in the commodities. These and a number of closely related comments are perhaps best characterized by the opinion of over 50 commenters that the commodities provided to the NSLP should comply with the Dietary Guidelines.

The Department also notes that over 100 commenters addressed the Department's September 1993 announcement of the Fresh Fruit and Vegetable initiative. Most of the comments were supportive of the initiative. Twenty-five commenters stressed the need to use the funds available to schools for direct food purchases as effectively as possible.

Miscellaneous Comments

Some commenters indicated the need to upgrade school kitchens to allow for the storage and preparation of more nutritious meals. In line with this objective, some commenters urged reauthorization of Federal funding for food service equipment. Commenters also pointed to the need for schools to disclose nutrition information so that students can make informed choices and parents and the community would have a basis by which to assess progress. A number of commenters cautioned against instituting changes too rapidly and encouraged the Department to take gradual steps. Others recommended that the Department market successful programs to serve as models. Several commenters recommended that the Department allow for a reimbursable snack to be served as a way to supply the extra foods that may be required to meet nutritional standards.

Other Comments Not Addressed in This Proposal

Finally, the Department wishes to call attention to several issues raised by commenters that are not germane to this proposal, either because of statutory constraints or because they address areas in which the Department believes State agencies and school food authorities need flexibility.

Milk and Dairy Products

The Department received over 600 comments regarding milk and dairy products, with most comments coming from the general public, parents and the school food service community. The majority of commenters recommended that schools not be required to offer whole milk, with a large number of these comments coming from the food service community. Commenters' reasons for eliminating the whole milk requirement included the high fat content, the perceived conflict with the Dietary Guidelines and its higher cost. Many commenters also recommended that non-dairy alternatives be offered in place of milk, as dairy products are high in fat, cholesterol, and protein; contain little iron and fiber; and, commenters claimed, are not tolerated well by many children. Commenters also recommended that more skim, one percent, and two percent milk be offered.

A few commenters supported maintaining the whole milk requirement, on the grounds that children may not consume low fat alternatives and eliminating the requirement would be costly to the Federal dairy program. Others, while not supporting the whole milk requirement, did caution against reducing or eliminating dairy products, as they provide necessary calcium for growing children.

The Department wishes to call attention to the fact that the requirements that fluid milk be available as a beverage and that whole milk be available as an option for the NSLP, are required by section 9(a)(2) of the NSLA, 42 U.S.C. 1758(a)(2). Therefore, the Department cannot deviate from these provisions by regulatory action.

Free Meals to All Children

Over 140 commenters, primarily from the school food service community, advocated a program in which meals would be served free of charge to all children, regardless of their families' economic status. Such a program would eliminate the income eligibility requirements, and all children would receive meals free of charge, regardless of their family's income. Many indicated that such a program would reduce paperwork, increase time for necessary nutrition-related activities, and reduce the stigma associated with participation.

Again, however, such a revision would require specific statutory authority in light of the requirement of section 9(b)(1)(A) of the NSLA 42 U.S.C. 1758(b)(1)(A), that school meals be provided at no cost only to those children from households with incomes of less than 130% of the Federal Income Poverty Guidelines. The Department also notes that such a program, implemented fully in all schools, would increase the cost of NSLP by $7 billion if fully implemented in School Year 1996. About one-half of this increase would be spent on higher reimbursement for meals currently reimbursed at the fully paid and reduced price rates. In other words, about $3.5 billion of the additional funding would be spent even before reaching any more children.

Fast Foods, Competitive Foods, Other Foods

Several commenters were concerned with the increase of fast food companies, fast food-like items and competitive foods of low nutritional value that are sold in schools. Others felt that, since fast foods are popular,

their use should be increased. The Department is not proposing any specific provisions on fast foods or competitive foods at this time. However, it should be noted that, under this proposal, meals claimed for reimbursement which include such foods will be required to comply with established nutritional standards over one week. Further, school food authorities would be required to continue to observe the restrictions currently in the regulations prohibiting the sale of foods of minimal nutritional value in competition with the NSLP and SBP.

Several commenters recommended that certain kinds of foods—principally milk, meat and processed foods—be eliminated entirely from program meals. These recommendations were based on the assumption that some foods are good for people and some are intrinsically bad. However, the Department does not share this view. The Department continues to believe that it is important to obtain essential nutrients from a variety of foods. The Department also emphasizes that foods, particularly those high in fat, must be eaten in moderation, but there are no plans to prohibit any foods from school meals other than the foods of minimal nutritional value currently enumerated in appendix B of part 210 for the NSLP and § 220.12 for the SBP.

Minimum Professional Standards

Some commenters suggested that the Department establish minimum professional standards for local food service workers. The Department is aware that efforts are being made to address this issue. For example, the American School Food Service Association has developed a program to certify food service workers. However, given the wide range of variances in needs and resources among the 20,000 school food authorities and 92,000 schools operating under the NSLP, as well as varying State requirements; the Department does not believe it is feasible to propose uniform national standards. Nevertheless, the Department does intend to continue to provide technical assistance and guidance to both State agencies and local school food authorities on ways to improve food service operations.

Cash in Lieu of Commodities/ Commodity Letter of Credit

Under section 18(b) of the NSLA, 42 U.S.C. 1769(b), Congress established the Cash in Lieu of Commodities (CASH) and Commodity Letter of Credit (CLOC) demonstration projects as a means of examining alternatives to the current commodity distribution system for schools. Under CASH, schools receive their per-meal commodity support entitlement (currently $.14) in the form of a direct cash payment. CLOC provides commodity support through a Letter of Credit which must be used to purchase specific commodities that mirror the Department's commodity purchases. Fifty-nine school districts participate in the CASH/CLOC demonstration. The current project authorization expires at the end of Fiscal Year 1994.

Several commenters supported CASH/CLOC, while a small number opposed it. Others implicitly favored the current commodity distribution system if more healthful commodities can be provided. These commenters would support alternatives only in the event that the current commodity system cannot be strengthened and improved. The Department intends to continue and expand efforts already underway to improve the commodity program. Moreover, the Department does not have the statutory authority to address the CASH/CLOC issue through the rulemaking process.

Guiding Principles and Framework for Action

Improving the nutritional standards of school meals is our national health responsibility. There is no question that diet is linked to health and that chronic disease often begins in childhood. Since eating habits are firmly established by age 12, it is essential that dietary patterns be formed early. What children eat helps determine not only how healthy they are as children, but how healthy they will be as adults.

Updating our nutrition standards and streamlining the administration of school meals programs reinforces President Clinton's priorities for health care reform and government reinvention. Five principles are at the core of our vision and grow out of our analysis of public comments and the participation of those who hold a stake in a healthy future for our children. These principles are:

Healthy children: Our goal is to provide our nation's children with access to school meal programs that promote their health, prevent disease, and meet the Dietary Guidelines for Americans.

Customer appeal: We understand that if food doesn't look good or taste good, children will not eat it. We must involve students, parents, teachers, and the food and agriculture community in any change through a national nutrition education campaign, using the media that children and parents understand and speaking in the language that they speak.

Flexibility: We have to reduce the burden of paperwork, streamline reporting systems, recognize regional and economic differences and offer schools different approaches to designing menus that meet the Dietary Guidelines. To do this, we must use technology more effectively.

Investing in people: We must provide schools and school food service directors with the training and technical assistance they need to bring about nutrition changes in the school meals programs and build the nutrition skills of our nation's children, and thereby improve their health.

Building partnerships: To meet our national health responsibility to American children and to increase cost effectiveness, we must forge partnerships throughout the public and private sectors. This includes continuing collaborative efforts with our federal partners at the Departments of Education and Health and Human Services and building bridges to consumer and industry groups.

Guided by these five principles, USDA constructed a comprehensive, integrated framework for action:

I. *Eating for Health: Meeting the Dietary Guidelines.* School meal nutrition standards will be updated and expanded to include the Dietary Guidelines for Americans with standards for fat and saturated fat as well as required nutrients. The current meal planning system which requires that certain types of foods be served in certain quantities will be replaced by a more flexible system that allows schools to concentrate on serving a variety of foods in amounts that are suitable for children.

II. *Making Food Choices: Nutrition Education, Training and Technical Assistance.* It is not enough to change the food on the plate. We must also provide the knowledge that enables children to make choices that lead to a nutritious diet and improved health. It also is vital that local meal providers receive training on how to improve meal quality. This dual initiative to educate children and assist meal providers offers many opportunities to influence both what foods are offered by schools and what foods are eaten by children.

III. *Maximizing Resources: Getting the Best Value.* By marshalling all available resources and strengthening partnerships with our state and local cooperators, we will stretch food dollars and cut costs while improving the nutritional profile of commodities. We will enhance access to locally grown commodities and better use regional

agricultural resources. And we will provide assistance, training and the power of federal purchases to help school administrators manage school meals programs in a more cost-effective manner.

IV. *Managing for the Future Streamlined Administration.* It is necessary to reduce paperwork and administrative burdens of local administrators. We will streamline procedures and emphasize administrative flexibility to free state and local food program managers to concentrate on nutrition.

The Framework for Action

The regulatory proposals that follow are intended to support the Department's goal of promoting the long term health of children through updating nutrition standards to include the Dietary Guidelines. In addition, several of the proposals reflect the Administration's desire to streamline administration of government programs through increasing State and local flexibility and making better use of advanced technology.

It is important to recognize, however, that these regulatory proposals are but one part of the Department's overall plan for improving the quality of school meals. The Guiding Principles and Framework for Action described above grew out of public comment and the recognition that it is not enough just to change the food served to children on their plates. What is required is a much broader approach that includes significant administrative actions initiated by the Executive Branch.

For example, the Department is committed to investing in people—both the State and local professionals who operate the program and the children who participate in it. This investment will take the form of nutrition education to build the skills necessary to make healthful food choices, training for food service workers and technical assistance. The Department has already committed existing funds toward the development of improved recipes for school meal service, a computerized data bank of standard nutritional values for foods served in the school meals program, and a demonstration project on the use of Nutrient Standard Menu Planning. On the nutrition education front, the Department has already announced a strategy that includes challenge grants to localities to develop community-based, comprehensive approaches to nutrition education and a nutrition publication directed at grade school children. The Department is also assisting local school food service professionals in working with chefs, farmers and others to harness all of their unique skills to make school meals appealing and healthful, and to educate children about food and cooking.

Looking to the future, the Administration's budget proposal for Fiscal Year 1995 contains a request for $18.4 million in additional funds to support nutrition education and technical assistance. Plans for these funds include extensive training for local school meal providers on how to plan and prepare nutritious and appealing meals as well as launching a national media campaign directed at building children's skills at making wise food choices for life-long health.

All these initiatives are being undertaken with the support of USDA's Federal partners at DHHS and DOE. This collaboration extends to addressing issues of common concern such as reducing redundant paperwork requirements, integrating nutrition education into school curriculum and exploring ways to integrate the school meals program more fully into the school environment and into school-based health initiatives. Within the Department, there are also plans to strengthen ties with the Food Service Management Institute and, indeed, with private organizations so that as many resources and as much creativity as possible can be brought to bear on this important issue of improving children's health through sound nutrition.

Efficient and effective government requires that the use of the finite resources available to administer the programs be maximized. Therefore, part of the Department's Framework for Action is to maximize resources wherever possible. One of the important avenues to pursue in this regard is effective use of the USDA commodity program. The Department recognizes that commodity foods are a significant component of the meals that are served to children and, therefore, need to be as nutritious as possible. A wide variety of foods ranging from grain products to fruits and vegetables to meat, poultry and fish are already being offered. The Department plans to continue to offer this wide array of foods. Improvement is always possible, however, and the Department intends to intensify its review of purchase specifications to assure that products are as low in fat and sodium as possible while still maintaining palatability for consumers.

In addition, the USDA agencies that are key partners in delivering commodities are working with one another, as well as with industry, to modify labels on commodities that go to the schools to include nutrition information, and to develop new products, like low-fat cheeses, that will provide the schools with more flexibility to meet the Dietary Guidelines. This latter effort will have a salutary effect not only on the commodity program, but could also prove useful in providing schools with a larger array of healthful products to choose from when they make their local purchases.

Because schools do purchase significant amounts of food independent of the commodity program, the Department is also considering various other strategies for improving the quality and effectiveness of those purchases. For example, a pilot test is planned for School Year 1994 with the Department of Defense to procure produce for the school meal programs. Through this project, schools can obtain a much wider variety of fresh produce than USDA can provide directly. The Department is also working to facilitate interaction among schools, State Departments' of Agriculture, small resource farmers and farmers' markets. This has great potential for improving the quality of the foods used by those schools that are close to particular growing areas as well as providing important new markets for small farmers.

In summary, the Department is committed to improving the quality of school meals and the health of the nation's children through a variety of approaches. There is complete recognition that success can only be achieved over time and through the efforts of the Federal government working in concert with State and local administering agencies, industry, the Congress, a variety of private organizations and the ultimate beneficiaries of the school meals programs—children and their parents.

Proposed Regulatory Changes

Expanding and Updating Nutrition Requirements

The Department's mission continues to be to carry out the declared policy of Congress to "safeguard the health and well-being of the Nation's children." In order to meet this goal, school meals must change to reflect the scientific consensus that is articulated in the Dietary Guidelines. Therefore, the Department believes that current nutrition standards must be expanded to incorporate the Dietary Guidelines in the NSLP and SBP regulations and is proposing to amend §§ 210.10 and 220.8 to require that school meals meet the applicable recommendations of the Dietary Guidelines including the quantified standards established for fat

and saturated fat. Proposed regulations would also require schools to make an effort to reduce sodium and cholesterol, increase dietary fiber and serve a variety of foods.

A more comprehensive discussion of implementation occurs later in this preamble, including the time frames that would be followed for the shift to the updated nutrition standards.

While the proposed regulations would include the basic provision that school meals meet nutrition standards over a one week menu cycle, the proposed revision would also require meals to provide a level of nutrients for specified age groups rather than meet minimum amounts of specific food items for each age group as is currently required. Sections 210.10 and 220.8, therefore, would incorporate nutrition standards for various age/grade groups based on the RDA for the following nutrients: Protein, vitamin A, vitamin C, iron, and calcium as well as the energy allowances for calories. Sections 210.10 and 220.8 would also set the maximum levels of calories from fat and saturated fat at 30 percent and 10 percent of calories, respectively.

Although RDA have been established for more nutrients than indicated above, the Department has chosen to monitor only those listed because these are key nutrients that promote growth and development which are consistent with those required in the Nutrition Labeling and Education Act of 1990 (Pub. L. 101–535). The proposal would also require schools to decrease the levels of sodium and cholesterol and increase the amount of dietary fiber in school meals. The Department is not proposing specific levels for these components, since numeric targets are not established by the current Dietary Guidelines. However, progress in this area could be assessed through a variety of ways including gradual reductions in sodium, and if necessary, cholesterol levels, and increased use of vegetables, fruits and grain products.

The Department wishes to note that the Dietary Guidelines are designed for persons aged two and over. The Department will maintain current meal patterns for children in the zero to eleven months and one to two year age groups. For children who are two years old, schools will have the option of using the minimum calorie and nutrient requirements for school meals for children ages three-six or developing a separate set of nutrient and calorie levels for this age group. Finally, because compliance with the Dietary Guidelines will not be required until School Year 1998–1999, which begins July 1, 1998, the current meal patterns and quantities will be retained temporarily and will be redesignated § 210.10a for the NSLP and § 220.8a for the SBP. This proposal does not apply to infant meal patterns and meal supplements; therefore, the appropriate sections of the redesignated § 210.10a and § 220.8a will continue to be followed by schools serving infants and meal supplements.

New Approaches to Menu Planning: Nutrient Standard Menu Planning and Assisted Nutrient Standard Menu Planning

Schools must currently meet a meal pattern which specifies minimum amounts (by age group) of the five food items which must be offered in order to receive reimbursement for meals. An alternate approach that provides an excellent tool for improving the nutritional quality of school meals is Nutrient Standard Menu Planning (NSMP). Under NSMP, the menu is developed through the nutrient analysis of all foods offered over a school week to ensure that meals meet specific nutrition standards for key nutrients, and meet recommended levels of fat and saturated fat. Other dietary components that will be analyzed are cholesterol, sodium and dietary fiber. However, the Department recognizes that some school food authorities may not have the computer capability or the degree of access to technical support necessary to independently conduct NSMP. In these circumstances, the Department is proposing to allow school food authorities to use a modified form of NSMP entitled Assisted Nutrient Standard Menu Planning (ANSMP). Use of ANSMP would allow development and analysis of menus by other entities while still applying the essentials of NSMP. (A more complete discussion of ANSMP may be found later in this preamble.)

Under NSMP, the menu planner is expected to use effective techniques to provide menus that meet the updated nutrition standards. All menu items (i.e., any single food or combination of food) or other foods offered as part of the reimbursable meal will be counted toward meeting the nutrition standards. An exception to this is foods of minimal nutritional value, as provided for in § 210.11(a)(2) or § 220.12(b), which are not offered as part of a menu item in a reimbursable meal. A definition of "menu item" is proposed to be added to § 210.2 and § 220.2 to expand upon the current definitions of food item and food component that are used in various sections of the regulations concerned with point of service meal counts. The definition would also specify that one menu item offered must be an entree and one must be fluid milk. Further, as discussed later in this preamble, the Department is proposing that the entree must be selected as part of a reimbursable lunch.

Menu items will be analyzed based on production levels to more accurately reflect the overall nutritional composition of the menu. Menus will be planned, analyzed for nutrient content and adjusted as needed to ensure that production and selection trends are considered and nutrition standards are met. A discussion of NSMP software programs and the National Nutrient Database for Child Nutrition Programs is provided later in this preamble.

The purpose of NSMP and ANSMP is two-fold: To provide a flexible way to plan menus using certain nutrient levels, not on limited food items and amounts, and to measure how well meals are meeting nutrition standards. The Department is proposing to adopt NSMP and ANSMP by amending § 210.10(k) and (l) of the regulations to incorporate NSMP and ANSMP for the NSLP and § 220.8(j) and (k) for the SBP.

While school meals will be expected to comply with the updated nutrition standards and to be planned through NSMP or ANSMP, the Department wishes to emphasize that compliance monitoring would stress technical assistance to enable the school to achieve the standards. While all meals offered during a menu cycle that fail to meet the established nutrition standards could technically be subject to an overclaim, the regulations will require State agencies to establish claims only when school food authorities refuse, not simply fail, to take corrective action. It is the Department's intent that every effort be made to provide nutritious meals to children rather than taking punitive actions which could undermine this initiative. Further discussion on this point may be found later in this preamble in the section on monitoring.

Nutrition Disclosure

Since information on the nutritional composition of the menu is readily available as a result of NSMP/ANSMP, the Department is proposing to amend § 210.10(a) to encourage school food authorities to make public, disclose the nutrients contained in their m[illegible]. Many school food authorities, recognizing the benefits of nutrition disclosure already make this information avail[illegible] in the classroom on menus or by notifying local media. These benefits include: (1) An increased awareness on the part of students and parents on the nutritional quality of

school meals; (2) depending on how the information is disclosed, an enhanced ability for students and parents to make healthful choices, and; (3) increased support for the school meal programs through recognition of the improved quality of school meals.

The Department recognizes the differing needs of school food authorities, and, therefore, is not proposing to mandate nutrition disclosure. The Department believes this information should be readily available to students and parents without their having to request it. In providing this information, school food authorities would take into account local factors such as nutrition analysis capabilities and student/parent requests. For example, the school may disclose information either: (1) Developed through the weekly nutrient analysis of meals; (2) based on sample meals offered each day, or; (3) provided along with food item(s) offered in the cafeteria.

The Department also wishes to emphasize that school food authorities that make this disclosure would not experience an additional administrative burden. The information being disclosed is a product of NSMP/ANSMP, and the school food authority can determine, for itself, the most efficient means of disclosure.

Although nutrition disclosure will not be required, the Department recognizes that many school food authorities are already providing this information to students and parents, and strongly encourages others to make public such information. The Department would also like to solicit comments regarding nutrition disclosure, particularly effective nutrition disclosure approaches; which nutrition information to disclose; and disclosure's value as a tool to help children choose nutritious meals.

Assisted Nutrient Standard Menu Planning

As stated above, the Department recognizes that some school food authorities may not have the resources or capacity to independently analyze NSMP. For these school food authorities, the optional method of ANSMP is an alternative approach to NSMP which is proposed in § 210.10(l) for the NSLP and § 220.8(k) for the SBP. School food authorities would draw on the expertise of others to provide menu cycles, adjusted for local needs and preferences. The provided menu would be analyzed to ensure that it meets the required nutrition standards. The menu analysis must be consistent with the local preferences, production records, preparation techniques and food procurement specifications. The provided menu cycles could be developed in a variety of ways—by States; consortiums of school food authorities, by consultants or even by the Federal government.

To ensure consistency with the nutrient analysis of the provided menu, the following components must be standardized: Recipes, food product specifications, and preparation techniques. To accurately reflect the nutrient analysis of the menu as offered, the provided menu must be analyzed and adjusted to the quantities of food prepared and served.

In addition, the school, in conjunction with the entity providing the menu cycle, must periodically review their application of ANSMP to ensure the suitability of the selected menu cycle and the accuracy with which it is being managed (i.e., Are the prescribed procurement specifications and preparation techniques being followed, and are on-going production adjustments made to reflect student choices, thereby resulting in reanalysis of the menu?) It is also possible that standard menus, recipes and procurement specifications could be provided by the Federal government, then adjusted and reanalyzed at the State or local level as necessary. The Department is most interested in receiving comments regarding the usefulness of this approach.

Reimbursable Meals

Schools currently receive reimbursement for each meal served to children that meets the requirements of the lunch or breakfast meal pattern and, if applicable, the offer versus serve option. Basically, the required components (meat/meat alternate, two or more servings of a vegetable and/or fruit, bread/bread alternate and milk) must be offered and a minimum number of items must be selected. In order to determine if the meal chosen by the child is reimbursable, the cashier observes, at the point of service, if the proper number of components are taken.

Under NSMP and ANSMP, a meal will be reimbursable if at least three menu items (one must be an entree and one fluid milk) are being offered, and if at least three menu items are selected. For reimbursable lunches, one of the menu items selected must be an entree. If the school participates in offer versus serve, a meal will be reimbursable if at least three menu items are offered and two menu items are selected. Again, for reimbursable lunches, one of these two menu items must be an entree. For the purpose of point of service counts, this proposal will not change the basic concept of a reimbursable meal. Cashiers will continue to determine if the proper number of menu items was selected and, for the lunch service, that one of the menu items is an entree.

The reason for requiring that one of the selected items for lunch be an entree stems from the Department's concern that the school lunches children consume provide an adequate amount of calories and other essential nutrients. Traditionally, the most significant nutrition contribution in a school lunch comes from the entree. Therefore, this proposal is being offered as a way of assuring that children (particularly those children that participate in other meals such as breakfast) select and, hopefully, consume the most nutritious lunch possible.

The Department recognizes that this proposal deviates from current requirements which do not stipulate that the child must select an entree for lunch. The Department would be concerned if commenters believe this restriction inhibits the flexibility that this proposed rule was designed to promote. For example, if children were prohibited from selecting lunches that were consistent with ethnic or vegetarian preferences, or if plate waste was a potential by-product. Therefore, the Department is particularly interested in receiving comments on and alternatives to this proposed requirement, including comments on whether the minimum number of menu items, both in terms of the standard meal and the offer versus serve option is adequate even with requiring selection of an entree for lunch.

The Department is not proposing to extend the requirement that a reimbursable meal contain an entree to the SBP. This decision was made due to the nature of the breakfast meal and the possible confusion that may result by trying to define an "entree" for the breakfast program.

[illegible]

While implementation of the updated nutrition standards affects the content of meals, it will not affect base counting methodology. Cashiers will continue to take counts at the point of service on the basis of the number of menu items [illegible] personnel will be able to recognize reimbursable meals, as they will not differ substantially [illegible].

In fact, under NSMP/ANSMP, point of service identification of a reimbursable meal may be easier as cashiers would no longer need to determine which of the required components discussed above

have been meet by a particular food item, such as a pot pie, which contains a number of different ingredients. Under NSMP/ANSMP, a pot pie would be the entree which is simply a required one menu item for claiming purposes.

Preparation for Implementation of NSMP and ANSMP

The Department is currently sponsoring a demonstration project to evaluate the optimum use of NSMP as a way for school meals to meet the Dietary Guidelines while ensuring that students also receive needed nutrients and calories. One of the main objectives of this demonstration is to assist the Department in identifying the technical assistance necessary to most efficiently and effectively implement NSMP. This approach shifts the focus from the traditional specifics of a meal pattern to meals containing a combination of foods that meet the nutritional needs of school-age children, by age group, over a school week. Under NSMP and ANSMP, school food authorities will have more flexibility in deciding what other foods will be offered as long as the nutrition standards are met.

The Flexibility of NSMP and ANSMP

The proposed menu development and analysis system has a number of advantages over the current meal pattern, and the Department believes the proposed change to adopt NSMP and ANSMP will greatly assist local school food authorities with implementation of the proposed nutrition standards. With NSMP and ANSMP, there is greater flexibility in food selections and portion sizes because meals are not limited to specific types of foods in specified portions. Further, menus with cultural or other special preferences will be easier to design.

NSMP and ANSMP would also eliminate the need for cumbersome and often confusing food crediting decisions such as whether taco chips or just taco pieces could be considered as a bread alternate or whether yogurt can be allowed as part of a reimbursable meal. The complex Child Nutrition labeling program, which requires the Department to determine how commercial products are credited as food components under the meal pattern, would be substantially reduced in scope or perhaps even eliminated entirely. More nutrient dense items could be added to menus under NSMP, and the nutritional contributions of all foods offered to the child can be recognized. The Department also wishes to emphasize that all nutrients offered to the child are counted in the analysis, including those in foods such as yogurt and desserts which do not presently count toward a reimbursable meal. Of course, the most important aspect of both NSMP and ANSMP is that school food authorities will have an accurate, practical on-going means of determining if the nutrition standards are being met.

Fortification

This proposal does not require school food authorities to distinguish between naturally occurring nutrients and those that are added through fortification. However, the Department is committed to the principle that the preferred source of adequate nutrition is a meal comprised of a variety of conventional foods, as recommended in the Dietary Guidelines, rather than one containing formulated fortified foods.

The Department has been unable to develop a practical method for regulating or monitoring fortification. For example, it is virtually impossible to calculate the amounts of nutrients added to food items and those naturally occurring, especially for food items with numerous ingredients. Although a comparison could be made between a fortified item and a similar item that had no added nutrients, there may not be an identical product on which to base the comparison.

The Department believes the standards as outlined under NSMP that meals contain adequate calories and that at least three menu items be offered, as well as the higher expense of engineered foods, will inhibit excessive reliance on highly fortified foods.

The Department welcomes commenters to address the use of fortified foods in school meal programs, particularly whether there are practical ways to control over-use of fortification, the degree to which this should be a concern, and potential impacts on the character of school meals.

It should be noted that if NSMP/ANSMP is implemented on a nationwide basis, the current regulatory requirements on the use of alternate foods would no longer be necessary. During the interim and where the meal patterns are still in use, these regulations would remain in force.

Operational Aspects of NSMP and ANSMP

National Nutrient Database for the Child Nutrition Programs

In order to conduct nutrient analysis, data on the nutrients contained in a wide range of foods must be available. To meet this need, the Department has developed a centralized National Nutrient Database to allow for accurate nutrient analysis of the menus and recipes used in the NSLP and SBP. The National Nutrient Database contains information on the nutritional composition of: (1) Commodities supplied through the Department; (2) standard reference food items which are used in the SBP and NSLP; (3) Quantity Recipes for School Food Service developed by the Department, and; (4) convenience, processed and pre-prepared foods from food manufacturers. The Department is working closely with the food industry to obtain nutrient analysis of many common food products used by schools for inclusion in the database.

The implementation of NSMP, as opposed to ANSMP, is dependent upon the school or school food authority's ability to analyze the nutrient content of foods. Therefore, the Department is proposing to require that the National Nutrient Database be incorporated into all school food service software systems used for menu and recipe analysis under NSMP. Under ANSMP, the database would be used by the entity providing assistance with nutrition analysis. The Department is making the database available free of charge to participating school food authorities and to computer software companies to develop school food service software programs. The database will be regularly maintained and updated to ensure that the information is as accurate and current as possible. School food authorities would be expected to incorporate these updates into their own software as they are made available. It should be noted that a preliminary version of the Department's database is now available. Information on how to obtain it can be secured from the Department's Child Nutrition Database Hotline at (301) 436–3536.

School Food Service Software Systems

The computer software industry has many nutrient analysis software programs on the market. Few of these, however, are specific to the school programs and do not contain the types of foods, descriptions, weights and measurements used in these programs. Moreover, the results of nutrient analysis can vary dramatically depending on which software package is being used. Nutrient analysis must be based on standardized specifications to ensure accuracy. Therefore, the Department has also developed software specifications for NSMP. The overall objective of any software system used for this purpose is to adapt advanced data automation technology to simplify completion of the mathematical and analytical tasks associated with NSMP. The software specifications include menu planning, nutritional analysis of

menus and recipes, and data management reports presented in a comprehensive, simplified and user-friendly manner. To ensure that school food authorities are using a software package which meets the Department's specifications, school food authorities will be required to use a software system that has been evaluated by FNS and, as submitted, been determined to meet the minimum requirements established by FNS. However, such review does not constitute endorsement by FNS or USDA. This proposed requirement is found in § 210.10(k)(1)(ii) for the NSLP and § 220.8(j)(1)(ii) for the SBP.

Use of Weighted Averages

Some food items are more popular than others and, thus, will be selected by school children more frequently. To accurately perform an assessment of the nutritional composition of reimbursable meals offered, nutrient analysis must be based on production levels of foods offered, as production levels are an indication of foods actually selected. For example, a menu item which is chosen frequently (and therefore more portions are prepared) will contribute more nutrients to the meal than a menu item chosen less frequently.

The calculation method for computing a weighted nutritional analysis will require the school food authority to enter the following information into the selected software program the menu item; portion size; projected servings of each menu item; and the projected number of reimbursable meals each day for the school week. It should be noted that the software specifications discussed above are designed to easily perform weighting calculations. This provision is proposed in § 210.10 (k)(2) and § 210.10 (k)(4) for the NSLP and § 220.8 (j)(2) and (j)(4).

Definition of School Week

A new definition would be added for "school week" to indicate that, for NSMP and ANSMP, a minimum of three days and a maximum of seven days must be included. This is because the nutrition analysis is proposed to be an average of the reimbursable meals served over the course of a week. To ensure common understanding of the terms NSMP and ANSMP, a proposed definition would be added to § 210.2 and § 220.2 explaining the term "school week."

Transition to NSMP and ANSMP

The Department recognizes that school food authorities will need technical assistance in order to implement these changes efficiently. The Department is conducting NSMP demonstration projects in several school food authorities, and the ongoing experiences gained from these will be shared as part of the overall assistance to school food authorities to phase in NSMP and ANSMP.

The Department also plans to provide extensive training and technical assistance to State and local agencies as they prepare to implement NSMP and ANSMP. As noted earlier in this preamble, the Department has requested specific funding in the Administration's Fiscal Year 1995 budget for this purpose as well as to fund other technical assistance and nutrition education activities. Other projects to support the move towards updated nutrition standards are already being undertaken within existing resources, including modification of more than fifty recipes to include more fruits, vegetables, and grain products and to decrease fat levels, and collaboration with the National Food Service Management Institute. Finally, the Department is committed to working with State agencies to target Nutrition Education and Training (NET) resources more intensely toward implementation of the Dietary Guidelines.

This proposed regulation would require school food authorities to adopt the updated nutrition standards and NSMP or ANSMP no later than July 1, 1998, the start of School Year 1998–99. However, school food authorities are encouraged to begin working towards full implementation of the updated nutrition standards as soon as practicable after publication of a final rule or to even use NSMP, ANSMP, or nutrient-based menu analysis in conjunction with the current meal patterns prior to the effective date.

State agencies would need to determine when school food authorities are ready to begin NSMP or ANSMP and would, of course, provide training and technical assistance to help school food authorities whenever they begin implementing this procedure. In determining when to begin NSMP in a particular school or school food authority, States should evaluate their capabilities both in terms of computer technology and availability of other technical resources. States will also need to evaluate implementation on an on-going basis to determine if any adjustments are needed and to provide support when start-up difficulties occur. The Department is not establishing a specific procedure for determining the readiness of school food authorities to phase in NSMP or ANSMP. Rather, the Department believes State agencies are in the best position to determine if a school food authority is ready to begin the shift to NSMP or ANSMP and will be able to respond to the wide range of situations that may occur and to concentrate on achieving the goal. This approach frees State agencies from assuring that a particular process is followed and allows them the flexibility to invest their time and efforts as they judge best.

Monitoring Compliance With Updated Nutrition Standards

The Department also proposes to modify the monitoring requirements to include compliance with the updated nutrition standards. Currently, states monitor compliance with meal pattern components and quantities on a per-meal basis. On the day of a review, the lunch service is observed to ensure that all required food items are offered and, if applicable, that children accept the minimum number of components stipulated both under the standard meal service and the offer versus serve option. Meal services that offer fewer than the five required food items are disallowed for Federal reimbursement, as are meals for which the child has not taken the minimum number of items under the offer versus serve option. States also examine menus and production records for the review period to ensure that all components were available, and that sufficient quantities were offered. Thus, a direct correlation exists between the meal service offered and the meals taken on a given day and the allowable reimbursement for those meals.

Under NSMP and ANSMP, Federal reimbursement will continue to be predicated upon similar factors. As noted earlier in this preamble, under NSMP and ANSMP, schools will continue to offer a minimum number of menu items, and children must accept a minimum number of items. Meals which do not meet these requirements will not be eligible for reimbursement. However, to allow school food authorities adequate time to move towards full implementation of NSMP or ANSMP, school food authorities that implement prior to School Year 1998–1999 will be exempt from Coordinated Review Effort (CRE) Performance Standard 2 on reimbursable meals containing the required food items/components in § 210.18(g)(2) if they are scheduled for an administrative review prior to School Year 1998–1999.

Under this proposal, in addition to meeting the minimums for the number of menu items, the reimbursable meals offered over a school week must also collectively meet the updated nutrition standards established. To determine compliance with the nutrition standards, State agencies will need to closely examine school food authority's nutrient analysis in the course of a review. While this is a much more precise examination than in past practice, it continues the concept of ensuring that the entire food service, not just an individual meal, conforms to program requirements. State agencies must also observe the meal service to determine if meals claimed for reimbursement contain the appropriate number and type of menu items. The Department is proposing to amend § 210.19, Additional Responsibilities, to outline review requirements for nutrition standards. The Department is proposing to add the compliance requirements for the nutrition standards to this section rather than to § 210.18, Administrative Reviews, in order to allow for operational experience and corrective action prior to any imposition of fiscal action.

State Agency Responsibilities

The following summarizes the State agency's responsibilities under the Department's proposal for general program management, including taking fiscal action against school food authorities that consistently refuse to meet program requirements. While State agencies would probably combine a determination of how the nutrition standards and NSMP/ANSMP are being met with the cyclical administrative review, the Department is also proposing to provide State agencies with flexibility to conduct these important evaluations at other times such as during technical assistance visits or even as a separate, special assessment. However, assessments of compliance with the nutrition standards must be conducted no less frequently than administrative reviews.

As proposed by the Department, State agencies would assess the nutrient analyses for the last completed school week. The purpose would be to determine if the school food authority is applying the correct methodology and is properly conducting the NSMP or ANSMP based on the actual menu cycle including any substitutions. The State agency would also review the menus and production records to determine if they correspond to the information used to conduct NSMP or ANSMP.

Corrective Action

If it is indicated that the school food authority is not conducting NSMP accurately or properly applying ANSMP, if the school week's meals, as offered, do not comply with nutrition standards, or if the meal observation identified a significant number of meals that did not meet the definition of a reimbursable meal, the school food authority would be required to take appropriate corrective action to achieve compliance. However, at this time, no claim would be established if the failure to comply was not intentional. (Intentional violations are discussed later in this preamble.)

Pursuant to section 16(b) of the CNA, 42 U.S.C. 1785(b), the Secretary of Agriculture is given authority to settle, adjust or waive any claims under both the NSLA or the CNA if to do so would serve the purposes of either Act. The Department recognizes that the transition to NSMP and ANSMP will not in every instance be completed without problems and unforeseen circumstances to be surmounted. The Department expects State agencies to act quickly to rectify any problems found and to monitor any corrective action undertaken. In the interests of facilitating the transition to NSMP/ANSMP, the Secretary is proposing to exercise his authority to settle, adjust and waive claims by not requiring State agencies to disallow payment or collect overpayments resulting from meals which do not meet the nutrition standards of the regulations as long as State agencies are satisfied that such deviations from the nutrition standards were not intentional and that the school food authority is working towards successful completion of a acceptable corrective action plan in a timely manner.

The Department stresses that this proposal does not establish specific steps or time frames for corrective action. State agencies, as a result of their evaluation of the school food authority, are in the best position to establish corrective action goals and time frames, working in partnership with local school food authorities. The Department believes that State agencies and school food authorities need flexibility in developing a corrective action plan and is, therefore, providing such flexibility in this proposal. Further, in recognition of the fact that timely and effective corrective action is in the best interest of all, the Department intends to incorporate review of this area into its management evaluation activities at the State level.

The Department would like to once again emphasize that, under this proposal, compliance with the updated nutrition standards is of paramount importance. First, corrective action will be required if a meal service does not meet the nutrition standards. The State agency cannot overlook these shortcomings and must ensure that the meal service is improved as stipulated in the corrective action plan. Secondly, the State will be required to monitor the school's corrective action efforts. In most cases, monitoring would include reviewing production records, menus and computer analyses submitted by the school food authority and providing any support indicated by such a review. When a school food authority refuses to make a good faith effort to comply with the terms of the corrective action plan, the State agency would be required to establish a claim.

Exception to Claim Establishment

Under this proposal, State agencies would require corrective action for meals not meeting the nutrition standards, but would receive reimbursement for those meals. This procedure represents a significant means of easing the transition to and operation of the updated nutrition standards. Section 8 of the NSLA, 42 U.S.C. 1757, and section 4(b)(1)(D) of the CNA, 42 U.S.C. 1773 (b)(1)(D), clearly provide that reimbursement for meals served is available only for those meals that meet Program requirements. Further, section 12(g) of the NSLA, 42 U.S.C. 1760(g), continues to provide for Federal criminal penalties for certain intentional Program violations under either the NSLA or the CNA. The Department is concerned that the corrective action provision not be construed by State agencies or school food authorities as an invitation to relax efforts to comply with the nutritional or administrative review requirements of §§ 210.10, 210.10a, 210.18 and 210.19. The institution of corrective action would not be a sufficient remedy by itself in an instance in which a State agency determined that school officials had intentionally failed to meet the nutrition standards required by NSMP. In these situations, while the State agency would initiate corrective action, it must also disallow claims for reimbursement for the substandard meals and, in very severe cases, consider referring the matter to the Department for criminal prosecution.

While continued refusal to take corrective action could result in loss of Federal funding, this provision is not intended to be punitive when school food authorities are acting in good faith to comply with the nutrition standards. The Department is far more concerned about correcting these situations than it is with pursuing fiscal action. The Department's foremost goal is to ensure that children are provided with the most nutritious meals possible. Consequently, the emphasis in this process is on corrective action and technical

assistance. If school food authorities implement appropriate corrective action and make satisfactory progress toward compliance, no fiscal action would be required.

Streamlined Administration

The Department is also proposing to streamline program administration by allowing State agencies and school food authorities flexibility in three important areas. The first provision would extend the Coordinated Review Effort (CRE) review cycle from 4 to 5 years. The Department's experience with CRE indicates that a one-year extension in the cycle would not adversely affect accountability, but it would result in a 20 percent decrease in the number of reviews currently conducted in any given year. While the exact reduction in burden would vary from State to State, the Department expects this decrease would provide the States with additional flexibility to enable them to continue to improve school meals. Section 210.18(c) is proposed to be amended to include this change.

The second provision eliminates the regulatory requirement for a specific type of edit check on daily meal counts contained in § 210.8(a)(2) for schools where the most recent CRE review did not identify meal counting and claiming problems. Currently, the edit check provision requires that each school food authority compare each school's daily meal count with data such as the number of children eligible for free, reduced price or paid meals multiplied by an attendance factor. This check is intended to ensure that monthly claims for reimbursement are based on reasonable and accurate counts of meals offered on any day of operation to eligible children.

The Department believes, however, that school food authorities that have demonstrated, through the CRE review, the accuracy of their meal counts and claims should be provided an optional approach to specific edit checks. This proposal would establish a system whereby these school food authorities could develop and implement their own systems of internal controls designed to ensure the accuracy of claims for reimbursement. This system would then be submitted to the State agency for review. If the State agency's review determined that the proposed method constituted an accurate internal control, no further action would be required, and the school food authority's own proposed internal controls would remain in effect. However, if the State agency concluded that the suggested system of internal controls was inadequate, the school food authority would be required to modify its procedures accordingly. In addition, if during the course of a CRE review or other oversight activity of the school food authority, it is determined that the internal controls were ineffective, the specific, regulatory edit check would replace their system until a future regularly scheduled CRE review indicates there are no meal count problems.

This proposal would virtually eliminate the requirement for a specific edit check for school food authorities with accurate meal counts and claims measured by the CRE review and replace it with a more flexible procedure to allow these school food authorities to design and implement a system that is streamlined for their particular circumstances. However, this proposal also maintains the necessary specificity of an edit check for school food authorities found to have meal counting and claiming violations. Further it provides for State agency oversight of accountability procedures and a ready mechanism, if needed, to substitute a Federally-defined procedure to ensure accurate claims for reimbursement. The Department believes that program integrity must be maintained by requiring specific criteria when review results indicate problems or failure of the school food authority's alternative system. Section 210.8(a)(2) and (a)(3) would be modified to reflect these proposed changes.

The Department is especially interested in receiving comments on this provision. Commenters should address the flexibility this proposed provision allows well-managed school food authorities and any implementation issues this poses. In addition, the Department would be interested in receiving alternative proposals that would accomplish the desired balance between local flexibility and sound accountability.

The third area that the Department is addressing to reduce paperwork at the school food authority level is the requirement in § 210.15(b)(4) that distinct records be maintained to document the nonprofit status of the school food service. These records are the accounts which any enterprise needs to maintain in the normal course of conducting business (i.e., receipts, costs, etc.). Therefore, since these kinds of records are a necessary part of a school food authority's own accountability system and, in many cases, are required by State laws, the Department does not consider it necessary for the program regulations to mandate this recordkeeping requirement. It is important to emphasize that the school food authority would still have to be operated on a nonprofit basis. This proposal is only amending the requirements for documentation of nonprofitability. This proposal would amend § 210.14(c) and § 210.15(b) to include this change. In the event that a question or dispute arises in connection with whether a nonprofit school food service has been properly operated, the burden of proof still be upon the school food authority to demonstrate that the school food service is being operated on a nonprofit basis.

Length of Meal Periods

As noted above, many commenters expressed concern that children be given sufficient time in which to eat, particularly if larger portion sizes are to be served. The Department also recognizes the need to balance the time for academics with the time to receive and eat school meals, especially lunch. Although the Department has no authority in this area, school food service directors are strongly encouraged to work with other school officials to ensure that adequate meal service times and facilities are provided. Likewise, the Department will continue to work with DOEd to solicit support in the education community to ensure that educators and school administrators understand the importance of students having adequate time to eat.

To indicate its concern in this area, the Department is proposing, in § 210.10(i), to recommend that school food authorities make every effort to provide adequate meal service times and periods to ensure that students can effectively participate in the school lunch program.

Changes to the School Breakfast Program Nutritional Requirements

In order to facilitate uniform implementation, the Department is also proposing to amend the nutritional requirements of the SBP to parallel the changes made to the nutritional requirements of the NSLP. The current § 220.8 would be redesignated as § 220.8a to retain the requirements that would be in effect until implementation of the updated nutrition standards on July 1, 1998, while § 220.8 would contain provisions on nutrition standards, NSMP and ANSMP for the SBP.

The major differences for the SBP are that fewer calories are required and one-fourth of the RDA are to be met. A new guide would be incorporated into § 220.8 to indicate the nutrition standards required for the SBP. In addition, separate analyses for SBP and

NSLP would be required to meet the different nutrition standards for each program. As previously discussed, a reimbursable meal under the SBP will not be required to contain an entree.

Effective Dates

As discussed earlier, this proposal requires school food authorities to serve meals through the use of NSMP or ANSMP and be in compliance with updated nutrition standards by School Year 1998–1999 which begins on July 1, 1998. The Department believes this schedule provides sufficient time to enable States to develop appropriate technical assistance and guidance materials, to allow local food service staff to become familiar with the updated requirements and to make appropriate changes in meals. There would be no mandate for school food authorities to implement the required changes prior to July 1, 1998. In the interest of promoting children's long-term health through diet, the Department encourages State agencies to work with school food authorities to implement as soon as possible and, in fact, as discussed earlier, expects State agencies to approve plans for early implementation. The Department considers that early implementation will also provide both State agencies and school food authorities with valuable experience before mandatory implementation.

To encourage early implementation, compliance activities described above will not take effect before School Year 1998–1999. In the interim period, reviews and oversight activities that focus on the food service portion of program operations will provide excellent opportunities for technical assistance and for State agencies to assess preparation for full implementation. All other changes in this rule, including the paperwork reductions and streamlined administration methods, could be implemented 30 days after final publication of the final rule.

List of Subjects

7 CFR Part 210

Children, Commodity School Program, Food assistance programs, Grants programs—social programs, National School Lunch Program, Nutrition, Reporting and recordkeeping requirements, Surplus agricultural commodities.

7 CFR Part 220

Children, Food assistance programs, Grant programs—social programs, Nutrition, Reporting and recordkeeping requirements, School Breakfast Program.

Accordingly, 7 CFR parts 210 and 220 are proposed to be amended as follows:

PART 210—NATIONAL SCHOOL LUNCH PROGRAM

1. The authority citation for 7 CFR part 210 is revised to read as follows:

Authority: 42 U.S.C. 1751–1760, 1779.

2. In § 210.2:

a. The definition of "*Food component*" is amended by adding the words "under § 210.10a" at the end of the sentence;

b. The definition of "*Food item*" is amended by adding the words "under § 210.10a" at the end of the sentence;

c. The definition of "*Lunch*" is revised;

d. A new definition of "*Menu item*" is added in alphabetical order;

e. A new definition of "*Nutrient Standard Menu Planning/Assisted Nutrient Standard Menu Planning*" is added in alphabetical order;

f. The definition of "*Reimbursement*" is amended by adding the words "or § 210.10a, whichever is applicable," after "§ 210.10"; and

g. A new definition of "*School Week*" is added in alphabetical order.

The revision and additions read as follows:

§ 210.2 Definitions.

* * * * *

Lunch means a meal which meets the nutrient and calorie levels designated in § 210.10 or the school lunch pattern for specified age/grade groups as designated in § 210.10a.

Menu item means, under Nutrient Standard Menu Planning or Assisted Nutrient Standard Menu Planning, any single food or combination of foods. All menu items or foods offered as part of the reimbursable meal may be considered as contributing towards meeting the nutrition standards provided in § 210.10(a), except for those foods that are considered as foods of minimal nutritional value as provided for in § 210.11(a)(2) which are not offered as part of a menu item in a reimbursable meal. For the purposes of a reimbursable lunch, a minimum of three menu items must be offered, one of which must be an entree (a combination of foods or a single food item that is offered as the main course) and one must be fluid milk. For the purposes of a reimbursable lunch, one of the selected menu items must be an entree. Under the offer versus serve option, three menu items must be offered and an entree and one other menu item must be selected.

* * * * *

Nutrient Standard Menu Planning/Assisted Nutrient Standard Menu Planning means a way to develop meals which is based on the analysis of nutrients which would require school lunches, when averaged over a school week, to meet specific levels for a set of key nutrients and calories rather than a specific set of food categories. Analysis of the menu items and foods shall be based on averages that will be weighted by production quantities as offered to the students. Such analysis is normally done by a school or a school food authority. However, for the purposes of Assisted Nutrient Standard Menu Planning, menu planning and analysis are completed by other entities and shall incorporate the production quantities needed to accommodate the specific service requirements of a particular school or school food authority.

* * * * *

School week means the period of time used as the basis for determining nutrient levels of the menu and for conducting Nutrient Standard Menu Planning or Assisted Nutrient Standard Menu Planning for lunches. The period shall be a minimum of three days and a maximum of seven days. Weeks in which school lunches are offered less than three times shall be combined with either the previous or the coming week.

* * * * *

§ 210.4 [Amended]

3. In § 210.4, paragraph (b)(3) introductory text is amended by removing the words "§ 210.10(j)(1) of this part" and adding in their place the words "§ 210.10a(j)(1)".

§ 210.7 [Amended]

4. In § 210.7:

a. Paragraph (c)(1)(v) is amended by removing the reference to "§ 210.10(b) of this part" and adding in its place the words "§ 210.10(a) or § 210.10a(b), whichever is applicable,"; and

b. Paragraph (d) is amended by removing the reference to "§ 210.10(j)(1) of this part" and adding in its place the reference "§ 210.10a(j)(1)".

5. In § 210.8:

a. The third sentence of paragraph (a)(2) is removed and new paragraphs (a)(2)(i) and (a)(2)(ii) are added;

b. Paragraph (a)(3) is revised;

c. The first sentence of paragraph (a)(4) is amended by removing the words "review process described in paragraphs (a)(2) and (a)(3) of this section" and adding in their place the

words "the internal controls used by schools in accordance with paragraph (a)(2)(i) of this section or the claims review process used by schools in accordance with paragraphs (a)(2)(ii) and (a)(3) of this section"; and

d. The first sentence of paragraph (b)(2)(i) is amended by removing the reference to "paragraph (a)(2)" and adding in its place a reference to "paragraph (a)(3)" and by adding at the end of the sentence the words "or the internal controls used by schools in accordance with paragraph (a)(2)(i) of this section".

The revision and additions reads as follows:

210.8 Claims for reimbursement.

(a) *Internal controls.* * * *

(2) *School food authority claims review process.* * * *

(i) Any school food authority that was found by its most recent administrative review conducted in accordance with § 210.18, to have *no* meal counting and claiming violations may:

(A) Develop internal control procedures that ensure accurate meal counts. The school food authority shall submit any internal controls developed in accordance with this paragraph to the State agency for approval and, in the absence of specific disapproval from the State agency, shall implement such internal controls. The State agency shall establish procedures to promptly notify school food authorities of any modifications needed to their proposed internal controls or of denial of unacceptable submissions. If the State agency disapproves the proposed internal controls of any school food authority, it reserves the right to require the school food authority to comply with the provisions of paragraph (a)(3) of this section; or

(B) Comply with the requirements of paragraph (a)(3) of this section.

(ii) Any school food authority that was identified in the most recent administrative review conducted in accordance with § 210.18, or in any other oversight activity, as having meal counting and claiming violations shall comply with the requirements in paragraph (a)(3) of this section.

(3) *Edit checks.* (i) The following procedure shall be followed for school food authorities identified in paragraph (a)(2)(ii) of this section, by other school food authorities at State agency option, or, at their own option, by school food authorities identified in paragraph (a)(2)(i) of this section: The school food authority shall compare each school's daily counts of free, reduced price and paid lunches against the product of the number of children in that school currently eligible for free, reduced price and paid lunches, respectively, times an attendance factor.

(ii) School food authorities that are identified in subsequent administrative reviews conducted in accordance with § 210.18 as not having meal counting and claiming violations and that are correctly complying with the procedures in paragraph (a)(3)(i) of this section have the option of developing internal controls in accordance with paragraph (a)(2)(i) of this section.

* * * * *

§ 210.9 [Amended]

6. In § 210.9:

a. Paragraph (b)(5) is amended by adding the words "or § 210.10a, whichever is applicable" at the end of the paragraph before the semicolon;

b. Paragraph (c) introductory text is amended by removing the reference to "§ 210.10(j)(1) of this part" and adding in its place the reference "§ 210.10a(j)(1)"; and

c. Paragraph (c)(1) is amended by removing the reference to "§ 210.10" and adding in its place the reference "§ 210.10a".

§ 210.10 [Redesignated as § 210.10a]

7. Section 210.10 is redesignated as § 210.10a.

8. A new section 210.10 is added to read as follows:

§ 210.10 Nutrition standards for lunches and menu planning systems.

(a) *Nutrition standards for reimbursable lunches.* School food authorities shall ensure that participating schools provide nutritious and well-balanced meals to children based on the nutrition standards provided in this section or, if applicable, for very young children and meal supplements, the appropriate provisions of § 210.10a. For the purposes of this section, the nutrition standards are:

(1) Provision of one-third of the Recommended Dietary Allowances (RDA) of protein, calcium, iron, vitamin A and vitamin C to the applicable age groups in accordance with the *Minimum Nutrient Levels for School Lunches* in paragraph (e)(4)(i) of this section;

(2) Provision of the lunchtime energy allowances for children based on the four age groups provided for in the *Minimum Nutrient Levels for School Lunches* in paragraph (e)(4) of this section;

(3) The applicable 1990 Dietary Guidelines for Americans which are:

(i) Eat a variety of foods;

(ii) Limit total fat to 30 percent of calories;

(iii) Limit saturated fat to less than 10 percent of calories;

(iv) Choose a diet low in cholesterol;

(v) Choose a diet with plenty of vegetables, fruits, and grain products; and

(vi) Use salt and sodium in moderation; and

(4) The following measures of compliance with the 1990 Dietary Guidelines for Americans:

(i) A limit on the percent of calories from total fat to 30 percent based on the actual number of calories offered;

(ii) A limit on the percent of calories from saturated fat to less than 10 percent based on the actual number of calories offered;

(iii) A reduction of the levels of sodium and cholesterol; and

(iv) An increase in the level of dietary fiber.

(b) *General requirements for school lunches.* (1) In order to qualify for reimbursement, lunches, as offered by participating schools, shall, at a minimum, meet the nutrition standards provided in paragraph (a) of this section when averaged over each school week. Except as otherwise provided herein, school food authorities shall ensure that sufficient quantities menu items and foods are planned and produced to meet, at a minimum, the nutrition standards in paragraph (a) of this section.

(2) School food authorities shall ensure that each lunch is priced as a unit and that lunches are planned and produced on the basis of participation trends, with the objective of providing one reimbursable lunch per child per day. Any excess lunches that are produced may be offered, but shall not be claimed for general or special cash assistance provided under § 210.4.

(c) *Requirements for meals served to infants and very young children (birth to 24 months of age).* Meals for infants from birth to 2 years of age shall meet the requirements in § 210.10a (a), (c), (d) and (h).

(d) *Specific nutrient levels for children age 2.* Schools with children age 2 who participate in the program shall ensure that the nutrition standards in paragraph (a) of this section are met except that, such schools have the option of either using the RDA and calorie levels for children ages 3–6 in the table, *Minimum Nutrient Levels for School Lunches,* in paragraph (e)(4)(i) of this section, or developing separate nutrient levels for this age group. The methodology for determining such levels will be available in menu planning guidance material provided by FNS.

(e) *Requirements for meals for children ages 3–17*—(1) *General.* In order to receive reimbursement, school food authorities shall ensure that participating schools offer lunches which meet the nutrition standards provided in paragraph (a) of this section to children age three and over.

(2) *Nutrient levels.* The nutrients of reimbursable lunches shall, as offered and as averaged over each school week, meet the requirements in the table, *Minimum Nutrient Levels for School Lunches,* in paragraph (e)(4)(i) of this section for children of the appropriate age group.

(3) *Records.* Production, menu and nutritional analysis records shall be maintained by schools to demonstrate that lunches meet, when averaged over each school week, the nutrition standards provided in paragraph (a) of this section and the nutrient levels for children of each age group in the table *Minimum Nutrient Levels for School Lunches* in paragraph (e)(4)(i) of this section.

(4) *Specific nutrient levels for children ages 3–17.* (i) Schools that are able to offer meals to children based on nutrient levels reflecting one of the four age levels in the table in this paragraph should do so. Schools that cannot offer meals to children on the basis of the age levels in the table in this paragraph shall, under Nutrient Standard Menu Planning or Assisted Nutrient Standard Menu Planning, adjust the established levels following guidance provided by FNS, or, if only one age is outside the established level, use the levels provided in the table for the majority of children. For example, a school has grades one through five, but if some first graders are six, the levels for Group II would be used as the majority of students are in this age group. Schools shall ensure that lunches are offered with the objective of providing the per lunch minimums for each age level as specified in the following table:

MINIMUM NUTRIENT LEVELS FOR SCHOOL LUNCHES

Nutrients and energy allowances	Group I ages 3–6 years	Group II ages 7–10 years	Group III ages 11–13 years	Group IV ages 14–17 years
Energy allowance/Calories	558	667	783	846
Total Fat (as a percent of actual total food energy)	(1)	(1)	(1)	(1)
Total Saturated Fat (as a percent of actual total food energy)	(2)	(2)	(2)	(2)
RDA for protein (g)	7.3	9.3	15.0	16.7
RDA for calcium (mg)	267	267	400	400
RDA for iron (mg)	3.3	3.3	4.5	4.5
RDA for vitamin A (RE)	158	233	300	300
RDA for vitamin C (mg)	14.6	15.0	16.7	19.2

[1] Less than or equal to 30% of actual calories offered.
[2] Less than 10% of actual calories offered.

(ii) A reimbursable lunch shall include a minimum of three menu items as defined in § 210.2; one menu item shall be an entree and one shall be fluid milk as a beverage. An entree may be a combination of foods or a single food item that is offered as the main course. All menu items or foods offered as part of the reimbursable meal may be considered as contributing towards meeting the nutrition standards in paragraph (a) of this section, except for those foods that are considered foods of minimal nutritional value as provided for in § 210.11(a)(2) which are not offered as part of a menu item in a reimbursable meal. Reimbursable lunches, as offered, shall meet the established nutrition standards in paragraph (a) of this section when averaged over a school week.

(f) *Milk requirement for children ages 2–17.* Schools shall comply with the requirements for offering milk as provided for in § 210.10a(d)(1).

(g) *Offer versus serve.* Each participating school shall offer its students at least three menu items as required by paragraph (e)(4)(ii) of this section. Under offer versus serve, senior high students are required to take at least two of the three menu items offered; one menu item selected must be an entree. At the discretion of the school food authority, students below the senior high level may also participate in offer versus serve. The price of a reimbursable lunch shall not be affected if a student declines a menu item or accepts smaller portions. State educational agencies shall define "senior high."

(h) *Choice.* To provide variety and to encourage consumption and participation, schools should, whenever possible, offer a selection of menu items, foods and types of milk from which children may make choices. When a school offers a selection of more than one type of lunch or when it offers a variety of menu items, foods and milk for choice as a reimbursable lunch, the school shall offer all children the same selection regardless of whether the children are eligible for free or reduced price lunches or pay the school food authority's designated full price. The school may establish different unit prices for each type of lunch offered provided that the benefits made available to children eligible for free or reduced price lunches are not affected.

(i) *Lunch period.* At or about mid-day schools shall offer lunches which meet the requirements of this section during a period designated as the lunch period by the school food authority. Such lunch periods shall occur between 10 a.m. and 2 p.m., unless otherwise exempted by FNS. With state approval, schools that serve children 1–5 years old are encouraged to divide the service of the meal into two distinct service periods. Such schools may divide the quantities and/or menu items or foods offered between these service periods in any combination that they choose. Schools are also encouraged to provide an adequate number of lunch periods of sufficient length to ensure that all students have an opportunity to be served and have ample time to consume their meals.

(j) *Exceptions.* Lunches claimed for reimbursement shall meet the school lunch requirements specified in this section. However, lunches offered which accommodate the exceptions and variations authorized under § 210.10a(i) are also reimbursable.

(k) *Nutrient Standard Menu Planning for children age 2–17.* In order to assure that school lunches meet the nutrition standards provided in paragraph (a) of this section, nutrient analysis shall be conducted on all menu items or foods offered as part of the reimbursable meal, except for those foods that are considered as foods of minimal

nutritional value as provided for in § 210.11(a)(2) which are not offered as part of a menu item in a reimbursable meal. Such analysis shall be over the course of each school week. The school food authority shall either independently conduct Nutrient Standard Menu Planning or shall request that the State agency allow Assisted Nutrient Standard Menu Planning.

(l) *The National Nutrient Database and software specifications.* (i) Nutrient analysis shall be based on information provided in the National Nutrient Database for Child Nutrition Programs. This database shall be incorporated into software used to conduct nutrient analysis. Upon request, FNS will provide information about the database to software companies that wish to develop school food service software systems.

(ii) Any software used to conduct nutrient analysis shall be evaluated by FNS and, as submitted, been determined to meet the minimum requirements established by FNS. However, such review does not constitute endorsement by FNS or USDA. Such software shall provide the capability to perform all functions required after the basic data has been entered including calculation of weighted averages as required by paragraph (k)(2) of this section.

(2) *Determination of weighted averages.* (i) Menu items and foods offered as part of a reimbursable meal shall be analyzed based on portion sizes and projected serving amounts and shall be weighted based on their proportionate contribution to the meals. Therefore, menu items or foods more frequently selected will contribute more nutrients than menu items or foods which are less frequently selected. Such weighting shall be done in accordance with guidance issued by FNS as well as that provided by the software used.

(ii) An analysis of all menu items and foods offered in the menu over each school week shall be computed for calories and for each of the following nutrients: protein; vitamin A; vitamin C; iron; calcium; total fat; saturated fat; and sodium. The analysis shall also include the dietary components of cholesterol and dietary fiber.

(3) *Comparing average daily levels.* Once the appropriate procedures of paragraph (k)(2) of this section have been completed, the results shall be compared to the appropriate age group level for each nutrient and for calories in the table, *Minimum Nutrient Levels for School Lunch*, in paragraph (e)(4)(i) of this section. In addition, comparisons shall be made to the nutrition standards provided in paragraph (a) of this section in order to determine the degree of conformity.

(4) *Adjustments based on students' selections.* The results obtained under paragraph (k)(2) of this section shall be used to adjust future menu cycles to accurately reflect production and student selections. Menus may require further analysis and comparison, depending on the results obtained in paragraph (k)(3) of this section when production and selection patterns change. The school food authority may need to consider modifications to the menu items and foods offered based on student selections as well as modifications to recipes and other specifications to ensure that the nutrition standards provided in paragraph (a) of this section are met.

(5) *Standardized recipes.* Under Nutrient Standard Menu Planning, standardized recipes shall be developed and followed. A standardized recipe is one that was tested to provide an established yield and quantity through the use of ingredients that remain constant in both measurement and preparation methods. USDA/FNS standardized recipes are included in the National Nutrient Database for the Child Nutrition Programs. In addition, local standardized recipes used by school food authorities shall be analyzed for their calories, nutrients and dietary components and added to the local database by that school food authority in accordance with paragraph (k)(1)(ii) of this section.

(6) *Processed foods.* Unless already included in the National Nutrient Database, the calorie amounts, nutrients and dietary components, in accordance with paragraph (k)(3) of this section, of purchased processed foods and menu items used by the school food authority shall be obtained by the school food authority or State agency and incorporated into the database at the local level in accordance with FNS guidance.

(7) *Substitutions.* If the need for serving a substitute food(s) or menu item(s) occurs at least two weeks prior to serving the planned menu, the revised menu shall be reanalyzed based on the changes. If the need for serving a substitute food(s) or menu item(s) occurs two weeks or less prior to serving the planned menu, no reanalysis is required. However, to the extent possible, substitutions should be made using similar foods.

(l) *Assisted Nutrient Standard Menu Planning.* (1) For school food authorities without the capability to conduct Nutrient Standard Menu Planning, as provided in paragraph (k) of this section, menu cycles developed by other sources may be used. Such sources may include but are not limited to the State agency, other school food authorities, consultants, or food service management companies.

(2) Assisted Nutrient Standard Menu Planning shall establish menu cycles that have been developed in accordance with paragraphs (k)(1) through (k)(6) of this section as well as local food preferences and local food service operations. These menu cycles shall incorporate the nutrition standards in paragraph (a) of this section and the *Minimum Nutrient Levels for School Lunches* in paragraph (e)(4)(i) of this section. In addition to the menu cycle, recipes, food product specifications and preparation techniques shall also be developed and provided by the entity furnishing Assisted Nutrient Standard Menu Planning to ensure that the menu items and foods offered conform to the nutrient analysis determinations of the menu cycle.

(3) If a school food authority requests Assisted Nutrient Standard Menu Planning, the State agency shall determine if it is warranted. At the inception of any approved use of Assisted Nutrient Standard Menu Planning, the State agency shall approve the initial menu cycle, recipes, and other specifications to determine that all required elements for correct nutrient analysis are incorporated. The State agency shall also, upon request, provide assistance with implementation of the chosen system.

(4) After initial service under the Assisted Nutrient Standard Menu Planning menu cycle, the nutrient analysis shall be reassessed in accordance with paragraph (k)(2) of this section and appropriate adjustments made.

(5) Under Assisted Nutrient Standard Menu Planning, the school food authority retains final responsibility for ensuring that all nutrition standards established in paragraph (a) of this section are met.

(m) *Compliance with the nutrition standards.* If the analysis conducted in accordance with paragraphs (k) or (l) of this section shows that the menus offered are not meeting the nutrition standards in paragraph (a) of this section, actions, including technical assistance and training, shall be taken by the State agency, school food authority, or school, as appropriate, to ensure that the lunches offered to children comply with the nutrition standards established by paragraph (a) of this section.

(n) *Nutrition disclosure.* School food authorities are encouraged to make information available indicating efforts

to meet the nutrition standards in paragraph (a) of this section, such as publicizing the results of the nutrient analysis of the school week menu cycle.

(o) *Supplemental food.* Eligible schools operating after school care programs may be reimbursed for one meal supplement offered to an eligible child (as defined in § 210.2) per day. Meal supplements shall conform to the provisions set forth in § 210.10a(j).

(p) *Implementation of the nutrition standards and Nutrient Standard Menu Planning/Assisted Nutrient Standard Menu Planning.* (1) No later than School Year 1998–99, school food authorities shall ensure that lunches offered to children ages 2 and above by participating schools meet the nutrition standards provided in paragraph (a) of this section.

(2) Further, no later than School Year 1998–99, school food authorities shall ensure that Nutrient Standard Menu Planning, or Assisted Nutrient Standard Menu Planning, where applicable, is applied to lunches offered by participating schools.

(3) Schools and/or school food authorities may begin to implement any or all of the provisions of this section before School Year 1998–99 with prior approval of the State agency. In these situations, State agencies shall evaluate the ability of school food authorities to begin Nutrient Standard Menu Planning or Assisted Nutrient Standard Menu Planning and provide start-up training and facilitate initial implementation. However, school food authorities shall not be subject to the provisions of § 210.19(a) for failure to comply with the nutrition standards established by paragraph (a) of this section or Nutrient Standard Menu Planning or Assisted Nutrient Standard Menu Planning established by paragraphs (k) and (l) of this section until School Year 1998–99. In addition, school food authorities that implement Nutrient Standard Menu Planning or Assisted Nutrient Standard Menu Planning prior to School Year 1998–99 shall be exempt from § 210.18(g)(2) until required implementation in School Year 1998–99.

(4) State agencies shall monitor implementation of Nutrient Standard Menu Planning or Assisted Nutrient Standard Menu Planning at the school food authority level in order to ensure proper compliance. Such monitoring shall include the State agency observation of the meal service to determine if meals claimed for reimbursement contain the appropriate number and type of menu items. FNS may review State agency evaluation criteria and monitoring procedures as part of any management evaluation review conducted during the implementation period.

(5) Beginning with School Year 1998–99, State agencies shall monitor compliance by school food authorities with the nutrition standards in paragraph (a) of this section in accordance with the requirements of § 210.19(a).

9. In the newly redesignated § 210.10a:

a. The section heading is revised; and

b. The table in paragraph (c) is amended by revising the "Milk" description under "Food Components and Food Items:".

The revisions read as follows:

§ 210.10a Lunch components and quantities for the meal pattern, lunches for very young children and meal supplements.

* * * * *

(c) *Minimum required lunch quantities.* * * *

School Lunch Pattern-per Lunch Minimums

Food Components and Food Items	
Milk (as a beverage):	
Fluid whole milk and fluid unflavored lowfat milk must be offered; (Flavored fluid milk, skim milk or buttermilk optional).	

* * * * *

10. In 210.14, paragraph (c) is revised to read as follows:

§§ 210.14 Resource management.

* * * * *

(c) *Financial assurances.* The school food authority shall meet the requirements of the State agency for compliance with § 210.19(a) including any separation of records of nonprofit school food service from records of any other food service which may be operated by the school food authority as provided in paragraph (a) of this section.

* * * * *

11. In 210.15:

a. Paragraph (b)(2) is revised;

b. Paragraph (b)(3) is amended by removing the reference to "210.10(b) of this part" and adding in its place the words "§ 210.10(a) or § 210.10a(b), whichever is applicable"; and

c. Paragraph (b)(4) is removed and paragraph (b)(5) is redesignated as paragraph (b)(4).

The revision reads as follows:

§ 210.15 Reporting and recordkeeping.

* * * * *

(b) *Recordkeeping summary.* * * *

(2) Production and menu records as required under § 210.10a and production, menu and nutrition analysis records as required under § 210.10, whichever is applicable.

* * * * *

12. In 210.16:

a. Paragraph (b)(1) is amended by adding the words "developed in accordance with the provisions of § 210.10 or § 210.10a, whichever is applicable," after the words "21-day cycle menu" whenever they appear, and

b. The first sentence of paragraph (c)(3) is revised to read as follows:

§ 210.16 Food service management [Reserved].

* * * * *

(c) * * *

(3) No payment is to be made for meals that are spoiled or unwholesome at time of delivery, do not meet detailed specifications as developed by the school food authority for each food component/menu item specified in § 210.10 or 210.10a, whichever is applicable, or do not otherwise meet the requirements of the contract. * * *

* * * * *

§ 210.18 [Amended]

13. In 210.18:

a. Paragraph (c) introductory text is amended by removing the number "4" in the phrase "4-year review cycle" wherever it appears and adding in its place the number "5";

b. The first sentence of paragraph (c)(1) is amended by removing the number "4" in the phrase "4-year review cycle" and adding in its place the number "5" and by removing the number "5" in the phrase "every 5 years" and adding in its place the number "6";

c. Paragraph (c)(2) is amended by removing the number "4" in the phrase "4-year cycle" and adding in its place the number "5";

d. Paragraph (c)(3) is amended by removing the number "5" in the phrase "5-year review interval" and adding the number "6" in its place;

e. Paragraph (d)(3) is amended by removing the reference to "210.19(a)(4)" and adding in its place a reference to "210.19(a)(5)", and

f. Paragraph (h)(2) is amended by removing the reference "§ 210.10" and adding in its place a reference to "§ 210.10a".

14. In 210.19:

a. Paragraphs (a)(1) through (a)(5) are redesignated as paragraphs (a)(2) through (a)(6), respectively, and a new paragraph (a)(1) is added;

b. Newly redesignated paragraph (a)(2) is revised;

c. The last sentence in newly redesignated paragraph (a)(3) is revised,

d. The number "4" in the second sentence of newly redesignated paragraph (a)(6) is removed and the number "5" is added in its place;

e. The second sentence of paragraph (c) introductory text is revised;

f. A new sentence is added at the end of paragraph (c)(1);

g. The reference to "§ 210.10" in paragraph (c)(6)(i) is removed and a reference to "§ 210.10a" is added in its place; and

h. The word "or" is removed at the end of paragraph (c)(6)(i), the period at the end of paragraph (c)(6)(ii) is removed and "; or" is added in its place, and a new paragraph (c)(6)(iii) is added.

The additions and revisions read as follows:

§ 210.19 Additional responsibilities.

(a) *General Program management.*

* * *

(1) *Compliance with nutrition standards.* At a minimum, beginning with School Year 1998–99, school food authorities shall meet the nutrition standards established in § 210.10(a) for reimbursable meals.

(i) Beginning with School Year 1998–99, State agencies shall evaluate compliance with the established nutrition standards over a school week. At a minimum, these evaluations shall be conducted once every 5 years and may be conducted at the same time a school food authority is scheduled for an administrative review in accordance with § 210.18. State agencies may also conduct these evaluations in conjunction with technical assistance visits, other reviews, or separately. The State agency shall assess the nutrient analysis for the last completed school week to determine if the school food authority is applying the methodology provided in § 210.10 (k) or (l), as appropriate. Part of this assessment shall be an independent review of menus and production records to determine if they correspond to the analysis conducted by the school food authority and if the menu, as offered, over a school week, corresponds to the nutrition standards set forth in § 210.10(a).

(ii) If the menu for the school week fails to meet any of the nutrition standards set forth in § 210.10(a), the school food authority shall develop, with the assistance and concurrence of the State agency, a corrective action plan designed to rectify those deficiencies. The State agency shall monitor the school food authority's execution of the plan to ensure that the terms of the corrective action plan are met.

(iii) If a school food authority fails to meet the terms of the corrective action plan, the State agency shall determine if the school food authority is working towards compliance in good faith and, if so, may renegotiate the corrective action plan, if warranted. However, if the school food authority has not been acting in good faith to meet the terms of the corrective action plan and refuses to renegotiate the plan, the State agency shall determine if a disallowance of reimbursement funds as authorized under paragraph (c) of this section is warranted.

(2) *Assurance of compliance for finances.* Each State agency shall ensure that school food authorities comply with the requirements to account for all revenues and expenditures of their nonprofit school food service. School food authorities shall meet the requirements for the allowability of nonprofit school food service expenditures in accordance with this part and, as applicable, 7 CFR part 3015. The State agency shall ensure compliance with the requirements to limit net cash resources and shall provide for approval of net cash resources in excess of three months' average expenditures. Each State agency shall monitor, through review or audit or by other means, the net cash resources of the nonprofit school food service in each school food authority participating in the Program. In the event that net cash resources exceed 3 months' average expenditures for the school food authority's nonprofit school food service or such other amount as may be approved in accordance with this paragraph, the State agency may require the school food authority to reduce the price children are charged for lunches, improve food quality or take other action designed to improve the nonprofit school food service. In the absence of any such action, the State agency shall make adjustments in the rate of reimbursement under the Program.

(3) *Improved management practices.* * * * If a substantial number of children who routinely and over a period of time do not favorably accept a particular menu item; return foods; or choose less than all food items/components or foods and menu items as authorized under § 210.10(e)(4)(ii) or § 210.10a(e), poor acceptance of certain menus may be indicated.

* * * * *

(c) *Fiscal action.* * * * State agencies shall take fiscal action against school food authorities for Claims for Reimbursement that are not properly payable under this part including, if warranted, the disallowance of funds for failure to take corrective action in accordance with paragraph (a)(1) of this section. * * *

(1) *Definition.* * * * Fiscal action also includes disallowance of funds for failure to take corrective action in accordance with paragraph (a)(1) of this section.

* * * * *

(6) *Exceptions.* * * *

(iii) When any review or audit reveals that a school food authority's failure to meet the nutrition standards of § 210.10 is unintentional and the school food authority is meeting the requirements of a corrective plan developed and agreed to under paragraph (a)(1)(ii) of this section.

* * * * *

Appendix A to Part 210 [Amended]

15. In Appendix A to part 210, Alternate Foods for Meals, under Enriched Macaroni Products with Fortified Protein, the first sentence of paragraph 1(a) is amended by removing the reference to "§ 210.10" and adding in its place a reference to "§ 210.10a".

16. In Appendix A, Alternate Foods for Meals, under Cheese Alternate Products,

a. Introductory paragraph 1 is amended by removing the reference to "§ 210.10" and adding in its place a reference to "§ 210.10a"; and

b. Paragraph 1(d) is amended by removing the reference to "§ 210.10" and adding in its place a reference to "§ 210.10a".

17. In Appendix A, Alternate Foods for Meals, under Vegetable Protein Products:

a. Introductory paragraph 1 is amended by removing the reference to "210.10" and adding in its place a reference to "210.10a";

b. The second sentence of paragraph 1(d) is amended by removing the reference to "210.10" and adding in its place a reference to "210.10a" ;

c. The first sentence of paragraph 1(e) is amended by removing the reference to "210.10" and adding in its place a reference to "210.10a" ; and

d. The first sentence of paragraph 3 is amended by removing the reference to "§ 210.10" and adding in its place a reference to "§ 210.10a".

18. In Appendix C to Part 210, Child Nutrition Labeling Program:

a. Paragraph 2(a) is amended by removing the reference to "210.10" and adding in its place a reference to "210.10a";

b. The first sentence of paragraph 3(c)(2) is amended by removing the reference to "210.10" and adding in its

place a reference to "210.10a" and by removing the reference to "220.8" and adding in its place a reference to "220.8a"; and

c. The second sentence of paragraph 6 is amended by removing the reference to "210.10" and adding in its place a reference to "210.10a" and by removing the reference to "220.8" and adding in its place a reference to "220.8a".

PART 220—SCHOOL BREAKFAST PROGRAM

1. The authority citation is revised to read as follows:

Authority: 42 U.S.C. 1773, 1779, unless otherwise noted.

2. In 220.2:

a. Paragraph (b) is amended by adding the words "or § 220.8a, whichever is applicable," after the reference to "§ 220.8";

c. Paragraph (m), previously reserved, is added;

d. A new paragraph (p–1) is added;

e. Paragraph (t) is amended by adding the words "or § 220.8a, whichever is applicable," after the reference to "§ 220.8"; and

f. A new paragraph (w–1) is added

The additions read as follows:

§ 220.2 Definitions.

* * * * *

(m) *Menu item* means, under Nutrient Standard Menu Planning or Assisted Nutrient Standard Menu Planning, any single food or combination of foods. All menu items or foods offered as part of the reimbursable meal may be considered as contributing towards meeting the nutrition standards provided in § 220.8(b), except for those foods that are considered as foods of minimal nutritional value as provided for in § 220.2(i–1) which are not offered as part of a menu item in a reimbursable meal. For the purposes of a reimbursable meal, a minimum of three menu items must be offered, one of which must be an entree (a combination of foods or a single food item that is offered as the main course) and one must be fluid milk.

* * * * *

(p–1) *Nutrient Standard Menu Planning/Assisted Nutrient Standard Menu Planning* means a way to develop meals based on the analysis of nutrients which would require school breakfasts, when averaged over a school week, to meet specific levels for a set of key nutrients and calories rather than a specific set of food categories. Analysis of the menu items and foods shall be based on averages that will be weighted by production quantities as offered to the students. Such analysis is normally done by a school or a school food authority. However, for the purposes of Assisted Nutrient Standard Menu Planning, menu planning and analysis is completed by other entities and shall incorporate the production quantities needed to accommodate the specific service requirements of a particular school or school food authority.

* * * * *

(w–1) *School week* means the period of time used as the basis for determining nutrient levels of the menu and for conducting Nutrient Standard Menu Planning or Assisted Nutrient Standard Menu Planning for breakfasts. The period week shall be a minimum of three days and a maximum of seven days. Weeks in which breakfasts are offered less than three times shall be combined with either the previous or the coming week.

* * * * *

§ 220.7 [Amended]

3. In 220.7, paragraph (e)(2) is amended by adding the words "or § 220.8a, whichever is applicable," after the reference to "§ 220.8".

§ 220.8 [Redesignated as § 220.8A]

4. Section 220.8 is redesignated as § 220.8a and a new § 220.8 is added to read as follows:

§ 220.8 Nutrition standards for breakfast and menu planning systems.

(a) *Breakfasts for very young children.* Meals for infants and very young children (ages birth to 24 months) who are participating in the Program shall meet the requirements in § 220.8a(a), (b) and (c).

(b) *Nutrition standards for breakfasts for children age 2 and over.* School food authorities shall ensure that participating schools provide nutritious and well-balanced breakfasts to children age 2 and over based on the nutrition standards provided in this section. For the purposes of this section, the nutrition standards are:

(1) Provision of one-fourth of the Recommended Dietary Allowances (RDA) of protein, calcium, iron, vitamin A and vitamin C to the applicable age groups in accordance with the *Minimum Nutrient Levels for School Breakfasts* in paragraph (e)(1) of this section;

(2) Provision of the breakfast energy allowances for children in accordance with the age groups in the *Minimum Nutrient Levels for School Breakfasts* in paragraph (e)(1) of this section;

(3) The applicable 1990 Dietary Guidelines for Americans which are

(i) Eat a variety of foods;

(ii) Limit total fat to 30 percent of calories;

(iii) Limit saturated fat to less than 10 percent of calories;

(iv) Choose a diet low in cholesterol;

(v) Choose a diet with plenty of vegetables, fruits, and grain products; and

(vi) Use salt and sodium in moderation; and

(4) The following measures of compliance with the 1990 Dietary Guidelines for Americans:

(i) A limit on the percent of calories from total fat to 30 percent based on the actual number of calories offered;

(ii) A limit on the percent of calories from saturated fat to less than 10 percent based on the actual number of calories offered;

(iii) A reduction of the levels of sodium and cholesterol; and

(iv) An increase in the level of dietary fiber.

(c) *General requirements for school breakfasts for children age 2 and over.* (1) In order to qualify for reimbursement, breakfasts, as offered by participating schools, shall, at a minimum, meet the nutrition standards in paragraph (b) of this section when averaged over each school week.

(2) School food authorities shall ensure that each breakfast is priced as a unit. Except as otherwise provided herein, school food authorities shall ensure that sufficient quantities of menu items and foods are planned and produced so that breakfasts meet, at a minimum, the nutrition standards in paragraph (b) of this section.

(3) School food authorities shall ensure that breakfasts are planned and produced on the basis of participation trends, with the objective of providing one reimbursable breakfast per child per day. Any excess breakfasts that are produced may be offered, but shall not be claimed for reimbursement under § 220.9.

(d) *Nutritional criteria for breakfasts for children age 2 and over.* In order to receive reimbursement, school food authorities shall ensure that participating schools provide breakfasts to children age two and over in accordance with the nutrition standards in paragraph (b) of this section.

(1) The nutrients of breakfasts shall, when averaged over each school week, meet the requirements in the table *Minimum Nutrient Levels for School Breakfasts*, in paragraph (e)(1) of this section for children of each age group.

(2) Production, menu and nutritional analysis records shall be maintained by schools to demonstrate that breakfasts as offered meet the nutrition standards provided in paragraph (b) of this section and the nutrient levels for children of each age group in the table, *Minimum*

Nutrient Levels for School Breakfasts, in paragraph (e)(1) of this section.

(3) Schools with children age 2 who participate in the program shall ensure that the nutrition standards in paragraph (b) of this section are met except that, such schools have the option of either using the RDA and calorie levels for children ages 3–6 in the table, *Minimum Nutrient Levels for School Breakfasts*, in paragraph (e)(1) of this section or developing separate requirements for this age group. The methodology for determining such levels will be available in menu planning guidance material provided by FNS.

(e) *Requirements for meals for children ages 3–17.* (1) Schools that are able to offer meals to children based on nutrient levels reflecting one of the four age level in the table in this paragraph should do so. Schools that cannot offer meals to children on the basis of age levels in the table in this paragraph shall, under Nutrient Standard Menu Planning or Assisted Nutrient Standard Menu Planning, adjust the established levels following guidance by FNS or, if only one age is outside the established level, use the level provided for the majority of children. Schools shall ensure that breakfasts are offered with the objective of providing the per breakfast minimums for each age level as specified in the following table:

MINIMUM NUTRIENT LEVELS FOR SCHOOL BREAKFASTS

Nutrients and Energy Allowances	Group I ages 3–6 years	Group II ages 7–10 years	Group III ages 11–13 years	Group IV ages 14–17 years
Energy allowances/calories	419	500	538	625
Total fat (as a percent of actual total food energy)	(1)	(1)	(1)	(1)
Total saturated fat (as a percent of actual total food energy)	(2)	(2)	(2)	(2)
RDA for protein (g)	5.50	7.00	11.25	12.50
RDA for calcium (mg)	200	200	300	300
RDA for iron (mg)	2.5	2.5	3.4	3.4
RDA for vitamin A (RE)	119	175	225	225
RDA for vitamin C (mg)	11.00	11.25	12.50	14.40

[1] Less than or equal to 30% of actual calories offered.
[2] Less than 10% of actual calories offered.

(2) A reimbursable breakfast shall include a minimum of three menu items as defined in § 220.2(m), one of which shall be fluid milk as a beverage, offered on cereal, or a combination of both. All menu items or foods offered as part of the reimbursable meal may be considered as contributing towards meeting the nutrition standards, except for those foods that are considered foods of minimal nutritional value as provided for in § 210.2(i–1) which are not offered as part of a menu item in a reimbursable meal. Breakfasts, as offered, shall independently meet the established nutrient standards when averaged over a school week.

(f) *Milk requirement for children ages 2–17.* A serving of milk as a beverage or on cereal or used in part for each purpose shall be a menu item for school breakfasts. Schools shall comply with the minimum required serving sizes for milk in § 220.8a(a)(2) and with the other requirements for milk in § 220.8a(d) and § 220.8a(g).

(g) *Offer versus serve.* Each participating school shall offer its students at least three menu items as required by paragraph (e)(2) of this section. Under offer versus serve, senior high students are required to take at least two of the three menu items. At the discretion of the school food authority, students below the senior high level may also participate in offer versus serve. The price of a reimbursable breakfast shall not be affected if a student declines menu items or accepts smaller portions. State educational agencies shall define "senior high."

(h) *Choice.* To provide variety and to encourage consumption and participation, schools should, whenever possible, provide a selection of foods and types of milk from which children may make choices. When a school offers a selection of more than one type of breakfast or when it offers a variety of foods and milk for choice as a reimbursable breakfast, the school shall offer all children the same selection regardless of whether the children are eligible for free or reduced price breakfasts or pay the school food authority designated full price. The school may establish different unit prices for each type of breakfast offered provided that the benefits made available to children eligible for free or reduced price breakfasts are not affected.

(i) *Substitutions.* Schools shall make substitutions for students who are considered to have disabilities under 7 CFR part 15b in accordance with § 220.8a(f).

(j) *Nutrient Standard Menu Planning/ Assisted Nutrient Standard Menu Planning for children age 2–17.* In order to assure that school breakfasts meet the nutritional standards provided in paragraph (b) of this section, nutrient analysis shall be conducted on all foods offered as part of a reimbursable meal. Such analysis shall be over the course of each school week. The school food authority shall either independently conduct Nutrient Standard Menu Planning or shall request that the State agency allow Assisted Nutrient Standard Menu Planning.

(1) *The National Nutrient Database and software specifications.* (i) Nutrient analysis shall be based on information provided in the National Nutrient Database for Child Nutrition Programs. This database shall be incorporated into software used to conduct nutrient analysis. Upon request, FNS will provide information about the database to software companies that wish to develop school food service software systems.

(ii) Any software used to conduct nutrient analysis shall be evaluated and, as submitted, been determined to meet the minimum requirements established by FNS. However, such review does not constitute endorsement by FNS or USDA. Such software shall provide the capability to perform all functions required after the basic data has been entered including calculation of weighted averages as required by (j)(2) of this section.

(2) *Determination of weighted averages.* (i) Foods offered as part of a reimbursable meal shall be analyzed based on menu items, portion sizes, and projected serving amounts and shall be weighted based on their proportionate contribution to the meals. Therefore, foods more frequently selected will contribute more nutrients than foods which are less frequently selected. Such weighting shall be done in accordance

with guidance issued by FNS as well as that provided by the software used.

(ii) An analysis of all menu items and foods offered in the menu over each school week shall be computed for calories and for each of the following nutrients: Protein; vitamin A; vitamin C; iron; calcium; total fat; saturated fat; and sodium. The analysis shall also include the dietary components of cholesterol and dietary fiber.

(3) *Comparing average daily levels.* Once the procedures of paragraph (j)(2) of this section have been completed, the results shall be compared to the appropriate age group level for each nutrient and for calories in the table, *Minimum Nutrient Levels for School Breakfasts,* in paragraph (e)(1) of this section. In addition, comparisons shall be made to the nutrition standards provided in paragraph (b) of this section in order to determine the degree of conformity.

(4) *Adjustments based on students' selections.* The results obtained under paragraph (j)(2) of this section shall be used to adjust future menu cycles to accurately reflect production and student selections. Menus will require further analysis and comparison, depending on the results obtained in paragraph (j)(2) of this section when production and selection patterns change. The school food authority may need to consider modifications to the menu items and foods offered based on student selections as well as modifications to recipes and other specifications to ensure that the nutrition standards in paragraph (b) of this section are met.

(5) *Standardized recipes.* Under Nutrient Standard Menu Planning, standardized recipes shall be developed and followed. A standardized recipe is one that was tested to provide an established yield and quantity through the use of ingredients that remain constant in both measurement and preparation methods. USDA/FNS standardized recipes are included in the National Nutrient Database for the Child Nutrition Programs. In addition, local standardized recipes used by school food authorities shall be analyzed for their calories, nutrients and dietary components and added to the local database by that school food authority.

(6) *Processed foods.* Unless already included in the National Nutrient Database, the calorie amounts, nutrients and dietary components, in accordance with paragraph (j)(2)(ii) of this section, of purchased processed foods and menu items used by the school food authority shall be obtained by the school food authority or State agency and incorporated into the database at the local level in accordance with FNS guidance.

(7) *Substitutions.* If the need for serving a substitute food(s) or menu item(s) occurs at least two weeks prior to serving the planned menu, the revised menu shall be reanalyzed based on the changes. If the need for serving a substitute food(s) or menu item(s) occurs two weeks or less prior to serving the planned menu, no reanalysis is required. However, to the extent possible, substitutions should be made using similar foods.

(k) *Assisted Nutrient Standard Menu Planning.* (1) For school food authorities without the capability to conduct Nutrient Standard Menu Planning, as provided in paragraph (j) of this section, menu cycles developed by other sources may be used. Such sources may include but are not limited to the State agency, other school food authorities, consultants, or food service management companies.

(2) Assisted Nutrient Standard Menu Planning shall establish menu cycles that have been developed in accordance with paragraphs (j)(1) through (j)(6) of this section as well as local food preferences and local food service operations. These menu cycles shall incorporate the nutrition standards in paragraph (b) of this section and the Minimum Nutrient Levels for School Breakfasts in paragraph (e)(1) of this section. In addition to the menu cycle, recipes, food product specifications and preparation techniques shall also be developed and provided by the entity furnishing Assisted Nutrient Standard Menu Planning to ensure that the menu items and foods offered conform to the nutrient analysis determinations of the menu cycle.

(3) If a school food authority requests Assisted Nutrient Standard Menu Planning, the State agency shall determine if it is warranted. At the inception of any approved use of Assisted Nutrient Standard Menu Planning, the State agency shall approve the initial menu cycle, recipes, and other specifications to determine that all required elements for correct nutrient standards and analysis are incorporated. The State agency shall also, upon request, provide assistance with implementation of the chosen system.

(4) After the initial service, the nutrient analysis shall be reassessed in accordance with paragraph (j)(2) of this section and appropriate adjustments made.

(5) Under Assisted Nutrient Standard Menu Planning, the school food authority retains final responsibility for ensuring that all nutrient standards established in paragraph (b) of this section are met.

(l) *Compliance with the nutrition standards.* If the analysis conducted in accordance with paragraphs (j) and (k) of this section shows that the menus offered are not in compliance with the nutrition standards established in paragraph (b) of this section, actions, including technical assistance and training, shall be taken by the State agency, school food authority, or school, as appropriate, to ensure that the breakfasts offered to children comply with the established nutrition standards.

(m) *Nutrition disclosure.* School food authorities are encouraged to make information available indicating efforts to meet the nutrition standards in paragraph (b) of this section, such as publicizing the results of the nutrient analysis of the school week menu cycle.

(n) *Implementation of nutrition standards and Nutrient Standard Menu Planning/Assisted Nutrient Standard Menu Planning.* (1) At a minimum, the provisions of this section requiring compliance with the nutrition standards in paragraph (b) of this section shall be implemented no later than the beginning of School Year 1998–99. However, schools and/or school food authorities may begin to implement any or all of the provisions in this section with prior approval of the State agency.

(2) Prior to School Year 1998–99, State agencies shall require school food authorities/schools to implement Nutrient Standard Menu Planning or Assisted Nutrient Standard Menu Planning for the School Breakfast Program at the same time it is implemented for the National School Lunch Program and in accordance with the terms of § 210.10(o) of this chapter.

5. The section heading of newly redesignated § 220.8a is revised to read as follows:

§ 220.8a Breakfast components and quantities for the meal pattern and for very young children.

* * * * *

§ 220.9 [Amended]

6. In § 220.9, the first sentence of paragraph (a) is amended by adding the words "or 220.8a, whichever is applicable," after the reference to "§ 220.8".

§ 220.14 [Amended]

7. In § 220.14, paragraph (h) is amended by removing the reference to "§ 220.8 (a)(1)" and adding in its place a reference to "§ 220.8a(a)(1)".

Appendix A to Part 220 [Amended]

8. In Appendix A to part 220, Alternate Foods for Meals, under

Formulated Grain-Fruit Products, paragraph 1(a) is amended by removing the reference to "§ 220.8" and adding in its place a reference to "§ 220.8a".

Appendix C to Part 220 [Amended]

9. In Appendix C to part 220, Child Nutrition (CN) Labeling Program:

a. Paragraph 2(a) is amended by removing the reference to "210.10" and replacing it with a reference to "210.10a";

b. The first sentence of paragraph 3(c)(2) is amended by removing the reference to "210.10" and adding in its place a reference to "210.10a" and by removing the reference to "220.8" and adding in its place a reference to "220.8a"; and

c. The second sentence of paragraph 6 is amended by removing the reference to "210.10" and adding in its place a reference to "210.10a" and by removing the reference to "220.8" and adding in its place a reference to "220.8a".

Dated: June 6, 1994

Ellen Haas,

Assistant Secretary for Food and Consumer Services.

Regulatory Cost/Benefit Assessment

1. *Title:* National School Lunch and School Breakfast Program: Nutrition Objectives for School Meals.

2. *Background:* This rule proposes to amend the regulations outlining the nutrition standards for the National School Lunch and School Breakfast Programs. Specifically, this proposal would update the current nutrition standards to incorporate the Dietary Guidelines for Americans, which reflect medical and scientific consensus on proper nutrition as a vital element in disease prevention and long term health promotion.[1] This proposal would also adopt meal planning based on analysis of key nutrients (Nutrient Standard Menu Planning or Assisted Nutrient Standard Menu Planning) in lieu of the current meal pattern. These changes would be implemented no later than July 1, 1998. In recognition of the importance of reinventing and streamlining government programs, this proposal would also reduce various burdens associated with the school meal programs and would modify the review requirements for the National School Lunch Program to ensure adequate oversight of the proposed updated nutrition standards.

3. *Statutory Authority:* National School Lunch Act (42 U.S.C. 1751–1760, 1779) and Child Nutrition Act of 1966 (42 U.S.C. 1773, 1779).

*Footnotes appear at end of docket

4. *Cost/Benefit Assessment of Economic and Other Effects:*

a. Costs To Produce a Meal:

A nationally representative sample included in the School Lunch and Breakfast Cost Study found an average food cost of $0.72 for school meals prepared under the current meal pattern, rounded to the nearest whole cent. Cost data from this study were used to estimate the cost of two weeks of sample menus developed under the requirements for Nutrient Standard Menu Planning in the proposed rule. The analysis found an average food cost of $0.72 per meal when rounded to the nearest whole cent[2]. These sample menus were developed for elementary and high school students using foods and recipes common to the National School Lunch Program (NSLP). When planning the sample menus, milk was constrained to provide eight fluid ounces with each meal, to include milks of various fat levels and a mix of flavored and unflavored milk. Additional weeks of menus could have been developed at similar cost, but analysis of two weeks of sample menus was deemed sufficient to demonstrate that nutrient targets could be met at current food cost. It would also have been possible to have further reduced the cost of the sample menus, for example by substituting lower cost items or using smaller portions of relatively expensive items such as yogurt and fish sticks. The lower end of the cost range of sample menus was about 28 percent below the two week average food cost. The sample menus were developed using foods and recipes already in common use in NSLP, such as those from "Quantity Recipes for School Food Service"[3]. They did not reflect the potential savings which may be realized when market forces stimulate development of new lower fat foods and recipes. Increased demand for foods lower in fat, saturated fat, sodium and cholesterol are expected to increase availability of these foods in the future. Such new foods and recipes should provide greater flexibility to NSLP menu planners, and may facilitate further moderation of meal cost and food components such as sodium and cholesterol where appropriate.

The sample menus include ingredients that are fresh and those that are processed into more convenient, labor saving forms, such as frozen. Examples of processed foods used in the sample menus include popular food items, pizza and chicken nuggets. Although these items were used less often than currently offered, by using foods and recipes common to the NSLP, the sample menus look similar to meals currently offered to students. By their preexisting use in NSLP, school food service personnel have already demonstrated that these food items can be prepared in the time available to prepare current school lunches, and similarly indicate that the staff with the skills needed to prepare these foods are already available. In addition, the equipment needed for food storage and preparation is either already available, or schools operating under the present rules have demonstrated that such equipment can be obtained within the existing reimbursement rates. Therefore, even though the costs of labor, equipment, and administration were not specifically analyzed, the manner in which the sample menus were developed provides confidence that non-food costs of the NSMP sample menus are expected to be similar to those already experienced in NSLP operation. FNS will continue to explore cost impacts. The evaluation of the Nutrient Standard Menu Planning Demonstration will examine the reported costs of school food service operations associated with implementing NSMP. This evaluation will examine total meal production costs and will analyze separate components (food, labor, other costs).

By definition, the average results reported above mean that some school districts would be expected to experience food costs for the sample menus that vary considerably from those reported above. This is not different from the current situation because there is already a wide range of food costs due to factors such as economies of size, geographic variation in delivery and labor costs, and local market conditions.

b. Market Effects

To estimate market effects a mathematical model was developed to incorporate information on the kinds, amounts, nutrient content, and costs of foods served in schools lunches. The model uses all of this information and seeks a solution which minimizes the changes in current amounts of foods served in NSLP meals and also meets the nutrition objectives set forth in the Dietary Guidelines and adds no additional costs to food purchases. The model constrains food offerings and recipes to those actually used in schools. However, the meal pattern is allowed to deviate from the current regulations regarding food groups and portion sizes as long as it meets at least one-third the RDA for all nutrients. In keeping with the principles of the Dietary Guidelines, the meals are also

restricted to no more than 30 percent of calories from total fat and less than 10 percent of calories from saturated fat.

The model can be specified to allow the amounts of all foods to vary, which permits substitution between high and low-fat beef as well as across other food groups such as pork, poultry, vegetables, and fruits. There are a vast number of possible scenarios which can be explored through this model, and the three discussed below have been selected as most useful in understanding the impacts of the proposed rule. In several of these scenarios the model is constrained to maintain the amounts or types of foods. In all three scenarios the volume of beverage milk is held constant at current consumption levels. This was done because milk will remain a required item under the proposed nutrition based menu planning system. The model minimizes the changes in the quantity of each item served and satisfies the nutrition and cost goals.

The model includes the following constraints for all scenarios: Food ingredient cost at average cost for NSLP meals; calories (⅓ of average energy allowance listed in the RDA report); total fat (not more than 30 percent of calories); saturated fat (less than 10 percent of calories); carbohydrate (not less than 50 percent of calories); cholesterol (not more than 100 mg); ⅓ of RDA level for the following select nutrients: protein, vitamins (vitamins A, B6, B12 and C, niacin, riboflavin, thiamin, folate), and minerals (calcium, iron, magnesium, phosphorus, and zinc); and milk (total volume and mix by fat content held constant at current levels). As described in greater detail below, scenario one is the basic model using these constraints, scenario two constrains all chicken to have the nutrient profile of low-fat chicken, and scenario three constrains the model to retain current levels for major commodity groups. The estimated changes in food items are then aggregated to national estimates based on the total number of school lunches served in FY–1993. Subsequently, the impact of these changes on agricultural markets are estimated using commodity market models developed by economists in the Economic Research Service.

Data

The study is based on the most recently available data on quantity and frequency of foods actually served in NSLP meals, detailed nutrient content of those foods, estimated food ingredient costs, and Recommended Dietary Allowances for micronutrients and Dietary Guidelines recommendations for fat and saturated fat.

Data on actual foods served in the NSLP were obtained from the 1993 USDA School Nutrition Dietary Assessment (SNDA) study conducted by Mathematica Policy Research for FNS. The study included a survey of about 3550 students in grades 1 through 12 in 545 schools throughout the country. The students reported detailed information on the kinds and amounts of foods and beverages they consumed during a 24-hour period. The impact analysis uses only the portion of the data on foods served to children as part of credited school lunches. It includes plate waste but excluded a la carte items, such as desserts, purchased in addition to the school lunch. The SNDA survey contained detailed information on over 600 food items served in the school lunch program. These items were aggregated into over 50 food groups based on the primary ingredient and the percent of calories from fat. For example, there were two beef categories: high-fat and low-fat beef; two poultry categories; etc.

Food items costs are estimated from ingredient cost data obtained in the 1993 School Lunch and Breakfast Cost Study conducted by Abt for FNS and recipes for school lunch items. The recipes were necessary for two reasons: Aggregation of ingredient costs to costs of food served, and for estimating the change in usage of the various agricultural commodities.

With respect to the agricultural economy, the amount of most foods served in NSLP meals is a small part of the total U.S. supply of agricultural commodities. For example, USDA and school district purchases of beef products account for less than two percent of the U. S. beef supply. Therefore, even the anticipated changes in the amounts of different foods served in the meals are expected to have minimal or no change in farm level prices.

Three alternative scenarios were examined to gauge market effects with alternative specific recommendations which could be implemented into the meals. All three scenarios meet dietary recommendations and the milk requirement with no change from the current per meal average food cost. Table 1 shows the total U.S. market in millions of pounds for various groups of commodities and the corresponding current school market size.

The three scenarios illustrate a range of market effects that could occur under alternative implementation assumptions. The first and third options demonstrate the range of market impacts associated with either minimizing the change in current food offerings or minimizing the change in commodity markets. The second scenario was designed to show how the results could change if lower fat preparation techniques were followed in only one of the commodity groups. Although chicken is used in this example, other commodities, such as beef or pork, might show similar changes if substitutions were made between high and low fat alternatives. Additional information on the constraints on the model imposed in each of the three scenarios is described in more detail below.

The three scenarios estimate impacts using current market prices for foods available and in use by schools. To the extent that products are reformulated to provide additional lower-fat products or lower-fat products become more widely available and affordable, the market impacts would change. The scenarios do not assume any product innovations. Similarly, food preparation techniques will play an important role in how the proposal would be implemented. Using lower fat preparation techniques would enable schools to continue to use foods at current levels because fat added during preparation would be reduced.

No single set of assumptions can adequately describe impacts under the proposed regulation. Schools have tremendous flexibility under nutrient standard menu planning to meet the dietary guidelines using the methods most appropriate to their circumstances. Schools can alter the mix of foods served within and among commodity groups. Changes in food preparation techniques could produce significant improvements in the nutritional profile of meals without any changes in the types of foods served. The model and the three scenarios examined show that changes in food preparation techniques for one commodity group can alter the results for other commodity groups. This occurs because the nutrient and cost targets are fixed. Nutritional improvement for one commodity group, such as a reduction in fat, both leaves more flexibility for other commodity groups to provide that food component within the established target, and, in the case of reduction of fat, required additional calories from some source to meet the calorie target.

The first scenario, "Minimum change in current offerings", established the amounts of foods from each of 52 groups required to meet the dietary, cost, and milk requirements with as little deviation as possible from the current eating choices of the children. It also required the consumption of low-fat,

medium-fat and whole milk to stay at the same levels as current consumption. The 52 groups include separate groups for high and low fat versions of food items and dishes. This scenario allows for substitutions among these and other groups.

The second scenario, using poultry as the example, shows how the results change if lower fat preparation techniques were used in one food category while holding food preparation techniques in other categories constant. High-fat poultry preparation techniques (such as chicken nuggets) were entirely replaced with lower fat techniques (such as baked or broiled chicken parts). As noted previously, other commodities might show similar changes if substitutions were made between high and low fat alternatives.

For the third scenario, the analysis model was modified to present a "No change in commodity markets" scenario where food commodity groups were restricted to their current level of use in the NSLP (with the exception of butter). The consumption of the various foods served were allowed to fluctuate within the commodity groups. For example, beef could be consumed alone or in a mixture such as lasagna, but the total level of beef served was required to be the same as is currently being served. In general, this adaptation required that low-fat foods be chosen within food groups. Notable exceptions included serving high-fat chicken and potatoes, probably due to the need to obtain sufficient calories. Also, the cost became more of a constraining factor in this scenario. Many of the higher fat or costly foods were eliminated from the solution. Some of the changes included:

- Serving milk containing less than 17 percent of kilocalories from fat (skim and one-percent);
- Serving beef in mixtures such as chili rather than as roasts, steaks, or hamburger patties;
- Serving low-fat pork products such as ham instead of ribs or bacon;
- Serving more meat mixtures such as chili and fewer grain mixtures such as pizza; and
- Serving more fruits and less fruit juices.

This analysis shows that the impact of the school lunch proposed rule on the major commodity markets and related farm programs would be minimal. Commodity prices, producer marketings and receipts, and farm program outlays under any of the scenarios would not vary significantly from the levels projected in the USDA 10-year Baseline Projections.

The proposed rule's limited impact reflects several factors including:

- The share of commodities used in the school lunch program is typically quite small compared to total U.S. disappearance. Hence changes in school lunch offerings have to be very large before they affect the commercial market.
- For the first scenario, changes in school lunch menus were designed both to meet the nutritional guidelines and to minimize changes in children's food choices. While this was done to reflect children's taste/preference, it has a moderating effect on changes in the commodity composition of school lunches as well as a minimum change in food service offerings.
- The second and third scenarios demonstrate that there is considerable potential for substitutions within food groups (e.g., shifting from conventional to healthier products in the same food group) and for changing food preparation techniques to improve nutritional value (e.g., shifting from fried to roasted chicken). The modified menus took advantage of these options. Changes in food preparation techniques and use of healthier products in the same food group would minimize agricultural impacts.

Individual commodity market impacts of scenarios one and two are described in greater detail below. These should be interpreted with the understanding that scenario three shows that it is possible to achieve the dietary, food cost and milk requirements with no change in commodity markets other than butter. The information presented reflects estimates of market impacts under full implementation of the proposed regulation.

Dairy Impacts

The impacts of the proposed rule differ across the fluid milk, butter, and cheese components of the dairy sector. The modified menus hold milk offerings constant but reduce cheese and eliminate butter. Hence, the major impacts would be in the processed product markets rather than the fluid market.

School lunch use of butter is eliminated in the three scenarios; the modified menus would annually displace 50–55 million pounds of butter in a 1.0 billion pound U.S. market. The dairy program activity expected under the baseline projections would keep the impact of this decline on producer prices, incomes, and government farm programs minimal. Virtually all of the displaced butter is donated by the Commodity Credit Corporation (CCC) from stocks acquired as part of its price support operations; purchases occur at the levels needed to support manufacturing milk prices at legislated levels and minimize stock holding. The school lunch volume is small enough compared to total CCC purchases and other disposal programs that the butter in question would continue to be acquired under the proposed rule but be donated to other institutions or sold concessionally or donated abroad. Hence, butter impacts would ultimately be minimal.

The impact of the proposed rule on the cheese market could be more pronounced but still limited. This is because the volume differences in the use of cheese between the baseline and the scenarios one and two is larger and most of the cheese used in the school lunch program is bought on the open market rather than donated from CCC stocks. But the annual 80–90 million pound decline in cheese disappearance associated with these scenarios would account for less than a 1 percent drop in U.S. cheese disappearance. This would lower farm milk prices 7 to 8 cents per hundredweight causing a decline in production and lower farm revenues from milk by $150-$200 million annually (from a 1990–93 base of $19.5 billion). CCC dairy program costs would increase by an estimated $20 to $25 million annually. Hence, even for cheese, the impacts on the dairy sector and the budget would be relatively small. As scenario two demonstrates for chicken, a more pronounced shift towards use of lower fat cheese or other lower fat items in schools could further moderate these impacts. Under scenario 3 there would be no reduction in cheese.

Meat Sector Impacts: Broilers and Turkeys

The impact of the proposed school lunch rule on the broiler market is expected to be modest under the first and second scenarios. Broiler offerings in the school lunch program would decline 120 million pounds under the first scenario and increase 38 million pounds under the second. The current school lunch use of 245 million pounds is a small share of the total U.S. market of 19.9 billion pounds. Hence, a 120 million pound reduction would lower broiler prices 1.8 percent and reduce farm revenues by 1.2 percent. The second scenario uses chicken as an example of how a large shift towards low-fat preparation (e.g., from fried to broiled) could moderate shifts in commodity usage. If purchases are increased by 38 million pounds as provided for under the second scenario broiler prices would increase 0.4 percent and revenues rise by 0.2

percent. There are no direct government programs for the industry.

The impact of the proposed rule on the turkey market is expected to be modest under scenarios 1 and 2. Total use of turkey meat would decline 52 million pounds under one scenario and increase 16 million pounds under the [illegible]. The [illegible] .07 million pounds is a small share of the total U.S. market of 4.6 billion pounds. Hence, turkey prices would decrease 2 percent on [illegible] the second. Producer revenues decrease [illegible] $75 million under the first scenario and increase $4 million under the second scenario—less than 0.01 percent in either case. There are no direct government programs for the turkey industry. Again, under scenario 3 there would be no change in either broilers or [illegible].

Meat Sector Impacts: Beef and Pork

The impact of the proposed rule on the beef market is expected to be minimal under the first and second scenarios. School lunch offerings of beef would decline 100–125 million pounds from 485 million pounds currently, in a total U.S. market of 24 billion pounds. This school lunch decline would reduce the farm level market price for beef by less than 1 percent and result in a 0.5 percent reduction in beef producers' revenues. A slightly larger reduction (126 million pounds) in beef offerings under the second scenario would result in approximately the same reduction in wholesale beef prices and farm revenues. There are no direct government programs related to the beef industry; hence, the changes likely under the proposed rule have no direct federal budget implications. As scenario two demonstrates for chicken, a more pronounced shift towards the use of lower-fat beef, lower-fat beef preparation, or other lower-fat items in schools could further moderate impacts [illegible] scenario 3 there would be no reduction.

The impact of the proposed school lunch rule on the pork market is also expected to be minimal under the first and second scenarios. This is because much of the pork already used in the school lunch program is lean pork such as ham. Total use of pork in the school lunch program would increase 16 million pounds or less under the first and second scenarios. The school lunch program's current use of 280 million pounds represents a small fraction of the total U.S. market of 17.1 billion pounds. Hence, the 16 million pound increase would boost prices a minimal 0.2 percent. Farm revenues would increase $11 million or 0.1 percent of their existing revenues. There are no government support programs directly associated with the pork industry and hence no budget implications.

Fruit, Vegetable, and Potato Market Impacts

The impacts of the proposed rule on the fruit, vegetable, and potato markets would be small under the first and second scenarios. Schools use these products in a variety of forms, including fresh, frozen, canned, and components of commodity processed products. Total usage of fruits in the school lunch program would increase 70 million pounds under the first scenario and over 1.1 billion pounds under the second. Both represent less than 2 percent of the 61.1 billion pound U.S. fruit market. Under scenario one, prices would increase 0.1 percent and farm revenues increase 1.2 percent or $124 million on a $10.2 billion market. Impacts under the second scenario are slightly larger, with prices up 0.2 percent and revenues up $200 million.

Use of vegetables in the program would increase 80 million pounds under the first scenario and 35 million pounds under the second in a 71 billion pound U.S. market. Under the first and second scenarios, price increases would be negligible and farm revenue gains would be $5–12 million or less than 0.1 percent of industry revenues. Use of potatoes in the program would decline 298 million pounds under the first and second scenarios in response to fewer french fry offerings. These reductions are expected to have a little or no impact on the 34 billion pound U.S. potato market. Reduced potato usage would result in 0.1 percent decline in potato prices and a comparable $20 million reduction in farm revenues. The School Nutrition Dietary Assessment Study found that potatoes are often fried or prepared with a significant amount of added fat. The sample menus developed for the food use analysis show that lower-fat potato dishes can be readily used under nutrient standard menu planning. As with chicken in scenario two, a more pronounced shift towards use of lower-fat potato preparation or raise lower-fat items by schools could further moderate the impacts on the potato market.

Field Crops Impacts

The major impact of the proposed rule on the field crop markets would be in the wheat market. Menu changes would increase the wheat used in various forms in the school lunch program from 16.5 million bushels currently to 28–30 million bushels, under the first two scenarios, in a total U.S. market of 2.6 billion bushels. While the difference between scenarios is insignificant, an increase in wheat demand of 10 to 15 million bushels could spark a small adjustment in the market. After [illegible] changing changes in production, feed use and exports, this increase would [illegible] the net increase in farm income would be [illegible] 5 million bushels would generate a 2 to 4 cent per bushel higher farm price. This would reduce deficiency payments by about $15 million (from a 1990–93 base of $2.9 billion) and would increase farmers' market receipts by about $45 million (from a 1990–93 base of $7.1 billion), more than offsetting the loss [illegible].

Rice use would increase roughly 1 million hundred weight under the first and second scenarios in a national market of 180 million hundred weight. This would generate less than a 1 percent change in the farm price of rice, $5–9 million increase in market revenues, and an offsetting $6–8 million reduction in government payments.

The proposed rule could also reduce use of oilseeds and related products. Changes in menu items as well as preparation techniques would decrease use of vegetable oils for frying and salad dressings.

But the decreases would be too small to measurably affect prices; moreover, with government support for oilseeds limited to a loan program with rates set well below forecast market prices, there would be no budget implications.

Peanut Impacts

In the agricultural impact models developed for this analysis, peanuts are part of a group including legumes and oats. This group shows some increases under the first and second scenarios, although the direct impact on peanuts is less clear. Even if the findings for the group as a whole are assigned to similarly impact peanuts, the impacts of the proposed rule on the peanut market would be small under the first and second scenarios. Under the first and second scenarios, total usage of peanuts [illegible] and the B program would increase about 6 million pounds from the current school lunch base of [illegible] million pounds. This increase represents less than 0.1 percent of the total U.S. peanut market of 2 billion pounds. Farm prices of peanuts are expected to rise about 0.1 percent and farm revenues increase about $1.0 million. There would be no impact on the government cost of the peanut program.

TABLE 1.—ANNUAL QUANTITY IMPACTS FOR MAJOR AGRICULTURAL MARKETS

[In millions of pounds]

Commodity group	1993 market size		Scenario		
	U.S. total farm-level disappearance	School lunches	One: Minimum change within current offerings	Two: Lower fat chicken preparation	Three: No change in commodity markets
Butter	1,007	55	0	0	0
Cheese	6,633	135	53	47	135
Broilers	19,855	245	125	283	245
Turkey	4,591	105	53	121	105
Beef	24,040	485	385	359	485
Pork	17,268	280	296	280	280
Fruits and juices	61,055	1,097	1,815	2,234	1,097
Vegetables	71,018	1,218	1,307	1,253	1,218
Potatoes	34,079	674	376	372	674
Peanuts	2,050	44	50	50	44
Rice (million cwt)	180	1.3	2.3	2.2	1.3
Wheat (million bu)	2,500	16	30	28	16

The three scenarios illustrate that minimizing the change in current offerings creates market impacts that would not occur if lower-fat substitutions are offered or the mix of commodities within category is allowed to change. They also emphasize that school menus would have to change in order to avoid any impacts in the commodity market.

TABLE 2.—FARM PRICE, REVENUE, AND PROGRAM IMPACTS FOR MAJOR AGRICULTURAL MARKETS

Commodity	Total farm receipts (in billions of dollars)	Scenario								
		One: Minimum change in current offerings			Two: Lower fat chicken preparation			Three: No change in commodity markets		
		Prices (percent)	Revenues (in millions of dollars)	Farm program costs (in millions of dollars)	Prices (percent)	Revenues (in millions of dollars)	Farm program costs (in millions of dollars)	Prices (percent)	Revenues (in millions of dollars)	Farm program costs (in millions of dollars)
Cheese (milk equivalent)	[1] 19.4	0.6	166	23	0.6	178	25	0.0	0	0
Butter (milk equivalent)	[1] 19.4	0.0	0	0	0.0	0	0	0.0	0	0
Broilers	11.0	1.8	134	0	0.4	19	0	0.0	0	0
Turkey	2.9	2.1	36	0	0.5	4	0	0.0	0	0
Beef	28.3	0.9	143	0	0.9	103	0	0.0	0	0
Pork	10.7	0.2	11	0	0.0	0	0	0.0	0	0

Peanuts	1.0	0.1	1	0	0.1	1	0	0.0	0	0
Rice	1.3	0.6	9	8	0.5	7	6	0.0	0	0
Wheat	7.3	0.7	45	35	0.7	45	35	0.0	0	0

[1] Total farm receipts from milk

USDA Commodities

USDA for a number of years has made adjustments to improve the nutritional content of commodities provided, however, the basic types and quantities of foods offered to schools have not changed significantly. The analysis conducted indicates that schools can provide meals that meet the dietary guidelines without significant changes in the types of food provided and the Department can continue to make improvements to the commodities provided without diminishing agricultural market support to farmers.

In total, USDA commodities account for less than one-sixth of all foods used by schools; the overall average is 16.4 percent. Although there is some variation among schools in the amount of USDA commodities they receive, USDA commodities make up between 10 and 25 percent of the food used for the vast majority (96 percent) of the school food authorities.

The market analysis for scenario one and the sample menus developed for the NSMP food cost analysis reflect an expected shift toward increased use of vegetables, fruits and grains. Such a shift is consistent with the Dietary Guidelines for Americans and the Food Guide Pyramid.[4] This shift can occur without causing significant impacts in overall food markets, however, or in the amounts and types of food USDA provides to schools, with the exception of butter.

USDA continues to make improvements that reduce the proportion of calories from fat in donated commodities: Reducing fat levels in ground beef; acquiring lower fat cheeses and salad dressings; and providing foods in lower-fat forms

(chicken vs. chicken nuggets). Because USDA provides a significant proportion of a small number of foods schools use (cheese—45 percent; beef—30 percent; turkey—70 percent; chicken—29 percent) efforts to lower the percentage of calories from fat for these commodities can have a substantial impact on the overall nutrient profile of foods used in the program. Even if there are some shifts in the types of foods that schools serve, there is likely to be little change in the overall amount of USDA acquisitions of cheese, beef and poultry because the Department's purchasing power would provide the best leverage for securing lower-fat versions of these products at the lowest price.

c. Benefits

No near-term cost savings due to health improvement from the nutritional update are projected. However, longer term savings in health care costs and years of life may result. The Continuing Survey of Food Intake by Individuals, 1989–91 found that school-age children have average daily intakes of 33.7 to 34.7 percent of calories from fat, and 12.6 to 13.3 percent of calories from saturated fat, depending upon the age-sex group. The Dietary Guidelines for Americans recommends limiting total fat intake to not more than 30 percent of total calories, and limiting saturated fat intake to less than 10 percent of total calories. The School Nutrition Dietary Assessment Study (SNDA) found the average daily consumption by NSLP participants on school days to be 35 percent of calories from fat and 13 percent of calories from saturated fat, compared to 33 percent of calories from fat and 12 percent of calories from saturated fat for non-participants.[5] SNDA also found that students consume fat and saturated fat from school meals at about the same levels as those offered to them. SNDA found schools offering NSLP meals which averaged 38 percent of calories from fat and 15 percent of calories from saturated fat, and participants consumed NSLP meals with 37 percent of calories from fat and 14 percent of calories from saturated fat. Implementation of the proposed rule would reduce the fat levels at school meals to the Dietary Guidelines levels. Using these figures along with the average percent of school-age children receiving a USDA meal (51%) and the average number of school days per year (182), we estimate that, on average, the proposed rule will achieve about 12 percent of the change needed to reach the Dietary Guidelines levels for percent of calories from fat and saturated fat for all U.S. children ages 5 to 18 years. Since school meal participation rates are higher for low-income children than for higher income children, the health benefits will be concentrated in the population at greatest risk of nutrition related chronic diseases—those with low income. Healthy People 2000: The National Health Promotion and Disease Prevention Objectives reports that low income is a special risk factor for both heart disease and cancer.[6]

The long term savings in health care costs and increase in years of life could result to the extent that lower intakes of fat, saturated fat, cholesterol, and sodium, and increased intakes of grains, fruits and low-fat vegetables either throughout the school years or over a more extended period of time could reduce the risk of diet-related chronic diseases such as heart disease, stroke, cancer, and atherosclerosis. These diseases accounted for almost 65 percent of all deaths in the U.S. in 1991.[7] McGinnis and Foege, in an analysis of actual causes of death in the U.S., reported about 300,000 deaths per year, 14 percent of the total deaths, as the lower bound estimate for deaths related to diet and activity patterns.[8] These factors cannot be readily separated due to their interdependence in determining obesity.

The savings in years of life and the value associated with a population reduction of fat, saturated fat and cholesterol has been estimated for the U.S. adult population. These estimates were incorporated into the regulatory impact analysis for the food labeling regulatory proposal published on November 27, 1991, the Food and Drug Administration (FDA).[9] While no comparable estimates are currently available for dietary changes by school age children, it is useful to consider the magnitude of effects expected from the proposed changes in the school meal programs with that projected for food labeling.

The study by the Research Triangle Institute (RTI) developed for the food labeling proposal estimated the following changes in fat, saturated fat and cholesterol for male and women due to the labeling changes:[10]

TABLE 3.—AVERAGE DAILY ESTIMATED CHANGES IN FAT, SATURATED FAT AND CHOLESTEROL FOR THE U.S. ADULT POPULATION DUE TO FDA FOOD LABELING CHANGES

	Men	Women	Average
Changes in fat intake:			
Grams	1.49	0.67	1.08
Percent	1.4%	1.1%	1.25%
Changes in saturated fat intake			
Grams	0.48	0.16	0.31
Percent	1.3%	0.7%	1.0%
Changes in cholesterol intake			
Milligrams	0.42	0.26	0.34
Percent	0.1%	0.1%	0.1%

Adapted from Food and Drug Administration regulatory impact analysis statement for the proposed food labeling regulations, FEDERAL REGISTER, November 27, 1991. Average assumes equal numbers of men and women.

RTI and FDA then used the changes for men and women in a computer model developed by Dr. Warren Browner to estimate the effects on years of life over a period of 20 years. The increased years of life estimates were then used to estimate a value for the added years of life. These changes were found to result in an estimated 20-year reduction of 35,179 cases of cancer, and a reduction of 4,028 cases of coronary heart disease. As a result they estimated avoiding 12,902 deaths and increasing life-years by 80,930.

FDA used two different approaches to estimating the total value of the food labeling changes, a remaining years of life approach and a mean value approach (see November 27, 1991 **Federal Register**, pages 60871–0872, for a more detailed description). They also estimated totals using two different dollar values for consumer willingness to pay for risk reduction—a conservative

estimate of $1.5 million and a higher estimate of $3.0 million. The value of the benefits from increased life-years was estimated to be $3.6 billion (discounted at 5 percent over a 20 year period). When benefits were valued based upon the number of early deaths prevented and the higher willingness to pay figure of $3.0 million, the estimate (similarly discounted) increased to $21 billion. In January 6, 1993, when publishing the final food labeling rule with a comment analysis, FDA updated their 20-year value estimates to between $4.4 billion and $26.5 billion.[11]

USDA agrees with FDA that for government policy evaluation, society's willingness to pay for risk reduction is an appropriate concept to use in evaluating the impact of government actions which will reduce risks. The FDA estimates of $1.5 million and $3.0 million used in their analysis are quite conservative. Economists have three decades of experience in estimating the value of reducing the risk of fatalities using labor market data. Fisher, Chestnut and Violette (1989) evaluated the merits of these studies of the extra wages that would have to be paid for accepting a higher risk of fatality on the job; concluded that the results from the studies without obvious design flaws were reasonable consistent; and reported that the studies implied a value-per-statistical-life of $1.6 million to $8.5 million (in 1986 dollars).[12] This range of value-per-statistical-life becomes $2 million to $10.4 million in 1993 dollars (updated using the change in Bureau of Labor Statistics' average weekly earnings paid to nonagriculture nonsupervisory workers).

Viscusi (1993) also surveyed risks of death and concluded that "the most reasonable estimates of the value of life are clustered in the $3 million to $7 million range" (p. 1942). However, he cautions that these estimates may be low, because the populations of exposed workers in these studies generally have lower incomes than individuals being protected by government risk regulations.[13] (The positive income elasticity for risk reduction means that higher values for lifesaving should be used when evaluating many risk reduction programs, such as airline safety programs). Fisher, Chestnut, and Violette also caution that to the individual's valuation of the risk reduction should be added the value loved ones and altruistic others also would be "willing to pay for reducing the fatality risk for those exposed to it" (p. 97).

The values for risk reduction may be greater when risks are involuntarily assumed than when the risks are voluntarily chosen. This is relevant to the school lunch situation where a limited array of choices are offered in the lunch program. Thus, the higher estimates may be most appropriate for evaluating the school lunch programs' healthier diet and its contribution to reducing risk per-statistical-life.

In comparison to the dietary changes predicted by FDA for food labeling, the improvements in fat and saturated fat estimated for the school meal program proposed regulation are substantial. The School Nutrition Dietary Assessment Study found that dietary intake from NSLP lunches provides 37 percent of calories from fat and 14 percent of calories from saturated fat. Reducing these lunchtime intakes to the Dietary Guidelines levels proposed in the regulation would reduce an NSLP participant's intake by 5.9 grams of fat and 3.4 grams of saturated fat on each day school lunch is eaten. Allowing for 182 school days per year and the percent of total U.S. children age 5 through 18 years who receive a meal on any school day (51%), it is estimated that the average daily reduction across all school-aged youth would be 1.5 grams fat and 0.86 grams saturated fat.

These estimates are significantly above those estimated for the FDA food labeling changes for fat and saturated fat. For cholesterol, school meals already provide a moderate intake and no further reduction will be required by the proposed regulation. To further compare the aggregate effect to that estimated for the food labeling regulations, consider the situation where the adult population reduces fat by 1.5 grams, reduces saturated fat by 0.86 grams, and does not reduce dietary cholesterol intake. This is necessary because there are no commonly accepted equations to relate changes in children's intakes of fat, saturated fat, and cholesterol to chronic disease reduction. The Browner model assumes that the relative risk of cancer is a function of total fat. The reduction of 1.5 grams of fat is about 39 percent greater than the reduction of 1.08 grams average for males and females estimated for FDA's food labeling, so a larger reduction in cancer incidence and deaths would be expected. For coronary heart disease, the Browner model assumes that all change is mediated through changes in serum cholesterol, which is affected by total fat, the type of fat, and dietary cholesterol. FDA used the following equation from Hegsted (1986) to estimate the change in serum cholesterol:

Change in serum cholesterol in milligrams per deciliter (mg/dl) = 2.16S − 1.65P + 0.097C

Where

S = change in percentage of total calories represented by saturated fat,

P = change in percentage of total calories represented by polyunsaturated fat, and

C = change in dietary cholesterol measured in milligrams per 1000 kilocalories.

The Hegsted equation shows that the greatest effect on serum cholesterol is due to saturated fat, and that changes in dietary cholesterol only play a small part.[14]

The NSLP changes result in an average reduction in saturated fat of 0.86 grams, which is 2.77 times the reduction of 0.31 grams estimated for FDA's food labeling. Since the estimated change in polyunsaturated fat levels is only slightly greater for food labeling than for the proposed regulation, the overall estimated change in serum cholesterol for the adult example based upon changes at the levels which are proposed for school lunch would be considerably greater than that projected for labeling, driven by the large decline in saturated fat.

In summary, if the reductions in fat and saturated fat intake instituted during the school years are continued into adulthood, the increase in life-years and the value in dollars based upon willingness to pay would be of a magnitude similar to or exceeding that estimated for the food labeling changes, which were $4.4 to $26.5 billion over 20 years. However, the lag time to realize this level of benefits over a 20 year period might be greater since FDA's estimates apply to the U.S. adult population and the proposed rule on school meals will begin to have effect with those children in school at the time of implementation.

The fat and saturated fat reductions estimated to accompany the proposed regulation assume that: (1) Students do not replace school meal fat and saturated fat reductions by increasing fat intake at other times of the day or on non-school days, (2) that the dietary improvements at USDA school meals do not result in similar improvements at other meals or on non-school days and (3) that the improvements by program participants do not result in changes by non-program participants. If students did replace fat and saturated fat at other eating occasions, a smaller health benefit would result. If improvements on school days serve as a positive models which, when combined with

nutrition education, result in improvements to non-USDA school meal, a larger improvement would result. The findings from the Menu Modification Demonstrations indicate that the daily fat intakes of NSLP participants would decline if their fat intakes at lunch were lower, but the effect on non-school meals is less clear.[15] Four sites at geographically dispersed locations (Chattanooga, TN; Denver, CO; Princeton City, OH; and San Bernadino, CA) received grants to test reduction in the fat content of NSLP meals. Dietary intakes of fifth grade NSLP participants at lunch and over 24 hours were collected both at baseline and after the reduction of fat in the NSLP meals. The demonstration found that the percent of calories from fat over 24 hours declined either significantly or marginally at all sites for both boys and girls. In addition, the reduction of intake in grams of total fat over 24 hours was greater than or equal to the reduction at the NSLP meal at three of the four sites. At the fourth site (Princeton City), despite an NSLP reduction in fat, 24-hour calories and grams of fat increased. At the San Bernardino site, which achieved the largest reduction in fat at the NSLP meals, the reduction of grams of fat over 24 hours was significantly greater than the NSLP reduction. On balance, the results of this demonstration indicate that when fat at the NSLP meal is reduced, students usually do not replace these calories by increasing fat intake at other eating occasions. While there is some indication that an accompanying reduction in fat at other eating occasions may be more common than an increase in fat at other eating occasions, findings are mixed and therefore not robust enough to influence benefit projections. Accordingly, the analysis in this section assumes that changes in NSLP fat levels do not affect fat intake at other occasions.

The fat and saturated fat reductions discussed in the impact analysis above relate only to the lunch meal. The proposed regulation will also reduce fat and saturated fat in school breakfasts, from 28 to 25 percent of total calories from fat, and from 11 to 10 percent of total calories from saturated fat. This will increase the overall reduction in average fat and saturated fat for the student population, but to a lesser extent than NSLP due to the smaller reductions and because fewer students participate in the School Breakfast Program.

The food labeling regulations are not expected to reduce U.S. fat and saturated fat levels by the full amount needed to achieve the Dietary Guidelines. This indicates that there will be room for the fat and saturated fat reductions which would result from the proposed rule to generate health improvement.

d. Effects on Participation

It is anticipated that the rule will have minimal effect on NSLP participation because implementation of the rule is not expected to increase meal prices or decrease meal acceptability. On a typical day, 25 million children participate in the National School Lunch Program. About 14 million of these meals are served to children receiving free or reduced price lunches. USDA has analyzed both the impact of meeting the dietary guidelines on meal price and meal acceptability and the implications for program participation.

Lunch price is an important factor in determining the level of participation among these students, with students participating at higher rates in schools with lower prices. Research indicates that price increases can cause substantial decreases in student participation. A key factor in maintaining participation among paid students while implementing the dietary guidelines is minimizing the meal cost. Food cost analysis demonstrated that nutritional targets can be reached within current food cost constraints. Minimizing cost impacts removes upward pressure on student fees which would result in decreased student participation.

USDA's efforts to test the effect of reducing fat and sodium and increasing the nutritional quality of meals has shown that improvements can be made without affecting participation. Although the SNDA study found that schools that served meals with a low proportion of calories from fat (less than 32 percent) had lower than average program participation, this information needs to be viewed in the larger context of efforts specifically designed to examine improvements in school meals.

The Department sponsored demonstration projects in five school food authorities from school year 1989–90 to 1991–92 to evaluate the extent to which menus planned to meet the NSLP meal pattern could be modified to better reflect the dietary guidelines.[16] Through the Menu Modification Demonstration Project, USDA examined the process involved in modifying school meals, including the impact on program participation. The demonstration found that fat could be decreased significantly without decreasing program participation. The percentage decrease in grams of fat ranged from 12 to 31 percent in the four sites. In all schools, average daily participation remained stable or increased slightly. In addition, the improvements were made with relatively minor changes in the types of foods offered. Although the districts were not able to make comparable improvements in the percentage of calories from fat, because overall calories decreased, the results demonstrate that fat can be cut without losing participation.

California is operating a State-wide demonstration of nutrient standard menu planning. The State reported that the nutrient-based system they implemented did not result in any decreases in gross meal participation between 1990 and 1992.

SNDA did find lower student participation in very low-fat schools, however, the study also indicated that it is possible to reduce the average fat content of lunches offered to well below the national average of 38 percent of food energy without adversely affecting participation in the NSLP. Participation rates were similar in schools whose lunches provide a moderate percentage of food energy from fat (32 percent to 35 percent) and in those whose meals provide a high or very high percentage of food energy from fat. It is important to note that the SNDA finding of low participation among low-fat schools is not based on experience with schools altering the nutrient content of food but rather on a point-in-time cross-sectional observation of schools with low-fat meals. The study did not collect information on how the schools implemented low-fat meals and what consequences these would have had on participation.

USDA recognizes that significant efforts must be undertaken to ensure that participation is maintained as meals are improved. If a meal does not taste good or look good then children will not eat it. The proposed regulation recognizes that food changes alone will not bring schools meals in line with the dietary guidelines. The results of SNDA and the two demonstrations suggest that reductions in calories from fat must be accompanied by nutrition education and promotional activities to maintain student participation. Gradual implementation of the Dietary Guidelines in school meals will allow for incremental changes in food offerings, minimizing the impact on current participation in the school meal programs. School food service is a nonprofit business that must meet student preferences to stay viable. This requires maintenance of participation by meeting food preferences, and accomplishing nutritional improvements through changes to

recipes, food preparation techniques and purchasing specifications that are consistent with these preferences.

e. Implementation Costs

Initial implementation costs faced by schools will vary depending on existing capabilities and resources within districts and will take many forms. Local, State and Federal resources are available for implementation. USDA has already initiated a number of improvements: Updated and improved recipes for schools, a computerized data bank of standard nutritional values of meals served and a demonstration project on NSMP. The demonstration will incur much of the developmental cost of the basic system framework and identify cost effective strategies for implementation. The Department has announced the availability of nutrition education cooperative agreements to develop comprehensive community-based approaches to nutrition education and is working on a national publication directed at grade school children. The Department is assisting school food service professionals in working with chefs, farmers and others to make school meals appealing and healthful.

The President's FY 1995 budget contains a request of over $20 million to support extensive training for school meal providers on how to plan and prepare nutritious and appealing meals as well as launching a national media campaign directed at building children's skills at making wise food choices for life.

States receive over $[illegible] million annually from the Federal level in State Administrative Expense (SAE) funds for program oversight. A portion of these resources are available to assist in implementation. In addition, the proposed regulation would reduce the level of State resources devoted to local school food authority reviews, which is described in more detail below.

At the local level, implementing nutrient standard menu planning will require computer capabilities. Many schools currently make extensive use of computers for management activities and have the facilities and capabilities to undertake nutrient standard menu planning. One of the goals of the initiative is to use the technology more effectively.

A study of school food authorities in the mid-Atlantic region found that 60 percent of SFAs employ computers for some functions.[17] Over one-fourth of these districts had comprehensive systems that allowed them to do menu management and nutritional evaluations. The menu modification demonstrations found that the lack of appropriate computer software limited the feasibility of monitoring the nutritional quality of menus. More recently developed software has greatly enhanced the ability to perform these analyses, which will now be supported by a USDA developed data base. Schools with microcomputers should be able to use this software.

Schools without sufficient computer capability or necessary access to technical assistance may opt for Assisted Nutrient Standard Menu Planning, which will allow development and analysis of menus by other entities, such as State agencies, consortiums of school districts, consultants or the Federal government, while still applying the essentials of NSMP.

The per meal reimbursement provided to schools was designed to cover both the food and administrative costs (labor and operations) of providing meals to students and can be used to acquire computer hardware and software. Enhanced computing abilities offer significant improvements in other areas of food service management beyond nutrient standard menu planning. The potential for additional improvements in food service operations beyond menu planning, for example, inventory control, should help offset the cost of acquiring this capability for NSMP.

The cost analysis found that the nutrient requirements of NSMP can be met at about the current cost of food in the National School Lunch Program. Because the foods used in the sample menus were drawn from what is currently being served, USDA does not anticipate the need for significant changes in meal preparation practices that would affect the cost to prepare meals. The administrative cost of conducting NSMP should be about the same as current operations once the system is fully implemented in a school. An evaluation of costs in the California nutrient standard demonstration reported that most schools experienced slight cost changes that ranged from 4 percent savings to 1.5 percent increased costs and concluded that most districts can expect to experience very little change in overall food service costs when implementing a nutrient-based system.[18]

f. Other Significant Effects

The Food and Nutrition Service believes that implementation of nutrient-based menus will require extensive training and technical assistance, especially at the school food authority level. In addition, the acquisition of computers (for schools that do not already have them) or contracting for computer or assistance with the revised menu planning system may involve some local level expenditures during the implementation period. While implementation will require a dedicated effort on the part of our agency, the state agencies and local school food authorities, the ongoing operation and maintenance of nutrient-based menu planning will be indistinguishable from the current meal pattern based system in terms of efforts.

To provide for the resources needed for implementation, the regulation proposes a twenty per cent reduction in state monitoring requirements. This reduction will enhance the level of resources available to focus on training and technical assistance efforts. Many school food authorities will no longer have the requirement for specific edit checks to review claims submitted for reimbursable meals. Rather, these school food authorities will have flexibility to develop their own internal controls for such review. This provision is largely intended to streamline program administration, but will also provide some relief from program management burdens.

Other Regulatory Changes

The regulation proposes to streamline some existing administrative procedures of State agencies and school districts. This will permit States and school districts to implement NSMP and focus on the nutritional needs of children. At the State level the school food authority review cycle will be extended from four to five years, reducing by 20 percent the resources devoted to this effort. While this will extend the time period between formal reviews, most districts are currently visited more frequently than the current four year cycle. The States will continue to have a significant presence at the local level. Although the focus of attention will be on implementing NSMP there should be no perceived reduction in State oversight.

5. *Reason for Selection of Proposed Alternative:* The overriding purpose behind this rule is to serve more nutritious and healthful meals to school children while maintaining access to the meal programs for needy children and enhancing the flexibility of local schools to administer the programs.

The nutrient targets selected are derived from the Dietary Guidelines for Americans and the Recommended Dietary Allowances (RDAs).[19] The Dietary Guidelines for Americans encompass the Federal government policy on nutrition. They are developed in consideration of scientific sources such as The Surgeon General's Report

on Nutrition and Health [20] and the National Academy of Sciences reports Diet and Health: Implications for Reducing Chronic Disease Risk [21] and Recommended Dietary Allowances. They are based upon the recommendations of an expert committee, the Dietary Guidelines Advisory Committee, specifically appointed to assist in developing Dietary Guidelines for use across Federal government. There are no alternative policy documents with official sanction by the government departments responsible for domestic nutrition which could provide alternative dietary targets for the general population. Other government publications in this area, such as "Building for the Future: Nutrition Guidance for the Child Nutrition Programs" [22] are based upon the Dietary Guidelines.

6. *Public Comments:* The Department also considered extensive oral testimony presented at four public hearings and meetings as well as written comments submitted in response to a notice published in the **Federal Register** on September 13, 1993. A summary of the comments is included in the preamble to the proposed rule.

Department of the Interior

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; 12-Month Petition Finding on the Bull Trout; Final Rule

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; 12-Month Petition Finding on the Bull Trout

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of petition finding.

SUMMARY: The Fish and Wildlife Service (Service) announces a 12-month finding on a petition to list the bull trout (*Salvelinus confluentus*) pursuant to the Endangered Species Act of 1973, as amended (Act). The Service finds that listing bull trout throughout its range is not warranted at this time due to unavailable or insufficient data regarding the threats to and status and population trends of the species within Alaska and Canada. Sufficient information is available, however, to support a warranted finding to list bull trout within the conterminous United States. The Service, therefore, finds that listing a distinct vertebrate population segment of bull trout residing in the conterminous United States is warranted, but precluded due to other higher priority listing actions. The Service continues to seek data and comments from the public on the status and threats to this species.

DATES: The finding reported in this document was made on June 6, 1994. Comments and information may be submitted until further notice.

ADDRESSES: Comments and materials concerning this petition may be sent to the Field Supervisor, U.S. Fish and Wildlife Service, 3704 Griffin Lane SE, suite 102, Olympia, Washington 98501. The petition, finding, supporting data, comments, and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: David C. Frederick, Field Supervisor (see **ADDRESSES** section), at 206/753–9440.

SUPPLEMENTARY INFORMATION:

Background

Section 4(b)(3)(B) of the Endangered Species Act, as amended (16 U.S.C. 1531 *et seq.*), requires that for any petition to list a species as endangered or threatened that presents substantial scientific or commercial information, a finding must be made within 12 months of the date of receipt of the petition on whether the petitioned action is (a) not warranted, (b) warranted, or (c) warranted but precluded from immediate proposal by other pending proposals to list, delist, or reclassify species. Such 12-month findings are to be published promptly in the **Federal Register**. If the finding is warranted but precluded, the Service will, within 12 months of such finding, reevaluate the issue and again make one of the three findings described above with regard to the petition.

The bull trout was designated as a category 2 candidate for listing in the conterminous United States in the September 18, 1985, Animal Notice of Review (50 FR 37958). Category 2 species are species for which the Service has some evidence of vulnerability but for which substantial information is not currently available to support a proposal to list the species as endangered or threatened.

On October 30, 1992, the Service received a petition to list the bull trout as an endangered species throughout its range from the following conservation organizations in Montana: Alliance for the Wild Rockies, Inc., Friends of the Wild Swan, and Swan View Coalition. The petitioners also requested that critical habitat be designated for the bull trout concurrently with the listing. They further requested an emergency listing and concurrent critical habitat designation for bull trout populations in select aquatic ecosystems where the biological information indicates that the species is in imminent threat of extinction.

A 90-day petition finding, published May 17, 1993 (58 FR 28849), determined that the petitioners had provided substantial information indicating that listing of the species may be warranted. The Service initiated a rangewide status review of the species concurrent with publication of the 90-day finding. The period of the Service's status review was extended due to insufficient staff.

The Service has carefully assessed the best scientific and commercial information available regarding the present and future threats facing the bull trout. The species historically was widely distributed throughout the major rivers and tributaries of the Pacific Northwest, including seven States (Alaska, Montana, Idaho, Washington, Oregon, Nevada, and California) and two Canadian Provinces (Alberta and British Columbia). The species has been extirpated from most of the large mainstem rivers in which it historically occurred. The majority of remaining individuals exist within headwater streams. These fragmented and isolated populations are subject to local extirpation.

The species is threatened with extinction within the conterminous United States as a result of aquatic habitat degradation due to forest management practices, roadbuilding, dams, water diversions, mining, and grazing, as well as from isolation, competition and hybridization with non-native fishes, and overharvest. Even populations occurring in wilderness areas, where land use impacts are minimal, are threatened by non-native species and by isolation from other populations such that stochastic events might, in time, result in extirpation.

Different amounts of scientific and commercial data are available on the different populations of bull trout throughout its range. There is little information available regarding the existence or status of bull trout in Alaska. Sufficient monitoring data to document the possible declining population trend in Canada is not currently available in Service files. As a result of the Service's status review for this species, the Service finds that listing bull trout throughout its range is not warranted at this time due to unavailable or insufficient data regarding the threats to and status and population trends of the species within Alaska and Canada.

Sufficient information on the biological vulnerability and threats to the species is, however, available to support a warranted finding to list bull trout within the conterminous United States. The Service has identified a national interest in preserving species in the conterminous United States, even though they also occur in Canada and Alaska. Examples of cases where the Service has used an international boundary to define a distinct vertebrate population segment include: Grizzly bear, bald eagle, marbled murrelet, and woodland caribou.

On September 21, 1983 (48 FR 43098), the Service published a system for prioritizing species for listing. This system results in a listing priority number from 1 to 12 (with number 1 as the most threatened). Because of limited staff and funding, the Service must give priority to the listing of species with a listing priority of 1 through 6. Given the moderate, yet imminent threats facing bull trout residing in the conterminous United States, the Service assigns the listing priority number of 9 to this distinct vertebrate population segment.

Section 4(b)(3)(B)(iii) of the Act provides that petitioned actions may be found to be warranted, but precluded by other listing actions when it is found that the Service is making expeditious progress in proposing and listing species of plants and animals that are imminently and highly threatened.

For the current fiscal year that began on October 1, 1994, the Service is making expeditious progress to propose and list (within the six conterminous States where bull trout reside), at least 80 plant and animal taxa with listing priority numbers between 2 and 8. The Service, therefore, finds that listing the distinct vertebrate population segment of bull trout residing in the conterminous United States is warranted, but precluded due to other higher priority listing actions. Such species are placed in category 1 of the candidate species list.

More detailed information regarding the above decisions may be obtained from the Service's Olympia office (see **ADDRESSES** above).

Department of Education

34 CFR Part 75
Direct Grant Programs; Final Rule

DEPARTMENT OF EDUCATION

34 CFR Part 75

RIN 1880–AA61

Direct Grant Programs

AGENCY: Department of Education

ACTION: Final regulations with request for comments.

SUMMARY: The Secretary amends the Education Department General Administrative Regulations (EDGAR) to amend regulations governing the requirements for non-competing continuation (NCC) discretionary grant awards. The amendments will eliminate the requirement for recipients to submit an application for NCCs. Instead, the due dates for performance reports will be adjusted so they may be used to determine whether a recipient has met the criteria for receiving a continuation award. EDGAR is also amended to clarify the Department's policy for the use of funds that remain unobligated by the recipient and carried over from one budget period of a project to the next budget period of a project. The action is being taken to improve the effectiveness, integrity, and efficiency of the grant award process, and to contribute to the effectiveness and integrity of the grants. Because these changes are procedural, the Secretary is not publishing these regulations as a proposed rule. However, the Secretary is interested in comments from the public on ways to further improve the non-competing continuation award process.

DATES: *Effective Dates:* These regulations take effect either 45 days after publication in the Federal Register or later if the Congress takes certain adjournments. Sections 75.118 and 75.590 will become effective after the information collection requirements contained in those sections have been submitted by the Department of Education and approved by the Office of Management and Budget under the Paperwork Reduction Act of 1980. If you want to know the effective date of these regulations, call or write the Department of Education contact person. A document announcing the effective date will be published in the Federal Register.

Applicability Dates: The final regulations published in this document will apply only to those competitions for new grants that will be awarded on or after October 1, 1994 and that are announced in the Federal Register on or after June 10, 1994. The Department's Combined Application Notice (CAN) for fiscal year 1995 is published elsewhere in this issue of the Federal Register and announces competitions that will be subject to the regulations contained in this document. For those competitions announced before today's CAN, applicants are subject to the EDGAR regulations as they existed before this regulation becomes effective regarding what had to be included in an application.

Recipients that receive initial year awards on the basis of competitions that were conducted under the prior EDGAR regulation will have to submit a continuation application, as they have in the past. For the first continuation award made after October 1, 1994, the continuation application must include a complete budget for each of the remaining budget periods of the project that is equivalent to the budget information that will be required under § 75.117 after the effective date of these final regulations. For any continuation awards made after this initial continuation award, the recipient must submit a performance report, as required by these new regulations rather than submitting further continuation applications.

COMMENTS: Comments must be received on or before August 9, 1994.

ADDRESSES: All comments concerning these final regulations should be addressed to Sherlyn Taylor, Grants and Contracts Service, U.S. Department of Education, 400 Maryland Avenue, SW room 3616, ROB–3, Washington, DC 20202–4700.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble.

FOR FURTHER INFORMATION CONTACT: Kathy Thomas, U.S. Department of Education, 400 Maryland Avenue, SW room 3616, ROB–3, Washington, DC 20202–4700. Telephone: (202) 401–3981. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: To improve the administration of discretionary grants and to clarify for recipients the procedures and requirements of the Department, the Secretary is amending sections in the Education Department General Administrative Regulations (EDGAR) on non-competing continuation applications and the use of unobligated funds.

Background

In 1993 the Department chartered a Quality Improvement Team for Non-Competing Continuation Grants (the Team). The Team studied the Department's process for awarding non-competing continuation grants. To conduct its analysis, the Team collected information from a wide variety of sources within and outside the Department, including flowcharting, analyzing data from the Department's automated grants management information system, conducting focus groups and interviews of program and grants staff at all levels in the Department, and benchmarking the grant award processes with other Federal agencies. The Team developed four options, ranging from retaining the current non-competing continuation award process (with certain refinements and improvements) to establishing a new process for making NCC awards. The outline of these options was shared with the public during the data gathering stage of the Team's work.

The public was given the opportunity to comment on improving the process for making non-competing continuation awards by submitting written comments or presenting testimony at a public meeting. Both the meeting and the invitation to submit written comments were announced in a notice published by the Department in the Federal Register on July 19, 1993 (55 FR 40640). Thirteen written comments were received in response to that request. The Team received additional comments at a public meeting held on August 18, 1993.

The information gained from these extensive data gathering activities allowed the Team to identify deficiencies in the current process and to base recommendations for developing and improving the current process.

Recommendation to Streamline the Non-competing Continuation Award Process

Based on input from interested parties, both inside and outside the Department, the Team recommended that the Department make non-competing continuation awards on the basis of acceptable and timely performance reports without requiring the recipient to submit applications for those awards. The Team's recommendation is consistent with the goals of the Government Performance and Results Act and the specific recommendations of the National Performance Review to "eliminate the continuation application process for

budget years within the project period" and that the process "be replaced by yearly program progress reports focusing on program outcomes and problems related to program implementation and service delivery." Instead, funding levels for each budget period of a project will be determined at the time of the initial award.

Changes in funding will be made on an "as needed" basis using prior approval standards already in place under 34 CFR 74.105 and 34 CFR 80.30(d). Under these standards and the procedures in §§ 74.102 and 80.30(f), a recipient must seek prior approval for certain changes to a budget and submit the request to the Grants Division of the Grants and Contracts Service. A request for a change in a recipient's budget should be made at the time that the recipient becomes aware of the need for the change, whether the change affects the current budget period or any or all future budget periods.

If the change affects the next budget period and the recipient becomes aware of the need for the change at the time that it submits its performance report, the recipient may submit the request at the time that it submits the performance report. However, the Secretary notes that submission of proposed budget changes with, or after, the performance report may delay the recipient's receipt of the continuation award. Any funding of a continuation award, whether or not made in conjunction with a request for a budget change, is contingent upon the availability of funds.

Annual awards will be made after approval of performance reports by the program offices. Based on public comment, it was clear to the Team that recipients understand the importance of providing information about progress of grant activities but feel that more timely performance reports would be preferable to an annual application timed to meet the Department's award schedule. Also, there was a perception among recipients that the Non-competing Continuation process demonstrates an "enforcement" mentality on the part of the Federal Government, at the expense of a collaborative and assisting attitude. Recipients favored a new paradigm whereby performance reporting would be tied more to projects' reporting on results and performance, and less to the threat of a cut-off in funding (even though extremely rare in practice). This option was chosen to implement an entirely new paradigm for the NCC award process.

Continuation funding will be based, as it has in the past, on evidence that the grantee has met the standards for continuation contained in 34 CFR 75.253. These standards include requirements that Congress appropriate sufficient funds to continue existing awards, that the grantee make substantial progress toward achieving the objectives of the project or obtain approval from the Secretary for certain changes to the grant, that continuation of the project is in the best interests of the Federal Government, and that the grantee submit, as required by § 75.118, every report that it must submit to get the continuation award. This last standard will take on increased importance under the amended regulations because the continuation award decision—including the decision about whether the grantee has made substantial progress—will be based entirely on the submission of reports as specified by the Secretary, rather than on the submission of a continuation award application. Moreover, having recipients submit their performance reports closer to the date when funding decisions must be made will make the reports more valuable instruments than the previous continuation applications. Until now, recipients often have been required to submit performance data in continuation applications before their projects had completed more than a few months of activities.

The Secretary stresses to recipients the increased importance of performance reports. Because these reports will be key to the decision to continue funding, recipients will be expected to submit high quality reports. A performance report must contain the most current performance information specified in EDGAR and any applicable program requirements. These requirements include an evaluation of the grantee's progress in achieving the objectives of the approved application, the effectiveness of the project in meeting the purposes of the program under which it was funded, and the effect of the project on the participants it serves (§ 75.590); and a discussion of the reasons for slippage if established goals were not met, and a computation of the cost per unit of output if the output of the project can be quantified (§§ 74.82(c) and 80.40(b)).

If a recipient fails to submit a performance report as directed by the Secretary, the recipient will not receive a continuation award. See § 75.253(a)(3). To merit receipt of a continuation award, the report must demonstrate that a recipient has made substantial progress in fulfilling the objectives of the grant. The Secretary intends that employees of the Department will scrutinize these reports closely to ensure that the recipient has, in fact, met this standard. The Department currently is developing a generic performance report for approval by the Office of Management and Budget (OMB).

The new process will provide many benefits to recipients. It will free up time previously spent on duplicative processes, both internal and external. For example, certifications and assurances (e.g., Lobbying; Debarment) must be submitted whenever an entity applies for funds. Since recipients will no longer submit an application to receive continuation funding, they will no longer be required to resubmit these assurances annually for the life of the project. The new process for making continuation awards should free up resources for both the recipients and Department staff that can be reinvested in higher quality project management, technical assistance, and monitoring.

Section-by-Section Analysis

Section 75.100 is revised to remove references to the application process that will no longer be used to make non-competing continuation awards.

Section 75.112 is amended by revising paragraph (b) to require an applicant for a new grant to describe in its application how, in each budget period of the grant, the applicant plans to meet each objective of the project.

Section 75.117 is revised to reflect the new procedure for determining the award amounts for all budget periods in a multi-year grant at the time the initial award is made. The revision ensures that the applicant provides multi-year budgetary information in its initial application since continuation applications will no longer be required.

Section 75.118 is revised to remove references to items that were formerly required in a continuation application. The items listed in paragraph (b) of this section are no longer needed because adequate information already will be provided in the initial application in accordance with the revised § 75.117. The performance report now will become due before the beginning of the continuation award, and will provide the information on which the funding decision will be made. This section makes clear that a performance report must be submitted, prior to the next budget period, for all multi-year awards and that the Secretary will establish the specific due date for submission of the report. In addition, this section changes any references to "applicant" so that it now will refer to the "recipient" because an application will no longer be a part of the continuation award process.

Section 75.232 is revised to incorporate the new procedure under which the Department performs its cost analysis on the basis of the initial application. The Department does a cost analysis to verify cost data in the detailed budget. In doing so, it evaluates specific elements of cost, and examines an applicant's proposed costs to determine if they are necessary, reasonable, and allowable under applicable statutes and regulations.

Section 75.253 is amended to make the performance reports due by the dates set by the Secretary (§ 75.253(a)). It is important that recipients understand that performance reports now will be due before the end of the current budget period because this information will be used in lieu of continuation applications in deciding whether to make continuation awards. If a recipient fails to submit a performance report as required by these regulations, the Secretary will not continue funding for the project.

Paragraph (c) of § 75.253 also is amended to clarify the Department's policy regarding funds that remain unobligated by a recipient. The current § 75.253(c) states when the Department would reduce the amount of new funds made available for a continuation award to a recipient. Implicit in the current rule is the policy that the Department would, under certain circumstances, add the unobligated funds to the amount of new funds made available for a continuation award. Consistent with this policy, § 75.253(c) clearly indicates the circumstances under which the Department will add the amount of unobligated funds to the amount of new funds made available for a continuation award, as well as the circumstances under which it will reduce those funds.

Section 75.590 is revised to clarify that the grant recipient's annual evaluation is its performance report. The current regulation in § 75.590 requires a recipient to evaluate the project annually but does not require the recipient to submit the evaluation to the Department. Under this amended regulation, the criteria for the annual evaluation required by § 75.590 is incorporated into the performance report. In this regard, the revised introduction to this section now says that a "recipient shall submit a performance report, or, for the last year of a project, a final report, that evaluates [the project] at least annually * * *." This change is designed to make clear that the performance report required under § 75.117, as amended by these regulations, must meet the standards established in § 75.590. These standards require an evaluation of the recipient's progress in achieving the objectives in its approved application, the effectiveness of the project in meeting the purposes of the program under which it is funded, and the effect of the project on the participants being served by the project. Under the amended §§ 75.590 and 75.117, a recipient will no longer have to submit a continuation application and also prepare a separate evaluation of the project. Instead, a single performance report, meeting the standards of § 75.590 will be submitted. Also, the final report of a project required under §§ 74.82(b) and 80.40(b) must meet the standards in § 75.590.

Executive Order 12866

These final regulations have been reviewed in accordance with Executive Order 12866. Under the terms of the order the Secretary has assessed the potential costs and benefits of this regulatory action.

The potential costs associated with the final regulations are those resulting from statutory requirements and those determined by the Secretary to be necessary for administering the Department's programs effectively and efficiently. Burdens, specifically associated with information collection requirements, if any, are identified and explained elsewhere in this preamble under the heading Paperwork Reduction Act of 1980.

In assessing the potential costs and benefits—both quantitative and qualitative—of these regulations, the Secretary has determined that the benefits of the regulations justify the costs.

The Secretary has also determined that this regulatory action does not unduly interfere with State, local, and tribal governments in the exercise of their governmental functions.

Regulatory Flexibility Act Certification

The Secretary certifies that these final regulations will not have a significant economic impact on a substantial number of small entities. For the most part these revisions are adopted to streamline the non-competing continuation award process and the process of reviewing requests for the use of unobligated funds carried over from one budget period to the next. The final revisions will not result in major changes in Departmental policy that might have significant economic impact on small entities. Rather, the effect of these rules is to shift the time when certain information is provided to the Department and eliminate the need for cumbersome continuation award applications.

Paperwork Reduction Act of 1980

Sections 75.112, 75.117, 75.118 and 75.590 contain information collection requirements. The information collection requirements for §§ 75.112 and 75.117 have already been approved under the Office of Management and Budget control number 1875–0102.

These regulations affect the following types of entities which are eligible, depending on the individual program, to apply for discretionary grants: State and local governments, nonprofit institutions, institutions of higher education, for profit organizations, and individuals. The Department needs the information in the performance reports to enable the Secretary to determine if the recipient meets the criteria for an additional year of funding. The performance report enables the Secretary to determine if the recipient has made substantial progress toward meeting the objectives in its approved application. Substantial progress is one of the requirements for a recipient to be eligible for continuation funds. Other requirements for continuation are described earlier in this preamble in the discussion regarding 34 CFR 75.253. The annual reporting burden for these collections of information is estimated to vary from 13 to 22 hours per response, with an average of 17.5 hours per response for 30,000 respondents, for a total annual burden of 525,000 hours, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collections of information. (44 U.S.C. 3504(h)).

The revisions to §§ 75.118 and 75.590 have not been approved by OMB under the Paperwork Reduction Act of 1980. The Department of Education will submit a collection submission to the Office of Management and Budget (OMB) for its review of these sections under the law.

Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, OMB, room 3002, New Executive Office Building, Washington, DC 20503; Attention: Daniel J. Chenok.

Intergovernmental Review

Programs receiving multi-year continuation awards are subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. However, for discretionary grants, the non-competing continuations referred to in 34 CFR 79.8 will no longer be required. Therefore, the Secretary will notify the recipient that the performance reports must be submitted for intergovernmental review. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for programs subject to 34 CFR part 75.

Waiver of Proposed Rulemaking

Under 5 U.S.C. 553(b)(A) the Secretary may waive proposed rulemaking for rules of agency procedure. These procedural regulations do not affect the substantive rights of recipients to receive new or continuation awards. The procedures established in these regulations merely reduce and shift burden regarding budget submissions and financial and performance reports. Therefore, the Secretary has decided to waive proposed rulemaking for these procedural regulations so that they may be used in the upcoming funding cycle to inform applicants for new awards what must be included in the application for a new award.

Regarding the amendment to 34 CFR 75.253(c), this amendment merely restates the longstanding current regulation in clearer language. The Department has interpreted the current 34 CFR 75.253 consistent with the language contained in the revised paragraph 75.253(c). 5 U.S.C. 553(b)(A) also provides that an agency may waive proposed rulemaking for interpretative rules. Because the amendment to 34 CFR 75.253(c) is consistent with current interpretation of the existing 34 CFR 75.253(c), the Secretary has decided to waive proposed rulemaking regarding this provision as well. Accordingly, the Secretary waives proposed rulemaking for the amendments to 34 CFR part 75 made in this final rulemaking document.

Invitation To Comment

The amendments to these regulations are procedural in nature and intended to streamline discretionary grants administration. However, interested persons are invited to submit comments and recommendations regarding these final regulations because the Department is always interested in ways it can further improve its discretionary grant management practices. All comments submitted will be considered in further streamlining and refining procedures for processing non-competing continuation awards and requests for the use of funds that remain unobligated by the recipient and are carried over to the next budget period. All comments submitted in response to these final regulations will be available for public inspection, during and after the comment period, in room 3636, Regional Office Building No. 3, Seventh and D Streets SW., Washington, DC, between the hours of 9 a.m. and 4 p.m., Monday through Friday of each week except Federal holidays.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the final regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 75

Education Department, discretionary grant programs, continuation funding, grant administration, reporting and recordkeeping requirements, performance reports, unobligated funds.

Dated: May 10, 1994.

Richard W. Riley,

Secretary of Education.

(Catalog of Federal Domestic Assistance Number does not apply.)

The Secretary amends part 75 of title 34 of the Code of Federal Regulations as follows:

PART 75—DIRECT GRANT PROGRAMS

1. The authority for 34 CFR part 75 continues to read as follows:

Authority: 20 U.S.C. 1221e–3(a)(1) and 3474, unless otherwise noted.

§ 75.100 [Amended]

2. Section 75.100 is amended by removing paragraph (c).

3. Section 75.112 is amended by revising paragraph (b) and adding an OMB control number to read as follows:

§ 75.112 Include a proposed project period and a timeline.

* * * * *

(b) An application must include a narrative that describes how and when, in each budget period of the project, the applicant plans to meet each objective of the project.

(Approved by the Office of Management and Budget under control number 1875–0102)

* * * * *

4. Section 75.117 is amended by revising paragraph (b), removing paragraph (c) and adding an OMB control number to read as follows:

§ 75.117 Information needed for a multi-year project.

* * * * *

(b) A budget narrative accompanied by a budget form prescribed by the Secretary, that provides budget information for each budget period of the proposed project period.

(Approved by the Office of Management and Budget under control number 1875–0102)

* * * * *

5. Section 75.118 is revised to read as follows:

§ 75.118 Requirements for a continuation award.

(a) A recipient that wants to receive a continuation award shall submit a performance report that provides the most current performance and financial expenditure information, as directed by the Secretary, that is sufficient to meet the reporting requirements of 34 CFR 74.82, 75.590, 75.720, and 80.40.

(b) If a recipient fails to submit a performance report that meets the requirements of paragraph (a) of this section, the Secretary denies continued funding for the grant.

Cross-Reference. See § 75.117 Information needed for a multi-year project, and §§ 75.250 through 75.253 Approval of multi-year projects, § 75.590 Evaluation by the recipient, § 75.720 Financial and performance reports, § 74.82 Performance Reports under nonconstruction grants, and § 80.40 Monitoring and reporting program performance.

(Authority: 20 U.S.C. 1221e–3(a)(1) and 3474)

§ 75.232 [Amended]

6. Section 75.232 is amended by adding the word "new" in paragraph (a) before the word "grant".

7. Section 75.253 is amended by removing the word "grantee" and adding, in its place, the word "recipient" in paragraphs (a)(2) and (a)(2)(ii)(B), and by revising paragraphs (a)(3), (c), and (e) to read as follows:

§ 75.253 Continuation of a multi-year project after the first budget period.

(a) * * *

(3) The recipient has submitted all reports as required by § 75.118, and

* * * * *

(c) The Secretary considers any funds remaining unobligated by the recipient at the end of a budget period in determining the amount of new funds to be awarded for the next budget period of the grant as follows:

(1) If the unobligated funds are needed to complete activities that were approved for the budget period that is about to end, the Secretary may add the unobligated funds to the amount of

funds to be approved for the next budget period of the grant.

(2) If the unobligated funds are not needed to complete activities that were approved for the budget period that is about to end, the Secretary may reduce the amount of new funds awarded for the next budget period by the amount of unobligated funds.

* * * * *

(e) Unless prohibited by program regulations, a recipient that is in the final budget period of a project period may seek continued assistance for the project under the procedures for selecting new projects.

8. Section 75.590 is amended by removing the word "grantee" and adding, in its place, the word "recipient" in paragraph (a) and revising the heading and the undesignated introductory text to read as follows:

§ 75.590 Evaluation by the recipient.

A recipient shall submit a performance report, or, for the last year of a project, a final report, that evaluates at least annually—

BILLING CODE 4000-01-P

Federal Register

Friday
June 10, 1994

Part VII

Environmental Protection Agency

40 CFR Part 170

Technical Amendment to Early-Entry Prohibition of the Worker Protection Standard; Final Rule

Administrative Exception to Early-Entry Prohibition of the Worker Protection Standard for Harvesting Cut Roses; Notice

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 170

[OPP–300164I; FRL–4866–5]

Technical Amendment, Addition of Table of Exception Decisions to Early-Entry Prohibition, Worker Protection Standard; Final Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: In the Notices section of this **Federal Register**, EPA is granting an administrative exception to the general prohibition on early entry into pesticide treated areas for hand labor contained in the Worker Protection Standard (WPS) issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). That exception allows, for a 2-year period, under specified conditions, early entry by workers to harvest greenhouse-grown cut roses. To ensure that the regulated community is aware of that and future administrative exceptions to the early-entry prohibition, EPA is amending the WPS to add a new § 170.122(e)(7) that allows the regulated community to locate **Federal Register** notices that set forth the terms and conditions of the administrative exceptions.

EFFECTIVE DATE: June 10, 1994.

FOR FURTHER INFORMATION CONTACT: Therese Murtagh, Chief, Occupational Safety Branch (7506C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, (703) 305–7666.

SUPPLEMENTARY INFORMATION:

I. Background and Purpose

EPA issued the WPS on August 21, 1992 (57 FR 38102, 40 CFR Part 170). The WPS includes a prohibition (§ 170.112) against routine early entry into pesticide treated areas to perform hand labor tasks during restricted-entry intervals (referred to as "early entry"). Section 170.112(e) of the WPS provides a process for EPA to consider and grant administrative exceptions to this prohibition on early entry. In the Notice section of this **Federal Register**, EPA is granting the first such administrative exception for early entry to harvest cut roses. To ensure that the regulated community is aware of, and able to locate, that and future administrative exceptions, EPA is amending § 170.112 by adding a new paragraph (e)(7) identifying the **Federal Register** citations and effective dates for administrative exceptions granted under § 170.112(e).

The addition of paragraph (e)(7) to § 170.112 is a technical amendment. It does not make any substantive changes in the WPS or § 170.112. Accordingly, EPA finds that there is good cause to make this amendment effective without notice and opportunity for public comment because they are unnecessary. Under § 170.112(e), EPA provides notice and an opportunity for comment on proposed administrative exceptions. There is no need for separate comment on adding a cross-reference to § 170.112(e) to those published exception decisions. In addition, EPA finds that there is good cause to make this technical amendment effective immediately upon publication so that reference to the cut rose administrative exception, which is itself effective immediately in this **Federal Register**, will appear in the CFR immediately.

II. Regulatory Assessment Requirements

A. Executive Order 12866

Under Executive Order 12866 (58 FR 51835, October 4, 1993), EPA must determine whether the regulatory action is "significant" and therefore subject to review by the Office of Management and Budget (OMB) and to the requirements of the Executive Order. Pursuant to the terms of the Executive Order, EPA has determined that this technical amendment is not "significant" and is therefore not subject to OMB review.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (5 U.S.C. 650(b)), EPA has determined that this technical amendment will not have a significant impact on a substantial number of small businesses since the technical amendment makes no substantive changes in the WPS.

C. Paperwork Reduction Act

This technical amendment contains no information collection requirements as defined in the Paperwork Reduction Act (44 U.S.C. 3502 et seq.).

List of Subjects in 40 CFR Part 170

Administrative practice and procedure, Labeling, Occupational safety and health, Reporting and recordkeeping requirements.

Dated: June 3, 1994.

Lynn R. Goldman,

Assistant Administrator for Prevention, Pesticides and Toxic Substances.

Therefore, 40 CFR chapter I, subchapter E, part 170 is amended as follows:

PART 170—[AMENDED]

1. The authority citation for part 170 continues to read as follows:

Authority: 7 U.S.C. 136w.

2. In § 170.112 by adding a new paragraph (e)(7) to read as follows:

§ 170.112 Entry restrictions.

* * * * *

(e) * * *

(7) *List of exceptions granted by EPA.* The following administrative exceptions from the requirements of this section have been granted by EPA. Each exception listed in paragraph (e)(7) of this section contains a reference to the **Federal Register** notice in which EPA has granted the exception and the effective dates of the exception. The terms and conditions of the exception appear in the referenced **Federal Register** notice.

(i) Exception for hand labor to harvest greenhouse-grown cut roses published in the **Federal Register** of June 10, 1994, effective from June 10, 1994, to June 10, 1996.

(ii) [Reserved].

[FR Doc. 94–14179 Filed 6–9–94; 8:45 am]

BILLING CODE 6560–50–F

ENVIRONMENTAL PROTECTION AGENCY

[OPP–300164H; FRL–4779–8]

Administrative Exception to Worker Protection Standard Early Entry Prohibition for Harvesting Cut Roses

AGENCY: Environmental Protection Agency (EPA)

ACTION: Administrative Exception decision.

SUMMARY: EPA is granting an administrative exception to the general prohibition on early entry into pesticide treated areas for hand labor contained in the Worker Protection Standard issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). The exception allows, for a 2–year period, under specified conditions, early entry to harvest greenhouse-grown cut roses. This exception will provide the cut rose industry additional time to develop and implement safe alternatives to early entry. EPA is denying an exception for other cut flower and cut fern industries at this time.

EFFECTIVE DATE: June 10, 1994.

ADDRESSES: All comments submitted on the proposed exception are available for public inspection in the Office of Pesticide Programs' public docket, room 1132, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. Office hours are 8 a.m. to 4:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Therese Murtagh, Chief, Occupational Safety Branch (7506C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, (703) 305–7666.

SUPPLEMENTARY INFORMATION:

I. Background

EPA issued on August 21, 1992, (57 FR 38102) a final rule establishing Worker Protection Standards (WPS) for agricultural pesticides (40 CFR part 170). The WPS includes a prohibition against routine early entry to pesticide treated areas to perform hand labor tasks during restricted-entry intervals (referred to as "early entry"). Section 170.112(e) of the WPS provides a process for considering exceptions to this prohibition against early entry. In the same August 21, 1992 **Federal Register**, EPA proposed to grant an exception to the early-entry prohibition for the cut flower and cut fern industries. Information received from the industry during the comment period for the proposed WPS persuaded EPA that there could be substantial economic repercussions if routine hand labor tasks were prohibited during the restricted-entry interval (57 FR 38175). EPA solicited comments on the proposed exception for the cut flower and cut fern industries and received a wide range of comments both supporting and opposing the proposed exception.

II. EPA's Exception Decision

EPA has reviewed the information received and has decided to grant a modified exception to the early-entry prohibition for harvesting greenhouse-grown cut roses only. The information submitted by the rose industry combined with EPA's knowledge of rose production convinced EPA that rose growers could suffer a substantial economic impact if compliance with the WPS early-entry restrictions were required. EPA is granting a 2–year exception to provide rose growers time to adjust pesticide spray schedules, find early-entry alternatives, and develop technology. The exception is subject to conditions designed to mitigate risk to early-entry workers. EPA believes that early entry under the terms of the exception for the period of 2 years will not pose unreasonable adverse effects to rose harvesters.

EPA believes the economic benefits of a 2–year exception for rose growers may be high and that the conditions of this exception will mitigate workers' risks. EPA does not, however, have sufficient information about the risks and benefits of the exception to grant a broader or longer term exception. If the rose industry determines that it needs an exception beyond 2 years, the industry will need to provide additional information on the economic benefits of an exception, as well as the risks, in a new exception request under §170.112(e)(1). This information should include worker exposure data, poisoning incident data, personal protective equipment feasibility information, and data on the economics of rose production and how WPS early-entry restrictions affect revenues.

EPA has not received sufficient information to warrant an exception to the early-entry prohibition for other cut flower and cut fern producers at this time. Information submitted in some comments suggests that alternatives to early entry exist for these other crops, and that such an early entry prohibition would not cause economic repercussions great enough to outweigh the risk to workers. Growers of other cut flowers and cut ferns who would still like EPA to consider an exception for these crops should submit an exception request which supplies the information outlined in §170.112(e)(1). This includes information on crop production and pesticide use practices, alternative practices, economic data, safety practices, and the costs and feasibility of implementing the conditions under which an exception would be granted.

III. Comments, Summary of Major Issues Raised in the Comments and EPA's Findings

In the WPS, EPA prohibited early entry for hand labor such as harvesting because EPA concluded that entry during a restricted-entry interval (REI) to perform routine hand labor tasks is rarely necessary, that personal protective equipment (PPE) for field workers is impractical because workers may remove it or use it incorrectly, and that PPE may be risk inducing because of heat stress concerns. Here, the rose industry has made a case, at least for the interim, that routine entry during an REI to harvest roses is necessary and that prohibiting such entry could have a substantial economic impact on rose growers.

Therefore, EPA is granting a limited exception to allow workers to harvest greenhouse-grown cut roses to avoid excessive economic burden to rose growers. Under conditions described below, workers may enter treated areas under an REI to harvest roses. EPA believes that in rose greenhouses, the use of PPE, a limitation on worker-exposure time, accessible decontamination facilities, provision of label-specific information to workers, basic pesticide safety training, and shade and mechanical cooling devices will mitigate risks for rose harvesters. The following additional factors contributed to EPA's decision: (1) PPE would be worn for only limited periods of time; (2) greenhouses usually encompass a much smaller area than field crops so that employers should more easily be able to ensure that workers wear the PPE; (3) harvesting could be accomplished in a reasonably efficient manner while wearing the required PPE, including coveralls, chemical-resistant gloves (possibly as liners underneath leather gloves), chemical-resistant footwear and headgear (if the potential for head exposure exists), and protective eyewear; (4) the accessibility, usual in rose greenhouses, of running water and in many cases showers for decontamination and heat-stress alleviation; and (5) the availability, also usual in rose greenhouses, of shade, fans, or other mechanical ventilation to provide some cooling. EPA therefore believes that early entry with PPE would be feasible and provide adequate reduction of risks to rose harvesters. Under the conditions of this exception

there will be less pesticide exposure to rose harvesters than in the past.

However, because of continuing uncertainty about the potential risks to early-entry rose harvesters and about the extent of the economic impact of WPS entry restrictions, and because EPA believes that certain alternative practices will eventually reduce or eliminate the need for early entry for rose harvesting, EPA is limiting the exception to 2 years. Should industry determine it needs an exception beyond 2 years, the industry will need to provide EPA with additional information on risks and benefits to support such an exception request.

A. Economic Need

Comments received from rose growers estimated annual revenue losses from $22,000 to more than $50,000 per acre as a result of restricted-entry intervals imposed by the WPS, should no exception be granted. Roses, Incorporated, a national association representing rose growers, estimated an average annual loss of $35,000 per acre for rose growers nationally. This is based on an estimated loss of the equivalent of 1 day's harvest per week due to the WPS. These figures appear to be based on the frequency at which pesticides are normally applied in rose production, the toxicity categories of the pesticides most commonly used on roses, and the need to harvest roses 2 times per day to ensure the harvested crop will yield a premium price. One comment stated that a rose crop can lose 80 percent of its value in 5 hours if not harvested promptly. Several rose growers commented that, given the practices currently employed on their operations, they would lose from 10 percent to 28 percent of their crop as a result of the WPS prohibition against reentry for harvesting during restricted-entry intervals, which range from 12 to 48 hours. These comments cite an average loss of 1 to 2–days' harvest each week depending on the pesticides applied.

Many growers also cited foreign competition in the rose industry as posing a serious economic threat. According to information submitted, imported roses, which represented less than 10 percent of the domestic market in 1980, now account for approximately 50 percent of the U.S. rose supply. Several comments noted that roses can be produced outside the U.S. with far lower labor costs and fewer government restrictions on chemicals used and on workplace safety. A few comments stated that domestic rose producers have managed to retain an economic edge over their foreign competitors by producing higher quality roses. These comments also noted, however, that quality rose production is dependent on intensive pesticide use to ensure an enhanced cosmetic standard.

Comments opposing the exception noted that the industry's estimates are based on current practices which rely on entry as soon as sprays have dried and dusts have settled. These comments suggested that alternative cultivation practices, such as improved scheduling of pesticide applications around essential work activities and use of nonchemical or less-toxic chemical pesticides, would either greatly reduce or eliminate the need for early entry.

One rose grower also noted that improved worker safety, while important in itself, has economic benefits which would offset some of the costs to employers brought on by the conditions of the exception proposed by EPA.

EPA currently has insufficient information to project quantitatively the economic impacts of not granting an exception to rose growers at this time. Given current practices, it is clear that without an exception to early-entry prohibitions, rose growers would be forced to change their practices. EPA expects that such changes in pesticide-use patterns, harvesting, post-harvest handling, scheduling of activities, or other cultural practices will either decrease growers' revenues, increase costs, or both, thereby decreasing growers' income at least in the short run. Given EPA's knowledge of rose culture, including the high per acre value of rose production, and information presented in comments submitted by rose growers, EPA believes that the impacts of denying the exception at this time could be substantial.

EPA also believes that the entry requirements set out in the terms of the exception will encourage the rose industry to adopt alternative production practices which ultimately will reduce the need for early entry, the toxicity of pesticide used, the frequency of pesticide use, and, eventually, the potential economic losses resulting from WPS entry restrictions.

B. Risk to Workers

Most comments opposing the proposed exception identified risk to workers as a primary concern. These comments observed that the frequency and volume of pesticide use in flower production which is necessary to maintain a high cosmetic standard contributes to worker exposure risk.

Several comments included specific information about injuries and poisonings relating to benomyl use (EPA notes that in 1992 all ornamental uses of benomyl, including use on roses, were voluntarily cancelled. Therefore benomyl should pose no added risk to workers harvesting roses under this exception.)

A number of comments also noted injuries to workers in cut-fern operations and included testimonials from fern workers who suffered pesticide-related illnesses or injuries. Some comments included reference to a study (Brouwer et. al. 1991) which suggested that workers in cut flower cultivation may experience higher exposure than workers who apply the pesticides.

Most comments from growers, on the other hand, noted safety records reflecting few, if any, lost work days as a result of worker exposure to pesticides. Roses, Inc., surveyed its members in 1988 about pesticide safety records and suggested that the survey results supported these comments. However, due to the limited scope of the survey and because the survey to some extent relied on growers' memories for data collection, it is difficult to draw conclusions from the results.

Many growers' comments noted that a factor contributing to rose workplace safety is the relative stability of the work force. Since roses are cultivated year round there is less worker turnover than in other, seasonal crops. Some growers cited an average employment period of 5 years or more per worker, and others added that rose workers are frequently paid by the hour rather than at a piece rate, which may encourage safer work practices. Rose growers also commented that productive workers must be trained and gain experience in cultivation and harvesting techniques. This employer investment also contributes to work force stability and safety.

Employers' Reports of Occupational Injuries, compiled by the California Department of Industrial Relations from 1981 to 1990, indicate that workers in horticultural specialty crops, which include roses, had a slightly higher rate of pesticide poisoning (0.53 poisonings per 1,000 workers per year) than that for agricultural workers in general (0.46 poisonings per 1,000 workers per year). This data, as well as information gathered by Agency experts about intensive pesticide use in rose production, has led EPA to determine that, without PPE and the other protective conditions of this exception, risk is as high or higher for rose harvesters as for workers harvesting outdoor agricultural crops such as strawberries, cotton, leaf crops, etc. EPA believes worker exposure risk is a

serious concern in greenhouse rose production. Certain workplace conditions discussed below, however, increase the likelihood that the conditions of this exception will effectively mitigate worker exposure risk.

The Brouwer study measured pesticide residues collected on hand and arm coverings worn by workers during flower-cultivation activities without any protective clothing or gloves being placed between treated foliage and the residue collectors. Workers in the Brouwer study were not provided with or required to use protective gear and their time in treated areas was not limited. EPA believes the conditions of this exception, which also include training about pesticide hazards and personal safety, and employer-provided PPE and decontamination facilities, will reduce worker exposure during harvesting activities permitted by this exception. Because the rose workforce is comparatively small and stable, EPA believes the conditions placed on this exception will be easier to implement and monitor than for many other agricultural crops.

EPA remains concerned about worker risk in rose cultivation. EPA is gathering the data necessary to establish chemical-specific REIs to ensure workers are adequately protected from risks associated with reentry. As a result of this process, some product-specific REIs appearing on pesticide labels include special restrictions. The exception described in this Notice may be used unless early entry is expressly prohibited in product labeling.

C. Conditions of the Exception

In 1992, EPA proposed to grant this exception subject to the following conditions: (1) The PPE specified on the product labeling for early entry is provided, cleaned, and maintained for the worker by the employer, and measures to prevent heat-related illness are implemented, when appropriate; (2) no entry takes place for the first 4 hours after the application and, thereafter, until any exposure level listed in the labeling has been reached or any ventilation criteria established by the WPS or in the labeling have been met; (3) the time in treated areas for each worker may not exceed 3 hours in any 24–hour period; (4) the required decontamination and change areas are provided; and (5) the required basic training and label-specific information have been furnished. Public comments on these conditions, which are designed to mitigate risk to early-entry workers, are discussed below.

At the time the exception was proposed, EPA expected that the basic provisions of the WPS for all workers would be provided for early-entry workers under this exception. However, since recent legislation has delayed the compliance date of certain WPS provisions, some of those basic protections have been incorporated into the conditions of this exception.

1. *Personal protective equipment (PPE).* Several comments opposing the exception stated that PPE use is not practical or feasible for harvesters. The Farmworker Justice Fund and others noted that often workers are not provided with PPE because it is expensive. Farmworker advocates also commented that PPE is not practical for harvesting cut flowers because it is awkward to use and uncomfortable. This, they argued, is a disincentive for some workers—those paid a piece rate—to use PPE since it could slow their work and thus reduce their pay.

Some comments from rose growers echoed these concerns and recommended EPA permit early entry with normal work attire (long sleeved shirt, long pants, shoes and socks) and leather gloves, expressing fear that a crop could be damaged by PPE-encumbered harvesters. Other rose growers noted that, relative to the value of lost crop without an exception, the cost of PPE is low. Therefore, employers would assume the cost of providing PPE to their workers if it were a condition of the exception. Some growers also commented that rose workers are frequently paid by the hour rather than a piece rate. In such cases, there would be no economic reason for workers to avoid use of PPE.

EPA notes that in most situations—even for toxicity category I pesticides—the most PPE that would be required for early-entry workers will be coveralls over long pants and a long-sleeved shirt, socks, chemical-resistant footwear, and chemical-resistant gloves. If the pesticide is an eye irritant, eye protection also will be required. EPA believes that this level of PPE is not likely to affect workers' mobility or dexterity to the extent that it could lead to a damaged crop or discourage workers from using the required PPE.

The Farmworker Justice Fund and other commenters who opposed the exception questioned the feasibility of PPE for protecting workers. Some comments cited a study evaluating PPE during chemical applications (Fenske, R.A., 1988) which demonstrated certain deficiencies in PPE's protective qualities. These deficiencies included pesticide exposure through seams and openings in protective garments. The study also showed exposure as a result of workers removing gloves because of discomfort.

EPA notes that, while some problems identified in the Fenske study which involved pesticide applicators may also apply to early-entry workers, the potential circumstances of exposure differ. Under this exception, early-entry workers would enter to work in a treated area under an REI only after a minimum of 4 hours have elapsed since the end of an application, while applicators involved in treating the area would have potential for direct exposure to pesticide formulations as they are applied. Additionally, the time in treated areas under this exception would be limited to 3 hours per worker per day. Also, since the Fenske study, several PPE manufacturers have made improvements in their products including better engineered seam closures, lighter-weight materials, and enhanced comfort for workers.

Chemical-resistant gloves and glove liners. If the product label requires chemical-resistant gloves, the WPS allows rose harvesters to use chemical-resistant glove liners under leather gloves in lieu of chemical-resistant gloves because of concern over sharp thorns. (Once leather gloves have been worn for this use, thereafter they may only be worn with chemical-resistant glove liners and for no other use.) Roses, Inc., and other commenters in favor of the exception requested that EPA allow rose harvesters to use leather gloves only in lieu of either chemical-resistant gloves or leather gloves with chemical-resistant glove liners. These comments stated that chemical-resistant gloves that are sufficiently supple and durable for rose harvesting are not yet available. Roses, Inc., after testing some glove options with member growers, added that chemical-resistant glove liners tend to be uncomfortable to wear and cause hands to sweat excessively which may encourage skin and fingernail diseases. One comment suggested permitting the use of cotton glove liners in lieu of chemical-resistant liners.

EPA remains convinced that leather gloves do not sufficiently prevent pesticide exposure, and in many cases may pose a greater hazard than if no gloves at all are worn. Since leather is virtually impossible to decontaminate once impregnated with pesticide residues, workers who wear such gloves are subjecting their hands to uninterrupted contact with residues and are thus at increased risk of pesticide-related problems. Agency experts also doubt the ability of cotton liners to be an effective barrier to residues given the duration and conditions under which

the gloves would likely be worn. EPA notes that obtaining chemical-resistant gloves of a quality and durability appropriate for harvesting thorn-type roses is difficult at present. However, several varieties of lightweight and disposable chemical-resistant gloves and glove liners are currently available which EPA believes, when worn under leather gloves, would not significantly affect a worker's dexterity. EPA therefore continues to require the use of either chemical-resistant gloves or leather gloves over chemical-resistant glove liners under this exception.

Heat stress. Another concern expressed in the comments was that PPE may increase workers' risk of heat stress. Information was presented that suggested heat is a serious health threat to workers, particularly those in fern operations.

Several growers commented that PPE would not pose a significant heat problem for rose workers because of several mitigating factors. These comments noted that temperature must be carefully regulated for successful rose cultivation through use of fans and venting during hot weather. One comment added that it is rare for temperatures in a rose greenhouse to exceed 90 degrees. Comments also added that water for drinking and decontamination is immediately available in virtually all rose greenhouses. EPA believes that such conditions make it likely that PPE will not pose the risk of heat-related illness to be expected for workers in other crops.

Conclusions. EPA recognizes the potential risks of worker exposure and heat stress during early-entry work; however, EPA believes that the PPE required under the exception is feasible and likely to provide adequate reduction of risks to workers in the rose industry. This is based on several factors: PPE would be worn for only limited periods of time; harvesters could work relatively efficiently while wearing the required PPE; water for drinking and decontamination is immediately available in most rose greenhouses; and the usual presence in rose greenhouses of fans or other mechanical ventilation to provide some cooling. Also, that the rose workforce is relatively stable and frequently paid an hourly wage rather than a piece rate, contributes to this determination.

Under this exception, EPA is requiring that early-entry workers wear PPE listed on the pesticide product label for early-entry workers. Early-entry PPE is generally equal to that which would be worn by applicators of the chemical in question (minus respirators, since entry is prohibited until the exposure level listed on the labeling has been reached or any ventilation criteria established by the WPS or in the labeling have been met). Additionally, under the conditions of this exception, early-entry workers would be instructed how to put on, use, and take off early-entry PPE, the importance of washing thoroughly after removing PPE, and how to prevent, recognize, and give first aid for heat-related illness.

2. *4–hour prohibition versus "sprays dried and dusts settled."* Several growers commented that the performance standard of "sprays have dried and dusts have settled" is preferable to EPA's generic entry prohibition of 4 hours after an application. Comments noted that the "sprays dried/dust settled" standard is both more workable for their industry and more protective of workers: sprays usually dry in 2 – 3 hours, but sometimes, in humid greenhouse conditions, may not be dry until after more than 4 hours have elapsed.

Comments, both favoring and opposing the exception, cited California regulations governing re-entry. The California Department of Pesticide Regulation (CDPR) also submitted comments. California's current regulations allow reentry for hand labor activities when sprays have dried and dusts have settled for most toxicity category II and III pesticides, and for six category I pesticides of importance to the greenhouse industry. (These six category I pesticides are skin and eye irritants.) Otherwise, entry is restricted for 24 hours following application of a category I product. According to CDPR, "These reduced entry intervals are based on workers being protected by work clothes and gloves, and instructions to shower at the end of the work period."

EPA adopted the generic 4–hour period of no entry as a means of removing personal judgment from the entry equation. Sprays dry at different rates in different parts of a treated area, depending on greenhouse conditions. Therefore, it is a difficult and subjective decision as to when entry is permissible under a "sprays dried" standard. For this reason, the "sprays dried" standard is also difficult to enforce. EPA continues to believe that there should be no entry into freshly treated areas which would involve contact with treated surfaces until the dusts or sprays have settled and some drying or volatilization of the formulation has taken place—4 hours. Thus, under this exception, EPA prohibits entry to treated areas for the first 4 hours after an application. (Also, entry is not permitted until any exposure level listed on the labeling has been reached or any ventilation criteria established by the WPS or in the labeling have been met. In some cases this will exceed 4 hours.) EPA believes that the conditions of this exception will protect workers from hazardous pesticide exposures regardless of a pesticide's toxicity category.

3. *3 hours per worker per 24 hours limit.* EPA proposed that each worker could not exceed 3 hours of early entry in any 24–hour period. The 3–hour limit was based on comments from Roses, Inc., on the proposed WPS which stated that 3 hours per worker per 24 hours would allow for most harvest needs and would limit worker exposure. Many comments from growers recommended extending the amount of time a worker may spend in a restricted area beyond 3 hours in a 24–hour period.

Several comments from rose growers suggested that normally 3 hours per worker per 24–hour period would be sufficient to carry out necessary harvesting during a restricted-entry interval. Most comments noted, however, that an early-entry worker may need to harvest for more than 3 hours during holiday harvest times. One comment stated that up to 8 hours could be needed. A few comments recommended a weekly standard rather than a 24–hour limit. Roses, Inc., also suggested that, given the proposed PPE conditions, a time limit would not be necessary. Some grower comments, however, indicated that the 3–hour limit would not pose significant problems and that pesticide applications could be scheduled around holiday harvests.

Comments opposing the exception raised the concern of worker non-compliance: if harvesters are paid piece rate they will have a strong economic incentive to exceed the 3–hour limit.

EPA is persuaded of the industry's economic need, given current production practices, to harvest roses during restricted-entry intervals, and recognizes that the time required to harvest roses varies from greenhouse to greenhouse and depends on holiday demand. Based on comments submitted by industry and knowledge of rose cultivation practices, EPA will accept 3 hours to be the amount of time needed to meet most harvest needs.

EPA points out that the effectiveness of PPE, upon which workers will rely to prevent exposure, declines the longer equipment is worn. Chemical resistance also decreases with time. Additionally, the longer a worker wears PPE the more likely it becomes that the worker will remove pieces as the PPE grows less comfortable. EPA believes an individual should not exceed 3 hours of early-entry

rose harvesting in any 24–hour period Therefore, the proposed 3–hour limit remains a condition of the exception. Any employers allowing their workers to exceed the 3–hour limit would be violating the WPS.

4. *Decontamination facilities.* Worker advocates commented that decontamination supplies will be too expensive for many employers to justify. Growers have responded that, like PPE, decontamination supplies are cheap relative to the value of crop lost due to entry restrictions. Employers would therefore assume the cost of decontamination supplies as a condition of the exception. Rose growers also commented that water for drinking and decontamination are immediately available in virtually all rose greenhouses.

EPA has decided that the proposed exception requirements for decontamination should remain a condition of this exception.

5. *Training and label information.* EPA proposed that early-entry workers be given the required basic safety training for workers and be provided with label-specific information before any early-entry work which involved contact with treated surfaces. Some comments submitted by growers stated that the training and communication requirements were extensive, and requested clarification.

EPA notes that the basic safety training for early-entry workers under this exception is identical to the basic safety training for other workers covered by the WPS, but early-entry workers must be trained before the early-entry work. EPA has prepared the basic materials and resources for worker training under the WPS and is currently distributing these widely through the States, USDA Cooperative Extension Service, and other training networks. Additionally, EPA will provide copies of such training resources directly to the rose industry to help facilitate training as required under the exception.

Regarding the provision of label-specific information, EPA believes that workers harvesting roses during an REI should be informed about the hazards associated with the chemicals to which they could be exposed. Early-entry workers may either read the product labeling or the employer may inform the worker of the appropriate labeling requirements. EPA believes this will not be unreasonably burdensome given the potential value of the information to workers, and has decided to maintain this as a condition of the exception.

6. *Time limitation and alternative practices.* Several comments recommended a strict time limit, should an exception be granted, to provide an incentive for developing and implementing alternative practices.

The National Coalition Against the Misuse of Pesticides (NCAMP) stated in their comments that a time limit for an exception "is an appropriate tool to encourage the development and implementation of alternative pest control methods which will result in greater worker safety."

In the preamble to the WPS, EPA stated that the elimination of routine early entry for hand labor activities may "force" the development of technology such as engineering controls, mechanical harvesters, weedecs, and pruners in crops where the timing of such tasks is critical (57 FR 38116–38117, August 21, 1992). This exception is intended as an interim measure which will allow growers time to explore and implement early-entry alternatives which are appropriate for cut rose production.

Several comments from both growers and worker advocates cited the existence of alternatives which should reduce the need for early entry within a few years. Examples of alternatives named in the comments included lower toxicity chemicals with shorter REIs, biological controls, engineering and technological advancements, genetic engineering of resistant rose varieties, and cultural practices (such as scheduling pesticide applications and work activities to avoid conflicts). The key difference between the growers' and the worker advocates' positions on alternatives was the extent to which they believe such alternatives can be quickly and cost-effectively adopted by industry.

The Farmworker Justice Fund presented information suggesting that several alternatives, including biological controls and cultural practices, have been studied and found to be effective in controlling certain rose pests.

In 1988 Roses, Inc., estimated a 5–year to 7–year time frame for the rose industry to develop alternatives to toxicity category I and II pesticides. In 1992, Roses, Inc., commented that:

> While some progress had been made, a lack of research funds and pressures from subsidized and dumped low-cost rose imports have seriously reduced profitability, making research and capital investment funds extremely hard to obtain. Less toxic pesticides are being used. Introduction of new materials is helping.... But, they are still too few to answer our needs and let us rely only on Class III materials.

New rose varieties being developed through genetic manipulation with disease and pest resistance are another possibility cited by Roses, Inc. While progress has been made, here again Roses, Inc., states they are still years away from rose plant introductions with significant engineered insect and disease resistance.

Roses, Inc., noted that while certain biological controls are promising, they often require a grower to make a sizable capital investment to implement. They conclude that these alternatives need more research, time, and money "to let the substitute practices mature as a real answer for our industry."

The Society of American Florists suggested that EPA offer incentives to growers who use less toxic pesticides. The Agency notes that, to a large extent, the provisions of the WPS are the incentive: growers who use primarily toxicity category III and IV products may not need early entry and therefore would not have to provide PPE, etc., for their harvesters.

One grower commented, "With some planning and shifting personnel we could keep early entry to a minimum." EPA lauds this as an immediate, practical alternative. Information about rose cultivation gathered by Agency experts suggests that in some cases roses can be cut early with minimal loss to crop value, if properly stored and handled.

In general, for a complex and highly managed crop such as roses, EPA believes industry will attempt to make adjustments in cultural practices and pesticide use patterns to minimize losses.

A time limit will encourage development and implementation of safer methods of pest control. EPA believes that time and research are needed to develop sustainable alternatives to early entry, but that the industry should aggressively work toward implementation of alternatives that have been proven effective. EPA expects that much early entry can be eliminated immediately through "planning and shifting personnel", and that in 2 years other alternatives to toxicity category I and II pesticides can be implemented.

Finally, while rose growers submitted sufficient information to convince EPA that an early-entry prohibition could have a substantial economic impact, EPA believes that the benefits, based on the limited information presented, only justify an interim period for the growers to adapt to the requirements of the WPS. Therefore, EPA has decided that the exception for early entry for harvesting cut roses will expire 2 years from publication of this Notice.

EPA continues to believe that in most cases the most reliable and effective

means of risk reduction for harvesters is to keep them out of treated areas until the expiration of the REI. However, because of the potentially considerable economic benefits of an exception for the cut rose industry, EPA has decided to grant a temporary exception. Until this exception expires, PPE, safety training and provision of label information, decontamination facilities, and time-in-treated-area limits, etc., will be the primary means of mitigating early-entry workers' pesticide exposure risk.

EPA will consider another exception for roses if the industry submits a request supported by the full set of data required under §170.112(e), including the feasibility of the conditions of this exception, and can clearly demonstrate that an aggressive attempt to develop and implement alternative practices was made during the period of this exception.

D. Activities Not Included in the Exception

Many comments from growers urged the Agency to include tasks such as watering, pruning, and disbudding in this exception, and to clarify whether "passing through" a restricted area would be acceptable.

Farmworker advocates' comments recognized that while industry comments had stated the need to harvest roses twice daily, 365 days per year, insufficient evidence was provided to support early entry for activities other than harvesting.

Sufficient evidence has not been presented to show that pruning and disbudding could not be accomplished outside of normal restricted-entry intervals. EPA believes these tasks can be accomplished without early entry through coordinated planning and scheduling without undue economic hardship for the industry.

In several rose greenhouses, automated or semi-automated irrigation is becoming the norm. In such operations, watering may be accomplished either without entry into the greenhouse or without contact with treated surfaces in the greenhouse; such entry may be permitted under §170.112(b).

EPA expects that passing through a treated area would be permissible, in most cases, under §170.112(b), *Exception for activities with no contact*, as long as the employer ensures the conditions of §170.112(b)(1) and (2) are met, that is, the worker will have no contact with treated surfaces, and no entry is allowed until any inhalation exposure criteria or ventilation criteria have been met.

E. Worker Compliance

As noted above, some comments raised concern over workers' possible failure to observe the requirements of this exception. Comments from growers expressed concern that employers are at risk of enforcement action should their workers fail to follow directions to use the required personal protective equipment or stay out of restricted areas.

EPA notes that responsibility for compliance with the general requirements of the WPS as well as the conditions of this exception rests with employers. While employers are prohibited from taking retaliatory action against employees for attempting to comply with the requirements of the WPS or this exception, the WPS does not prevent an employer from disciplining a worker who fails to observe the employer's instructions to use PPE, stay out of restricted areas, or other directions relating to WPS requirements. Such action in no way alleviates the responsibility of the employer to adhere to the requirements of the WPS.

F. Other Issues

Some comments requested exceptions from provisions which are outside the scope permitted by the exception process in §170.112(e). Such requests included (1) a special exception from oral notification and posting provisions, (2) use of barrier tape in lieu of posting with the WPS warning sign, (3) special minor use registration assistance, and (4) use of the exception process to revise other provisions of the WPS. Since these requests are beyond the scope of §170.112(e), they are not addressed here.

IV. Response to Other Cut Flower and Cut Fern Producers

For other cut flowers and cut ferns, EPA received very limited or no information on (1) projected economic impacts of WPS entry restrictions, (2) technical or financial viability of alternative practices, and (3) the safety and feasibility of an exception. Evidence submitted in some of the comments suggested that alternatives to early entry exist for these other crops, and that an early-entry prohibition would not cause economic repercussions great enough to outweigh the risk to workers. Therefore, EPA has determined that an exception for other cut flower and cut fern producers is not warranted at this time.

V. Terms of the Exception

This exception for harvesting cut roses is narrower than the exception which was proposed by EPA in the August 21, 1992, **Federal Register** (57 FR 38175) in that this exception extends only to harvesting cut roses and expires after 2 years.

In April 1994, Congress enacted legislation which delays the compliance date for some of the basic safety provisions of the WPS until January 1, 1995. This legislation permits entry during an REI for tasks relating to the production of agricultural plants, but explicitly excludes hand labor activities such as harvesting, from the permitted tasks. EPA is including in the terms of this exception for rose harvesting, some basic safety provisions which will be provided to all workers covered by the WPS on January 1, 1995. These include provisions for basic safety training, display of a safety poster, posting of application information, decontamination, and emergency assistance. Notwithstanding the 1994 legislation, agricultural employers taking advantage of the exception announced in this Notice must comply with the conditions of this exception. The 1994 legislation does not affect the terms of this exception.

The terms of the exception are the same as those proposed in the August 21, 1992, **Federal Register** (57 FR 38175), with the exception that a requirement has been added that agricultural employers who make use of this exception inform their early-entry workers about the exception, and that the exception is limited to 2 years. The basic safety provisions described above also have been included.

EPA reserves the right to withdraw exceptions, including the exception for cut roses, in accordance with §170.112(e)(6), *Withdrawing an exception*, if the Agency receives information or any other data that indicate the health risks posed by the exception are unacceptable or if the Agency receives information that indicates the exception is no longer necessary or prudent.

The exception described in this Notice may be used unless early entry is expressly prohibited in product labeling. For example, some labels prohibit entry—including entry that would otherwise be permitted under the WPS and this exception—by any person other than trained and equipped handlers performing handling tasks for specified periods after the application. In such cases, during that period, early entry to harvest roses is not permitted under this exception.

Exception for harvesting roses:

1. *Conditions.* Under this exception, a worker may enter a treated area during a restricted-entry interval to harvest roses if the agricultural employer

ensures that the following requirements are met:

(a) No such entry is allowed for the first 4 hours following the end of the application, and no such entry is allowed thereafter until any inhalation exposure level listed in the labeling has been reached, or any ventilation criteria on the labeling or, after January 1, 1995, established by 40 CFR 170.110(c)(3), have been met.

(b) The time in treated areas during a restricted-entry interval for any worker harvesting roses under this exception does not exceed 3 hours in any 24-hour period.

(c) The agricultural employer ensures that the worker, before entering the treated area, either has read the product labeling or has been informed, in a manner that the worker can understand, of all labeling requirements related to human hazards or precautions, first aid, symptoms of poisoning, personal protective equipment specified for early entry, and any other labeling requirements related to safe use.

(d) The personal protective equipment specified on the product labeling for early entry is provided to the worker. Such personal protective equipment shall conform to the following standards:

(1) Personal protective equipment (PPE) means devices and apparel that are worn to protect the body from contact with pesticides or pesticide residues, including, but not limited to, coveralls, chemical-resistant suits, chemical-resistant gloves, chemical-resistant footwear, respiratory protection devices, chemical-resistant aprons, chemical-resistant headgear, and protective eyewear.

(2) Long-sleeved shirts, short-sleeved shirts, long pants, short pants, shoes, socks, and other items of work clothing are not considered personal protective equipment for the purposes of this exception and are not subject to the requirements of this exception, although pesticide labeling may require that such work clothing be worn during some activities.

(3) When "chemical-resistant personal protective equipment is specified by the product labeling, it shall be made of material that allows no measurable movement of the pesticide being used through the material during use.

(4) When "waterproof" personal protective equipment is specified by the product labeling, it shall be made of material that allows no measurable movement of water or aqueous solutions through the material during use.

(5) When a "chemical-resistant suit" is specified by the product labeling, it shall be a loose-fitting, one- or two-piece, chemical-resistant garment that covers, at a minimum, the entire body except head, hands, and feet.

(6) When "coveralls" are specified by the product labeling, they shall be a loose-fitting, one- or two-piece garment, such as a cotton or cotton and polyester coverall, that covers, at a minimum, the entire body except head, hands, and feet. The pesticide product labeling may specify that the coveralls be worn over a layer of clothing. If a chemical-resistant suit is substituted for coveralls, it need not be worn over a layer of clothing.

(7) Gloves shall be of the type specified by the product labeling. Gloves or glove linings made of leather, cotton, or other absorbent materials must not be worn for early-entry activities unless these materials are listed on the product labeling as acceptable for such use. If chemical-resistant gloves with sufficient durability and suppleness are not obtainable for tasks with roses or other plants with sharp thorns, leather gloves may be worn over chemical-resistant liners. However, once leather gloves have been worn for this use, thereafter they shall be worn only with chemical-resistant liners and they shall not be worn for any other use.

(8) When "chemical-resistant footwear" is specified by the product labeling, it shall be one of the following types of footwear: chemical-resistant shoes, chemical-resistant boots, or chemical-resistant-shoe coverings worn over shoes or boots. If chemical-resistant footwear with sufficient durability and a tread appropriate for wear in rough terrain is not obtainable for workers, then leather boots may be worn in such terrain.

(9) When "protective eyewear" is specified by the product labeling, it shall be one of the following types of eyewear: goggles; face shield; safety glasses with front, brow, and temple protection; or a full-face respirator.

(10) When "chemical-resistant headgear" is specified by the product labeling, it shall be either a chemical-resistant hood or a chemical-resistant hat with a wide brim.

(e) The agricultural employer ensures that:

(1) Workers wear the personal protective equipment correctly for its intended purpose and use personal protective equipment according to manufacturer's instructions.

(2) Before each day of use, all personal protective equipment is inspected for leaks, holes, tears, or worn places, and any damaged equipment is repaired or discarded.

(3) Personal protective equipment that cannot be cleaned properly is disposed of in accordance with any applicable Federal, State, and local regulations.

(4) All personal protective equipment is cleaned according to manufacturer's instructions or pesticide product labeling instructions before each day of reuse. In the absence of any such instructions, it shall be washed thoroughly in detergent and hot water.

(5) Before being stored, all clean personal protective equipment is dried thoroughly or is put in a well-ventilated place to dry.

(6) Personal protective equipment contaminated with pesticides is kept separately and washed separately from any other clothing or laundry.

(7) Any person who cleans or launders personal protective equipment is informed that such equipment may be contaminated with pesticides, of the potentially harmful effects of exposure to pesticides, and of the correct ways to handle and clean personal protective equipment and to protect themselves when handling equipment contaminated with pesticides.

(8) All clean personal protective equipment is stored separately from personal clothing and apart from pesticide-contaminated areas.

(9) Each worker is instructed how to put on, use, and remove the personal protective equipment and is informed about the importance of washing thoroughly after removing personal protective equipment.

(10) Each worker is instructed in the prevention, recognition, and first aid treatment of heat-related illness.

(11) Workers have a clean place away from pesticide-storage and pesticide-use areas for storing personal clothing not in use; putting on personal protective equipment at the start of any exposure period; and removing personal protective equipment at the end of any exposure period.

(12) That no worker is allowed or directed to wear home or to take home personal protective equipment contaminated with pesticides.

(f) When personal protective equipment is required by the labeling of any pesticide for early entry, the agricultural employer ensures that no worker is allowed or directed to perform the early-entry activity (harvest roses) without implementing, when appropriate, measures to prevent heat-related illness.

(g) The agricultural employer: (1) During early entry permitted under this exception, provides early-entry workers with enough water for routine washing and emergency eyeflushing

(2) Ensures that: (i) At all times when the water is available to workers, it shall be of a quality and temperature that will not cause illness or injury when it contacts the skin or eyes or if it is swallowed.

(ii) When water stored in a tank is to be used for mixing pesticides, it shall not be used for decontamination or eyeflushing, unless the tank is equipped with properly functioning valves or other mechanisms that prevent movement of pesticides into the tank.

(iii) Soap and single-use towels are provided at each decontamination site in quantities sufficient to meet workers' needs.

(iv) To provide for emergency eyeflushing, at least 1 pint of water shall be immediately available to each worker who is harvesting roses if the pesticide labeling requires protective eyewear for the early-entry activity. The eyeflush water shall be carried by the early-entry worker or shall be otherwise immediately accessible.

(v) The decontamination site shall be reasonably accessible to and not more than 1/4 mile from where workers are working.

(vi) The decontamination site shall not be in an area being treated with pesticides.

(vii) The decontamination site shall not be in an area that is under a restricted-entry interval unless the decontamination site would otherwise not be reasonably accessible to those workers.

(3) *Decontamination after early-entry activities.* At the end of any exposure period for early-entry workers, the agricultural employer provides, at the site where the workers remove personal protective equipment, soap, clean towels, and a sufficient amount of water so that the workers may wash thoroughly.

(h) *Posted pesticide safety information.* When early-entry workers are on an agricultural establishment and, within the last 30 days, a pesticide covered by the WPS has been applied on the establishment or a restricted-entry interval has been in effect, the agricultural employer displays, in accordance with this exception, pesticide safety information.

(1) *Safety poster.* A safety poster is displayed that conveys, at a minimum, the following basic pesticide safety concepts:

(i) Avoid getting on your skin or into your body any pesticides that may be on plants and soil, in irrigation water, or drifting from nearby applications.

(ii) Wash before eating, drinking, using chewing gum or tobacco, or using the toilet.

(iii) Wear work clothing that protects the body from pesticide residues (long-sleeved shirts, long pants, shoes and socks, and a hat or scarf).

(iv) Wash/shower with soap and water, shampoo hair, and put on clean clothes after work.

(v) Wash work clothes separately from other clothes before wearing them again.

(vi) Wash immediately in the nearest clean water if pesticides are spilled or sprayed on the body. As soon as possible, shower, shampoo, and change into clean clothes.

(vii) Follow directions about keeping out of treated or restricted areas.

(viii) There are Federal rules to protect workers and handlers.

(2) *Emergency medical care information.* The name, address, and telephone number of the nearest emergency medical care facility shall be on the safety poster or displayed close to the safety poster, and workers shall be informed promptly of any change to the information on emergency medical care facilities.

(3) *Location.* The information shall be displayed in a central location in the greenhouse where it can be readily seen and read by workers.

(4) *Accessibility.* Early-entry workers shall be informed of the location of the information and shall be allowed access to it.

(5) *Legibility.* The information shall remain legible during the time it is posted.

(i) *Providing specific information about applications.* When early-entry workers are on an agricultural establishment and, within the last 30 days, a pesticide covered by the WPS has been applied on the establishment or a restricted-entry interval has been in effect, the agricultural employer displays, in accordance with this paragraph, specific information about the pesticide.

(1) *Location, accessibility, and legibility.* The information shall be displayed in the location specified for the pesticide safety poster in paragraph (h)(3) and shall be accessible and legible, as specified in paragraphs (h)(4) and (h)(5).

(2) *Timing.* (i) The information shall be posted before the application takes place if early-entry workers will be on the establishment during application. Otherwise, the information shall be posted at the beginning of any worker's first work period involving early entry.

(ii) The information shall continue to be displayed for at least 30 days after the end of the restricted-entry interval (or, if there is no restricted-entry interval, for at least 30 days after the end of the application) or at least until workers are no longer on the establishment, whichever is earlier.

(3) *Required information.* The information shall include:

(i) The location and description of the treated area.

(ii) The product name, EPA registration number, and active ingredients of the pesticide.

(iii) The time and date the pesticide is to be applied.

(iv) The restricted-entry interval for the pesticide.

(j) *Notice about the exception for harvesting roses.* The agricultural employer:

(1) Notifies early-entry rose harvesters orally, before such workers enter a treated area, that the establishment is relying on this exception to allow workers to enter treated areas to harvest roses.

(2) Posts information about the terms and conditions of this exception. The posted information shall convey the following information:

(i) The establishment is operating under the conditions of the exception for rose harvesting.

(ii) No entry is allowed for the first 4 hours following an application, and until any exposure level has been reached or any ventilation criteria have been met.

(iii) Time in treated areas for each worker may not exceed 3 hours in any 24–hour period.

(iv) Decontamination and change areas must be provided.

(v) Basic safety training and label-specific information must be provided to early-entry workers.

(vi) The personal protective equipment specified on the product labeling for early-entry must be provided, cleaned, and maintained for early-entry workers.

(vii) Early-entry workers must be instructed in how to put on, use, and remove the personal protective equipment.

(viii) Measures to prevent heat stress must be implemented when appropriate.

(ix) A pesticide safety poster and information about pesticide applications must be displayed in a central location.

(x) The exception expires on June 10, 1996.

(3) *Location, accessibility, and legibility.* The posted information shall be displayed in the location specified for the pesticide safety poster in paragraph (h)(3) and shall be accessible and legible, as specified in paragraphs (h)(4) and (h)(5).

(4) *Timing.* (i) The information shall be posted before early-entry harvesting takes place and shall continue to be

displayed as long as the exception is used on the agricultural establishment.

(k) *Pesticide safety training*— (1) *General requirement.* Before a worker enters a treated area to harvest roses as permitted under this exception, the agricultural employer ensures that the worker has been trained in general pesticide safety according to paragraph (l).

(2) *Exception.* A worker who is currently certified as an applicator of restricted-use pesticides under 40 CFR part 171 or who satisfies the training requirements of part 171 or who satisfies the handler training requirements under 40 CFR 170.230(c) need not be trained under this paragraph.

(l) *Training programs.* (1) General pesticide safety information shall be presented to workers either orally from written materials or audiovisually. The information must be presented in a manner that the workers can understand (such as through a translator) using nontechnical terms. The presenter also shall respond to workers' questions.

(2) The person who conducts the training shall meet at least one of the following criteria:

(i) Be currently certified as an applicator of restricted-use pesticides under 40 CFR part 171; or

(ii) Be currently designated as a trainer of certified applicators or pesticide handlers by a State, Federal, or Tribal agency having jurisdiction; or

(iii) Have completed a pesticide safety train-the-trainer program approved by a State, Federal, or Tribal agency having jurisdiction; or

(iv) Satisfy the training requirements in 40 CFR part 171 or in 40 CFR 170.230(c).

(3) Any person who issues an EPA-approved Worker Protection Standard worker training certificate must assure that the worker who receives the training certificate has been trained in accordance with (l)(4) of this paragraph.

(4) The training materials shall convey, at a minimum, the following information:

(i) Where and in what form pesticides may be encountered during work activities.

(ii) Hazards of pesticides resulting from toxicity and exposure, including acute and chronic effects, delayed effects, and sensitization.

(iii) Routes through which pesticides can enter the body.

(iv) Signs and symptoms of common types of pesticide poisoning.

(v) Emergency first aid for pesticide injuries or poisonings.

(vi) How to obtain emergency medical care.

(vii) Routine and emergency decontamination procedures, including emergency eyeflushing techniques.

(viii) Hazards from chemigation and drift.

(ix) Hazards from pesticide residues on clothing.

(x) Warnings about taking pesticides or pesticide containers home.

(xi) Requirements of 40 CFR part 170 subpart B designed to reduce the risks of illness or injury resulting from workers' occupational exposure to pesticides.

(m) *Verification of training.* (1) Except as provided in paragraph (m)(2), if the agricultural employer ensures that a worker possesses an EPA-approved Worker Protection Standard worker training certificate, then the requirements of paragraphs (k) and (l) will have been met.

(2) If the agricultural employer is aware or has reason to know that an EPA-approved Worker Protection Standard worker training certificate has not been issued in accordance with the conditions described above, or has not been issued to the worker bearing the certificate, a worker's possession of that certificate does not meet the requirements of paragraph (k).

(n) *Emergency assistance.* If there is reason to believe that a person who is or has been harvesting roses as permitted by this exception has been poisoned or injured by exposure to pesticides used on the agricultural establishment, including, but not limited to, exposures from application, splash, spill, drift, or pesticide residues, the agricultural employer shall:

(1) Make available to that person prompt transportation from the agricultural establishment, including any labor camp on the agricultural establishment, to an appropriate emergency medical facility.

(2) Provide to that person or to treating medical personnel, promptly upon request, any obtainable information on:

(i) Product name, EPA registration number, and active ingredients of any product to which that person might have been exposed.

(ii) Antidote, first aid, and other medical information from the product labeling.

(iii) The circumstances of application or use of the pesticide on the agricultural establishment.

(iv) The circumstances of exposure of that person to the pesticide.

II. *Definitions.* The terms used in this exception have the same meanings as they have in the Worker Protection Standard 40 CFR part 170.

III. *Expiration.* This exception expires June 10, 1996.

VI. List of Exceptions in 40 CFR 170.112

In the Final rule section of this **Federal Register**, EPA is amending §170.112 of the WPS by adding a new paragraph (e)(7) identifying the **Federal Register** citation and effective date for this administrative exception for harvesting cut roses. In the future, reference to other exceptions granted under §170.112(e) will also be added to this new paragraph (e)(7) as exceptions are granted. EPA is adding this cross-reference in §170.112(e), and EPA will ensure that the regulated community is aware of, and able to locate, this and future administrative exceptions and is aware of the terms and conditions of the exceptions. The addition of paragraph (e)(7) to §170.112 is a technical amendment. It does not make any substantive changes in the WPS or in §170.112.

List of Subjects

Administratice practice and procedure, Labeling, Occupational safety and health, Pesticides and pest.

Dated: June 3, 1994.

Lynn R. Goldman,

Assistant Administrator for Prevention, Pesticides and Toxic Substances.

Part VIII

Department of the Interior

Bureau of Indian Affairs

25 CFR Part 256
Housing Improvement Program; Proposed Rule

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

25 CFR Part 256

Housing Improvement Program

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice; Extension of Proposed Rule comment period.

SUMMARY: Notice is hereby given that the public comment period of the Notice of Proposed Rulemaking for amendments to 25 CFR part 256, is extended for a period of thirty days. The extension, requested by Indian leadership, will provide sufficient time for contemplation and comment.

DATES: This notice, effective upon publication in the **Federal Register**, will extend the comment period from June 6, 1994 to July 6, 1994.

FOR FURTHER INFORMATION CONTACT: Acting Chief, Division of Housing Assistance, Bureau of Indian Affairs, Mailstop 2525–MIB, 1849 C Street, NW, Washington, DC 20240. Telephone (202) 208–5427.

SUPPLEMENTARY INFORMATION: The Assistant Secretary—Indian Affairs published a Proposed Rule which amends 25 CFR part 256, Housing Improvement Program (59 FR 16726). The Notice of Proposed Rulemaking proposes a revision to the distribution method for Housing Improvement Program (HIP) funds from a housing inventory basis to documented eligible applicants. Based on the total number of eligible applicants submitted by all tribes, the Bureau of Indian Affairs (BIA) will distribute FY 1995 HIP funds proportionally and transfer these funds into the Tribal Priority Allocation (TPA) for each tribe. Beginning in FY 1996, individual tribes will make their own determination of funding levels for HIP within their TPA funding allocation.

A technical correction is also made to eliminate Category C, Downpayments which are inconsistent with the intent of the HIP. The income levels in the January 1992 issue of 25 CFR 256 were established to ensure that the program served truly needy individuals.

A revision is proposed to eliminate individuals who own a home acquired under Federal housing assistance from the Department of Housing and Urban Development (HUD) through an Indian Housing Authority from being served under HIP. They would not meet the eligibility requirements of HIP since they have already been served by a Federal program. Comments and requests received from Indian people indicate that additional time is needed for the public comment period to facilitate adequate and proper review of the Proposed Rule. All comments received during the initial and extended comment period will be given full consideration. We believe that the extended public comment period will provide an adequate opportunity for tribes and tribal organizations to provide comment and input into the final rule.

Dated: May 25, 1995.

Faith Roessel,

Acting Assistant Secretary—Indian Affairs

NEW EDITION

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

Revised January 1, 1994

The GUIDE is a useful reference tool, compiled from agency regulations, designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Briefing on How To Use the Federal Register
For information on a briefing in Washington, DC, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. It is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. The annual subscription fee for a single workstation is $375. Six-month subscriptions are available for $200 and one month of access can be purchased for $35. Discounts are available for multiple-workstation subscriptions. To subscribe, Internet users should telnet to wais.access.gpo.gov and login as newuser (all lower case); no password is required. Dial in users should use communications software and modem to call (202) 512–1661 and login as wais (all lower case); no password is required; at the second login prompt, login as newuser (all lower case); no password is required. Follow the instructions on the screen to register for a subscription for the **Federal Register** Online via *GPO Access*. For assistance, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids.gpo.gov, or a fax to (202) 512–1262, or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday through Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $444, or $490 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $403. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $6.00 for each issue, or $6.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 59 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: June 23 at 9:00 am
WHERE: Office of the Federal Register
Conference Room, 800 North Capitol Street NW., Washington, DC (3 blocks north of Union Station Metro)
RESERVATIONS: 202–523–4538

Rules and Regulations

Federal Register
Vol. 59, No. 112
Monday, June 13, 1994

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

Federal Aviation Administration

14 CFR Part 39

[Docket No. 93–NM–182–AD; Amendment 39–8932; AD 94–12–04]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 747 series airplanes, that requires repetitive inspections to detect cracking in certain fuselage skin lap joints, and repair, if necessary. This amendment is prompted by the results of extensive pressure fatigue tests conducted by the manufacturer. The actions specified by this AD are intended to detect and repair fatigue cracking in certain lap joints, which will ensure safe operation of airplanes that have exceeded their economic design goal.

DATES: Effective July 13, 1994.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of July 13, 1994.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Steven C. Fox, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2777; fax (206) 227–1181.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain Boeing Model 747 series airplanes was published in the **Federal Register** on December 17, 1993 (58 FR 65943). That action proposed to require repetitive high frequency eddy current (HFEC) inspections to detect cracking in certain fuselage skin lap joints, and repair, if necessary.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the proposed rule.

One commenter requests that Revision 1 of Boeing Service Bulletin 747–53–2367, dated January 27, 1994, be included as an additional source of service information. The FAA concurs. Since the issuance of the proposal, the FAA has reviewed and approved Revision 1 of Boeing Service Bulletin 747–53–2367, dated January 27, 1994, which clarifies the procedures for accomplishment of the inspections described in the Initial Release of the service bulletin, dated December 18, 1991 (which was referenced in the proposal as the sole source of appropriate service information). Therefore, paragraphs (a) and (c) of the final rule have been revised to reference Revision 1 of the service bulletin as an additional source of service information.

This same commenter requests that the proposed rule be revised to include a reporting requirement to keep Boeing and the FAA advised of findings of cracks. The FAA does not concur. The FAA has determined that the unsafe condition addressed by this AD (which is to detect and repair fatigue cracking in certain lap joints) will be adequately addressed by paragraph (a) of the final rule, which requires the inspection of certain lap joints, and paragraph (c) of the final rule, which requires the repair of all cracks found during the inspection. Therefore, since the final rule requires repetitive inspections to detect cracks and repair of all findings of cracks, the FAA finds that a reporting requirement would unduly burden operators.

This commenter further requests that the proposed rule be revised to compensate for operators that fly with cabin pressure differentials of 2.0 psi or less when calculating the number of flight cycles to determine the compliance time. The FAA does not concur. The FAA finds that operating at cabin pressure differentials of 2.0 psi or less is applicable to only one operator. Since there are numerous factors that affect the calculation of flight cycles, such as total number of low pressure cycles, amount of thrust, number of gross weight flight cycles, etc., the FAA has determined that these mitigating factors could be best evaluated through requests for alternative methods of compliance, as provided for in paragraph (d) of the final rule.

One commenter requests that the proposed compliance time of 22,000 flight cycles be extended to 25,000 flight cycles to inspect the lap joints in areas outside of Stringer 14 since data indicate that cracking in these areas did not occur until after 25,000 flight cycles. The FAA does not concur. In developing an appropriate compliance time for this AD, the FAA not only evaluated the fatigue test data that was provided by the manufacturer, but took into consideration the size of the test sample: the test results were based upon just one airplane that had no loads and was not pressurized. Based on this data, the FAA determined that 22,000 flight cycles represented a conservative threshold for initiating inspections so as to ensure that any cracking initiation would be found in a timely manner.

Another commenter requests that the proposed compliance time of 3,000 flight cycles to perform the repetitive inspections be extended to 4,300 flight cycles to coincide with operators' regularly scheduled maintenance periods. The FAA does not concur. The FAA has determined that the compliance time, as proposed, represents the maximum interval of time allowable for the affected airplanes to continue to operate without compromising safety. In developing this inspection interval, the FAA evaluated the reliability of the inspection method and the results of fatigue test data. The FAA found that extending this interval by more than one-third would allow cracks to propagate undetected, which

would adversely affect the structural integrity of the airplane.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the change previously described. The FAA has determined that this change will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 723 Model 747 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 183 airplanes of U.S. registry will be affected by this AD, that it will take approximately 14 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $140,910, or $770 per airplane.

The total cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

94-12-04 Boeing: Amendment 39-8932. Docket 93-NM-182-AD.

Applicability: Model 747-100, -200, -300, 747SP, and 747SR series airplanes, as listed in Boeing Service Bulletin 747-53-2367, dated December 18, 1991, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent structural failure in the fuselage due to fatigue cracking in certain lap joints, accomplish the following:

(a) Prior to the accumulation of 22,000 full pressure flight cycles (or, if the external skin panel of an affected lap joint has been replaced: Prior to the accumulation of 22,000 full pressure flight cycles since skin replacement), or within 1,000 landings after the effective date of this AD, whichever occurs later, perform an external surface high frequency eddy current (HFEC) inspection of the skin around the upper row of fasteners in accordance with the Accomplishment Instructions of Boeing Service Bulletin 747-53-2367, dated December 18, 1991; or Revision 1, dated January 27, 1994.

(b) If no crack is found, repeat the inspection at intervals not to exceed 3,000 full pressure flight cycles.

(c) If any crack is found, accomplish paragraphs (c)(1) and (c)(2) of this AD.

(1) Prior to further flight, perform an open hole HFEC inspection to detect cracking in the upper row fastener holes between the adjacent frames in accordance with the Accomplishment Instructions of Boeing Service Bulletin 747-53-2367, dated December 18, 1991; or Revision 1, dated January 27, 1994. Prior to further flight, repair any crack found in accordance with the 747 Structural Repair Manual, Chapter 53-30-03.

(2) Repeat the inspection required by paragraph (a) of this AD at intervals not to exceed 3,000 full pressure flight cycles.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(e) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(f) The inspections shall be done in accordance with Boeing Service Bulletin 747-53-2367, dated December 18, 1991; or Boeing Service Bulletin 747-53-2367, Revision 1, dated January 27, 1994. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124-2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on July 13, 1994.

Issued in Renton, Washington, on May 31, 1994.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 93-NM-90-AD; Amendment 39-8933; AD 94-12-05]

Airworthiness Directives; McDonnell Douglas Model DC-10 Series Airplanes and Model KC-10A (Military) Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to all McDonnell Douglas Model DC-10 series airplanes and Model KC-10A (military) airplanes, that requires inspections to detect cracks in wing stringer number 41; installation of a repair, if necessary; and modification of that stringer. This amendment is prompted by reports of fatigue cracks in outer wing stringer number 41. The actions specified by this AD are intended to prevent reduced structural integrity of the wing.

DATES: Effective July 13, 1994.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of July 13, 1994.

ADDRESSES: The service information referenced in this AD may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90801-1771, Attention: Business Unit Manager, Technical Administrative Support, Dept. L51, M.C. 2-98. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 800 North Capitol Street NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Maureen Moreland, Aerospace Engineer, Airframe Branch, ANM-120L, FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806-2425; telephone (310) 988-5238; fax (310) 988-5210.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to all McDonnell Douglas Model DC-10 series airplanes and Model KC-10A (military) airplanes was published in the **Federal Register** on September 24, 1993 (58 FR 49946). That action proposed to require inspections to detect cracks in wing stringer number 41; installation of a repair, if necessary; and modification of that stringer.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the proposed rule.

The Air Transport Association (ATA) of America, on behalf of one of its members, requests that the FAA include a flow diagram in the proposal since its provisions are complex. The FAA does not concur. The FAA considers that the requirements of this AD are presented in a reasonably clear manner in the text of the final rule. In addition, McDonnell Douglas DC-10 Service Bulletin 57-114, Revision 1, dated July 26, 1993, which is referenced in the AD as the appropriate source of service information, provides corresponding guidance for accomplishment of the actions required by this AD.

ATA also suggests that, prior to issuance of the final rule, the FAA should verify that the service bulletin will not create problems for operators, and that accomplishment of the service bulletin should be verified by an operator before the AD is finalized. One ATA member experienced difficulty accomplishing the permanent repair specified in the service bulletin because parts listed did not fit, drawings were erroneous, and fastener grip lengths were inadequate for the repair. The FAA concurs with the commenter's request. The FAA has conveyed these concerns to the manufacturer, and has verified that the initial problems expressed by the commenter have been corrected in Revision 1 of the service bulletin. Since Revision 1 of the service bulletin was cited in the proposal as the appropriate source of service information, the FAA finds that no change to the AD is necessary.

One commenter requests that the FAA allow visual inspection methods to be used in lieu of the proposed eddy current inspection methods. The commenter indicates that fastener accessibility enables accomplishment of a visual inspection and provides an equivalent level of crack detection. The FAA does not concur. Based on the results of crack growth analysis, the FAA has determined that a visual inspection of the stringer cannot provide an acceptable level of crack detection. In addition, the FAA based the repetitive inspection intervals on the crack growth analysis results based upon the minimum crack length detectable by eddy current inspection.

The commenter also requests that credit be given for general visual inspections accomplished previously. A second commenter supports the proposed rule, but requests that the AD be revised to state that inspections accomplished within 1,500 landings prior to the effective date of the AD are acceptable in lieu of the initial inspection. The commenters provide no justification for these requests. Since the FAA has determined that a visual inspection of the stringer does not provide an acceptable level of crack detection, as discussed previously, the FAA considers that the requirement for eddy current inspections is appropriate and credit cannot be extended for general visual inspections accomplished previously. However, the phrase "unless accomplished previously," which appears in the "Compliance" paragraph of the final rule, provides credit for operators that have accomplished the required inspection prior to the effective date of this AD in accordance with McDonnell Douglas DC-10 Service Bulletin 57-114, Revision 1, dated July 26, 1993.

One commenter requests that the first inspection accomplished to comply with this AD be required during the airplane's next heavy maintenance visit if a general visual inspection has been accomplished prior to the effective date of the AD. The FAA does not concur. A general visual inspection of the stringer does not provide an acceptable level of crack detection, as discussed previously. In developing an appropriate initial compliance time for this action, the FAA considered the safety implications and normal maintenance schedules for timely accomplishment of the inspection. In consideration of these items, the FAA has determined that 6,500 total landings or 1,500 landings after the effective date of the AD, whichever occurs later, represents the maximum interval of time allowable wherein the inspection can reasonably be accomplished and an acceptable level of safety can be maintained.

The same commenter states that the service bulletin cited in the AD specifies that one reason for accomplishing the actions described in the service bulletin is to prevent unscheduled maintenance downtime for replacement of a cracked stringer; therefore, the commenter questions the need for this AD. The commenter adds that, to date, stringer 41 cracking has not impacted its maintenance due to the viable maintenance program currently in place. The commenter states that imposing an AD at this time would only complicate its maintenance program and would contribute little toward ensuring that the airplane wing structure is operating in good condition.

The FAA does not concur. As explained in the preamble of the proposal, the FAA has received reports of fatigue cracks in outer wing stringer number 41 and, in one case, complete failure of the stringer. Such fatigue cracking presents an unsafe condition in airplanes, since it could eventually lead to failure of the stringer and reduced structural integrity of the wing. The FAA has determined that this unsafe condition could exist or eventually develop on Model DC-10 series airplanes and Model KC-10A (military) airplanes, and that repetitive inspections of the affected area must be mandated to ensure that safety is not degraded. The appropriate vehicle for mandating such action to correct an unsafe condition is the airworthiness directive.

One commenter requests that the proposed compliance time for accomplishment of the initial inspection specified in paragraph (b)(1) of the proposal be changed from "[p]rior to the accumulation of 6,500 total landings, or within 1,500 landings after the effective date of the AD, whichever occurs later," to "[p]rior to the accumulation of 6,500 total landings, or within one year after the effective date of this AD, whichever occurs later." The commenter operates

Model DC–10–40 series airplanes of non-U.S. registry for training flights for cockpit crews. The commenter explains that, during one training flight period of a few weeks, the number of flight cycles accumulated may be more than 1,500 landings. The commenter adds that the proposed inspections and modifications require entry into the fuel tanks; therefore, the commenter plans to accomplish the initial inspections and the modifications during regularly scheduled maintenance.

The FAA does not concur with the commenter's request. Compliance times for AD's are normally based on a parameter related to failure of a particular component. In this case, fatigue cracking in outer wing stringer number 41 and subsequent failure of the stringer are undoubtedly related to the number of landings. The FAA has determined, in this case, that there is no apparent direct relationship between failure of the stringer and calendar time. In light of this, and in consideration of the average utilization rate of the affected U.S. operators and the practical aspects of orderly inspections of the U.S. fleet during regular maintenance periods, the FAA established the compliance times specified in this AD. The FAA maintains that those compliance times are appropriate. However, the FAA would consider a request for adjustment of the compliance time, in accordance with the provisions of paragraph (c) of this AD, provided that, for example, continued operational safety of the airplane could be assured until the required action is accomplished.

One commenter requests that, in order for the AD requirements to align with the actions described in the service bulletin, accomplishment of the preventative modification should be considered optional, and that operators should be permitted to accomplish repetitive inspections at intervals of 4,000 landings in lieu of the preventative modification. The FAA does not concur. The degree of assurance necessary as to the adequacy of inspections needed to maintain the safety of the aging transport airplane fleet, coupled with a better understanding of the human factors associated with numerous repetitive inspections, has caused the FAA to place less emphasis on repetitive inspections and more emphasis on design improvements and material replacement. Thus, in lieu of its previous position of continual inspection, and repair or modification on condition if cracks are found, the FAA has decided to require, whenever practicable, airplane modifications necessary to remove the source of the particular aging phenomena.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 426 Model DC–10 series airplanes and Model KC–10A (military) airplanes of the affected design in the worldwide fleet. The FAA estimates that 121 Model DC–10–10 and –15 series airplanes of U.S. registry will be affected by this AD, that it will take approximately 13.6 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Required parts for Model DC–10–10 and –15 series airplanes will cost approximately $586 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators of Model DC–10–10 and –15 series airplanes is estimated to be $161,414, or $1,334 per airplane.

The FAA estimates that 148 Model DC–10–30 and –40 series airplanes and Model KC–10A (military) airplanes of U.S. registry will be affected by this AD, that it will take approximately 13.6 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Required parts for Model DC–10–30 and –40 series airplanes and Model KC–10A (military) airplanes will cost approximately $1,420 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators of Model DC–10–30 and –40 series airplanes and Model KC–10A (military) airplanes is estimated to be $320,864, or $2,168 per airplane.

Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $482,278. The total cost impact figure is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

94–12–05 McDonnell Douglas: Amendment 39–8933. Docket 93–NM–90–AD.

Applicability: All Model DC–10–10, –10F, –15, –30, –30F, –40, and –40F series airplanes and Model KC–10A (military) airplanes; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduced structural integrity of the wing, accomplish the following:

(a) For Model DC–10–10, –10F, and –15 series airplanes: Accomplish paragraphs (a)(1), (a)(2), (a)(3), and (a)(4) of this AD in accordance with McDonnell Douglas DC–10 Service Bulletin 57–114, Revision 1, dated July 26, 1993.

(1) Prior to the accumulation of 6,500 total landings, or within 1,500 landings after the effective date of this AD, whichever occurs later: Perform an eddy current surface inspection or an eddy current bolt hole inspection to detect cracks on stringer number 41 on the left- and right-hand wings, in accordance with the service bulletin.

(2) If no crack is found, repeat the inspection thereafter at intervals not to exceed 4,000 landings.

(3) If any crack is found, prior to further flight, accomplish paragraph (a)(3)(i), (a)(3)(ii), or (a)(3)(iii) of this AD, as applicable.

(i) If any crack is found that extends upward from the fastener hole, and if that crack is outside the limits specified in Condition 2 of the service bulletin, accomplish a temporary repair in accordance with Condition 2, Phase I of the service bulletin, or a permanent repair in accordance with Condition 2, Phase II of the service bulletin. If the temporary repair is accomplished, prior to the accumulation of 5,000 landings after accomplishing that temporary repair, accomplish the permanent repair in accordance with Condition 2, Phase II of the service bulletin. After accomplishment of the permanent repair, no further action is required by this AD.

(ii) If any crack is found that extends downward from the fastener hole, and if that crack is outside the limits specified in Condition 2 of the service bulletin, accomplish the permanent repair in accordance with Condition 2, Phase II of the service bulletin. After such repair, no further action is required by this AD.

(iii) If any crack is found in a fastener hole, and if that crack is within the limits specified in Condition 2 of the service bulletin, accomplish the preventative modification in accordance with Condition 1, Option II of the service bulletin. If the crack was detected using techniques other than the eddy current bolt hole inspection described in the service bulletin, prior to accomplishing the preventative modification, perform an eddy current bolt hole inspection to detect cracks, in accordance with the service bulletin, and accomplish paragraph (a)(3)(iii)(A), (a)(3)(iii)(B), or (a)(3)(iii)(C) of this AD, as applicable.

(A) If any crack is found that extends upward from the fastener hole, and if that crack is outside the limits specified in Condition 2 of the service bulletin, accomplish the requirements of paragraph (a)(3)(i) of this AD.

(B) If any crack is found that extends downward from the fastener hole, and if that crack is outside the limits specified in Condition 2 of the service bulletin, accomplish the requirements of paragraph (a)(3)(ii) of this AD.

(C) If any crack is found that is within the limits specified in Condition 2 of the service bulletin, accomplish the preventative modification in accordance with Condition 1, Option II of the service bulletin. After accomplishment of the preventative modification, no further action is required by this AD.

(4) Except for airplanes on which the preventative modification (Condition 1, Option II) or the permanent repair (Condition 2, Phase II) has been accomplished, prior to the accumulation of 6,500 total landings, or within 5 years after the effective date of this AD, whichever occurs later: Perform an eddy current bolt hole inspection to detect cracks in the fastener holes in accordance with the service bulletin.

(i) If no crack is found, or if any crack is found that is within the limits specified in Condition 2 of the service bulletin, prior to further flight, accomplish the preventative modification in accordance with Condition 1, Option II of the service bulletin. After accomplishment of the preventative modification, no further action is required by this AD.

(ii) If any crack is found that exceeds the limits specified in Condition 2 of the service bulletin, prior to further flight, accomplish a permanent repair in accordance with Condition 2, Phase II of the service bulletin. After accomplishment of the permanent repair, no further action is required by this AD.

(b) For Model DC–10–30, –30F, –40, and –40F series airplanes and Model KC–10A (military) airplanes: Accomplish paragraphs (b)(1), (b)(2), (b)(3), and (b)(4) of this AD in accordance with McDonnell Douglas DC–10 Service Bulletin 57–114, Revision 1, dated July 26, 1993.

(1) Prior to the accumulation of 6,500 total landings, or within 1,500 landings after the effective date of this AD, whichever occurs later: Perform an eddy current surface inspection or an eddy current bolt hole inspection to detect cracks on stringer number 41 on the left- and right-hand wings in accordance with the service bulletin.

(2) If no crack is found, repeat the inspection thereafter at intervals not to exceed 3,200 landings.

(3) If any crack is found, prior to further flight, accomplish paragraph (b)(3)(i), (b)(3)(ii), or (b)(3)(iii) of this AD, as applicable.

(i) If any crack is found that extends upward from the fastener hole, and if that crack is outside the limits specified in Condition 2 of the service bulletin, accomplish a temporary repair in accordance with Condition 2, Phase I of the service bulletin, or a permanent repair in accordance with Condition 2, Phase II of the service bulletin. If the temporary repair is accomplished, prior to the accumulation of 5,000 landings after accomplishing that temporary repair, accomplish the permanent repair in accordance with Condition 2, Phase II of the service bulletin. After accomplishment of the permanent repair, no further action is required by this AD.

(ii) If any crack is found that extends downward from the fastener hole, and if that crack is outside the limits specified in Condition 2 of the service bulletin, accomplish the permanent repair in accordance with Condition 2, Phase II of the service bulletin. After such repair, no further action is required by this AD.

(iii) If any crack is found in a fastener hole, and if that crack is within the limits specified in Condition 2 of the service bulletin, accomplish the preventative modification in accordance with Condition 1, Option II of the service bulletin. If the crack was detected using techniques other than the eddy current bolt hole inspection described in the service bulletin, prior to accomplishing the preventative modification, perform an eddy current bolt hole inspection to detect cracks, in accordance with the service bulletin, and accomplish paragraph (b)(3)(iii)(A), (b)(3)(iii)(B), or (b)(3)(iii)(C) of this AD, as applicable.

(A) If any crack is found that extends upward from the fastener hole, and if that crack is outside the limits specified in Condition 2 of the service bulletin, accomplish the requirements of paragraph (b)(3)(i) of this AD.

(B) If any crack is found that extends downward from the fastener hole, and if that crack is outside the limits specified in Condition 2 of the service bulletin, accomplish the requirements of paragraph (b)(3)(ii) of this AD.

(C) If any crack is found that is within the limits specified in Condition 2 of the service bulletin, accomplish the preventative modification in accordance with Condition 1, Option II of the service bulletin. After accomplishment of the preventative modification, no further action is required by this AD.

(4) Except for airplanes on which the preventative modification (Condition 1, Option II) or the permanent repair (Condition 2, Phase II) has been accomplished, prior to the accumulation of 6,500 total landings, or within 5 years after the effective date of this AD, whichever occurs later: Perform an eddy current bolt hole inspection to detect cracks in the fastener holes in accordance with the service bulletin.

(i) If no crack is found, or if any crack is found that is within the limits specified in Condition 2 of the service bulletin, prior to further flight, accomplish the preventative modification in accordance with Condition 1, Option II of the service bulletin. After accomplishment of the preventative modification, no further action is required by this AD.

(ii) If any crack is found that exceeds the limits specified in Condition 2 of the service bulletin, prior to further flight, accomplish a permanent repair in accordance with Condition 2, Phase II of the service bulletin. After accomplishment of the permanent repair, no further action is required by this AD.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(d) Special flight permits may be issued in accordance with Federal Aviation Regulations (FAR) § 21.197 and § 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) The inspections, repairs, and modification shall be done in accordance with McDonnell Douglas DC–10 Service Bulletin 57–114, Revision 1, dated July 26, 1993. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90801–1771, Attention: Business Unit Manager.

Technical Administrative Support, Dept. L51, M.C. 2–98. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(f) This amendment becomes effective on July 13, 1994.

Issued in Renton, Washington, on May 31, 1994.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 94–13627 Filed 6–10–94; 8:45 am]

BILLING CODE 4910–13–U

---

14 CFR Part 39

[Docket No. 93–NM–233–AD; Amendment 39–8929; AD 94–12–02]

Airworthiness Directives; Saab Model SAAB SF340A and SAAB 340B Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Saab Model SAAB SF340A and SAAB 340B series airplanes, that requires an inspection of the elevator and aileron coves, and further inspections and repair, if necessary. This amendment is prompted by a report of delamination between the composite structure and the aluminum foil on the elevator cove on a Model SAAB SF340B series airplane. The actions specified by this AD are intended to prevent jamming of the aileron or elevator.

DATES: Effective July 13, 1994.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of July 13, 1994.

ADDRESSES: The service information referenced in this AD may be obtained from Saab Aircraft AB, SAAB Aircraft Product Support, S–581.88, Linköping Sweden. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mark Quam, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055–4056; telephone (206) 227–2145; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain Saab Model SAAB SF340A and SAAB 340B series airplanes was published in the **Federal Register** on February 4, 1994 (59 FR 5361). That action proposed to require an inspection of the elevator and aileron coves to verify the type of antistatic protection applied to the coves. For coves that are found without conductive paint or expanded aluminum foil, that action proposed to require a detailed visual inspection and delamination tap test to detect aluminum foil delamination on the coves; and either a temporary repair and repetitive detailed visual inspections and delamination tap tests of the coves, or a permanent repair of the coves. Accomplishment of the permanent repair terminates the repetitive detailed visual inspections and delamination tap tests.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were submitted in response to the proposal or the FAA's determination of the cost to the public. The FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 152 airplanes of U.S. registry will be affected by this AD, that it will take approximately 20 work hours per airplane to accomplish the inspection, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $167,200, or $1,000 per airplane.

The total cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

94–12–02 SAAB Aircraft AB: Amendment 39–8929. Docket 93–NM–233–AD.

Applicability: Model SAAB SF340A series airplanes, serial numbers –004 through –159 inclusive; and Model SAAB 340B series airplanes, serial numbers –160 through –260, inclusive; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent jamming of the aileron or elevator, accomplish the following:

(a) Within 500 hours time-in-service or 90 days after the effective date of this AD, whichever occurs first, perform an inspection of the elevator and aileron coves to verify the type of antistatic protection applied to the coves, in accordance with Saab Service Bulletin 340–51–012, dated November 10, 1993.

(b) If a cove has conductive paint or expanded aluminum foil (stretched metal—aluminum net), no further action is required by this AD for that cove.

(c) If a cove does not have conductive paint or expanded aluminum foil (stretched metal—aluminum net), prior to further flight, perform a detailed visual inspection and delamination tap test to detect aluminum foil delamination on the elevator or aileron cove.

in accordance with the Saab Service Bulletin 340–51–012, dated November 10, 1993.

(1) If no delamination is found, repeat the detailed visual inspection and delamination tap test thereafter at intervals not to exceed 800 hours time-in-service in accordance with the service bulletin.

(2) If any delamination is found, prior to further flight, accomplish either paragraph (c)(2)(i) or (c)(2(ii) of this AD.

(i) Perform a temporary repair of the cove in accordance with the service bulletin. Thereafter, repeat the detailed visual inspection and delamination tap test required by paragraph (c) of this AD at intervals not to exceed 800 hours time-in-service. Or

(ii) Perform a permanent repair of the cove in accordance with the service bulletin. Accomplishment of this permanent repair constitutes terminating action for the repetitive inspection required by this AD.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(e) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(f) The inspections and repairs shall be done in accordance with Saab Service Bulletin 340–51–012, dated November 10, 1993. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Saab Aircraft AB, SAAB Aircraft Product Support, S–581.88, Linköping, Sweden. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on July 13, 1994.

Issued in Renton, Washington, on May 26, 1994.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

14 CFR Part 39

[Docket No. 94–NM–63–AD; Amendment 39–8931; AD 94–10–51]

Airworthiness Directives; Airbus Industrie Model A300, A300–600, and A310 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This document publishes in the **Federal Register** an amendment adopting Airworthiness Directive (AD) T94–10–51 that was sent previously to all known U.S. owners and operators of certain Airbus Model A300, A300–600, and A310 series airplanes by individual telegrams. This AD requires a detailed visual inspection to detect cracks, delamination, or discoloration of the bus bar of certain aft fixed side cockpit windows; and deactivation of the window heating system and repetitive detailed visual inspections, or replacement of the window with a modified window, if necessary. This amendment is prompted by a report of fracture of a fixed cockpit window that led to electrical arcing in the bus bar area of the window heating system on a Model A300 series airplane. The actions specified by this AD are intended to prevent decompression of the fuselage during flight due to failure of a window.

DATES: Effective June 28, 1994, to all persons except those persons to whom it was made immediately effective by telegraphic AD T94–10–51, issued May 3, 1994, which contained the requirements of this amendment.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of June 28, 1994.

Comments for inclusion in the Rules Docket must be received on or before August 12, 1994.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 94–NM–63–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

The applicable service information may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Sam Grober, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–1187; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION: On May 3, 1994, the FAA issued telegraphic AD T94–10–51, which is applicable to certain Airbus Industrie Model A300, A300–600, and A310 series airplanes. That action was prompted by a report of fracture of a fixed cockpit window on the right-hand aft side of the cockpit of a Model A300 series airplane. Embrittlement of the fixed cockpit window and simultaneous rupture of the two main plies of the window have been attributed to electrical arcing in the bus bar area of the window heating system. This condition, if not corrected, could result in decompression of the fuselage during flight.

Since the subject windows installed on Model A300–600 and A310 series airplanes are similar in design to those on Model A300 series airplanes, the FAA has determined that these airplanes are also subject to the addressed unsafe condition.

Airbus Industrie has issued All Operators Telex (AOT) 56–01, Revision 1, dated April 29, 1994, that describes procedures for a detailed visual inspection to detect discoloration (black or brown burnt spots) of the bus bar of certain aft fixed side windows; and either deactivation of the window heating system coupled with repetitive detailed visual inspections, or replacement of the window with a modified window, if necessary. The Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, classified this AOT as mandatory and issued French telegraphic airworthiness directive N 94–104–160(B), dated April 26, 1994, in order to assure the continued airworthiness of these airplanes in France.

These airplane models are manufactured in France and are type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since the unsafe condition described is likely to exist or develop on other airplanes of the same type design registered in the United States, the FAA issued telegraphic AD T94–10–51 to require a detailed visual inspection to detect cracks, delamination, or discoloration (black or brown burnt spots) of the bus bar of certain aft fixed side windows; and either deactivation of the window heating system and repetitive detailed visual inspections, or replacement of the window with a modified window, if necessary. The actions are required to be accomplished in accordance with the AOT described previously.

Since it was found that immediate corrective action was required, notice and opportunity for prior public comment thereon were impracticable and contrary to the public interest, and good cause existed to make the AD effective immediately by individual telegrams issued on May 3, 1994, to all known U.S. owners and operators of certain Airbus Model A300, A300–600, and A310 series airplanes. These conditions still exist, and the AD is hereby published in the **Federal Register** as an amendment to § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) to make it effective as to all persons.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 94–NM–63–AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

94–10–51 Airbus Industrie: Amendment 39–8931. Docket 94–NM–63–AD.

Applicability: Model A300, A300–600, and A310 series airplanes; as listed in Airbus Industrie All Operators Telex (AOT) 56–01, Revision 1, dated April 29, 1994; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent decompression of the fuselage during flight, accomplish the following:

(a) Within 15 days after the effective date of this AD, perform a detailed visual inspection to detect cracks, delamination, or discoloration (black or brown burnt spots) of the bus bar of the aft fixed windows, in accordance with Airbus Industrie AOT 56–01, Revision 1, dated April 29, 1994.

(b) If any crack or delamination is found during the inspection required by paragraph (a) of this AD, prior to further flight, replace the affected window with a modified window, in accordance with Airbus Industrie AOT 56–01, Revision 1, dated April 29, 1994.

(c) If no cracks, delamination, or discoloration is found during the inspection required by paragraph (a) of this AD, accomplish either paragraph (c)(1) or (c)(2) of this AD in accordance with Airbus Industrie AOT 56–01, Revision 1, dated April 29, 1994.

(1) Within 7 days after accomplishing the inspection required by paragraph (a) of this AD, and thereafter at intervals not to exceed 7 days, repeat the inspection required by paragraph (a) of this AD; or

(2) Prior to further flight, deactivate the side window heating system in accordance with the AOT.

(d) If any discoloration is found during the inspections required by paragraph (a) or (c) of this AD, and that discoloration measures less than 10mm in diameter, accomplish paragraphs (d)(1), (d)(2), and (d)(3) of this AD in accordance with Airbus Industrie AOT 56–01, Revision 1, dated April 29, 1994.

(1) Prior to further flight, deactivate the side window heating system on the affected side, in accordance with the AOT.

(2) 7 days after deactivating the window heating system, inspect the affected window to detect cracks or delamination formation around the discolored area, in accordance with the AOT.

(3) If any crack or delamination is found during the repeat inspection required by paragraph (d)(2) of this AD, prior to further flight, replace the window with a modified window, in accordance with the AOT.

(e) If any discoloration is found during the inspection required by paragraph (a) or (c) of this AD, and that discoloration measures 10mm or more in diameter, accomplish paragraphs (e)(1), (e)(2), and (e)(3) of this AD, in accordance with Airbus Industrie AOT 56–01, Revision 1, dated April 29, 1994.

(1) Prior to further flight, deactivate the side window heating system on the affected side, in accordance with the AOT.

(2) Thereafter, at daily intervals, inspect the affected window to detect cracks or delamination formation around the

discoloration area, in accordance with the AOT.

(3) If any crack or delamination is found during the inspections required by paragraph (e)(2) of this AD, prior to further flight, replace the window with a modified window in accordance with the AOT.

(f) Replacement of the aft fixed side window in accordance with Airbus Industrie AOT 56–01, Revision 1, dated April 29, 1994, constitutes terminating action for the requirements of this AD.

(g) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(h) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(i) The inspections, deactivation, and replacement, shall be done in accordance with Airbus Industrie All Operators Telex (AOT) 56–01, Revision 1, dated April 29, 1994. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(j) This amendment becomes effective on June 28, 1994, to all persons except those persons to whom it was made immediately effective by telegraphic AD T94–10–51, issued May 3, 1994, which contained the requirements of this amendment.

Issued in Renton, Washington, on May 31, 1994.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 94–13625 Filed 6–10–94; 8:45 am]

[Docket No. 93–NM–139–AD; Amendment 39–8937; AD 94–12–09]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 747 series airplanes, that requires inspections to detect fatigue-related skin cracks and corrosion of the skin lap joints in the fuselage upper lobe, and repair, if necessary. This amendment also requires modification of certain lap joints and inspections of modified lap joints. This amendment is prompted by a structural review of Model 747 series airplanes. The actions specified by this AD are intended to prevent rapid decompression of the airplane and the inability to carry fail-safe loads, due to the problems associated with fatigue cracking and corrosion.

DATES: Effective July 13, 1994.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of July 13, 1994.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Steven Fox, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2777; fax (206) 227–1181.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain Boeing Model 747 series airplanes was published in the **Federal Register** on February 24, 1994 (59 FR 8875). That action proposed to require inspections to detect fatigue-related skin cracks and corrosion of the skin lap joints in the fuselage upper lobe, and repair, if necessary. That action also proposed to require modification of certain lap joints and inspections of modified lap joints.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the proposal.

One commenter requests that proposed inspection requirements be revised. This commenter requests that, if the visual inspection [proposed in paragraph (a)(1) of the AD] reveals any evidence of corrosion, operators should be allowed to perform a low frequency eddy current (LFEC) inspection of the entire length of the lap joint to determine if corrosion exceeds 10% of the skin thickness. If this LFEC inspection is accomplished, the commenter also requests that the visual inspection repetitive interval specified in paragraph (a)(1) be extended from the proposed 2,000 landings to 3,000 landings so that the interval corresponds with other major structural inspection intervals. The FAA cannot concur with this request, since the commenter provided neither specific inspection instructions nor data to justify the effectiveness of the proposed procedures. Under the provisions of paragraph (i) of the final rule, however, operators may apply for the approval of an alternative method of compliance with the AD, or adjustment of the compliance time, if sufficient justification is presented to the FAA.

Two commenters request that proposed paragraph (a) be clarified with regard to the inspections and inspection interval required after a lap joint has been modified. These commenters request that, for lap joints that have been modified by either the full or partial modification procedures described in the referenced Boeing service bulletin, operators be allowed a period of time during which no inspections are required for those lap joints. The referenced Boeing service bulletin, as well as proposed paragraph (f), state that post-modification inspections are to start at 10,000 cycles, 7,000 cycles, or 5,000 cycles after modification of the skin lap joints, depending upon the type of modification that has been accomplished. However, as worded in paragraph (a) of the proposal, the same inspections meant to detect cracks and corrosion in unmodified skin lap joints would be required to be performed on modified skin lap joints until the inspections specified in proposed paragraph (f) begin. The FAA concurs that clarification of this requirement is necessary. It was not the FAA's intent to require that the initial-type of inspections of unmodified lap joints be performed on modified lap joints. Accordingly, paragraphs (a)(1) and (a)(3) have been revised to indicate that the inspections of the specified lap joints are to continue at repetitive intervals only until the lap joints are modified in

accordance with the requirements of paragraph (e).

Several commenters request that the compliance time for accomplishing the "full" modification on certain lap joints, as specified in paragraph (b)(2), be extended from the proposed 15 months to 18 months. Additionally, these commenters request that the compliance time for a similar requirement specified in paragraph (c)(2) be extended from the proposed 30 months to 36 months. The commenters state that, by extending these compliance times, operators would be able to accomplish the modification during a scheduled maintenance interval ("C" check), and thereby eliminate the need to schedule special times for the accomplishment of this modification, at additional expense. The FAA concurs. It was the FAA's intent that the modification be performed at a main base during regularly scheduled maintenance where special equipment and trained maintenance personnel will be available if necessary. Accordingly, the final rule has been revised to specify compliance times as requested by the commenters. The FAA has determined that this extension will not adversely affect safety since the affected lap joints will be subject to repetitive inspections in the interim.

Two commenters request that paragraph (e) be revised to extend the compliance time for accomplishment of the "full" modification of the specified skin lap joints from the proposed 1,000 cycles (for airplanes that have accumulated nearly or more than 20,000 total flight cycles) to 4 years after the effective date of the final rule. These commenters consider the proposed compliance time to be too short and not consistent with compliance times provided for similar actions in other AD's pertaining to aging aircraft issues. The FAA does not concur. The 1,000 flight cycle compliance time is consistent with the mandatory modification of a lap joint that has been found to have corrosion or cracking, as required by paragraph (b)(2) of this AD. Cold bonded lap joints such as these have a history of numerous findings of fatigue cracks and corrosion. In light of this, and the fact that fatigue cracking is cycle-related, the FAA has determined that modification of these lap joints cannot be delayed any further than 1,000 flight cycles, especially on those airplanes that already have accumulated 20,000 flight cycles, without compromising safety.

One commenter requests that the applicability of proposed paragraphs (f)(1), (f)(2), and (f)(3) be revised to clarify that it is the "lap joint," rather than the "airplane," on which the particular modification has been accomplished. The FAA concurs and has revised wording of the final rule to clarify this point.

One commenter requests that all references in the rule to "landings" be changed to "cycles." The FAA concurs that the reference should be revised. The FAA has reviewed the applicable service information related to this action and finds that the majority of references to recommended compliance times are stated in "flight cycles." Although the FAA normally uses the terms "landings" and "flight cycles" interchangeably, the FAA considers that it is appropriate in this case to change the verbiage of the AD to match that of the cited service bulletins. Therefore, in this final rule, the FAA has substituted the term "flight cycles" for the term "landings."

Another commenter, a non-U.S. operator, requests that the proposed rule be revised to include a provision specifying that pressurization cycles of 2.0 psi or less need not be counted as a flight cycle when determining the number of flight cycles relative to the proposed compliance thresholds. This commenter states that a pressurization cycle of 2.0 psi or less is a typical pressure used during flight training, and causes little fatigue damage of the kind addressed by this AD action. The FAA does not concur. The FAA does not consider it appropriate to include various provisions in an AD applicable to a single operator's unique use of an affected airplane. Paragraph (i) of this AD provides for the approval of alternative methods of compliance to address these types of unique circumstances. Further, this commenter does not compile data for each of its airplanes so that an individual airplane's pressurization cycles could be determined; instead, it uses a fleet average to calculate the equivalent number of pressurization cycles. The FAA does not consider it appropriate to use approximations for determining compliance with this AD.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 200 Model 747 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 116 airplanes of U.S. registry will be affected by this proposed AD.

The required inspections will entail 100 work hours per airplane per inspection, at an average labor rate of $55 per work hour. (This figure does not include the time necessary for gaining access and closing up.) Based on these figures, the total cost impact of this requirement on U.S. operators is estimated to be $638,000, or $5,500 per airplane, per inspection.

The required "full" modification will entail approximately 96 work hours for each 200-inch length of uncracked and uncorroded lap joint, at an average labor rate of $55 per work hour. (This figure does not include the time necessary for gaining access and closing up.) There are 100 lap joint sections per airplane, each with a length of 200 inches. The cost of required parts is expected to be negligible. Based on these figures, the total cost impact of this requirement on U.S. operators is estimated to be $61,248,000, or $528,000 per airplane

The initial high frequency eddy current (HFEC) inspection following modification will entail approximately 56 work hours, at an average labor rate of $55 per work hour. Based on these figures, the total cost impact of this requirement AD on U.S. operators is estimated to be $357,280, or $3,080 per airplane.

Based upon the figures discussed above, the total cost impact of this AD on U.S. operators is expected to be $62,243,280, or $536,580 per airplane. This total cost figure includes the inspections and modification, for the first year of the average five-year inspection cycle. Additionally, the total cost figure indicated is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The FAA recognizes that the obligation to maintain aircraft in an airworthy condition is vital, but sometimes expensive. Because AD's require specific actions to address specific unsafe conditions, they appear to impose costs that would not otherwise be borne by operators. However, because of the general obligation of operators to maintain aircraft in an airworthy condition, this appearance is deceptive. Attributing those costs solely to the issuance of this AD is unrealistic because, in the interest of maintaining safe aircraft, most prudent operators would accomplish the required actions even if they were not required to do so by the AD.

A full cost-benefit analysis has not been accomplished for this AD. As a

matter of law, in order to be airworthy, an aircraft must conform to its type design and be in a condition for safe operation. The type design is approved only after the FAA makes a determination that it complies with all applicable airworthiness requirements. In adopting and maintaining those requirements, the FAA has already made the determination that they establish a level of safety that is cost-beneficial. When the FAA, as in this AD, makes a finding of an unsafe condition, this means that this cost-beneficial level of safety is no longer being achieved and that the required actions are necessary to restore that level of safety. Because this level of safety has already been determined to be cost-beneficial, a full cost-benefit analysis for this AD would be redundant and unnecessary.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

94-12-09 Boeing: Amendment 39-8937. Docket 93-NM-139-AD.

Applicability: Model 747 series airplanes, line positions 001 through 200 inclusive, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent rapid decompression of the airplane and the inability to carry fail-safe loads, accomplish the following:

(a) Within 1,000 flight cycles after the effective date of this AD, and thereafter at the intervals specified in paragraphs (a)(1), (a)(2), and (a)(3) of this AD, perform inspections at the upper lobe skin panel lap joints in accordance with Boeing Service Bulletin 747-53-2307, Revision 2, dated October 14, 1993:

(1) Perform a detailed external visual inspection to detect cracks and evidence of corrosion (bulging skin between fasteners, blistered paint, dished fasteners, popped rivet heads, or loose fasteners) in accordance with the service bulletin. Repeat that inspection thereafter at intervals not to exceed 2,000 flight cycles until the modification required by paragraph (e) of this AD is accomplished.

(2) Perform a high frequency eddy current inspection (HFEC) to detect cracks in the skin at the upper row of fasteners of the skin panel lap joints forward of body station (BS) 1000 in accordance with the service bulletin. Repeat that inspection thereafter at intervals not to exceed 4,000 flight cycles until the modification required by paragraph (e) of this AD is accomplished.

(3) Perform a HFEC inspection to detect cracks in the skin at the upper row of fastener holes of the skin panel lap joints aft of BS 1480 to 2360 in accordance with the service bulletin. Repeat that inspection thereafter at intervals not to exceed 6,000 flight cycles until the modification required by paragraph (e) of this AD is accomplished.

(b) If any crack is found during any inspection required by this AD, or if any corrosion is found for which material loss exceeds 10 percent of the material thickness, accomplish paragraphs (b)(1) and (b)(2) of this AD in accordance with Boeing Service Bulletin 747-53-2307, Revision 2, dated October 14, 1993.

(1) Prior to further flight, repair any crack or corrosion found, in accordance with the service bulletin.

(2) Within 18 months after accomplishing the repair, accomplish the "full" modification described in the service bulletin for the remainder of any skin panel lap joint in which a crack is found, or in which corrosion is found that exceeds 10 percent of the material thickness.

(c) If no crack is found during any inspection required by this AD, but corrosion is found for which the material loss does not exceed 10 percent of the material thickness: Accomplish paragraph (c)(1) and (c)(2) of this AD for the entire affected skin panel lap joint in accordance with Boeing Service Bulletin 747-53-2307, Revision 2, dated October 14, 1993.

(1) Within 500 flight cycles after accomplishing the inspection during which the corrosion was found, and thereafter at intervals not to exceed 500 flight cycles until the "full" modification required by paragraph (c)(2) of this AD is accomplished: Perform a HFEC inspection to detect cracks of the corroded skin panel lap joint, in accordance with the service bulletin.

(2) Within 36 months after accomplishing the inspection during which the corrosion was found: Accomplish the "full" modification in accordance with the service bulletin.

(d) The inspections required by this AD shall be performed by removing the paint and using an approved chemical stripper; or by ensuring that each fastener head is clearly visible.

(e) Except as provided in paragraph (g) of this AD, prior to the accumulation of 20,000 total flight cycles, or within the next 1,000 flight cycles after the effective date of this AD, whichever occurs later: Accomplish the modification described in the service bulletin as a "full" modification of the skin panel lap joints at the locations specified in paragraphs (e)(1) and (e)(2) of this AD, as applicable, in accordance with Boeing Service Bulletin 747-53-2307, Revision 2, dated October 14, 1993. Accomplishment of this modification terminates the repetitive inspection requirements of paragraph (a) of this AD.

(1) For airplane line numbers 001 through 058, inclusive: Modify the skin panel lap joints at Stringer 12 (left and right), station 520 to 1,000; and Stringer 19 (left and right), station 520 to 740.

(2) For airplane line numbers 59 through 200, inclusive: Modify the skin panel lap joints at Stringer 12 (left and right), station 740 to 1,000; and Stringer 19 (left and right), station 520 to 740.

(f) Perform an external HFEC inspection to detect skin cracks of any modified skin panel lap joints at the times specified in paragraphs (f)(1), (f)(2), and (f)(3) of this AD, as applicable, in accordance with Boeing Service Bulletin 747-53-2307, Revision 2, dated October 14, 1993. Repeat that inspection thereafter at intervals not to exceed 3,000 flight cycles.

(1) For skin panel lap joints on which the "full" modification has been accomplished: Within 10,000 flight cycles after accomplishment of that modification.

(2) For skin panel lap joints on which the "optional" (partial) modification has been accomplished: Within 7,000 flight cycles after accomplishment of that modification.

(3) For skin panel lap joints having deep countersink fasteners located at Section 42 on which the "full" modification, as described in the original issue of the service bulletin, has been accomplished: Within 5,000 flight cycles after accomplishment of that modification.

(g) In lieu of the "full" modification required by paragraph (e) of this AD, the "optional" (partial) modification described in Boeing Service Bulletin 747-53-2307,

Revision 2, dated October 14, 1993, may be accomplished for skin panels that have an outer thickness of 0.090 inches or less, and that do not have any cracks, corrosion, or an existing structural repair on the skin panel lap joint. The "optional" (partial) modification shall not be accomplished at deep countersink fastener locations.

(h) Accomplishment of the requirements of this AD terminates the requirements of AD 90–15–06, amendment 39–6653.

(i) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(j) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(k) The actions shall be done in accordance with Boeing Service Bulletin 747–53–2307, Revision 2, dated October 14, 1993. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(l) This amendment becomes effective on July 13, 1994.

Issued in Renton, Washington, on June 2, 1994.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 71

[Airspace Docket No. 94–AWP–9]

Revocation of Class D Airspace; Victorville, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revokes the Class D airspace area at Victorville, CA due to the closure of George AFB. An operational airport traffic control tower is required to retain Class D airspace. The airport traffic control tower is closed, and, therefore, the FAA is revoking this Class D airspace area.

EFFECTIVE DATE: 0901 u.t.c., December 8, 1994.

FOR FURTHER INFORMATION CONTACT: Scott Speer, Airspace Specialist, System Management Branch, AWP–530, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261, telephone (310) 297–0697.

SUPPLEMENTARY INFORMATION:

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) revokes the Class D airspace area at Victorville, George AFB, CA. An operational airport traffic control tower is required to retain Class D airspace. The airport traffic control tower is closed. Consequently, the FAA is revoking this Class D airspace area. Because this action is a minor technical amendment in which the public would not be particularly interested, I find that notice and public procedure under U.S.C. 553(b) are unnecessary.

The coordinates for this airspace docket are based on North American Datum 83. Class D airspace designations are published in paragraph 5000 of FAA Order 7400.9A dated June 17, 1993, and effective September 16, 1993, which is incorporated by reference in 14 CFR 71.1 (58 FR 36298; July 6, 1993). The Class D airspace designation listed in this document will be published subsequently in the Order.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9A, Airspace Designations and Reporting Points, dated June 17, 1993, and effective September 16, 1993, is amended as follows:

14 CFR Part 71

[Airspace Docket No. 94–AWP–12]

Revocation and Modification of Class D Airspace; Establishment of Class E Airspace; Imperial County, CA and El Centro NAF, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revokes the Class D airspace area and establishes a Class E airspace area at Imperial County Airport and modifies the El Centro NAF Class D airspace area. The airspace at Imperial County Airport was inadvertently classified as Class D airspace. Imperial County Airport does not have an airport traffic control tower which is required for Class D airspace, and, therefore, the FAA is revoking this Class D airspace area.

EFFECTIVE DATE: 0901 u.t.c., December 8, 1994.

FOR FURTHER INFORMATION CONTACT: Scott Speer, Airspace Specialist, System Management Branch, AWP–530, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261, telephone (310) 297–0697.

SUPPLEMENTARY INFORMATION:

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) revokes the Class D airspace area and establishes Class E airspace at Imperial County Airport, CA. The El Centro NAF, CA, Class D airspace area description is modified to reflect this change. An operational airport traffic control tower is required to retain Class D airspace. Imperial County Airport does not have an airport traffic control tower. Consequently, the FAA is revoking this Class D airspace area. Because this action is a minor technical amendment in which the public would not be particularly interested, I find that notice and public procedure under U.S.C. 553(b) are unnecessary.

The coordinates for this airspace docket are based on North American Datum 83. Class D and Class E airspace designations are published in Paragraphs 5000 and 6002, respectively, of FAA Order 7400.9A dated June 17, 1993, and effective September 16, 1993, which is incorporated by reference in 14 CFR 71.1 (58 FR 36298; July 6, 1993). The Class D and Class E airspace designations listed in this document will be published subsequently in the Order.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

RIN 1515–AB53

Express Consignments; Formal and Informal Entries of Merchandise; Administrative Exemptions

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Interim regulations; solicitation of comments.

SUMMARY: The amendments contained in this document are being published as interim regulations to implement certain statutory amendments to the Customs laws regarding administrative exemptions. These statutory amendments are contained in the Customs modernization provisions of the North American Free Trade Agreement Implementation Act. Also, the interim regulations clarify the procedures for shipments brought into the United States by express consignment operators or carriers and make clear that all shipments carried into the United States by express consignment operators or carriers are required to be entered, unless specifically exempt from entry. These interim regulations also implement the Customs modernization provisions in the North American Free Trade Agreement Implementation Act exempting from entry certain merchandise (undeliverable shipments, railway freight locomotives and cars, and instruments of international traffic).

DATES: Interim rule effective July 28, 1994; comments must be received on or before July 13, 1994.

ADDRESSES: Written comments (preferably in triplicate) must be submitted to U.S. Customs Service, ATTN: Regulations Branch, Franklin Court, 1301 Constitution Avenue, NW., Washington, DC 20229, and may be inspected at the Regulations Branch, 1099 14th Street, NW., suite 4000, Washington, DC.

SUPPLEMENTARY INFORMATION:

Background

On December 8, 1993, the President signed into law Public Law 103–182, the North American Free Trade Agreement Implementation Act (107 Stat. 2057). Title VI of this Act, popularly known as

the Customs Modernization Act (the Act) amended certain Customs laws. Section 651 of the Act amended section 321, Tariff Act of 1930, as amended (19 U.S.C. 1321).

Before its amendment by the Act, section 321 authorized administrative exemptions from duty and taxes on articles such as gifts and personal and household goods, and in certain other situations. Specifically, section 321 authorized the Secretary of the Treasury, in order to avoid expense and inconvenience to the Government disproportionate to the amount of revenue that would otherwise be collected, to disregard a difference of less than $10 between the duty actually due on an entry and the estimated duties deposited. On the same basis, section 321 authorized the Secretary to admit free of duty and tax any article the value of which was less than $50 in the case of bona fide gifts ($100 if the gift was from certain island possessions) sent from persons in foreign countries to persons in the United States. Section 321 authorized the Secretary to admit free of duty and tax any article the value of which was less than $25 in the case of personal or household articles accompanying the traveler. In all other cases (*i.e.*, if not a bona fide gift sent from a person in a foreign country to a person in the United States or a personal or household article accompanying a traveler), the Secretary was authorized to admit free of duty and tax any article the value of which was less than $5.

In the last three cases (*i.e.*, bona fide gifts, personal or household articles, and all other cases), the exemptions were subject to the condition that the aggregate fair retail value in the country of shipment of articles imported by one person on one day could not exceed the authorized amount. Also, the exemptions in these cases were not to be granted in any case in which merchandise covered by a single order or contract was forwarded in separate lots to secure the benefit of the provision.

The Secretary was authorized to prescribe regulations to implement these provisions. Section 321 specifically authorized the Secretary to diminish any of the dollar amounts referred to above.

Section 651 of the Act increased the dollar amounts described and, instead of setting maximum dollar amounts below which the Secretary was authorized to make the exemptions applicable, authorized the Secretary to make the exemptions applicable to an amount to be specified in regulations, but not less than a stated amount. That is, the amended section 321 now provides minimum dollar amounts for the exemptions.

In the case of the difference between duty actually due on an entry and the estimated duties deposited, the dollar amount was increased to a minimum of $20. Also, this provision was changed to authorize Customs to apply the exemption to the total of duties, fees, and taxes, instead of only duties and taxes, as had been the case. In the case of bona fide gifts, personal or household articles, and all other cases, the dollar amounts were respectively increased to $100 ($200, if the gift is from one of the named island possessions), $200, and $200, respectively.

Section 651 removed from § 321 the specific authorization to, by regulation, diminish any of the dollar amounts specified in the provision. Section 651 retained the specific authorization in section 321 for regulations to prescribe exceptions to any exemption whenever the Secretary finds such action is consistent with the purpose of the provisions or is necessary to protect the revenue or to prevent unlawful importations.

The provision in the Customs Regulations containing the authorization to disregard a difference of less than $10 between the duty actually due on an entry and the estimated duties deposited is found in 19 CFR 159.6. The provisions in the Customs Regulations pertaining to the administrative exemption for bona fide gifts are found in 19 CFR 10.152 and 145.32 and the provision for personal or household articles is found in 19 CFR 148.51 (see also §§ 148.12, 148.64). The provisions in the Customs Regulations pertaining to the $5 administrative exemption for all other articles are found in 19 CFR 10.151 and 145.31. Conditions for the exemptions provided for in 19 CFR 10.151 and 10.152 are currently found in 19 CFR 10.153.

Provisions pertaining to the administrative exemptions under section 321 are also found in part 128 of the Customs Regulations, which relates to express consignments. Section 128.24(d) of that part refers to low value shipments (*i.e.*, shipments valued at $5 or less) and provides that such shipments must be segregated from shipments valued at more than $5 when the special informal entry procedures provided for in part 128 are used. This provision was intended to cover articles which could be administratively exempted from duties and taxes under section 321(a)(2)(C) (see T.D. 89–53, published in the **Federal Register** on May 8, 1989 (54 FR 19561)).

These interim regulations conform the Customs Regulations to the changes made to section 321 by section 651 of the Act. In addition, the interim regulations clarify entry procedures applicable to merchandise subject to section 321. The dollar amounts currently provided for in 19 CFR 10.151 through 10.153, 145.31, 145.32, 148.12, 148.51, 148.64 and 159.6 are changed to the minimums provided for in the amended section 321.

The interim regulations amend part 143 to clarify the procedures for entries of shipments qualifying for the administrative exemptions in section 321(a)(2). Shipments covered in section 321(a)(2) are included in the merchandise which may be entered under the procedures provided for by regulation under 19 U.S.C. 1498. That provision authorizes the Secretary of the Treasury to prescribe rules and regulations for the declaration and entry of the merchandise described in the section. Entries which may be provided for by regulation under section 1498 are distinguished from entries which are required to be filed under 19 U.S.C. 1484 (*i.e.*, formal entries). As authorized by section 1498, these amendments provide that the person who may make entry of shipments covered by section 321(a)(2) is the owner, purchaser, or consignee of the merchandise or, when appropriately designated by one of these persons, a Customs broker licensed under 19 U.S.C. 1641. Under the same authority, an amendment to part 143 makes it clear that the person who may make entry of other merchandise (*i.e.*, merchandise not qualifying for the administrative exemptions in section 321(a)(2)) which qualifies for informal entry is the owner or purchaser of the merchandise or, when appropriately designated by the owner, purchaser, or consignee of the merchandise, a Customs broker licensed under 19 U.S.C. 1641.

A corresponding amendment to part 111, concerning Customs brokers, is added to the list of transactions for which a broker's license is not required. The new provision provides that a person entering merchandise qualifying for and entered under the informal entry procedures authorized by 19 U.S.C. 1498 is not required to be licensed as a broker unless required to be so licensed by regulations issued under the authority of section 1498. A reference to the provision included in part 143 is included in the new provision.

Also under the authority of 19 U.S.C. 1498, amendments are made to part 143 to clearly provide the procedures for entries of the merchandise covered in section 321(a)(2). Shipments of such

merchandise may be entered by presenting the bill of lading (or a manifest listing each bill of lading) or other document used to file or support entry. Manifest information is required consisting of the country of origin of the merchandise, shipper name, address and country, ultimate consignee name and address, specific description of the merchandise, quantity, and value. Cross references are provided to section §§ 148.12 and 148.62 to make it clear that entry by oral declaration continues to be allowed.

No amendment to the regulations is being promulgated at this time to implement the new subsection (a)(3) of section 321, added by section 651 of the Act. This provision allows Customs to waive the collection of duties, fees, and taxes due on entered merchandise when such duties, fees, or taxes are less than $20, in order to avoid expense and inconvenience to the Government disproportionate to the amount of revenue that would otherwise be collected. Regulations implementing this provision are being delayed pending an analysis of the expense and inconvenience to the Government in view of the revenue involved.

Section 159.6, authorizing Customs to disregard a difference of less than $10 (now $20 under the amended section 321(a)(1)) between duties deposited and duties actually due on an entry, is amended to authorize Customs to apply the exemption to the total of duties, fees, and taxes, as provided for in section 321(a)(1), as amended by section 651 of the Act.

Customs also is making amendments to the Customs Regulations in part 128 relating to express consignments. These amendments are intended to make it clear that all shipments carried into the United States by express consignment operators and carriers are required to be entered, unless specifically exempt from entry.

Basically, a 3-tier approach applies to such shipments. That is, shipments valued in excess of $1250 are required to be formally entered, as provided for under 19 U.S.C. 1484 in parts 141, 142, and 143 (except subpart C) of the Customs Regulations. Shipments valued between $200 and $1250 may be entered under the informal entry procedures, as provided for under 19 U.S.C. 1498 (unless the shipments consist of merchandise which may not be entered under those procedures). These procedures consist of the filing of a Customs Form 3461, either modified to cover all importations under the special procedures for express consignment operator or carrier importations or all such importations on a daily or flight basis, and the advance filing of the manifest information provided for in 19 CFR 128.21. This information consists of the country of origin, shipper name, address and country, ultimate consignee name and address, specific description of the merchandise and the tariff classification of the merchandise, quantity, shipping weight, and value. An entry summary (Customs Form 7501) and estimated duties are required to be filed with Customs within 10 days of release of these shipments.

The third tier is for shipments valued at $200 or less. These shipments also may be entered under the informal entry procedures, as provided for under 19 U.S.C. 1498 (unless the shipments consist of merchandise which may not be entered under those procedures). The procedures for these shipments are the same as those for the second-tier shipments (valued between $200 and $1250), except that the tariff classification of the merchandise is not required for the shipments and no entry summary or estimated duties is required to be filed.

An amendment to 19 CFR 101.1, adding a definition of "shipment", makes it clear that the monetary exemption for third-tier shipments is based on the bill of lading or other evidence used to file or support entry, or oral declaration when applicable. For example, if the document used to file or support entry is an individual bill of lading to the ultimate consignee in the United States, the monetary limitation is applied on the basis of the value of the shipment on the individual bill of lading. This is so whether the document used to file or support entry is itself the bill of lading or an advance manifest, as described in 19 CFR 128.21, listing each of the individual bills of lading. On the other hand, if the document used to file or support entry is a master bill of lading (as opposed to each individual bill of lading), the monetary limitation is applied on the basis of the total value of the shipments on the master bill of lading. The same is true of the application of the monetary limitation in section 321(a)(2) for other importations (*i.e.*, those not involving an express consignment entity). This is so because the definition of "shipment" is for general purposes in chapter I of title 19 of the CFR, unless the context of the term requires a different meaning (see 19 CFR 101.1).

As is true generally under these amendments, the person who may make entry for the shipments valued between $200 and $1250 which may be entered under the informal entry procedures is the owner or purchaser of the shipment or, when appropriately designated by the owner, purchaser, or consignee of the shipment, a Customs broker licensed under 19 U.S.C. 1641. The person who may make entry for the shipments valued $200 or less which may be entered under the informal entry procedures is the owner, purchaser, or consignee or, when appropriately designated by one of these persons, a Customs broker licensed under 19 U.S.C. 1641. As discussed above, the authority for this distinction is that these entries are made under 19 U.S.C. 1498 and the Secretary of the Treasury is specifically authorized to prescribe rules and regulations for the declaration and entry of such shipments.

Amendments are also made to part 141. Section 141.4 is amended to clarify that shipments subject to the administrative exemptions under § 321(a)(2) must be entered under special informal entry procedures for lower value shipments. Only merchandise specifically exempt from entry (*i.e.*, so-called intangibles, under General Note 13 (formerly General Note 4), HTSUS, and certain vessels) is exempt from all forms of entry. Also, a conforming amendment to the citation of the General Note in § 141.4 is necessary because of the redesignation of the General Note (*i.e.*, General Note 4, HTSUS, the predecessor to General Note 13, was redesignated as General Note 13; see Presidential Proclamation 6641, December 15, 1993, published in the **Federal Register** on December 20, 1993 (58 FR 67032, 66867)).

Undeliverable Shipments

The North American Free Trade Agreement Implementation Act amended General Note 4 (now General Note 13) by adding other articles which are exempt from entry (section 681 of Pub. L. 103–182). The newly added articles are articles which are returned as undeliverable to the United States within 45 days of their departure from the United States. The articles may not have left the custody of either the carrier or foreign customs service during that time. The departure from the United States of articles for which the exemption is granted may not be treated as satisfying any requirement for exportation in order to receive a benefit from, or meet an obligation to, the United States.

The amendment to § 141.4 implements this provision. The amendment requires the person claiming the exemption to certify that the merchandise complies with the provision. In addition, the amendment requires the person claiming the exemption to provide, upon request by

Customs, any evidence necessary to support the claim.

Other Exemptions From Entry

Section 681 of the Act also added a provision to the tariff schedule exempting from entry and release requirements railway locomotives (provided for in headings 8601 and 8602, HTSUS) and railway freight cars (provided for in heading 8606, HTSUS) on which no duty is owed (Additional U.S. Note 1, Chapter 86, HTSUS). Also, section 681 of the Act provided for the addition of a Note to Chapter 99, HTSUS, under which certain Canadian railway freight cars provided duty-free treatment in subheadings 9905.86.05 and 9905.86.10, HTSUS, are exempt from entry and release requirements. The railway freight cars provided for in subheading 9905.86.05, HTSUS, are those produced before July 1, 1991, or if entered after July 1, 1994, produced not less than 3 years before the date of importation, and provided for in heading 8606, HTSUS. The railway freight cars provided for in subheading 9905.86.10, HTSUS, are those imported for temporary use in transportation in the United States and certified by the importer to be exported within 1 year from the date of importation and provided for in heading 8606, HTSUS. In the case of both Notes (to be added to chapter 86 and 99, HTSUS), the Secretary of the Treasury is authorized by regulation to establish appropriate reporting requirements and to require that a bond be posted to ensure compliance.

The amendment to § 141.4 implements these provisions. In the case of railway locomotives and freight cars which are exempt from entry on the basis that no duty is owed on them and they are classified in headings 8601, 8602, or 8606, HTSUS (*i.e.*, without reference to subheading 9905.86.05 or 9905.86.10, HTSUS), no special evidentiary requirement is imposed because duty-free treatment is not conditioned on any special condition (other than duty-free status because of origin).

In the case of railway freight cars which are exempt from entry by virtue of subheading 9905.86.05 or 9905.86.10, HTSUS, because there are conditions other than the absence of duty being owed on the freight cars, the amendment contains special evidentiary requirements. The requirements, concerning the time of production of the freight car and the duration of the stay in the United States of the freight car, shall be met by a certification (documentary or electronic), subject to Customs verification. In the case of the requirement to export the freight car within 1 year from the date of importation, in subheading 9905.86.10, HTSUS, the amendment specifically provides that a freight car admitted into the United States under this provision which is not exported within the 1 year period becomes subject to entry and the payment of any applicable duties.

As authorized by the statutory provision, the amendment provides that locomotives and freight cars described in Additional U.S. Note 1 of Chapter 86, HTSUS, and freight cars described in subheading 9905.86.05 or 9905.86.10, HTSUS, may be released only after the importer has filed a bond on Customs Form 301, containing either the basic importation and entry conditions (19 CFR 113.62) or the international carrier bond conditions (19 CFR 113.64). Amendments to 19 CFR 123.12 are added concerning the entry of foreign locomotives and equipment in international traffic, to add references to the provisions implementing these provisions.

Instruments of International Traffic

Section 681 of the Act added a provision to the tariff schedule exempting from formal entry procedures instruments of international traffic, such as containers, lift vans, rail cars and locomotives, truck cabs and trailers, etc. The provision also provided for the periodic reporting and payment of fees associated with the importation of such instruments of international traffic.

The exemption from entry for instruments of international traffic is already provided for in the Customs Regulations (see 19 CFR 10.41a). There are no fees associated with the importation of instruments of international traffic. Therefore, no substantive amendment to the Customs Regulations is necessary to implement this provision. However, to alert the public to the exemption from entry for instruments of international traffic, a provision is added referring to this exemption from entry and 19 CFR 10.41a in the list of exceptions from the general rule in § 141.4.

Accordingly, Customs is promulgating on an interim basis amendments as described above and set forth below.

Delayed Effective Date and Public Comment Requirements

The agency intends that these interim regulations become effective on the 45th day following the date of publication, *i.e.*, 15 days after the close of the comment period. The agency believes it has good cause under 5 U.S.C. 553(d) (1) and (3) of the Administrative Procedure Act (APA) (5 U.S.C. 553) to promulgate interim regulations because the regulations provide an immediate benefit to both the Government and the public by increasing exemptions which already exist. These interim regulations are intended to implement Congressional intent embodied in 19 U.S.C. 1321, as amended, that these exemptions, when granted, should exist at statutory minimums.

Furthermore, existing rights and obligations are not otherwise changed. The agency believes the public wants these new statutory minimums to become effective as soon as possible as the public should benefit from the efficiencies and savings resulting therefrom. In addition, the agency does not believe the public needs time to conform its conduct so as to avoid violation of these regulations. The due and timely execution of the agency's responsibilities would be unnecessarily impeded by a time consuming notice and comment period. The agency believes such delay is unnecessary because it does not expect the public to object to the regulations being promulgated as they merely provide the relief that Congress intended.

Even though, based on the discussion set forth above, Customs believes the amendments in this document may be promulgated on an interim basis and could be effective immediately, Customs is providing a 45-day delayed effective date, with a 30 day comment period preceding that effective date. This represents a practical compromise between the need for temporal urgency and the desirability of public participation in the rulemaking process.

In the spirit of the APA, the agency is soliciting public comment regarding its decision to promulgate these interim regulations and in delaying their effective date only for that period of time necessary to review any relevant comments regarding that decision. Unless the comments show that there exists good cause for not making the regulations effective on an interim basis, the regulations will become effective on an interim basis on the 45th day following the date of publication.

Comments

Consequently, the agency hereby solicits comments on both the substance of these regulations and their intended effective date. The comments should clearly state whether they address the substance of the interim rule or the agency's determination to make the rule effective on an interim basis. If, based on the comments, good cause is shown that the regulations should not become effective on an interim basis, a document will be issued withdrawing

the interim regulations before their effective date. If no such good cause is shown, the interim regulations will go into effect. The agency will then be able to gain experience with the interim regulation, fully consider substantive comments, and decide whether the interim regulation needs amendment before its promulgation as a final rule.

Consideration will be given to any written comments (preferably in triplicate) that are timely submitted to Customs. All such comments received from the public pursuant to this notice of rulemaking will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), during regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Branch, 1099 14th Street, NW., suite 4000, Washington, DC.

Regulatory Flexibility Act and Executive Order 12866

Since this document is not subject to the notice and public procedure requirements of 5 U.S.C. 553, it is not subject to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This document is not a "significant regulatory action" under E.O 12866.

Paperwork Reduction Act

The collections of information contained in this interim rulemaking were previously approved by the Office of Management and Budget (OMB) in accordance with the Paperwork Reduction Act of 1980 under control numbers 1515–0069 (§§ 128.21, 128.23, 128.24) and 1515–0065 (§§ 141.4, 143.23).

Drafting Information

The principal author of this document was Russell Berger, Regulations Branch, U.S. Customs Service. However, personnel from other offices participated in its development.

List of Subjects

19 CFR Part 10

Alterations, Bonds, Customs duties and inspection, Exports, Foreign relations, Imports, Preference programs, Repairs, Reporting and recordkeeping requirements, Trade agreements.

19 CFR Part 101

Customs duties and inspection, Exports, Imports, Organization and functions (Government agencies).

19 CFR Part 111

Administrative practice and procedure, Brokers, Customs duties and inspection, Imports.

19 CFR Part 123

Administrative practice and procedure, Aircraft, Bonds, Canada, Customs duties and inspection, Imports, Mexico, Reporting and recordkeeping requirements, Trade agreements, Vehicles, Vessels.

19 CFR Part 128

Carriers, Couriers, Customs duties and inspection, Express Consignments, Imports.

19 CFR Part 141

Customs duties and inspection, Entry procedures, Invoices, Reporting and recordkeeping requirements.

19 CFR Part 143

Automated broker interface, Customs duties and inspection, Electronic entry filing, Imports, Invoice requirements.

19 CFR Part 145

Customs duties and inspection, Imports, Postal Service.

19 CFR Part 148

Customs duties and inspection, Reporting and recordkeeping requirements.

19 CFR Part 159

Liquidation of entries for merchandise, Suspension of liquidation pending disposition of American manufacturer's cause of action.

Amendments

Title 19, chapter I, parts 10, 101, 111, 123, 128, 141, 143, 145, 148, and 159 of the Customs Regulations (19 CFR parts 10, 101, 111, 123, 128, 141, 143, 145, 148 and 159) is amended as set forth below:

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

1. The general authority for part 10 is revised to read as follows, and the specific section authority for §§ 10.152 and 10.153 is removed:

Authority: 19 U.S.C. 66, 1202, 1321, 1481, 1484, 1498, 1508, 1623, 1624;

* * * * *

2. Part 10 is amended by revising the center heading preceding § 10.151 to read as follows:

Importations Not Over $200 And Bona Fide Gifts

3. Section 10.151 is revised to read as follows:

§ 10.151 Importations not over $200.

Subject to the conditions in § 10.153 of this part, the district director shall pass free of duty and tax any shipment of merchandise, as defined in § 101.1(o) of this chapter, imported by one person on one day having a fair retail value, as evidenced by the bill of lading (or other document filed as the entry) or manifest listing each bill of lading, in the country of shipment not exceeding $200, unless he has reason to believe that the shipment is one of several lots covered by a single order or contract and that it was sent separately for the express purpose of securing free entry therefor or of avoiding compliance with any pertinent law or regulation. Merchandise subject to this exemption shall be entered under the informal entry procedures (see subpart C, part 143, and §§ 128.24, 145.31, 148.12, and 148.62, of this chapter).

4. Section 10.152 is revised to read as follows:

§ 10.152 Bona-fide gifts.

Subject to the conditions in § 10.153 of this part, the district director shall pass free of duty and tax any article sent as a bona-fide gift from a person in a foreign country to a person in the United States, provided that the aggregate fair retail value in the country of shipment of such articles received by one person on one day does not exceed $100 or, in the case of articles sent from a person in the Virgin Islands, Guam, and American Samoa, $200. Articles subject to this exemption shall be entered under the informal entry procedures (see subpart C, part 143, and §§ 145.32, 148.12, 148.51, and 148.64, of this chapter). An article is "sent" for purposes of this section if it is conveyed in any manner other than on the person or in the accompanied or unaccompanied baggage of the donor or donee.

5. Section 10.153 is amended by removing the references to "$50" and "$100" wherever appearing in paragraphs (b), (d)(2), (d)(3) and (f), and by adding in place thereof, respectively, "$100" and "$200".

PART 101—GENERAL PROVISIONS

1. The authority for part 101 is revised to read as set forth below, and the authority citations following §§ 101.1 and 101.4 are removed.

Authority: 5 U.S.C. 301; 19 U.S.C. 2, 66, 1202 (General Note 17, Harmonized Tariff Schedule of the United States), 1623, 1624

2. Section 101.1 is amended by adding a new paragraph (o) to read as follows:

§ 101.1 Definitions.

* * * * *

(o) *Shipment.* "Shipment" means the merchandise described on the bill of lading or other document used to file or support entry, or in the oral declaration when applicable.

PART 111—CUSTOMS BROKERS

1. The general authority for part 111, and the specific section authority for § 111.3, are revised to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 17, Harmonized Tariff Schedule of the United States (HTSUS)), 1624, 1641.

Section 111.3 also issued under 19 U.S.C. 1484, 1498;

* * * * *

2. Section 111.3 is amended by adding a new paragraph (e) to read as follows:

§ 111.3 Transactions for which license is not required.

* * * * *

(e) *Informal entries.* A person entering merchandise qualifying for, and entered under, the informal entry procedures authorized by 19 U.S.C. 1498 is not required to be licensed as a broker, unless required to be so licensed under § 143.26 of this chapter, issued under the authority of 19 U.S.C. 1498.

PART 123—CUSTOMS RELATIONS WITH CANADA AND MEXICO

1. The general authority for part 123, and the specific section authority for §§ 123.12–123.18, are revised to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 17, Harmonized Tariff Schedule of the United States (HTSUS)), 1431, 1624;

* * * * *

Sections 123.12 also issued under 19 U.S.C. 1202 (Chapter 86, Additional U.S. Note 1, HTSUS), 1322;

Sections 123.13–123.18 also issued under 19 U.S.C. 1322;

* * * * *

2. Section 123.12 is amended by revising the first sentence, respectively, of paragraphs (a)(1) and (a)(2), and by revising paragraph (b), to read as follows:

§ 123.12 Entry of foreign locomotives and equipment in international traffic.

(a) * * *

(1) *On inward trip.* Unless formally entered and cleared through Customs into the United States, or unless exempt from entry as provided in § 141.4(b)(4) of this chapter, a foreign locomotive shall be used on the inward trip only in connection with taking the inbound train to the last place in a continuous haul, including the switching of cars which it has hauled into the United States. * * *

(2) *On outward trip.* Unless formally entered and cleared through Customs into the United States, or unless exempt from entry as provided in § 141.4(b)(4) of this chapter, foreign locomotives may be used on the outward trip only in connection with through trains crossing the boundary, including switching to make up such trains. * * *

(b) *Admission of empty equipment.* Empty foreign railroad equipment shall be admitted to the United States without formal entry and payment of duty only if:

(1) The passengers or goods to be loaded are to be transported directly to or through a foreign country; or

(2) The equipment is exempt from entry as provided in § 141.4(b)(4) of this chapter.

* * * * *

PART 128—EXPRESS CONSIGNMENTS

1. The authority for part 128 is revised to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 17, Harmonized Tariff Schedule of the United States (HTSUS)), 1321, 1484, 1498, 1551, 1555, 1556, 1565, 1624.

2. Section 128.21 is amended by revising paragraph (a)(4) to read as follows:

§ 128.21 Manifest requirements.

(a) *Additional information.* * * *

(4) Specific description of the merchandise, and under the following conditions, the Harmonized Tariff Schedule of the United States (HTSUS) subheading number:

(i) If the merchandise is required to be formally entered as provided in § 128.25; or

(ii) If the merchandise is eligible for, and is entered under, the informal entry procedures as provided in § 128.24, but may not be passed free of duty and tax as consisting of a shipment of merchandise imported by one person on one day having a fair retail value in the country of shipment not exceeding $200, as provided in § 128.24(e).

* * * * *

3. Section 128.23 is revised to read as follows:

§ 128.23 Entry requirements.

(a) *General rule.* Except as provided in paragraph (c) of this section, all articles carried by an express consignment entity shall be entered by a person with the right to file entry.

(b) *Procedures*—(1) *General.* All express consignment entities utilizing the procedures in this part shall comply with the requirements of the Customs Automated Commercial System (ACS). These requirements include those under the Automated Manifest System (AMS), Cargo Selectivity, Statement Processing, the Automated Broker Interface System (ABI), and enhancements of ACS.

(2) *Entry number.* All entry numbers must be furnished to Customs in a Customs approved bar coded readable format in order to assist in the processing of express consignment cargo under the Customs Automated Commercial System (ACS).

(3) *Paper entry document waiver.* The district director is authorized, at the time of entry, to accept the appropriate electronic equivalent in lieu of entry documents for those entries designated as not requiring examination or review when the advance manifest requirements of § 128.21(a) of this part have been met.

(c) *Exception.* Articles specifically exempt from entry by § 141.4(b) of this chapter need not satisfy the general rule as set forth in paragraph (a) of this section.

4. Section 128.24 is amended by revising the last sentence of paragraph (b), and the first sentence of paragraph (c), and by revising paragraphs (d) and (e) to read as follows:

§ 128.24 Informal entry procedures.

* * * * *

(b) *Procedures.* * * * The party who may make entry under § 143.26 of this chapter may submit a copy of the invoice or the advance manifest as described in § 128.21 in lieu of other control documents.

(c) *Alternative procedure.* The party who may make entry under § 143.26 of this chapter may be required to submit an individual Customs Form 3461 covering the eligible shipments on a daily basis or by flight basis. * * *

(d) *Entry summary.* An entry summary (Customs Form 7501) must be presented in proper form, and estimated duties deposited within 10 days of the release of the merchandise under either the regular or alternative procedure described in this section. However, see paragraph (e) of this section if the shipment is valued at $200 or less.

(e) *Shipments valued at $200 or less.* Shipments valued at $200 or less meeting the requirements of § 10.151 of this chapter shall be passed free of duty and tax. Such shipments must be segregated from shipments valued at more than $200 if an advance manifest is used as the entry document, as provided for in § 128.21. If such an advance manifest is used as the entry document, the following are not required to be provided for shipments qualifying under this paragraph:

(1) The Harmonized Tariff Schedule of the United States (HTSUS) subheading number (see § 128.21(a)(4)); and

(2) An entry summary (see paragraph (d) of this section).

5. Section 128.25 is revised to read as follows:

§ 128.25 Formal entry procedures.

Formal entry, as provided for under 19 U.S.C. 1484 in parts 141, 142, and 143 (except for subpart C), of this chapter, is required for all shipments exceeding the monetary limitation for informal entry (see § 128.24) and any shipment for which the informal entry procedures may not be used (see § 128.24).

§ 128.26 [Removed]

6. Section 128.26 is removed.

PART 141—ENTRY OF MERCHANDISE

1. The general authority for part 141 continues to read as follows, and the specific section authority for § 141.4 is revised to read as follows:

Authority: 19 U.S.C. 66, 1448, 1484, 1624.

* * * * *

Section 141.4 also issued under 19 U.S.C. 1202 (General Note 13; Chapter 86, Additional U.S. Note 1; Chapter 89, Additional U.S. Note 1; Chapter 98, Subchapter III, U.S. Note 4; Chapter 99, Subchapter V, U.S. Note 9, Harmonized Tariff Schedules of the United States (HTSUS)), 1498;

* * * * *

2. Section 141.4 is revised to read as follows:

§ 141.4 Entry required.

(a) *General.* All merchandise imported into the United States is required to be entered, unless specifically excepted.

(b) *Exceptions.* The following are the exceptions to the general rule:

(1) The exemptions listed in General Note 13 to the Harmonized Tariff Schedule of the United States (HTSUS).

(2) Vessels (not including vessels classified in headings 8903 and 8907 and subheadings 8905.90.10 and 8906.00.10 or in Chapter 98, HTSUS, such as under subheadings 9804.00.35 or 9813.00.35). See also Chapter 89, Additional U.S. Note 1, HTSUS.

(3) Instruments of international traffic described in § 10.41a of this chapter, under the conditions provided for in that section. See also Chapter 98, Subchapter III; U.S. Note 4, HTSUS.

(4) Railway locomotives classified in heading 8601 or 8602, HTSUS, and freight cars classified in heading 8606, HTSUS, on which no duty is owed (see paragraph (d) of this section). See Chapter 86, Additional U.S. Note 1, HTSUS; Chapter 99, Subchapter V, U.S. Note 9, HTSUS; see also 19 CFR part 123 for reporting requirements for railway equipment brought into the United States from Canada or Mexico.

(c) *Undeliverable articles.* The exemption from entry for undeliverable articles under General Note 13(e), HTSUS, is subject to the following conditions:

(1) The person claiming the exemption must submit a certification (documentary or electronic) that:

(i) The merchandise was intended to be exported to a foreign country;

(ii) The merchandise is being returned within 45 days of departure from the United States;

(iii) The merchandise did not leave the custody of the carrier or foreign customs;

(iv) The merchandise is being returned to the United States because it was undeliverable to the foreign consignee; and

(v) The merchandise was not sent abroad to receive benefit from, or fulfill obligations to, the United States as a result of exportation.

(2) Upon request by Customs, the person claiming the exemption shall provide evidence required to support the claim for exemption.

(d) *Railway locomotives and freight cars.* To be excepted from entry, railway locomotives and freight cars described in Additional U.S. Note 1 of Chapter 86, HTSUS, and railway freight cars from Canada described in subheading 9905.86.05 or 9905.86.10, HTSUS, are subject to the following requirements, as applicable:

(1) For a railway freight car described in subheading 9905.86.05, HTSUS, the importer shall certify, subject to Customs verification, that the freight car was produced before July 1, 1991, or if admitted after July 1, 1994, that the freight car was produced not less than 3 years before the date of importation;

(2) For a railway freight car described in subheading 9905.86.10, HTSUS, the importer shall certify, subject to Customs verification, that the freight car will be exported within 1 year from the date of importation. (Any railway freight car admitted into the United States under this provision which is not exported within the 1-year period becomes subject to entry and the payment of any applicable duties.);

(3) For railway locomotives and freight cars described in Additional U.S. Note 1 of Chapter 86, HTSUS, and railway freight cars described in subheading 9905.86.05 or 9905.86.10, HTSUS, to be released in accordance with paragraph (b)(4) of this section, the importer shall first file a bond on Customs Form 301, containing the bond conditions set forth in either § 113.62 or 113.64 of this chapter.

(e) *Informal entry.* Merchandise qualifying for informal entry by regulation, pursuant to 19 U.S.C. 1498, is exempt from formal entry under 19 U.S.C. 1484 and this part, but must be entered as required under applicable regulations (see part 143, subpart C, and §§ 10.151 through 10.153, 128.24, 145.31, 145.32, 148.12, 148.13, 148.51, and 148.62 of this chapter).

PART 143—SPECIAL ENTRY PROCEDURES

1. The authority for part 143 continues to read as follows:

Authority: 19 U.S.C. 66, 1481, 1484, 1498, 1624.

2. Section 143.21 is amended by adding a paragraph (l) to read as follows:

§ 143.21 Merchandise eligible for informal entry.

* * * * *

(l) Shipments of merchandise qualifying for the administrative exemptions under 19 U.S.C. 1321(a)(2) and provided for in—

(1) Section 10.151 or 145.31 of this chapter (certain importations not exceeding $200 in value);

(2) Section 10.152 or 145.32 of this chapter (certain bona-fide gifts not exceeding $100 in value ($200 in the case of articles sent from a person in the Virgin Islands, Guam, or American Samoa)); or

(3) Section 148.51 or 148.64 of this chapter (certain personal or household articles not exceeding $200 in value).

3. Section 143.23 is amended by adding two new paragraphs (i) and (j) to read as follows:

§ 143.23 Form of entry.

* * * * *

(i) A shipment of merchandise not exceeding $1250 in value which is imported by an express consignment operator or carrier and which meets the requirements in § 128.24 of this chapter may be entered as provided in that section.

(j) Except for mail importations (see §§ 145.31 and 145.32 of this chapter), or in the case of personal written or oral declarations (see §§ 148.12, 148.13 and 148.62 of this chapter), a shipment of merchandise not exceeding $200 in value which qualifies for informal entry under 19 U.S.C. 1498 and meets the requirements in § 10.151 or § 10.152 of

this chapter may be entered by presenting the bill of lading or a manifest listing each bill of lading (see §§ 10.151, 10.152 and 128.24(e) of this chapter). The following information is required to be filed as a part of such entry:

(1) Country of origin of the merchandise;

(2) Shipper name, address and country;

(3) Ultimate consignee name and address;

(4) Specific description of the merchandise;

(5) Quantity; and

(6) Value.

4. Section 143.26 is added to read as follows:

§ 143.26 Party who may make informal entry of merchandise.

(a) *Shipments valued between $200 and $1250.* A shipment of merchandise valued between $200 and $1250 which qualifies for informal entry under 19 U.S.C. 1498 may be entered by the owner or purchaser of the shipment or, when appropriately designated by the owner, purchaser, or consignee of the shipment, a Customs broker licensed under 19 U.S.C. 1641.

(b) *Shipments valued at $200 or less.* A shipment of merchandise valued at $200 or less which qualifies for informal entry under 19 U.S.C. 1498 and meets the requirements in 19 U.S.C. 1321(a)(2) (see §§ 10.151, 10.152, 10.153, 145.31, 145.32, 148.51, 148.64, of this chapter) may be entered by the owner, purchaser, or consignee of the shipment or, when appropriately designated by one of these persons, a Customs broker licensed under 19 U.S.C. 1641.

PART 145—MAIL IMPORTATIONS

1. The general authority for part 145 is revised to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 17, Harmonized Tariff Schedule of the United States (HTSUS)), 1624.

* * * * *

2. Section 145.31 is revised to read as follows:

§ 145.31 Importations not over $200 in value.

The district director shall pass free of duty and tax, without preparing an entry as provided for in § 143.12, packages containing merchandise having an aggregate fair retail value in the country of shipment of not over $200, subject to the requirements set forth in §§ 10.151 and 10.153 of this chapter.

3. Section 145.32 is revised to read as follows:

§ 145.32 Bona-fide gifts.

The district director shall pass free of duty and tax, without preparing an entry as provided for in § 145.12, articles sent as bona-fide gifts from persons in foreign countries to persons in the United States having an aggregate fair retail value in the country of shipment not exceeding $100 ($200, in the case of articles sent from persons in the Virgin Islands, Guam, and American Samoa), subject to the requirements set forth in §§ 10.152 and 10.153 of this chapter.

PART 148—PERSONAL DECLARATIONS AND EXEMPTIONS

1. The general authority for part 148 is revised, and the specific section authority for §§ 148.43, 148.51, 148.63, 148.64 and 148.74 continues, to read as follows:

Authority: 19 U.S.C. 66, 1496, 1498, 1624. The provisions of this part, except for subpart C, are also issued under 19 U.S.C. 1202 (General Note 17, Harmonized Tariff Schedule of the United States (HTSUS));

* * * * *

Sections 148.43, 148.51, 148.63, 148.64 and 148.74 also issued under 19 U.S.C. 1321;

* * * * *

§§ 148.12, 148.51, 148.64 [Amended]

2. Sections 148.12(b)(2)(ii), 148.51(b)(1), and 148.64(b)(1) are amended by removing the reference to "$25" where appearing therein, and by adding in its place "$200".

PART 159—LIQUIDATION OF DUTIES

1. The authority for part 159 continues to read as follows:

Authority: 19 U.S.C. 66, 1500, 1624. Subpart C also issued under 31 U.S.C. 5151. Additional authority and statutes interpreted or applied are cited in the text or following the sections affected.

2. Section 159.6 is amended by removing the references to "$10" and "duties" wherever appearing in paragraphs (a), (b) and (c), and by adding in place thereof, respectively, "$20", and "duties, fees, and taxes"; and by revising paragraph (d) to read as follows:

§ 159.6 Difference between liquidated duties and estimated duties.

* * * * *

(d) *Customs duties and fees and internal revenue taxes netted for $20 limit.* The assessments of Customs duties and fees and internal revenue taxes shall be separately stated on the entry at the time of liquidation, but the amounts of any differences shall be netted when applying the $20 minimum for issuance of a bill or refund check.

George J. Weise,

Commissioner of Customs.

Approved: May 26, 1994.

John P. Simpson,

Deputy Assistant Secretary of the Treasury.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Part 660

[FHWA Docket No. 93–16]

RIN 2125–AD13

Forest Highway Portion of Public Lands Highway Program

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: The FHWA is issuing revised Forest Highway (FH) Program regulations to conform to the requirements of the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA). Section 1032 of the ISTEA amends, among other things, 23 United States Code (U.S.C.) 202 and 204 to combine the FH category with the public lands highway category. The revised regulation will ensure expeditious and proper allocation of funds to provide public road access to the National Forest System (NFS).

EFFECTIVE DATE: July 13, 1994.

FOR FURTHER INFORMATION CONTACT: Mr. Allen W. Burden, Chief, Program and Administration Division, Federal Lands Highway Office, (202) 366–9488, Mr. Curtis L. Page, Forest Highway Program Engineer, Federal Lands Highway Office, (202) 366–9489, or Mr. Wilbert Baccus, Office of the Chief Counsel, (202) 366–1396, FHWA, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4 p.m., e.t., Monday through Friday, except legal Federal holidays.

SUPPLEMENTARY INFORMATION: On December 18, 1991, the President signed the ISTEA, Public Law 102–240, 105 Stat. 1914. Section 1032 of the ISTEA amends 23 U.S.C. 202 and 204 by, among other things, incorporating new planning provisions, including metropolitan and statewide transportation plan requirements; establishing management systems provisions, including highway safety, bridges on and off Federal-aid highways, and highway pavements;

adding and revising definitions for key terms relating to the Federal Lands Highway Program; and modifying existing allocation procedures.

The primary purpose of the Federal Lands Highway Program is to provide public road funding to serve the Federal lands outside State or local government responsibility. Typically, the facilities serve recreational travel and tourism, protect and enhance natural resources, provide sustained economic development in rural areas, and provide needed transportation for Native Americans.

The FHWA's partnership with the Forest Service (FS) began in 1916 when the Federal-Aid Road Act appropriated funds for the construction and maintenance of roads and trails serving the national forests. There are currently over 25,000 miles of FHs, on State and local transportation systems, serving 191 million acres of national forest lands in 40 States plus Puerto Rico. These roads connect to the approximately 370,000 miles of forest development roads that are under the jurisdiction of the FS. The fiscal year 1994 (FY 94) authorization for FHs was $113 million. On October 5, 1993, the FHWA published a notice of proposed rulemaking (NPRM) in the **Federal Register** (58 FR 51794). The following discussion addresses comments to the NPRM which were provided to the FHWA.

Development of Regulations

The final rule was developed by an interagency task force of the FHWA and the FS. The FHWA and the FS considered the comments received to the Docket for the regulation in developing the revisions to the NPRM for the final rule.

Relationship to Interim Guidance Issued December 26, 1991

On December 26, 1991, the FHWA issued interim guidance to aid States and the FS in complying with the new legislative requirements. The guidance was developed in consultation with FS headquarters staff and published in the **Federal Register** at 57 FR 14880 on April 23, 1992. This interim guidance is superseded by this regulation.

Conformance

This final rule is in accordance with part 450 of this title.

Written Comments Received to the Docket

Six commenters submitted 29 comments to the Docket regarding the NPRM. One Federal agency and five State highway agencies (SHAs) commented on the NPRM. The majority of commenters offered specific suggestions for revisions. Some also offered minor editorial corrections and text enhancements. Most of the significant comments were directed at § 660.105—Planning and route designation—and at § 660.107—Allocations. All comments were considered and have been accommodated to the extent practical. In response to these comments, the FHWA has developed a final rule. A summary of the specific responses to comments raised on individual sections of the NPRM follows:

Section-by-Section Analysis

Section 660.101 Purpose

Comment: One commenter expressed the need to better describe the importance of the FH Program for access to and management of the NFS and its role as an integral part of the Federal Lands Highway Program.

Response: This section was expanded to better describe how the FH Program enhances local, regional, and national benefits of FHs funded under the Public Lands Highway category of the coordinated Federal Lands Highway Program. The FH Program provides safe and adequate transportation access to and through National Forest System (NFS) lands for visitors, recreationists, resource users, and others which is not met by other transportation programs, assists rural and community economic development, and promotes tourism and travel.

Section 660.103 Definitions

Comment: One commenter suggested that the definition of "public authority" be modified so that a public authority would be required to meet all authorities noted in the NPRM definition by changing the "or" condition to an "and" condition regarding the public authority's authority to finance, build, operate, "or" maintain toll or toll-free facilities.

Response: Because this definition is a title 23, U.S.C., definition, it was not revised, even though the "and" condition would make it more restrictive. Regulations may clarify or explain, but cannot revise, a statutory definition.

Comment: Another commenter suggested revising the definition of "forest road" to include a road which provides "access to" the NFS since many FHs in some States do not meet the criteria of a forest road as indicated by the proposed definition.

Response: This is also a title 23, U.S.C., definition and was not revised in the final rule. The present wording for the definition of "forest road," as stated in 23 U.S.C. 101, is: "The term forest road or trail means a road or trail wholly or partly within, or adjacent to, and serving the NFS and which is necessary for the protection, administration, and utilization of the NFS and the use and development of its resources." This definition is adequate because a road which provides access to the NFS is considered to be serving the NFS. Also, the definition for FH allows for roads providing access to the NFS since it refers to forest roads, the definition of which allows access to the NFS.

Comment: One commenter suggested that the definition of "statewide transportation plan" be clarified by adding the phrase "pursuant to the provisions of part 450 of this title" at the end of the definition.

Response: Similar wording was used in the definition of Metropolitan Planning Organization (MPO) in this section. Therefore, the phrase was added to the end of the definition to clarify it. Also, a definition for "metropolitan transportation plan" was added to this section because the term is used in § 660.105 along with the term "statewide transportation plan," which is also defined in this regulation in § 660.103.

Section 660.105 Planning and Route Designation

Comment: Several of the SHAs expressed the need for clarification of who provides transportation planning, FS resource planning, and management systems information to the States and MPOs for incorporation into the MPOs and transportation improvement programs (TIPs).

Response: Some minor wording changes were made to paragraph (a) of this section to reflect the fact that the FS will provide resource planning and related transportation information to the "appropriate" MPO in accordance with part 450 of this title. This clarification was needed because there are numerous MPOs within some States and the FS should direct the information only to the MPO needing the information.

Comment: Two of the SHAs felt that paragraph (b) should be clarified to delineate the reporting responsibilities for management information systems. One felt the final rule should specify that the State would be responsible for pavement, bridge, and safety management systems where the FH is also a State highway and that cities and counties would be responsible for those management systems where FHs are under city or county jurisdiction. The FS would then be responsible for those

management systems on all other applicable roads.

Response: Title 23, U.S.C., 303 requires the States to develop and implement systems for managing highway pavements of Federal-aid highways (pavement management systems), bridges on and off Federal-aid highways (bridge management systems), and highway safety for all public roads (safety management systems). The results of bridge management systems and safety management systems on all FHs and results of pavement management systems for FHs on Federal-aid highways are to be provided by the SHAs for consideration in the development of programs under § 660.109 of this part. The FHWA will provide appropriate pavement management results for FHs which are not Federal-aid highways. The last two sentences in paragraph (b) were reworded to clarify these procedures and be more in concert with 23 U.S.C. 204(a).

Comment: Two SHAs pointed out the inappropriate reference to the "Federal-aid system" in paragraph (b) when describing who reports pavement management systems results for FHs.

Response: The language of the final rule was revised to refer to "forest highways which are not Federal-aid highways" rather than to "forest highways off the Federal-aid system."

Comment: One commenter recommended that paragraph (c)(1) be clarified by adding the word "forest" before the word "roads" to be more consistent with previous definitions and to clarify candidate roads for nomination. This would clarify the fact that the SHA and the FS will nominate "forest" roads, not just any roads, for FH designation. The FH definition also references forest roads.

Response: Paragraph (c)(1) was revised to make this clarification.

Comment: One commenter suggested that the order of the three criteria for designating FHs in paragraph (d)(1) should be revised to add greater emphasis to the serving of access needs of the NFS.

Response: This comment was accepted. The order of the three items was revised.

Section 660.107 Allocations

Comment: One commenter noted the restrictiveness of the NPRM in that it limits the funding of the allocated portion of the Public Lands Highway Program exclusively to FHs. The commenter further pointed out that the 1991 ISTEA amended 23 U.S.C. 202 by striking the subsection that dealt with FHs as a part of the Public Lands Highway Program with the result that, according to the commenter, one-third of the allocated program may be spent on highways other than FHs. Under this broader definition of Public Lands Highways, the States would have the flexibility to spend the allocated portion of PLH funds on all kinds of highways such as the Bureau of Land Management roads and even Indian Reservation Roads. The "equal consideration" language of the ISTEA, in the commenter's view, would allow for at least half of the allocated funds to be spent on such roads while the NPRM language restricts the allocated portion to FHs only.

Response: The conference report on ISTEA states that "Sixty-six percent of the public lands highway account shall be allocated to the Forest Service regional offices for use in 41 States based on the FH criteria. The remaining 34 percent shall be allocated by the Secretary based on national competition for other forest or public lands highways." (H.R. Conf. Rep. No. 404, 102d Cong., 1st Sess. 331 (1991).) Therefore, the interpretation of 23 U.S.C. 202(b) is as follows:

1. Thirty-four percent of the public lands highway funds shall be allocated in a discretionary manner, giving preference to States that contain at least 3 percent of the total public lands in the nation.

2. Sixty-six percent of the public lands highway funds are to be allocated to the FS Regions in accordance with section 134 of the Surface Transportation and Uniform Relocation Assistance Act of 1987 (STURAA) (Pub. L. 100–17, 101 Stat. 132, 173). Section 134 pertained to the allocation of FH funds, which is part of the Public Lands Highway category. Therefore, the language of this section was not changed.

Comment: Two of the SHAs took exception to the fact that this section requires the allocation of Public Lands Highway Funds by FS Region, citing an apparent inconsistency with section 134 of the STURAA which allocates "for expenditure in each State." It was suggested that, for some States which have more than one FS Region, allocation by FS Region potentially creates difficulties, such as competition or conflicts between States, and that FH funds should continue to be allocated as outlined in the STURAA. Also, because the ISTEA requires that all FS projects be included in each State's "Statewide Transportation Improvement Program" (STIP), allocation of funds by State would make it easier for each State to project available funding and projects for inclusion in its STIP.

Response: The NPRM may have given the appearance that the allocation method is being changed. Actually, the NPRM proposed to continue with the same FH allocation method which has been in existence since FY 85. If FH funds were to be allocated to the States, 34 States would have their "hold harmless" funds reduced by an aggregate total of approximately $90 million per year (based on FY 94 allocation amounts). This represents nearly 85 percent of the total FY 94 FH funds allocation. The regulation will continue with the allocation in its present form.

Comment: One commenter suggested that the word "elements," used in the NPRM to state that the allocation of funds for FHs uses values based on relative transportation needs of the various elements of the NFS, should be replaced with the word "resources." The commenter pointed out that the word "element" is used in the definition of renewable resources and could be construed to limit allocations based on renewable resources only. The commenter also believes the term "resources" was defined to include both renewable and nonrenewable resources and is more appropriate to use in defining the allocation process.

Response: This wording was carried forward from the previous wording of the existing regulation. However, the sentence was clarified by deleting the entire phrase "the various elements of," thereby eliminating the need for referring to either "resources" or "elements." It now refers only to "using values based on relative transportation needs of the NFS."

Section 660.109 Program Development

Comment: One commenter proposed that a seventh FH project selection criterion should be added to the existing six criteria in paragraph (a) of this section. The new criterion, which would read: "The results for forest highways from the pavement, bridge, and safety management systems" is needed to comply with § 660.105(b) of this part, which discusses the management systems required under 23 U.S.C. 134 and 135. It would also have to be consistent with any changes made in 23 U.S.C. 105.

Response: Because management systems provide input to transportation planning and the TIP, this seventh criterion was added to the final rule as worded above.

Comment: One of the SHAs noted that the NPRM, in paragraph (a), stated that: "The FHWA will arrange and conduct a conference with the FS and the State Highway Agency (SHA) to jointly select

the projects which will be included in the programs. * * *" The commenter stated that cooperators (agencies) with jurisdiction over the FHs under consideration should be included in this conference to enhance the regional planning aspect for these projects.

Response: Under current procedures, the State represents the interests of the cooperators. The program meetings are always open to interested cooperators who may wish to attend. The States may invite cooperators to the meetings, if they wish. Thus, there is no need to change the wording of the NPRM.

Comment: The previous commenter also called attention to paragraph (a) of the NPRM which stated that the FS and the SHA will "jointly select the projects which will be included in the programs for the current fiscal year and at least the next 4 years." The commenter recommended that, since the projects selected will ultimately be added to the STIP, the planning and selection of FH projects should cover the same timeframe as the STIP.

Response: Generally, at least 5 years are needed to identify early environmental and other preliminary engineering required to ensure meeting the schedule to advance a project to construction. The proposed FH timeframe is consistent with this since the TIP generally shows 3 years of the 5-year FH program. Thus, there is no need to change the wording of the NPRM.

Comment: One commenter requested that, in paragraph (b) of this section, the term "recommended," as used in the first sentence, "The recommended program will be prepared by the FHWA and concurred in by the FS and the SHA," should be replaced with the term "selected." This would more accurately reflect the current procedure, as stated in paragraph (a), that the FHWA, the FS, and the SHA will "jointly select the projects," not just recommend them. One of the SHAs felt the second sentence should be revised to read, "The FHWA will approve the program 'only when there is concurrence by the FS and the SHA.'" Otherwise, the FHWA could conceivably approve the program without waiting for concurrence by the other two agencies.

Response: A review of this section indicated that the wording of the NPRM may still create some confusion, even with the recommended word changes, because the first two sentences of paragraph (b) state that "The recommended program will be prepared by the FHWA and concurred in by the FS and the SHA" and that "The FHWA will approve the program." This would make it appear that the FHWA simply prepares and approves its own program. Consequently, the wording of the first sentence of this paragraph was revised to read: "The recommended program will be prepared and approved by the FHWA with concurrence by the FS and the SHA." The second sentence was deleted.

Comment: One commenter pointed out that the term "incorporate," as used in the third sentence of NPRM paragraph (b), which states that "the SHA shall advise any other cooperators in the State of the projects included in the final program and shall incorporate the approved program into the STIP," seems vague. It appears to imply that the approved FH program is independent of the regional and statewide STIP planning requirements of the ISTEA. The commenter felt that, although this may be the correct way to handle a program of this nature, the process required to "incorporate" the final program into the STIP should be clarified.

Response: This sentence was clarified by adding the following phrase to the end of the sentence: "And shall include the approved program in the State's process for development of the STIP."

Section 660.111 Agreements

Comment: One commenter felt that the 41 statewide FH agreements currently in effect between the FHWA and the States (including Puerto Rico) should be updated and made into tri-party agreements with the FHWA, the FS, and the SHA. This would perpetuate the "partnership" spirit of the ISTEA and facilitate cooperation among the three agencies. It would also eliminate separate agreements between the FS and the SHA and between the FHWA and the SHA in each State. The wording of this section should be revised by inserting the words "the Forest Service" where necessary, such as after the word "FHWA" in paragraph (a), to include the FS as a signatory agency to the agreements.

Response: Because there are some overall FH procedures that not only involve the SHAs, but the FS as well, tri-party agreements among the FHWA, the FS, and the SHA will be a requirement in the final rule. Because the FHWA and the FS already have separate two-party FH program agreements for all 40 States, plus Puerto Rico, and because the FHWA does not want to delay the FH program until all new tri-party agreements are executed, the first sentence of this section of the NPRM was revised to delete the phrase "prior to the expenditure of any funds by the FHWA in the State."

Section 660.112 Project Development

Comment: One commenter suggested that, in the first sentence of paragraph (a), the phrase "or a public authority" should be added after the words "Projects will be administered by the FHWA." This would acknowledge that the FS may, in some cases, administer the design and construction of FH projects. The same commenter also suggested adding the phrase "and procedures documented in the statewide agreement" to the end of the sentence to allow for items included in statewide agreements to supplement Federal-aid procedures, where appropriate.

Response: Because the FS wants to be able to administer FH projects, this sentence was reworded to add the words "or the FS" instead of "or a public authority." Also, the phrase "and procedures documented in the statewide agreement" was added to the end of the sentence. This will allow the parties to determine the procedures to be followed in a State.

Section 660.113 Construction

Comment: One commenter suggested that the words "a public authority" be substituted for "cooperator" in paragraph (b) of this section. This would allow the FS to perform construction, if appropriate. Cooperators would still be included since they are, by definition, a public authority.

Response: Because other public authorities that might potentially be involved in a project would also be cooperators, the word "cooperator" was kept in the sentence in paragraph (b). However, by adding the words "the FS" after FHWA, the FS will be explicitly allowed to perform construction, if appropriate. Also, paragraph (c), which deals with final acceptance of the project, was revised to clarify the intent. The word "construction" was retained in the language to differentiate acceptance of the construction work (for the purpose of releasing the contractor) from that of acceptance of the entire project, including any extra work required to resolve noncontractor-related matters.

Section 660.115 Maintenance

Comment: In dealing with the same issue discussed in the previous section, as to what constitutes final acceptance of a project, it was suggested by one commenter that the word "construction" be deleted to avoid confusion.

Response: The term "construction" is not incorrect in the context of this paragraph, because it describes the type

of acceptance being made. However, the entire sentence was reworded to clarify and minimize possible confusion. By referencing § 660.113(c), which includes the word "construction," the meaning of the term "construction acceptance" was retained.

Section 660.117 Funding, Records and Accounting

Comment: One commenter suggested deleting the phrase "and the SHAs" from paragraph (e).

Response: Because the term "cooperators" includes SHAs, the phrase was considered redundant and, therefore, deleted.

Comment: One commenter suggested adding the word "Generally" at the beginning of the sentence in paragraph (f) to allow for those special cases where cash is not obtained in advance of construction procurement.

Response: Adding the word "generally" to the sentence makes the requirement too much less restrictive. Instead, the following phrase was added to the end of the last sentence: "Unless otherwise specified in a project agreement." Also, the word "shall" was changed to "should" to allow more flexibility.

Rulemaking Analyses and Notices; Executive Order 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

The FHWA has determined that this action is not major within the meaning of Executive Order 12866 or significant within the meaning of Department of Transportation regulatory policies and procedures. It is anticipated that the economic impact of this rulemaking would be minimal; therefore, a full regulatory evaluation is not required. This rule merely requires the States and Federal agencies to conform to the requirements of the ISTEA. The requirements are basically incremental to what the States and Federal agencies are required to do under the new ISTEA provisions, such as incorporating new planning provisions, including metropolitan and statewide transportation plan requirements; and establishing management systems provisions, including highway safety, bridges on and off Federal-aid highways, and highway pavements.

Regulatory Flexibility Act

In compliance with the Regulatory Flexibility Act (Pub. L. 96–354, 5 U.S.C. 601–612), the FHWA has evaluated the effects of this rule on small entities. Based on the evaluation, the FHWA hereby certifies that this action will not have a significant economic impact on a substantial number of small entities. The revised regulation will not directly affect small businesses because the regulation applies only to Federal agency, State, and local government transportation programs. However, a minor positive secondary effect may result from the employment of small businesses, such as engineering consultant firms, to implement some of the planning and management systems required by the ISTEA.

Executive Order 12612 (Federalism Assessment)

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this action does not have sufficient federalism implications to warrant the preparation of a federalism assessment.

Executive Order 12372 (Intergovernmental Review)

Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.

Paperwork Reduction Act

This action does not contain a collection of information requirement for purposes of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

National Environmental Policy Act

The agency has analyzed this action for the purpose of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) and has determined that this action would not have any effect on the quality of the environment.

Regulation Identification Number

A regulation identification number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

List of Subjects in 23 CFR Part 660

Forest highways, Highways and roads, Public lands highways.

In consideration of the foregoing, the FHWA is amending chapter 1 of title 23, Code of Federal Regulations, part 660, subpart A as set forth below.

Issued on: June 6, 1994.

Rodney E. Slater,

Federal Highway Administrator.

PART 660—SPECIAL PROGRAMS (DIRECT FEDERAL)

1. Part 660, subpart A is revised to read as follows:

Subpart A—Forest Highways

Sec.

660.101 Purpose.
660.103 Definitions.
660.105 Planning and route designation.
660.107 Allocations.
660.109 Program development.
660.111 Agreements.
660.112 Project development.
660.113 Construction.
660.115 Maintenance.
660.117 Funding, records and accounting.

Authority: 16 U.S.C. 1608–1610; 23 U.S.C. 101, 202, 204, and 315; 49 CFR 1.48.

Subpart A—Forest Highways

§ 660.101 Purpose.

The purpose of this subpart is to implement the Forest Highway (FH) Program which enhances local, regional, and national benefits of FHs funded under the public lands highway category of the coordinated Federal Lands Highway Program. As provided in 23 U.S.C. 202, 203, and 204, the program, developed in cooperation with State and local agencies, provides safe and adequate transportation access to and through National Forest System (NFS) lands for visitors, recreationists, resource users, and others which is not met by other transportation programs. Forest highways assist rural and community economic development and promote tourism and travel.

§ 660.103 Definitions.

In addition to the definitions in 23 U.S.C. 101(a), the following apply to this subpart:

Cooperator means a non-Federal public authority which has jurisdiction and maintenance responsibility for a FH.

Forest highway means a forest road under the jurisdiction of, and maintained by, a public authority and open to public travel.

Forest road means a road wholly or partly within, or adjacent to, and serving the NFS and which is necessary for the protection, administration, and utilization of the NFS and the use and development of its resources.

Jurisdiction means the legal right or authority to control, operate, regulate use of, maintain, or cause to be maintained, a transportation facility, through ownership or delegated authority. The authority to construct or maintain such a facility may be derived from fee title, easement, written authorization, or permit from a Federal agency, or some similar method.

Metropolitan Planning Organization (MPO) means that organization designated as the forum for cooperative transportation decisionmaking pursuant to the provisions of part 450 of this title.

Metropolitan Transportation Plan means the official intermodal transportation plan that is developed and adopted through the metropolitan transportation planning process for the metropolitan planning area.

National Forest System means lands and facilities administered by the Forest Service (FS), U.S. Department of Agriculture, as set forth in the Forest and Rangeland Renewable Resource Planning Act of 1974, as amended (16 U.S.C. 1601 note, 1600–1614).

Open to public travel means except during scheduled periods, extreme weather conditions, or emergencies, open to the general public for use with a standard passenger auto, without restrictive gates or prohibitive signs or regulations, other than for general traffic control or restrictions based on size, weight, or class of registration.

Public authority means a Federal, State, county, town, or township, Indian tribe, municipal or other local government or instrumentality with authority to finance, build, operate, or maintain toll or toll-free facilities.

Public lands highway means: (1) A forest road under the jurisdiction of and maintained by a public authority and open to public travel or (2) any highway through unappropriated or unreserved public lands, nontaxable Indian lands, or other Federal reservations under the jurisdiction of and maintained by a public authority and open to public travel.

Public road means any road or street under the jurisdiction of and maintained by a public authority and open to public travel.

Renewable resources means those elements within the scope of responsibilities and authorities of the FS as defined in the Forest and Rangeland Renewable Resource Planning Act of August 17, 1974 (88 Stat. 476) as amended by the National Forest Management Act of October 22, 1976 (90 Stat. 2949; 16 U.S.C. 1600–1614) such as recreation, wilderness, wildlife and fish, range, timber, land, water, and human and community development.

Resources means those renewable resources defined above, plus other nonrenewable resources such as minerals, oil, and gas which are included in the FS's planning and land management processes.

Statewide transportation plan means the official transportation plan that is: (1) Intermodal in scope, including bicycle and pedestrian features, (2) addresses at least a 20-year planning horizon, and (3) covers the entire State pursuant to the provisions of part 450 of this title.

§ 660.105 Planning and route designation.

(a) The FS will provide resource planning and related transportation information to the appropriate MPO and/or State Highway Agency (SHA) for use in developing metropolitan and statewide transportation plans pursuant to the provisions of part 450 of this title. Cooperators shall provide various planning (23 U.S.C. 134 and 135) information to the Federal Highway Administration (FHWA) for coordination with the FS.

(b) The management systems required under 23 U.S.C. 303 shall fulfill the requirement in 23 U.S.C. 204(a) regarding the establishment and implementation of pavement, bridge, and safety management systems for FHs. The results of bridge management systems and safety management systems on all FHs and results of pavement management systems for FHs on Federal-aid highways are to be provided by the SHAs for consideration in the development of programs under § 660.109 of this part. The FHWA will provide appropriate pavement management results for FHs which are not Federal-aid highways.

(c) The FHWA, in consultation with the FS, the SHA, and other cooperators where appropriate, will designate FHs.

(1) The SHA and the FS will nominate forest roads for FH designation.

(2) The SHA will represent the interests of all cooperators. All other agencies shall send their proposals for FHs to the SHA.

(d) A FH will meet the following criteria:

(1) Generally, it is under the jurisdiction of a public authority and open to public travel, or a cooperator has agreed, in writing, to assume jurisdiction of the facility and to keep the road open to public travel once improvements are made.

(2) It provides a connection between adequate and safe public roads and the resources of the NFS which are essential to the local, regional, or national economy, and/or the communities, shipping points, or markets which depend upon those resources.

(3) It serves:

(i) Traffic of which a preponderance is generated by use of the NFS and its resources; or

(ii) NFS-generated traffic volumes that have a substantial impact on roadway design and construction; or

(iii) Other local needs such as schools, mail delivery, commercial supply, and access to private property within the NFS.

§ 660.107 Allocations.

On October 1 of each fiscal year, the FHWA will allocate 66 percent of Public Lands Highway funds, by FS Region, for FHs using values based on relative transportation needs of the NFS, after deducting such sums as deemed necessary for the administrative requirements of the FHWA and the FS; the necessary costs of FH planning studies; and the FH share of costs for approved Federal Lands Coordinated Technology Implementation Program studies.

§ 660.109 Program development.

(a) The FHWA will arrange and conduct a conference with the FS and the SHA to jointly select the projects which will be included in the programs for the current fiscal year and at least the next 4 years. Projects included in each year's program will be selected considering the following criteria:

(1) The development, utilization, protection, and administration of the NFS and its resources;

(2) The enhancement of economic development at the local, regional, and national level, including tourism and recreational travel;

(3) The continuity of the transportation network serving the NFS and its dependent communities;

(4) The mobility of the users of the transportation network and the goods and services provided;

(5) The improvement of the transportation network for economy of operation and maintenance and the safety of its users;

(6) The protection and enhancement of the rural environment associated with the NFS and its resources; and

(7) The results for FHs from the pavement, bridge, and safety management systems.

(b) The recommended program will be prepared and approved by the FHWA with concurrence by the FS and the SHA. Following approval, the SHA shall advise any other cooperators in the State of the projects included in the final program and shall include the approved program in the State's process for development of the Statewide Transportation Improvement Program For projects located in metropolitan areas, the FHWA and the SHA will work with the MPO to incorporate the approved program into the MPO's Transportation Improvement Program

§ 660.111 Agreements.

(a) A statewide FH agreement shall be executed among the FHWA, the FS, and each SHA. This agreement shall set forth the responsibilities of each party, including that of adherence to the applicable provisions of Federal and State statutes and regulations.

(b) The design and construction of FH projects will be administered by the FHWA unless otherwise provided for in an agreement approved under this subpart.

(c) A project agreement shall be entered into between the FHWA and the cooperator involved under one or more of the following conditions:

(1) A cooperator's funds are to be made available for the project or any portion of the project;

(2) Federal funds are to be made available to a cooperator for any work;

(3) Special circumstances exist which make a project agreement necessary for payment purposes or to clarify any aspect of the project; or

(4) It is necessary to document jurisdiction and maintenance responsibility.

§ 660.112 Project development.

(a) Projects to be administered by the FHWA or the FS will be developed in accordance with FHWA procedures for the Federal Lands Highway Program. Projects to be administered by a cooperator shall be developed in accordance with Federal-aid procedures and procedures documented in the statewide agreement.

(b) The FH projects shall be designed in accordance with part 625 of this chapter or those criteria specifically approved by the FHWA for a particular project.

§ 660.113 Construction.

(a) No construction shall be undertaken on any FH project until plans, specifications, and estimates have been concurred in by the cooperator(s) and the FS, and approved in accordance with procedures contained in the statewide FH agreement.

(b) The construction of FHs will be performed by the contract method, unless construction by the FHWA, the FS, or a cooperator on its own account is warranted under 23 U.S.C. 204(e).

(c) Prior to final construction acceptance by the contracting authority, the project shall be inspected by the cooperator, the FS, and the FHWA to identify and resolve any mutual concerns.

§ 660.115 Maintenance.

The cooperator having jurisdiction over a FH shall, upon acceptance of the project in accordance with § 660.113(c), assume operation responsibilities and maintain, or cause to be maintained, any project constructed under this subpart.

§ 660.117 Funding, records and accounting.

(a) The Federal share of funding for eligible FH projects may be any amount up to and including 100 percent. A cooperator may participate in the cost of project development and construction, but participation shall not be required.

(b) Funds for FHs may be used for:

(1) Planning;

(2) Federal Lands Highway research;

(3) Preliminary and construction engineering; and

(4) Construction.

(c) Funds for FHs may be made available for the following transportation-related improvement purposes which are generally part of a transportation construction project:

(1) Transportation planning for tourism and recreational travel;

(2) Adjacent vehicular parking areas;

(3) Interpretive signage;

(4) Acquisition of necessary scenic easements and scenic or historic sites;

(5) Provisions for pedestrians and bicycles;

(6) Construction and reconstruction of roadside rest areas including sanitary and water facilities; and

(7) Other appropriate public road facilities as approved by the FHWA.

(d) Use of FH funds for right-of-way acquisition shall be subject to specific approval by the FHWA.

(e) Cooperators which administer construction of FH projects shall maintain their FH records according to 49 CFR part 18.

(f) Funds provided to the FHWA by a cooperator should be received in advance of construction procurement unless otherwise specified in a project agreement.

RIN 2125–AD09

Removal of Obsolete and Redundant Right-of-Way Requirements

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Correction to final rule.

SUMMARY: This document contains a correction to the authority citation in the final rule published on May 16, 1994 at 59 FR 25326. The final rule related to removal of obsolete and redundant right-of-way requirements.

EFFECTIVE DATE: June 13, 1994.

FOR FURTHER INFORMATION CONTACT: Gerald B. Saunders, Chief, Operations Division, Office of Right-of-Way, HRW–20, (202) 366–0142; or Reid Alsop, Office of Chief Counsel, HCC–31, (202) 366–1371, Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except Federal holidays.

The FHWA hereby corrects the authority citation of 23 CFR part 713 which was published on Monday, May 16, 1994, on page 25327 in FR Doc. 94–11846 to read as follows:

Authority: 23 U.S.C. 101(a), 142(f), 156, and 315; 42 U.S.C. 4633 and 4651–4655; 23 CFR 1.32; 49 CFR 1.48 (b) and (cc), 18.31 and parts 21 and 24.

Issued on: June 6, 1994.

Theodore A. McConnell,

Chief Counsel.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[PA 19–1–6225; FRL–4890–3]

Approval and Promulgation of Air Quality Implementation Plans; Pennsylvania; Stage II Vapor Recovery Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving a State Implementation Plan (SIP) revision submitted by the Commonwealth of Pennsylvania. This revision establishes and requires the use of Stage II vapor recovery at gasoline dispensing facilities in ozone nonattainment areas classified as moderate, serious, or severe in the Commonwealth. The effect of this action is to approve, in a limited fashion, the Pennsylvania regulation requiring Stage II vapor recovery gasoline dispensing facilities (Chapter 129.82) and the associated definition of gasoline dispensing facility in Chapter 121.1. It is also the effect of this action to disapprove, in a limited fashion, Pennsylvania regulation, Chapter 129.82. This action is being taken under section 110 of the Clean Air Act.

EFFECTIVE DATE: This final rule will become effective on July 13, 1994.

ADDRESSES: Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107; Air and Radiation Docket & Information Center, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460; and Pennsylvania Department of Environmental Resources Bureau of Air Quality Control, P.O. Box 8468, 400 Market Street, Harrisburg, Pennsylvania 17105.

FOR FURTHER INFORMATION CONTACT: Cynthia H. Stahl, (215) 597–9337.at the EPA Region III address.

SUPPLEMENTARY INFORMATION: On November 29, 1993 (58 FR 62560), EPApublished a notice of proposed rulemaking (NPR) for the Commonwealth of Pennsylvania. The NPR proposed two actions: (a) A limited approval/limited disapproval of the Pennsylvania Stage II vapor recovery regulation, Chapter 129.82 submitted on March 4, 1992; and (b) approval of Chapter 129.82 as supplemented by section 6.7(b), (c), and (h) and section 17(2) of the Pennsylvania Air Pollution Control Act as amended on June 29, 1992. EPA proposed the approval of Chapter 129.82 as supplemented by sections of the Pennsylvania Air Pollution Control Act in the event that Pennsylvania submitted those sections of the Pennsylvania Air Pollution Control Act as a formal SIP revision.

Since Pennsylvania has not submitted the applicable sections from its Air Pollution Control Act as amended on June 29, 1992. EPA is withdrawing its proposed approval of Chapter 129.82 as supplemented by section 6.7(b), (c), and (h) and section 17(2) of the Pennsylvania Air Pollution Control Act, as amended on June 29, 1992. Therefore, this notice is a final rulemaking action of the March 4, 1992 submittal alone.

Other specific requirements of Pennsylvania's Stage II regulation and the rationale for EPA's proposed action are explained in the NPR and will not be restated here. Only one comment pertaining to the NPR was received. The Pennsylvania Department of Environmental Resources (DER) requested that EPA withhold final action on the Stage II vapor recovery regulation submitted on March 4, 1992 until EPA resolves the issues concerning applicability of Stage II in moderate ozone nonattainment areas. EPA has no issues to resolve concerning Stage II in moderate ozone nonattainment areas. The onboard vapor recovery requirements required to be issued prior to January 22, 1994 do not affect requirements in the Pennsylvania Stage II regulation, Chapter 129.82. States are free to continue to enforce Stage II regulations in moderate ozone nonattainment areas, even after the promulgation of onboard vapor recovery requirements by EPA. Therefore, EPA is finalizing its limited approval/limited disapproval of the Pennsylvania Stage II regulation, Chapter 129.82, and the associated definition of gasoline dispensing facilities located in Chapter 121.1, which is applicable in moderate, serious and severe ozone nonattainment areas in the Commonwealth.

Final Action

EPA is approving the definition of gasoline dispensing facility in Chapter 121 and the Stage II vapor recovery requirements in Chapter 129.82 as a revision to the Pennsylvania SIP. EPA is also disapproving the Stage II vapor recovery requirements in Chapter 129.82 for the limited purpose of allowing Pennsylvania the opportunity to correct the testing and certification requirement deficiencies previously identified by EPA. This final limited disapproval begins the 18 month sanctions clock for the Pennsylvania Stage II regulation.

Because of the previously identified deficiencies, EPA cannot grant full approval of this rule under section 110(k)(3) and part D. Also, because the submitted rule is not composed of separable parts which meet all the applicable requirements of the CAA, EPA cannot grant partial approval of the rule under section 110(k)(3).

However, EPA may grant a limited approval of the submitted rule(s) under section 110(k)(3) in light of EPA's authority pursuant to section 301(a) to adopt regulations necessary to further air quality by strengthening the SIP. The approval is limited because EPA's action also contains a simultaneous limited disapproval, due to the fact that the rule does not meet the section 182(b)(3) requirement of part D because of the noted deficiencies. Thus, EPA is approving the Pennsylvania Stage II vapor recovery regulation, Chapter 129.82 submitted under section 110(k)(3) and 301(a) of the CAA for the limited purpose of strengthening the Pennsylvania SIP.

SIP approvals under section 110 and subchapter I, part D of the Clean Air Act do not create any new requirements but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP approval does not impose any new requirements, the Administrator certifies that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the Federal-State relationship under the CAA, preparation of a flexibility analysis would constitute Federal inquiry into the economic reasonableness of state action. The Clean Air Act forbids EPA to base its actions concerning SIP's on such grounds. *Union Electric Co.* v. *U.S. EPA*, 427 U.S. 246, 255–66 (1976); 42 U.S.C. 7410(a)(2).

EPA is also disapproving the Pennsylvania Stage II rule because it contains deficiencies that have not been corrected and, as such, the rule does not fully meet the requirements of section 182(b)(3) of the Act. Under section 179(a)(2), if the Administrator disapproves a submission under section 110(k) for an area designated nonattainment, based on the submission's failure to meet one or more of the elements required by the Act, the Administrator must apply one of the sanctions set forth in section 179(b) unless the deficiency has been corrected within 18 months of such disapproval. Section 179(b) provides two sanctions available to the Administrator: highway funding and offsets. The 18 month period referred to in section 179(a) begins at the time EPA publishes final notice of this disapproval. Moreover, the final disapproval triggers the Federal implementation plan (FIP) requirement under section 110(c). The 18 month sanctions clock for the Pennsylvania Stage II vapor recovery regulation begins on June 13, 1994.

EPA's disapproval of the State request under section 110 and subchapter I, part D of the CAA does not affect any existing requirements applicable to small entities. Any pre-existing Federal requirements remain in place after this disapproval. Federal disapproval of the state submittal does not affect its state-enforceability. Moreover, EPA's disapproval of the submittal does not impose any new Federal requirements. Therefore, EPA certifies that this disapproval action does not have a significant impact on a substantial number of small entities because it does not remove existing requirements and impose any new Federal requirements.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

This action has been classified as a Table 2 action for signature by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by an October 4, 1993 memorandum from Michael H. Shapiro, Acting Assistant Administrator for Air and Radiation. On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 SIP revisions from the requirements of section 3 of Executive Order 12291 for a period of two years. The USEPA has submitted a request for a permanent waiver for Table 2 and 3 SIP revisions. The OMB has agreed to continue the waiver until such time as it rules on USEPA's request. This request is still applicable under Executive Order 12866, which superseded Executive Order 12291 on September 30, 1993.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action, pertaining to the Pennsylvania Stage II regulation, Chapter 129.82, must be filed in the United States Court of Appeals for the appropriate circuit by August 12, 1994. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements.

Dated: April 14, 1994.

Stanley L. Laskowski,

Acting Regional Administrator, Region III.

40 CFR part 52 is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart NN—Pennsylvania

2. Section 52.2020 is amended by adding paragraph (c)(89) to read as follows:

§ 52.2020 Identification of plan.

* * * * *

(c) * * *

(89) Revisions to the Pennsylvania Regulations, Chapter 129.82 pertaining to Stage II Vapor Recovery and the associated definition of gasoline dispensing facilities in Chapter 121.1 submitted on March 4, 1992 by the Pennsylvania Department of Environmental Resources:

(i) Incorporation by reference.

(A) Letter of March 4, 1992 from the Pennsylvania Department of Environmental Resources transmitting Chapter 121.1, definition of gasoline dispensing facilities, and Chapter 129.82 pertaining to regulations for Stage II vapor recovery in moderate, serious and severe ozone nonattainment areas in the Commonwealth.

(B) Pennsylvania Bulletin (Vol. 22, No. 8) dated February 8, 1992 containing the definition of gasoline dispensing facility in Chapter 121.1 and the Stage II vapor recovery regulations contained in Chapter 129.82, effective on February 8, 1992.

(ii) Additional material.

(A) Remainder of March 4, 1992 State submittal.

3. Section 52.2023 is amended by adding paragraph (i) to read as follows:

§ 52.2023 Approval status.

* * * * *

(i) Limited approval/limited disapproval of revisions to the Pennsylvania Regulations, Chapter 129.82 pertaining to Stage II Vapor Recovery and the associated definition of gasoline dispensing facilities in Chapter 121.1 submitted on March 4, 1992 by the Pennsylvania Department of Environmental Resources. The Pennsylvania Stage II regulation is deficient in that it does not include the testing and certification procedures contained in EPA's October 1991 Stage II guidance documents (EPA–450/3–91–022a and EPA–450/3–91–022b).

BILLING CODE 1505–01–D

DEPARTMENT OF COMMERCE

National Ocenic and Atmospheric Administration

50 CFR Part 216

[Docket No. 940667–4167; I.D. 053194B]

RIN 0648–AG34

Taking and Importing of Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; with request for comments.

SUMMARY: NMFS implements provisions of the International Dolphin Conservation Act (IDCA) that make it unlawful, after June 1, 1994, for any person, to sell, purchase, offer for sale, transport, or ship, in the United States, any tuna or tuna product that is not dolphin safe. The intent of this action is to ensure that the U.S. market does not act as an incentive to the harvest of tuna caught in association with dolphins or with driftnets.

DATES: This rule is effective June 2, 1994. Comments on this rule must be received or postmarked on or before August 12, 1994.

ADDRESSES: Comments should be sent to: Director, Southwest Region, NMFS, 501 W. Ocean Blvd., Suite 4200, Long Beach, CA 90802–4213.

FOR FURTHER INFORMATION CONTACT: LT Dana Wilkes, NMFS, 310–980–4000.

SUPPLEMENTARY INFORMATION:

Background

NMFS is required to monitor the importation of certain fish and fish products to ensure compliance with various provisions of the Marine Mammal Protection Act (MMPA), as amended by the IDCA and the Dolphin Protection Consumer Information Act (DPCIA). The IDCA states, among other things, that "It is the policy of the United States.. to ensure that the market of the United States does not act as an incentive to the harvest of tuna caught in association with dolphins or with driftnets."

The IDCA makes it unlawful, after June 1, 1994, for any person to sell, purchase, offer for sale, transport, or ship, in the United States, any tuna or tuna product that is not dolphin safe.

Tuna, or a tuna product, is not dolphin safe if it contains tuna that was harvested on the high seas by a vessel engaged in fishing with driftnets 2.5 km or longer in length ("large-scale driftnets"). As of May 31, 1994, the Secretary had not identified any nation whose vessels are engaging in fishing with large-scale driftnets.

Tuna or a product containing tuna that was harvested in the eastern tropical Pacific Ocean (ETP) by a vessel 400 short tons (362.8 metric tons (mt)) carrying capacity or greater, is dolphin safe only if it is accompanied by two written statements: one executed by the captain of the vessel that harvested the tuna, certifying that purse seine nets were not intentionally deployed on or to encircle dolphins at any time during the fishing trip (captain's statement); and the other from a NMFS or Inter-American Tropical Tuna Commission official certifying that there was an approved observer on board the vessel during the entire trip and that purse seine nets were not intentionally deployed during the trip on, or to encircle, dolphins (observer's statement). Both the captain's and the observer's statements must be endorsed in writing by each exporter, importer, and processor of the product.

Tuna or a product containing tuna harvested outside the ETP by a purse seine vessel, is dolphin safe if it is accompanied by a captain's statement, certifying that no purse seine net was intentionally deployed on, or to encircle, dolphins during the particular voyage on which the tuna was harvested.

Tuna or a product containing tuna harvested outside the ETP by a purse seine vessel in a fishery in which the Secretary has determined that a regular and significant association occurs between marine mammals and tuna, and in which tuna is harvested through the use of purse seine nets deployed on, or to encircle, marine mammals, is dolphin safe if it is accompanied by a captain's statement and an observer's statement. As of May 31, 1994, the Secretary had not made such a determination.

NMFS anticipates that the dolphin-safe documentation requirements of the IDCA and this final rule will primarily affect tuna harvested with purse seine nets outside of the ETP. In accordance with the importation requirements of 50 CFR 216.24(e), all tuna, other than fresh, is required to be accompanied by a NOAA Form 370 "Fisheries Certificate

of Origin" (FCO) upon importation into the United States. NMFS believes that most tuna marketed in the United States (U.S.-harvested, as well as imports) is labeled "dolphin safe" in accordance with DPCIA labeling standards. Therefore, most tuna harvested in the ETP by purse seine vessels 400 short tons (362.8 mt) carrying capacity or greater and sold in the United States meets the dolphin-safe documentation requirements (i.e., it is accompanied by an FCO, as well as captain's and observer's statements and endorsements). For imported tuna harvested outside the ETP by a purse seine vessel, this regulation requires that a captain's statement be attached to the FCO. In addition, for tuna harvested outside the ETP by a U.S. purse seine vessel, this regulation requires a captain's statement. The FCO's must be endorsed by each exporter, importer, and processor of the tuna, as described above.

The U.S. Customs Service (USCS) controls the importation of tuna and tuna products into the United States. USCS will verify that a captain's statement accompanies shipments of tuna and tuna product containing tuna harvested by purse seine outside the ETP, and that a captain's statement and an observer's statement, endorsed in writing by every exporter, importer, and processor, accompany tuna or tuna product containing tuna harvested by purse seine in the ETP.

This rule is codified in 50 CFR 216.24(e)(9). The former text of paragraph 216.24(e)(9) that is replaced by this regulation was effective only through 1986. Therefore, deletion of that language has no regulatory effect

Classification

This rule codifies statutory requirements and prohibitions that became effective pursuant to the IDCA after June 1, 1994. Therefore, under authority set forth at 5 U.S.C. 553(b)(B), good cause exists to waive the notice and comment requirements of the Administrative Procedure Act as such procedures are unnecessary. Further, in that this rule incorporates a statutory requirement already in effect, good cause exists under 5 U.S.C. 553(d)(3) to waive the 30-day delay in effective date.

This rule has been determined to be not significant for purposes of E.O. 12866.

This rule contains collection-of-information requirements subject to the Paperwork Reduction Act. The collections found at 50 CFR 216.24(e) have been previously approved by the Office of Management and Budget (OMB) under Control Number 0648–0040 for tuna or a tuna product that contains tuna harvested in the ETP by purse seine vessels of 400 short tons (362.8 metric tons) carrying capacity or greater and that is labeled "dolphin safe." The public reporting burden for this collection was previously estimated to be 0.66 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information (56 FR 47418, September 19, 1991). The IDCA now mandates that the same reporting requirement apply to all tuna or tuna products containing tuna harvested by purse seine in the ETP by these vessels, and it is expected that the same reporting burden will apply. In addition, all tuna or tuna products containing tuna harvested by purse seine vessel outside the ETP must now be accompanied by the captain's statement described above. The reporting burden for the completion of the captain's statement for tuna harvested by purse seine outside of the ETP is estimated to be 0.083 hours per response. Also, tuna harvested outside the ETP must now be accompanied by an FCO and captain's statement. Send comments regarding this burden estimate or on any other aspect of this collection of information, including suggestions for reducing this burden, to the Director, Southwest Region, NMFS (see ADDRESSES) and to the Office of Management and Budget, Paperwork Reduction Project 0648–0400, Washington, D.C. 20503 (Attn: NOAA Desk Officer).

List of Subjects in 50 CFR Part 216

Administrative practice and procedure, Imports, Indians, Marine mammals, Penalties, Reporting and recordkeeping requirements, Transportation.

Dated: June 6, 1994

Charles Karnella,

Acting Program Management Officer, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 216 is amended as follows:

PART 216—REGULATIONS GOVERNING THE TAKING AND IMPORTING OF MARINE MAMMALS

1. The authority citation for part 216 continues to read as follows:

Authority: 16 U.S.C. 1361 *et seq.*

2. In § 216.24, the heading of paragraph (e) is revised and paragraph (e)(9) is revised to read as follows:

§ 216.24 Taking and related acts incidental to commercial fishing operations.

* * * * *

(e) *Importation, purchase, shipment, sale and transport.*

(9) *Dolphin safe requirements.* (i) It is unlawful for any person to sell, purchase, offer for sale, transport, or ship in the United States, any tuna or tuna product that is not dolphin safe.

(ii) For purposes of this section, tuna or a tuna product is dolphin safe if:

(A) It does not contain tuna that was harvested on the high seas by a vessel engaged in large-scale driftnet fishing;

(B) In the case of tuna or tuna product that contains tuna harvested in the ETP by a purse seine vessel, either the purse seine vessel is of less than 400 short tons (362.8 metric tons (mt)) carrying capacity or, if the purse seine vessel is of 400 short tons (362.8 mt) carrying capacity or greater, the tuna or tuna product is accompanied by:

(*1*) A completed Fisheries Certificate of Origin;

(*2*) A written statement by the captain of each vessel that harvested the tuna, certifying that the vessel did not intentionally deploy a purse seine net on, or to encircle, dolphins at any time during the trip; a written statement, signed by either the Secretary or a representative of the Inter-American Tropical Tuna Commission, certifying that an observer employed by or working under contract with the Inter-American Tropical Tuna Commission or the Secretary, was on board the vessel during the entire trip and that the vessel did not intentionally deploy a purse seine net on, or to encircle, dolphin at any time during the trip; and

(*3*) An endorsement on the Fisheries Certificate of Origin by each exporter, importer, and processor certifying that, to the best of his or her knowledge and belief, the Fisheries Certificate of Origin and attached documents, and the statements required by this paragraph (e)(9)(ii) accurately describe the tuna products;

(C) In the case of tuna or a tuna product containing tuna harvested outside the eastern tropical Pacific Ocean by a purse seine vessel, it is accompanied by a written statement, executed by the captain of the vessel, certifying that no purse seine net was intentionally deployed on, or to encircle, dolphins during the particular voyage on which the tuna was harvested; and

(D) In the case of tuna or a tuna product containing tuna harvested outside the ETP by a purse seine vessel in a fishery in which the Secretary has determined that a regular and significant association occurs between

marine mammals and tuna, and in which tuna is harvested through the use of purse seine nets deployed on, or to encircle, marine mammals, it is accompanied by a written statement, executed by the captain of the vessel and by an observer, certifying that no purse seine net was intentionally deployed on, or to encircle, marine mammals during the particular voyage on which the tuna was harvested.

(iii) *Submission of documentation.*—(A) *Imported tuna or tuna product.* The documents required by paragraph (e)(9)(ii) of this section must accompany the imported tuna or tuna product until no further endorsements are required on the documentation and the documents have been submitted to officials of the U.S. Customs Service at the time of importation.

(B) *U.S. domestic shipments.* The documents required by paragraph (e)(9)(ii) of this section must accompany tuna or tuna product, other than imported, until no further endorsements are required on the documentation and the documents have been submitted to the Director, Southwest Region, National Marine Fisheries Service, 501 W. Ocean Boulevard, Suite 4200, Long Beach, CA 90802.

50 CFR Part 301

[Docket No. 931235–4107; I.D. 060694F]

Pacific Halibut Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of inseason action.

SUMMARY: The Assistant Administrator for Fisheries, NOAA, on behalf of the International Pacific Halibut Commission (IPHC),publishes notice of this inseason action pursuant to IPHC regulations approved by the United States Government to govern the Pacific halibut fishery. This action is intended to enhance the conservation of Pacific halibut stocks in order to help sustain them at an adequate level in the northern Pacific Ocean and Bering Sea.

EFFECTIVE DATE: May 26, 1994.

FOR FURTHER INFORMATION CONTACT: Steven Pennoyer, telephone 907-586-7221; Gary Smith, telephone 206-526-6140; or Donald McCaughran, telephone 206-634-1838.

SUPPLEMENTARY INFORMATION: The IPHC, under the Convention between the United States of America and Canada for the Preservation of the Halibut Fishery of the Northern Pacific Ocean and Bering Sea (signed at Ottawa, Ontario, on March 2, 1953), as amended by a Protocol Amending the Convention (signed at Washington, DC, on March 29, 1979), has issued this inseason action pursuant to IPHC regulations governing the Pacific halibut fishery. The regulations have been approved by the Secretary of State of the United States of America (58 FR 17791, April 6, 1993). On behalf of the IPHC, this inseason action is published in the **Federal Register** to provide additional notice of its effectiveness, and to inform persons subject to the inseason action of the restrictions and requirements established therein.

Inseason Action

1994 Halibut Landing Report No. 3

North Washington Coast Sport Fishery to Close

The north Washington coast (waters west of the Bonilla-Tatoosh line and south to the Queets River) sport halibut harvest through May 22 is 47,699 lb (21.6 mt). It is anticipated that the catch limit of 68,039 lb (30.9 mt) for this area will be reached on May 28. Therefore, the sport halibut fishery in this area will close at 11:59 p.m. on May 28, and remain closed for the remainder of 1994.

Anglers have landed an estimated 6,500 lb (3.0 mt) of Pacific halibut in Neah Bay, WA, that were caught in Canadian waters. Fishing remains open in Canadian waters with a two fish daily bag limit, no size restriction. Anglers desiring to fish in Canadian waters are strongly urged to contact Canada Department of Fisheries and Oceans at (604) 666-0383/0583 for sport fishing information concerning licensing and the nautical description of closed areas.

Dated: June 7, 1994.

David S. Crestin,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

50 CFR Part 675

[Docket No. 931100–4043; I.D. 060894A]

Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is prohibiting retention of Greenland turbot in the Bering Sea subarea (BS) of the Bering Sea and Aleutian Islands management area (BSAI). NMFS is requiring that catches of Greenland turbot in the BS be treated in the same manner as prohibited species and discarded at sea with a minimum of injury. This action is necessary because the Greenland turbot total allowable catch (TAC) in the BS has been reached.

EFFECTIVE DATE: 12 noon, Alaska local time (A.l.t.), June 8, 1994, until 12 midnight, A.l.t., December 31, 1994.

FOR FURTHER INFORMATION CONTACT: Michael L. Sloan, 907–586-7228.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the BSAI exclusive economic zone is managed by the Secretary of Commerce according to the Fishery Management Plan for the Groundfish Fishery of the BSAI Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 675.

In accordance with § 675.20(a)(7)(ii), the Greenland turbot TAC for the BS was established by the final 1994 initial specifications of groundfish (59 FR 7656, February 16, 1994) and subsequent apportionment of reserve (59 FR 21673, April 26, 1994) as 4,667 metric tons.

The Director, Alaska Region, NMFS has determined in accordance with § 675.20(a)(9), that the Greenland turbot TAC in the BS has been reached. Therefore, NMFS is requiring that further catches of Greenland turbot in the BS be treated as prohibited species in accordance with § 675.20(c)(3), effective from 12 noon, A.l.t., June 8, 1994, until 12 midnight, A.l.t., December 31, 1994.

Classification

This action is taken under § 675.20 and is exempt from OMB review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: June 8, 1994.

David S. Crestin,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 59, No. 112
Monday, June 13, 1994

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 9

[Docket No. PRM–9–2]

Ohio Citizens for Responsible Energy, Inc.; Receipt of Petition for Rulemaking

AGENCY: Nuclear Regulatory Commission.

ACTION: Petition for rulemaking; notice of receipt.

SUMMARY: The Nuclear Regulatory Commission (NRC) is publishing for public comment a notice of receipt of a petition for rulemaking dated February 10, 1994, which was filed with the Commission by Ohio Citizens for Responsible Energy, Inc. (OCRE). The petition was docketed by the NRC on February 15, 1994, and has been assigned Docket No. PRM–9–2. OCRE filed an amendment to the petition which was docketed by the NRC on April 11, 1994. The petitioner requests, that the NRC amend its regulations to establish public right-to-know provisions that would ensure public access to licensee-held information.

DATES: Submit comments by August 29, 1994. Comments received after this date will be considered if it is practical to do so but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: Submit written comments to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch.

Deliver comments to 11555 Rockville Pike, Rockville, Maryland, between 7:45 am and 4:15 pm on Federal workdays.

For a copy of the petition, write the Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

The petition and copies of comments received may be inspected and copied for a fee at the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC.

FOR FURTHER INFORMATION CONTACT: Michael T. Lesar, Chief, Rules Review Section, Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: 301–415–7163 or Toll Free: 800–368–5642.

SUPPLEMENTARY INFORMATION:

Background

The regulations specified in 10 CFR Part 9 address the public's right of access to information held by NRC. Subpart A prescribes procedures for making NRC agency records available to the public for inspection and copying under the Freedom of Information Act (FOIA) and provides notice of procedures for obtaining NRC records otherwise publicly available. Subpart B implements the provisions of the Privacy Act of 1974 with respect to the procedures by which individuals may determine the existence of, seek access to, and request correction of NRC records concerning themselves. Subpart B also covers the requirements applicable to NRC personnel with respect to the use and dissemination of such records.

The Petitioner

On February 10, 1994, OCRE filed a petition for rulemaking under 10 CFR 2.802 with the NRC. OCRE filed an amendment to the petition on April 11, 1994. The petitioner is a private, not-for-profit organization incorporated under the laws of the State of Ohio. OCRE specializes in research and advocacy on nuclear safety issues and supports the highest standards of safety and environmental protection. OCRE also supports the right of meaningful public participation in the regulation of nuclear facilities. The petitioner was an intervenor in the operating license proceeding for the Perry Nuclear Power Plant and has intervened in three operating license amendment cases regarding Perry.

Reasons for the Petition

According to the petitioner, the purpose of the petition is to request a change to the rules regarding public access to information as stated in 10 CFR part 9, particularly information that is held by licensees but is not submitted to the NRC. OCRE contends that it has observed a trend in the NRC's regulatory practice in the past several years that decreases the amount of information to which the public has access. The petitioner believes that this trend is apparent in NRC bulletins and generic letters issued over the past six years. OCRE states that these documents instruct licensees to send conclusory statements that they have completed the requested actions to the NRC instead of instructing licensees to send the NRC detailed documentation and analyses of their actions. The detailed records are kept at the plant site where they are accessible only to NRC inspectors. The petitioner is particularly concerned because if these materials are never sent to the NRC, they will not get into the Public Document Room and the public will never have access to them. OCRE further states that the materials will not even be obtainable under the FOIA unless an NRC inspector happens to make a copy of the requested documents and the documents are still in the agency's possession at the time the FOIA request is filed.

OCRE refers to the Station Blackout rule in § 50.63(a)(2), which states that "the capability for coping with a station blackout of specified duration shall be determined by an appropriate coping analysis. Utilities are expected to have the baseline assumptions, analyses, and related information used in their coping evaluations available for NRC review." It is not apparent to the petitioner that this material is actually sent to the NRC and made publicly available.

The petitioner believes that other regulatory trends are also decreasing public access to information. OCRE states that the Technical Specification Improvement Program encourages the removal of material from the plant technical specifications and the relocation of it to internal plant documents. The petitioner included a list of recent generic letters that enable licensees to relocate material from the plant technical specifications, a public document, into other plant documents that may not be available to the public. According to the petitioner, about 36 percent of current technical specification material will be relocated to internal plant documents under this program.

The petitioner states that NRC's revised rules of practice place an even greater burden on public petitioners to provide as much documentation and factual basis for contentions as early as possible while the access of petitioners to detailed information is diminishing. The petitioner further states that if detailed information is never submitted to the NRC, and thus never becomes accessible to the public, participants in proceedings will never be able to supply a basis sufficient to support admission of contentions under the new rules of practice.

OCRE believes that lack of public access to information on nuclear regulation undermines public confidence in the NRC's regulatory program and is contrary to the public's statutory right to participate in the NRC regulatory process. The petitioner also states that members of the public cannot fulfill the role of participating in the NRC regulatory process, which Congress has bestowed upon them, without access to the detailed information that current NRC policies are placing beyond the public's reach.

In the amendment to the petition, OCRE cited two additional examples of the lack of public access to licensee-held information. The first example is NRC's proposed rule entitled "Codes and Standards for Nuclear Power Plants; Subsection IWE and Subsection IWL" (59 FR 979, January 7, 1994), which states that "In order to further reduce the burden on licensees and NRC staff, the Subsection IWE and IWL portions of the ISI plan will not have to be submitted to the NRC for approval. Licensees may simply retain their initial Subsection IWE and Subsection IWL plans at the site for audit." The second example is NRC's final rule entitled "Storage of Spent Fuel in NRC-Approved Storage Casks at Power Reactor Sites" (55 FR 29161, July 18, 1990) which does not appear to require nuclear power plant users of the approved storage casks to submit their site-specific evaluations, as required by § 72.212(b)(2), to the NRC. This section states that "A copy of this record must be retained until spent fuel is no longer stored under the general license issued under § 72.210." The petitioner further states that § 72.212(b)(10) only requires that general licensees make records available to the NRC for inspection.

In the amendment to the petition, the petitioner amended the language in its suggested § 9.301(b) to include persons required by the proposed rule entitled "Certification of Gaseous Diffusion Plants," published on February 11, 1994 (59 FR 6792), to obtain NRC certification of gaseous diffusion plants under proposed Part 76 in the definition of "possessor." OCRE requests that the NRC clarify that this proposed definition would include entities authorized to dispose of radioactive materials.

The petitioner recommends a change to Part 9 to establish the public's right-to-know and to provide the public access to copies of internal plant documents, subject to the exceptions necessary to protect sensitive information. The suggested amendment would not require that licensees generate information that does not already exist in response to a request. The petitioner believes that its suggested amendment would strike a proper balance between the public's right to know and the rights of the licensees.

The petitioner's suggested amendment would include appeal procedures. If a requester is not satisfied with a licensee's response to a request for information, the requester could appeal the matter to an Administrative Law Judge on the Atomic Safety and Licensing Board Panel. According to the petitioner, this option is the most appropriate and efficient one for appeals.

OCRE believes that its suggested amendment to Part 9 would impose a minimal burden on licensees and that this minor burden would be justified by the substantial increase in meaningful public participation. According to the petitioner, the proposed amendment to Part 9 would also enhance the public's confidence in the NRC's regulatory program.

The Suggested Amendments

The petitioner requests that the NRC amend 10 CFR Part 9 by adding subpart E to read as follows:

Subpart E—Public Right of Access to Licensee-Held Information

Section 9.300 Scope of Subpart

This subpart establishes the public's right of access to licensee-held information, subject to certain exceptions. This subpart sets forth the procedures to be followed by persons requesting documents held by NRC licensees or applicants and by the licensees or applicants in responding to requests for documents. This subpart also establishes procedures for appealing adverse licensee responses to public requests for records.

Section 9.301 Definitions

As used in this subpart,

(a) "Person" has the meaning given in 10 CFR 2.4.

(b) "Possessor" means any holder of or applicant for any license to possess, use, dispose of, and/or transfer source material, byproduct material, special nuclear material, and/or spent fuel, or to construct, manufacture, possess, own, operate, and/or transfer any production or utilization facility or independent spent fuel storage installation, or any holder of or applicant for any construction permit, or any holder of or applicant for an early site permit under subpart A of 10 CFR part 52, or any holder of or applicant for a standard design certification under subpart B of part 52, or any holder of or applicant for a certificate of compliance or approved compliance plan under part 76.

(c) "Record" means any document, writing, book, data, paper, brochure, photograph, punch card, magnetic tape or disk, paper tape, sound recording, pamphlet, slide, motion picture, map, drawing, graph, correspondence, contract, report, microfilm, microfiche, optical storage medium, or other documentary material, regardless of form or characteristics, made by, in the possession of, or under the control of a possessor.

Section 9.302 Designation of Responsible Official

Each possessor shall designate, by name or title, a responsible official to whom requests for records are to be sent. Each possessor shall report to the NRC the name and/or title of the responsible official so designated. Possessors shall promptly notify the NRC, in writing, of any changes to the name or title of the designated responsible official. The NRC will periodically publish a list of possessors and their designated responsible officials.

Section 9.303 Procedure for Requesting Records

Any person may request any record relevant to NRC-licensed or regulated activities held by a possessor. The request shall be made in writing and sent to the responsible official designated by the possessor. The requester should describe the records sought with reasonable specificity.

Section 9.304 Response by Possessor

(a) A possessor receiving a request for records shall respond to the request within thirty (30) days from the receipt of the request by the designated responsible official.

(b) The possessor's response shall consist of one or more of the following options:

(1) If the records requested do not exist or are not within the possession or

control of the possessor, inform the requester of this fact.

(2) If the records requested are publicly available, inform the requester of this fact and where the records may be obtained.

(3) Place the records requested in the NRC's Public Document Room in Washington, DC, or in a Local Public Document Room near the possessor's facility or convenient to the requester, and inform the requester where the records may be obtained.

(4) Provide the records directly to the requester. The possessor may require the requester to pay reasonable reproduction fees.

(5) The possessor may refuse to disclose the requested records only if one or more of the following criteria are met:

(i) The requested records have absolutely no relevance to any activity, facility, or material licensed or regulated by the NRC.

(ii) The requested records contain personnel or medical files or similar personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. However, records pertaining to the requester shall be disclosed directly to the requester or his or her designated legal representative.

(iii) The requested records contain trade secrets or proprietary information or privileged or confidential commercial or financial information.

(iv) The requested records contain safeguards information, as defined in 10 CFR part 73.

(v) The requested records contain material that has been properly classified in the interests of national defense or foreign policy.

(vi) The requested records contain information that would disclose the identity of a confidential source or reveal information furnished only by a confidential source, the disclosure of which would tend to reveal the source's identity.

(c) Any reasonably segregable portion of a record shall be provided to the requester or placed in the Public Document Room after deletion of the portions that are exempt under paragraph (b)(5).

(d) Unless disclosure of the record is prohibited by law, a possessor may disclose a record containing material exempt under paragraph (b)(5) directly to the requester upon the execution of an appropriate protective agreement.

Section 9.305 Appeals

(a) A requester may appeal a possessor's response for denial of access to the requested records, for charging excessive reproduction fees, or for lack of response by the possessor within the designated time limits.

(b) Appeals shall be made by filing a notice of appeal with the Chairman of the Atomic Safety and Licensing Board Panel. The notice of appeal shall be filed within sixty (60) days of the possessor's final response and shall include:

(i) A copy of the requester's original letter of request;

(ii) a copy of the possessor's response(s), or a statement that the possessor has not responded to the request;

(iii) an explanation of why the possessor's response is inadequate, erroneous, or otherwise unacceptable, or why the reproduction fees charged by the possessor are excessive.

(c) Upon the receipt of a notice of appeal under this section, the Chairman of the Atomic Safety and Licensing Board Panel shall appoint an Administrative Law Judge to consider the appeal. The Administrative Law Judge shall utilize whatever informal procedures are deemed necessary to resolve the matter and may examine in camera the requested records to determine whether such records or any part thereof may be withheld under the exemptions specified in § 9.304(b)(5). The burden of proof is upon the possessor to sustain its actions.

(d) The decision of the Administrative Law Judge shall be binding on the possessor. Decisions of the Administrative Law Judge shall be final and are not subject to further administrative appeals or judicial review.

Section 9.306 Penalties

Refusal of a possessor to comply with an order of the Administrative Law Judge may be subject to enforcement action by the NRC.

Dated at Rockville, Maryland, this 7th day of June, 1994.

For the Nuclear Regulatory Commission.

John C. Hoyle,

Acting Secretary of the Commission.

BILLING CODE 7590–01–P

FEDERAL RESERVE SYSTEM

12 CFR Part 203

[Regulation C; Docket No. R–0839]

Home Mortgage Disclosure

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Proposed rule.

SUMMARY: The Board is publishing for public comment proposed changes to Regulation C (Home Mortgage Disclosure) and to the instructions and reporting forms that financial institutions must use in complying with the annual reporting requirements under the regulation. The principal reasons for the proposed amendments are to respond to the statutory provisions regarding earlier availability of the HMDA disclosure statements to the public; help improve the quality of the HMDA data; and provide clarifications requested by financial institutions that report under HMDA. The amendments would set an earlier deadline for reporting HMDA data to supervisory agencies; require reporting in machine-readable format; require institutions to keep their loan application registers current during the year as data are being collected; and make a number of other changes.

DATES: Comments must be received on or before August 10, 1994.

ADDRESSES: Comments should refer to Docket No. R–0839 and be sent to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551. They may also be delivered to the guard station in the Eccles Building courtyard on 20th Street, NW. (between Constitution Avenue and C Street on 20th Street NW (between Constitution Avenue and C Street, NW.) between 8:45 a.m. and 5:15 p.m. weekdays. Comments received will be available for inspection and copying by any member of the public in the Freedom of Information Office, room B–1122 of the Eccles Building, between 9 a.m. and 5 p.m. weekdays.

FOR FURTHER INFORMATION CONTACT: Jane Jensen Gell or W. Kurt Schumacher, Staff Attorneys, or John C. Wood, Senior Attorney, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551, at 202/452–2412; for the hearing impaired *only*. contact Dorothea Thompson, Telecommunications Device for the Deaf, at 202/452–3544.

SUPPLEMENTARY INFORMATION:

(1) Background

The Board's Regulation C (12 CFR part 203) implements the Home Mortgage Disclosure Act of 1975 (HMDA) (12 U.S.C. 2801 *et seq.*). The regulation requires most mortgage lenders located in metropolitan statistical areas (MSAs) to report annually to federal supervisory agencies, and disclose to the public, information about their home mortgage

and home improvement lending activity. The reports and disclosures cover loan originations, applications that do not result in originations (for example, applications that are denied or withdrawn), and purchases of loans. Information reported includes the location of the property to which the loan or application relates; the race or national origin, gender, and income of the applicant; and the type of purchaser for loans sold in the secondary market. For denied applications, lenders are also permitted to report the reasons for denial.

Lenders are required to report originations, applications, and purchased loans for each calendar year to their supervisory agency by March 1 of the following year. The reports are made on a HMDA Loan/Application Register (HMDA–LAR) in a transaction-by-transaction format; for reports containing more than 100 entries, lenders currently are expected to submit the data in automated form (magnetic tape or diskette). The lender's supervisory agency submits the data to the Federal Reserve Board, which processes the data on behalf of member agencies of the Federal Financial Institutions Examination Council (FFIEC) and the Department of Housing and Urban Development. The Board then prepares public disclosure statements for each reporting lender and aggregate reports covering the data for all lenders in a metropolitan area. The statements are sent to lenders, generally by July or August, and the lenders are required to make the statements available to the public at their home office and at certain branch offices.

Although lenders must make the disclosure statements available within three business days, they have a thirty-day period within which to review the statements prepared by the Board and to report any discrepancies to the agencies. After necessary revisions have been made, the Board prepares and sends disclosure statements for all reporting lenders in each MSA, along with aggregate disclosure tables covering all such lenders, to a central data depository in each MSA. The central depositories are usually public libraries, regional planning agencies, or other public offices; the disclosures are generally sent to the depositories by October.

(2) Explanation of Proposed Amendments

One of the principal reasons the Board is proposing to amend Regulation C is the need to make HMDA data available to the public earlier than has been the case in the past. Statutory amendments to HMDA enacted in 1992 provide that starting with the HMDA reports for calendar year 1994, disclosure statements for individual lenders should be available to the public by July 1 of the following year, and that aggregate tables should be available at the central depositories by September 1.

To meet this timetable, it will be necessary for the agencies to begin processing the raw data earlier than March 1. Therefore, the proposed amendments include a change in the deadline for data submission, requiring lenders to submit their data by February 1 instead of March 1. Some of the other proposed amendments also are intended, in part, to facilitate earlier availability of the data (see discussion concerning the proposed change to § 203.5(a), below).

Another important reason the Board is proposing amendments to Regulation C relates to the accuracy of the HMDA data. The accuracy of the HMDA reports produced under the new data collection system that was instituted in 1990 (following an expansion of the data collected under HMDA) has improved in each succeeding year, but concerns continue to exist about data quality. A major part of what is involved in ensuring data accuracy relates to matters that are in the control of reporting institutions; for example, lending institutions must devote adequate resources to the task of accurately compiling and checking data before reporting it. However, to the extent that any requirements of the regulation are unclear or complicated, consistent and accurate reporting is more difficult. Accordingly, some of the proposed amendments now being published are intended in whole or in part to make the reporting requirements clearer or simpler. In addition, another proposed amendment calls for reporting in machine-readable format; this change also should help improve data quality, as discussed below.

The Board solicits comment generally on other ways in which Regulation C might be changed to better address problems of accuracy of the HMDA data. For example, would allowing or requiring all home equity lines to be reported—rather than only the portion of a line the borrower intends to use for home improvement or home purchase—simplify reporting and bring about greater consistency? Would the same be true for other categories of loans? (On a similar point, refer to the discussion of possible changes in the types of refinancings that should be reported, in section (3), "Other Matters on Which the Board Solicits Comment," below.) Are there areas in which explanations could be made simpler or clearer, thereby facilitating more accurate reporting?

The Board notes its intention to publish within the next several months a proposed staff commentary to Regulation C. The commentary will provide a vehicle for interpretations that would help lenders better understand and comply with the regulation's requirements. The commentary will supplement the detailed instructions provided in appendix A to Regulation C for completion of the HMDA-LAR and in the Guide to HMDA Reporting: Getting It Right, the brochure published by the FFIEC and distributed by the individual agencies. The Board is in the process of drafting the commentary, and solicits comment from lenders identifying specific areas that the commentary should address.

Set forth below is a section-by-section discussion of the proposed amendments to the regulation.

Section 203.2—Definitions

Paragraph (f)—Home Improvement Loan

The proposal would revise the regulation's definition of "home improvement loan" to facilitate compliance. The existing definition sets two conditions: first, that the loan applicant state, at the time of the application, that the loan is for the purpose of repairing, rehabilitating, or remodeling a dwelling; and second, that the loan be classified in the records of the financial institution as a home improvement loan.

One change proposed by the Board relates to the first part of the definition—that the loan be for the purpose of repairing, rehabilitating, or remodeling a dwelling. Questions have arisen about situations in which a loan is made for the purpose of making improvements to the borrower's residential property, but not, strictly speaking, to the "dwelling" as defined under Regulation C. The regulation defines dwelling as a residential structure, whether or not attached to real property. Thus, for example, a dwelling under Regulation C includes a house, apartment building, or mobile home, but not necessarily the land upon which the house or other structure is located. Some institutions have asked whether a loan for building or repairing things such as a detached garage, a driveway, a fence, or landscaping should qualify as a home improvement loan for HMDA purposes.

To avoid technical distinctions based on whether a loan relates to the structure or to the land on which it is situated, the Board proposes to change

the home improvement loan definition to focus primarily on the applicant's statement of purpose for the loan. Thus, a loan would qualify as a home improvement loan for HMDA purposes if the applicant states, at the time of the loan application, that the loan is for "home improvement purposes."

The Board also proposes to eliminate the second part of the definition, which would make the manner in which an institution classifies a loan irrelevant to its treatment for HMDA purposes. This part of the definition was originally intended to minimize the regulatory burden on financial institutions, by not requiring an institution to report a loan as a home improvement loan on its HMDA-LAR if the institution did not record the loan as a home improvement loan for other purposes. Many institutions now indicate that they would like to report loans that in fact are for home improvement purposes, but they find it difficult to do so because the loans may not be "classified" in the institution's records as home improvement loans. Removing the classification test would resolve this problem. However, the Board solicits comment on the extent to which this proposed change would create significant compliance burdens for institutions that do not currently record such loans on the HMDA-LAR but now would be required to do so. Comment is also requested generally on the overall advantages and disadvantages of making this change.

Section 203.4—Compilation of Loan Data

Paragraph (a)—Data Format and Itemization

Maintenance of LARs on a current basis. The regulation currently requires covered institutions to report HMDA data for a given calendar year to supervisory agencies by March 1 of the following year, but does not specify when the data must be recorded on the HMDA–LAR. The Board proposes to require institutions to fully record transactions within one month after final action is taken (such as origination of a loan, or denial or withdrawal of an application). The Board believes this approach would help in improving the accuracy and timeliness of the HMDA data. Current-year registers would be available to examiners so that, if problems were occurring, the supervisory agency could work with the institution to ensure that errors were corrected well before the relatively brief period between the end of the year and the reporting deadline. Another advantage of the proposed change would be that examiners and the institution itself would have ready access to current data that could be helpful in assessing its fair lending and community reinvestment performance.

The Board recognizes that some institutions may compile and geocode transactions (assign MSA, state, county, and census tract codes) on a batch basis, from time to time during the year or at year-end. The Board solicits comment on how burdensome institutions that currently follow this procedure would find it to record all the LAR information, including the geographic codes, on the HMDA–LAR within one month after final action. In addition, comment is requested on the extent to which any burden might be reduced if the requirement were to keep the HMDA–LAR up to date on a quarterly basis, rather than monthly. The Federal Deposit Insurance Corporation imposes a thirty-day requirement on the HMDA-covered institutions it supervises; the Office of the Comptroller of the Currency proposed a similar requirement, and recently adopted a quarterly update requirement instead (see 59 FR 26411, May 20, 1994).

The Board believes that a requirement to update the HMDA—LAR within one month after each transaction would be an important step toward improving the accuracy and timeliness of HMDA data reporting; if the compliance burden appeared to outweigh the advantages, however, the Board would consider alternatives such as quarterly updating.

Reporting income. The Board proposes to revise the regulation to clarify how institutions report applicants' income and eliminate an internal inconsistency that now exists. Currently, § 203.4(a)(7) of Regulation C provides that financial institutions shall collect data on "income relied upon in processing the loan application." The instructions for completing the HMDA–LAR state that if no income is asked for or relied on in the credit decision, the lender may enter NA (not applicable) in this field (appendix A, paragraph V.D.5.c.).

The Board proposes that lenders must report all income reflected on the application, including income of coapplicants, whether or not the lender relies on a particular source of income. If the lender determined, in the course of verifying information, that some portion of the income reported by the applicant was overstated, the lender would enter the verified amount rather than the amount originally reported.

Currently lenders need not report income for streamlined refinancings in which they neither ask for nor rely on income information. In addition, for privacy reasons, an institution need not record applicants' income on the HMDA–LAR for loans made to the institution's own employees. These rules will remain in place.

Section 203.5—Disclosure and Reporting

Paragraph (a)—Reporting to Agency

Change in reporting deadline. Currently, institutions are required to file their HMDA data with supervisory agencies by March 1 following the year to which the data relate. The Board proposes to change the due date to February 1.

Statutory amendments contained in the Housing and Community Development Act of 1992, 106 Stat. 3889, provide that starting with loan and application data for calendar year 1994, the FFIEC shall make "every effort" to ensure that individual lenders' public disclosure statements are available at the lenders' offices before July 1 of the following year. Similarly, the amendments call for the FFIEC to make both the individual disclosures and the aggregate tables available at the central depositories before September 1.

In 1993, the individual lenders' disclosure statements for 1992 lending activity became available to the public the first week of August, and the disclosure statements and aggregate reports became available at central depositories the first week of November. This year, the processing schedule calls for disclosures to be available at institutions in July and at central depositories in October. Thus, progress is being made toward meeting the statutory targets for earlier availability of HMDA data. But given the high volume of data being processed, the Board believes it is necessary to move up the date for submitting the raw data to supervisory agencies.

Reporting in Machine-Readable Format. In processing the HMDA data, the Board and the other agencies use various means to identify and correct data errors. For example, the data are run through computerized edit checks designed to detect errors and omissions in the data fields. Where these are found, the agencies send the reports back to the institution for correction.

Lenders whose HMDA–LAR contains more than 100 line entries are generally expected by the agencies to submit their data in machine-readable format, such as PC diskette or magnetic tape. The Board and the other agencies have encouraged lenders to submit their HMDA–LARs in automated form, and all but one of the agencies provide PC software that can be used to compile

data on diskettes. This software has built-in edit checks for accuracy and is furnished free of charge. Software packages that are widely available from private vendors also contain the computerized edits used by the Board. Nonetheless, many lending institutions still submit their HMDA data in paper form, and the agencies have found that these paper submissions tend to contain a substantially higher number of errors than submissions in machine-readable form.

The Board proposes to require that all institutions report HMDA data in machine-readable form and that they edit their data before submitting it, either using the agency-supplied HMDA software or using the same edits in private vendors' software.

The proposed change would help lenders to ensure submission of accurate data.

The overall accuracy of the data has improved each year since 1990, the first year of expanded reporting under the amendments in the Financial Institutions Reform, Recovery and Enforcement Act of 1989, in part because institutions have increasingly submitted data by diskette, magnetic tape, or Fedline. However, further improvements in data quality are needed, and the pre-edited reporting of data in machine-readable form would help in bringing about such improvements. Machine-readable reporting would also assist the agencies in meeting the new public disclosure deadlines, by reducing the time needed to enter the data from each reporting institution into the HMDA processing database.

The Board recognizes that some financial institutions subject to HMDA might not have the computer capability to compile and report their data in machine-readable form. The Board solicits comment, therefore, on whether requiring machine-readable data submission from all institutions would create a hardship for some, and if so, whether supervisory agencies should have discretion to grant waivers from this requirement on a case-by-case basis. For example, a waiver might be granted in a case where an institution does not itself own or have ready access to a personal computer nor have access through a service provider.

Paragraph (e)—Notice of Availability

The Board proposes to make a technical change to § 203.5(e) concerning the notice of availability that institutions are required to post. Pursuant to amendments contained in the Housing and Community Development Act of 1992, lending institutions must now make available to the public not only their disclosure statements but also their loan/application registers (after deleting certain data fields). These statutory amendments were incorporated into Regulation C in March 1993 (see 58 FR 13403, March 11, 1993).

The proposed change will revise the notice language to reflect that HMDA data in addition to disclosure statements are available from institutions.

Appendix A—Form and Instructions for Completion of HMDA Loan/Application Register

II. Required Format and Reporting Procedures

Paragraph A. The Board proposes to require that all HMDA-covered institutions submit data in machine-readable form, except that supervisory agencies may have discretion to grant relief from this requirement in cases of hardship. See the discussion of this proposed change under § 203.5(a), above.

Paragraph E. A new paragraph II. E. would be added to the HMDA–LAR instructions to reflect the proposed requirement that the HMDA–LAR be kept current within one month of final action during the year as transactions occur. See the discussion under § 203.4(a), above.

III. Submission of HMDA–LAR and Public Release of Data

Paragraph A. The proposal includes a change in the reporting deadline from March 1 to February 1; paragraph III. A. in the instructions would be revised accordingly. See the discussion on this proposed change under § 203.5(a), above.

Paragraphs B and C.— Requirement to report total HMDA–LAR entries on transmittal sheet. The regulation requires that a transmittal sheet accompany an institution's HMDA–LAR data submission, containing general information such as the name, address, and identifying numbers of the institution. Currently, the transmittal sheet does not ask for the total number of transaction line entries contained in the HMDA submission, although the instructions encourage institutions to provide this record count in a cover letter.

The Board proposes to amend Regulation C to require financial institutions to report on the transmittal sheet (in both the paper-copy and machine-readable versions) the total number of line entries included in the data submission. Respondents also will be asked to send a transmittal sheet with any subsequent submission of data, rather than only with the initial submission. An institution will sometimes send HMDA data to its supervisory agency in more than one submission when revisions to the initial submission are necessary, for example, or because transactions were found to have been inadvertently omitted. The count on the transmittal sheet for each submission will help the agencies verify the number of line entries submitted by the institution at that time. This change would help reduce the likelihood of any data being lost during the collection process.

Paragraph G. Posters. The Board is providing suggested language for the notice of availability that lenders are required to post in their home and branch offices in metropolitan areas. The revised notice reflects the fact that HMDA data besides disclosure statements are now available from financial institutions. See the discussion of proposed changes to § 203.5(e), above.

V. Instructions for Completion of Loan/Application Register

A. *Application or loan information.* 5. Explanation of purpose codes. Code 2: Home improvement. The proposal includes changes in the definition of home improvement loans for HMDA reporting purposes. The HMDA–LAR instructions would be revised to reflect the proposed changes. See the discussion of home improvement loan issues under § 203.2(f), above.

8. Loan amount. f. Reporting counteroffers. The proposal clarifies that counteroffers are to be reported as loan denials if the applicant does not accept the counteroffer, not as applications withdrawn or approved but not accepted. This clarification conforms with the treatment of counteroffers in Regulation B (Equal Credit Opportunity).

C. *Property location.* 5. Outside MSA. Financial institutions are encouraged but not required to enter geographic information for loans on property located outside the MSAs in which they have a home or branch office (or outside any MSA). The proposed rule clarifies that, if a lender enters data in the property location fields of the HMDA–LAR for these loans, the data must accurately reflect the location of the property in question.

(3) Other Matters on Which the Board Solicits Comment. In addition to seeking comment on the proposed amendments, the Board solicits comment on other matters related to HMDA reporting: prequalification programs, refinancing transactions, and

the collection of racial or ethnic information, as discussed below.

Prequalification programs. Regulation C requires lenders to compile and report data on applications for loans as well as on loan originations. The Board has received questions about mortgage lenders' prequalification programs, asking whether and when a request for prequalification must be treated as a credit application for purposes of HMDA reporting. The answer depends on the outcome of the prequalification decision.

The definition of application under HMDA is virtually identical to the definition established by the Board's Regulation B (Equal Credit Opportunity). Accordingly, lenders are directed to the guidance provided in the Official Staff Commentary to Regulation B, comments 2(f)–1 through –4, on differentiating between applications and inquiries. The commentary states that if a lender—in giving information to a consumer—evaluates information about the consumer, decides to decline a credit request, and communicates this to the consumer, the creditor has treated that inquiry as an application for credit (by virtue of having made a credit decision). In the case of Regulation B, the creditor must then comply with the notification rules on adverse action.

In regard to HMDA reporting, the same rule applies, and a lender that turns down a prequalification request (because of the homebuyer's poor credit history, for example) must report it as a loan denial on its HMDA–LAR.

Prequalification requests that are approved, on the other hand, will be reported on the HMDA–LAR at a later stage in the process, after homebuyers have found the property they want to purchase and the lender has evaluated a formal loan application, not at the time of the prequalification approval. Thus, the lender will report when: (1) the lender originates a loan; (2) the lender has made a firm loan offer that the applicant does not accept; (3) the applicant expressly withdraws the mortgage application; (4) the lender closes the file for incompleteness; or (5) the lender denies the mortgage loan application.

In some cases, lender decisions on prequalifications that are approved may ultimately not be reported on the HMDA–LAR: if a homebuyer who has been prequalified for credit does not later pursue a formal application for a mortgage loan, the lender has no reporting obligations under HMDA (and no notification requirements under Regulation B).

For denials of prequalification requests that are reportable under HMDA, there are questions about how a lender can comply with the reporting requirements with regard to the loan amount, loan type, and property location data fields on the HMDA–LAR. Generally speaking, a property location will not "exist" at the prequalification stage if the prospective homebuyer does not yet have a purchase contract on, or has not requested financing for, a specific property. Thus, the lender should enter NA (not applicable) in each of the location fields in such instances. For loan amount, if the prospective homebuyer has not requested a particular amount of credit, the regulation currently does not provide any alternative code. The Board requests comment on whether a code such as NA (not applicable) will suffice, or whether a special code—indicating that the transaction is a prequalification—would be more appropriate and useful. Similar issues arise with respect to loan type in cases where prospective borrowers have not specified during the prequalification process the type of loan they are seeking.

The Board requests comment about other compliance issues related to prequalifications, and contemplates that guidance regarding these matters will be provided in the commentary to Regulation C to be issued later this year.

Reporting of refinancings. The regulation requires lenders to report refinancings, which are defined as loans involving the satisfaction of an existing obligation and its replacement by a new obligation undertaken by the same borrower. The Board solicits comment on the reporting of transactions that are not technically refinancings, but that serve as the functional equivalent of refinancings. In some regions, transactions are structured as modifications of existing obligations (sometimes called modification, extension, and consolidation agreements or "MECAs"), rather than as replacements thereof, often in order to reduce borrower costs associated with a refinancing (for example, title insurance fees).

Institutions have inquired whether they should report such transactions, which serve the same purpose as refinancings and normally entail the same underwriting procedures. The Board solicits comment on this matter. The Board also solicits comment on what types of modifications should not be subject to reporting (such as the simple modification of a loan term from 25 to 15 years), as well as the basis for any such distinctions. Other issues on which comment is requested include whether the reporting of such transactions should be limited to cases where a new lender is offering the modification, or should also be available to the original lender.

Another matter on which the Board seeks comment concerns the current exclusion for certain refinancings based on the purpose of the transaction. Under existing Regulation C, a refinancing is to be reported only if the loan being refinanced was a home purchase or home improvement loan, or was a refinancing of such a loan. In addition, a refinancing is reported only if the amount outstanding on the loan being refinanced, plus the amount of any new money for home purchase or home improvement purposes, is equal to more than 50 percent of the total new loan amount. For example, if a borrower refinances a home purchase loan only for the purpose of getting a lower interest rate on the outstanding balance, and therefore does not obtain any new money, the refinancing is reported because the amount outstanding on the original loan is equal to 100 percent of the new loan amount. Similarly, if a borrower refinances a home purchase loan and obtains new money to be used entirely for home improvement purposes, then again the refinancing is reported because here again, the amount outstanding plus new money for "covered purposes" (home improvement and home purchase) is equal to 100 percent of the new loan amount. At the other extreme, if a borrower refinances a loan with an outstanding balance of $20,000 and obtains $40,000 of new money to be used for starting a new business, the refinancing is not reported because the amount outstanding plus new money for "covered purposes" is equal to only one-third of the new loan amount.

This purpose test for determining whether refinancings are to be reported under Regulation C has generated a substantial number of questions from lenders. For example, the purpose of the loan being refinanced may not be clear at the time the borrower applies for the refinancing. In some cases, a loan has been refinanced repeatedly, new money having been obtained each time; and the calculations necessary to determine whether more than 50 percent of the total new loan amount is for covered purposes become difficult. An alternative approach that would be easier to understand and apply would be to treat all refinancings as subject to reporting on the HMDA–LAR. Although such an expansion in coverage would result in the disclosed data's being less tied to the home purchase and home improvement categories, it is not clear that the resulting data would be less

useful. The Board solicits comment on the advantages and disadvantages of these changes, both for reporting institutions and for users of HMDA data.

Collection of racial or ethnic information. Regulation C provides that applicants for mortgage and home improvement loans be requested, but not required, to provide information about their race or national origin, gender, and income. The purpose is to gather data that may help regulatory agencies to gauge whether a lending institution is complying with the fair lending laws. If an applicant chooses not to provide the information on race or national origin and gender, the loan officer is required to enter the information on the basis of visual observation or surname.

Currently, the categories in Regulation C for data collection on race/national origin of applicants are:

- American Indian or Alaskan Native
- Asian or Pacific Islander
- Black
- Hispanic
- White
- Other

The categories that the Office of Management and Budget (OMB) issues for government statistical purposes are substantially the same, except that the "other" category is not included. OMB and others have indicated their belief that the presence of the "other" category undercuts the usefulness of the data, in that a data user has no way of knowing what the category represents.

In adopting the monitoring provisions of Regulation C in 1989, the Board based the categories used on Regulation B, which has contained the "other" category since it was first adopted by the Board in 1976. The Board believed that the "other" category served a useful function. For example, it provides a choice to applicants who do not identify with any of the specifically defined categories; in 1992, the "other" category was used in roughly 45,000 out of 10 million loan records. The Board notes also that OMB is likely in the next few years to propose changing the list of categories for the next decennial census.

Comment is solicited on whether the Board should consider deleting the "other" category. The Board notes that if this change were made for Regulation C, a parallel change would be made in the monitoring provisions of Regulation B.

(4) Economic Impact Statement. The Board's Division of Research and Statistics has prepared an economic impact analysis of the proposed amendments. A copy of the analysis may be obtained from Publications Services, Board of Governors of the Federal Reserve System, Washington, DC 20551, or by telephone at (202) 452-3245.

List of Subjects in 12 CFR Part 203

Banks, banking, Consumer protection, Federal Reserve System, Home mortgage disclosure, Mortgages, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Board proposes to amend 12 CFR part 203 as follows:

(Certain conventions have been used to highlight the proposed changes to the regulation and the instructions. New language is shown inside bold-faced arrows, while language that would be removed is set off with brackets.)

PART 203—HOME MORTGAGE DISCLOSURE (REGULATION C)

1. The authority citation for part 203 continues to read as follows:

Authority: 12 U.S.C. 2801–2810.

2. Section 203.2 would be amended by revising paragraph (f) as follows:

§ 203.2 Definitions.

* * * * *

(f) *Home improvement loan* means any loan that [— (1)] is stated by the borrower (at the time of the loan application) to be for ►home improvement purposes.◄ [the purpose of repairing, rehabilitating, or remodeling a dwelling; and (2) is classified by the financial institution as a home improvement loan.]

* * * * *

3. Section 203.4 would be amended by revising the second sentence of paragraph (a) introductory text and paragraph (a)(7) as follows:

§ 203.4 Compilation of loan data.

(a) *Data format and itemization.* * * * These [data shall be presented] ►transactions shall be recorded, within one month of taking final action,◄ on a register in the format prescribed in appendix A ►of this part◄ and shall include the following items:

* * * * *

(7) The race or national origin and sex of the applicant or borrower, and the income ►asked for or◄ relied upon in processing the application.

* * * * *

4. Section 203.5 would be amended by revising paragraphs (a) and (e) as follows:

§ 203.5 Disclosure and reporting.

(a) *Reporting to agency.* By ►February 1◄ [March 1] following the calendar year for which the loan data are compiled, a financial institution shall send [two copies of] its complete loan application register [(if submitted in paper form)] to the agency office specified in appendix A of this [regulation] ►part◄, and shall retain a copy for its records for a period of not less than three years. [A financial institution need only submit one copy when the submission is on computer tape or diskette.]

* * * * *

(e) *Notice of availability.* A financial institution shall post a general notice about the availability of its ►HMDA data◄ [disclosure statement] in the lobbies of its home office and any physical branch offices located in an MSA. Upon request, it shall promptly provide the location of the institution's offices where the statement is available. At its option, an institution may include the location in its notice.

5. Item II. of appendix A to Part 203 would be amended by revising the first sentence of paragraph A., by removing the last 3 sentences of paragraph A., and by adding a new paragraph E., as follows:

Appendix A to Part 203—Form and Instructions for Completion of HMDA Loan/Application Register

* * * * *

II. Required Format and Reporting Procedures

A. Institutions [are expected to] ►shall◄ submit data to their supervisory agencies in an automated, machine-readable form [unless 100 or fewer application and loan entries are reported]. * * * [An institution that submits its register in nonautomated form must send two copies that are typed or computer printed. You must use the format of the loan/application register but are not required to use the form itself. Each page must be numbered, and the total number of pages must be given (for example, "Page 1 of 3").]

* * * * *

►E. Applications and loans must be fully recorded on your register, including geographic information, within one month of final action (such as the origination, denial or withdrawal of an application, or the purchase of a loan).◄

6. Item III. of appendix A to Part 203 would be amended by revising paragraphs A., B., C., and G., as follows:

* * * * *

III. Submission of HMDA-LAR and Public Release of Data

A. You must submit the data for your institution to the office specified by your supervisory agency no later than ►February 1◄ [March 1] following the calendar year for which the data are compiled. A list of the agencies appears at the end of these instructions.

B. You must submit all required data to your supervisory agency in one complete package, with the prescribed transmittal

sheet. An officer of your institution must certify to the accuracy of [the] data. ►Any additional data submissions that become necessary (for example, because you discover that data were omitted from the initial submission, or because revisions are called for) also must be accompanied by a transmittal sheet.◄

C. ►The transmittal sheet must state the total number of HMDA-LAR line entries included in the accompanying data submission.◄ [You are encouraged to provide in a cover letter an approximate count of the total number of line entries contained in your data submission.] If you are a depository institution, you also are asked to ►provide◄ [include] a list of the MSAs where you have a home or branch office.

* * * * *

G. Posters. Your agency [can] ►may◄ provide [you with] HMDA posters that you can use to inform the public of the availability of your disclosure statement, or you may print your own posters. ►If you print your own, the following language is suggested:

Home Mortgage Disclosure Act Notice

The HMDA data about our residential mortgage lending are available for review. The data show geographic distribution of loans and applications; race, gender, and income of applicants and borrowers; and information about loan approvals and denials. To inspect our HMDA data, inquire at this office.◄

7. Item V. of Appendix A to Part 203 would be amended by revising paragraphs A.5.code 2, A.8.f., and C.5., as follows:

* * * * *

V. Instructions for Completion of Loan/Application Register

A. *Application or loan information*

* * * * *

5. *Explanation of purpose codes*

* * * * *

Code 2: Home Improvement

a. Code 2 applies to loans and applications for loans that [(1)] the borrowers have said will be used for ►home improvement purposes for◄ [repairing, rehabilitating, or remodeling] one- to four-family residential dwellings[, and (2) are recorded on your books as home improvement loans].

* * * * *

8. Loan amount.

* * * * *

f. ►Reporting counteroffers.◄ [If you offered to lend less than the applicant applied for, enter the amount of the loan if the offer was accepted by the applicant. If the offer was not accepted, enter the amount that the applicant applied for.] ►If you make a counteroffer for an amount different from the amount initially applied for, and the counteroffer is accepted by the applicant, report it as an origination for the amount of the loan actually granted. If the applicant turns down the counteroffer or fails to respond, report it as a denial for the amount initially requested. Do *not* report it as a withdrawn application or as an application that was approved but not accepted.◄

* * * * *

C. Property location.

* * * * *

5. Outside-MSA. For loans on property located outside the MSAs in which you have a home or branch office (or outside any MSA), you may enter the MSA, state, county, and census tract numbers or you may enter the code "NA" in each of these columns. ►If you choose to enter the numbers, they must be correct for the property in question.◄

* * * * *

By order of the Board of Governors of the Federal Reserve System, June 7, 1994.

William W. Wiles,

Secretary of the Board.

[FR Doc. 94–14262 Filed 6–10–94; 8:45 am]

BILLING CODE 6210–01–P

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 333

RIN 3064–AB44

Mutual-to-Stock Conversions of State Nonmember Savings Banks

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Proposed rule.

SUMMARY: The proposed rule would require FDIC-insured mutual state-chartered savings banks that are not members of the Federal Reserve System (State Savings Banks) to comply with new substantive provisions of the FDIC's regulations when proposing to convert to the stock form of ownership. The intended effect of the proposed rule is to assure that certain aspects of mutual-to-stock conversions of FDIC-regulated institutions do not engender safety-and-soundness concerns, breaches of fiduciary duty or other violations of law.

DATES: Written comments must be received by the FDIC on or before July 13, 1994.

ADDRESSES: Written comments shall be addressed to the Office of the Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, DC 20429. Comments may be hand-delivered to Room F–400, 1776 F Street, NW., Washington, DC, on business days between 8:30 a.m. and 5 p.m. (FAX number: (202) 898–3838). Comments will be available for inspection in room 7118, 550 17th Street, NW., Washington, DC between 9 a.m. and 4:30 p.m. on business days.

FOR FURTHER INFORMATION CONTACT: Robert H. Hartheimer, Acting Director, Division of Resolutions (202/898–8879), John G. Finneran, Jr., Acting Deputy General Counsel, Legal Division (202/898–3766), Robert F. Miailovich, Associate Director, Division of Supervision (202/898–6918), Robert W. Walsh, Manager, Planning and Program Development Section, Division of Supervision (202/898–6911), Joseph A. DiNuzzo, Counsel, Legal Division (202/898–7349), Federal Deposit Insurance Corporation, Washington, DC 20429.

SUPPLEMENTARY INFORMATION:

I. Paperwork Reduction Act

The collection of information contained in this proposed rule has been submitted to the Office of Management and Budget (OMB) for review and approval pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). Comments regarding the accuracy of the burden estimate, and suggestions for reducing the burden, should be addressed to the Office of Management and Budget, Paperwork Reduction Project (3064–0117), Washington, DC 20503, with copies of such comments sent to Steven F. Hanft, Assistant Executive Secretary (Administration), room F–400, FDIC, 550 17th St. NW., Washington, DC 20429.

The collection of information in this proposed rule is found in § 333.4(d) and takes the form of materials related to a State Savings Bank's proposed conversion from the mutual to stock form of ownership. The information will be used to enable the FDIC to identify and address issues involved in the proposed conversion relating to the safety and soundness of the bank, any abusive management practices and potential violations of applicable law.

The estimated annual reporting burden for the collection of information requirement in this proposed rule is summarized as follows:

Number of Respondents: 40

Number of Responses per Respondent: 1

Total Annual Responses: 40

Hours per Response: 20

Total Annual Burden Hours: 800

Regulatory Flexibility Act

The Board hereby certifies that the proposed rule would not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Therefore, the provisions of that Act regarding an initial and final regulatory flexibility analysis (*Id.* at 603 and 604) do not apply here.

II. Recent FDIC Regulatory Initiatives on Mutual-To-Stock Conversions

In recent years numerous mutually owned State Savings Banks have converted to stockholder-owned State Savings Banks. Many of the institutions that converted from mutual to stock form first converted from federal or state mutual savings associations regulated by the Office of Thrift Supervision (OTS) to State Savings Banks. One consequence of these conversions to State Savings Banks is that the FDIC replaces the OTS as the institution's primary federal regulator. Mutual-to-stock conversions of State Savings Banks are generally subject to the rules and entitled to the protections of the applicable state law.[1]

Conversion rules under state law are not identical to and in some cases are less stringent than OTS regulations. The absence of consistent treatment under state laws and the lack of some federal oversight of State Savings Bank mutual-to-stock conversions present an opportunity for inconsistency and abuse.

Because of concerns about prior and potential abuses in the conversion process, on February 1, 1994, the FDIC issued for public comment a proposed policy statement on the conversions of State Savings Banks from mutual to stock ownership (Proposed Policy Statement). 59 FR 4712. The general purpose of the Proposed Policy Statement was to solicit public comment on the issues involved in mutual-to-stock conversions and whether and how the FDIC should regulate this activity. The areas of FDIC concern identified in the Proposed Policy Statement were: (1) Proper appraisal of the institution to be sold; (2) proper pricing of the stock sold in the conversion; (3) fair apportionment of the stock subscription rights; (4) adequate disclosure of information needed to make an informed investment decision; and (5) non-abusive compensation and benefits provided to insiders.

Subsequent to the issuance of the Proposed Policy Statement the Board of Directors of the FDIC (Board) determined that during the pendency of the Proposed Policy Statement it was necessary for the FDIC to review applications filed by State Savings Banks with their respective state banking regulator and any other applicable state and federal banking and/or securities regulators to determine whether the proposed conversions contain any safety and soundness issues and/or issues of insider abuse that reflect negatively on the integrity and competence of the management of the converting institution. The Board's concerns were caused by several recent and pending mutual-to-stock conversions of State Savings Banks that had given rise to questions related to management abuse and excessive enrichment of insiders, fairness to depositors and general safety and soundness concerns. These conversions have recently been the subject of Congressional hearings and numerous news articles and reports. The FDIC also had received (and continues to receive) direct complaints from depositors of State Savings Banks about unfair treatment and insider abuse in mutual-to-stock conversions.

Thus, on February 15, 1994, the FDIC issued an interim final rule adding a new section to Part 303 of the FDIC's regulations (to be published at 12 CFR 303.15) prohibiting State Savings Banks from converting to stock form without complying with the requirements of the interim rule (Interim Rule). 59 FR 7194. The Interim Rule requires State Savings Banks that propose to convert to stock ownership to file with the FDIC a notice of intent to convert to stock form consisting of a description of the proposed conversion accompanied by a copy of all documentation and application materials filed with the applicable state and federal regulators. Pursuant to the Interim Rule, the FDIC currently reviews all conversion materials regarding State Savings Banks with a special interest in: The use of the proceeds from the sale of stock, as prescribed in the business plan; the adequacy of the disclosure materials; the participation of depositors in approving the transaction; the form of the proxy statement required for the vote of the depositors/members on the conversion; any increased compensation and other remuneration (including stock grants, stock option rights and other similar benefits) to be obtained by officers and trustees of the bank in connection with the conversion; the adequacy and independence of the appraisal of the value of the mutual savings bank for purposes of determining the price of the shares of stock to be sold; the process by which the bank's trustees approved the appraisal, the pricing of the stock and the compensation arrangements for insiders; the nature and apportionment of stock subscription rights; and the extent of any existing and planned contributions to or investments in the community. In a proposed merger/conversion, the FDIC pays particular attention to the value offered to depositors of the converting institution and the compensation packages offered to management.

As indicated in the Interim Rule, the FDIC generally expects proposed conversions to substantially satisfy the standards found in the mutual-to-stock conversion regulations of the OTS (12 CFR Part 563b). Any variance from those regulations is closely scrutinized. As also indicated in the Interim Rule, however, compliance with OTS requirements is not necessarily sufficient for FDIC regulatory purposes. The Interim Rule specifies that the FDIC will look to the OTS rules "currently in effect" at the time the FDIC reviews the proposed conversion. As indicated below, the OTS recently revised its mutual-to-stock conversion regulations. Thus, upon the issuance of the OTS revised regulations on May 3, 1994 (59 FR 22725), the FDIC began taking into account the extent to which proposed conversions of State Savings Banks conform with the various provisions of the OTS' revised regulations. The Interim Rule remains effective during the pendency of this proposed rulemaking.

III. Comments Received on the Proposed Policy Statement and Interim Rule

In developing and issuing this proposed rule it was helpful for the FDIC staff and the Board to consider the comments received on the Proposed Policy Statement and the Interim Rule. It is anticipated that the Board will again consider those comments when taking final action on the Proposed Policy Statement and the Interim Rule. Some issues identified and discussed in the comments are not germane to the proposed rule, but may be relevant when the Board takes final action on the Proposed Policy Statement and Interim Rule; thus, although they are mentioned briefly in the summary of comments provided below, those issues are not otherwise discussed in the context of this proposed rulemaking.

In the Proposed Policy Statement and the Interim Rule the FDIC specifically requested comment on, among other issues: What abuses are prevalent in mutual-to-stock conversions and why the FDIC should take action against such abuses; whether federal oversight in conversions of State Savings Banks is necessary; whether the FDIC should issue a regulation closely following the OTS conversion regulations or the FDIC should take a less formal approach; whether the FDIC should seek Congressional action in this area; and

[1] Some federal laws also apply, such as the anti-fraud provisions of the federal securities law. *E.g.*, 15 U.S.C. 78j.

the mechanics and substantive provisions of the Interim Rule.

A summary of the comments received on the Proposed Policy Statement and Interim Rule is provided below.

IV. Need for the Proposed Rule

Recently the OTS revised its mutual-to-stock conversion regulations primarily to address immediate concerns about excessive management remuneration and inadequate depositor participation in conversions of savings associations (59 FR 22725 (May 3, 1994)) (OTS Revisions). In essence, the new regulations attempt to prevent management abuses by strengthening the rights of depositors.

The FDIC believes that the OTS Revisions are a necessary, sound first step in correcting certain abuses stemming from conversions and that the absence of some federal oversight of mutual-to-stock conversions of State Savings Banks presents an opportunity for inconsistency and abuse. Thus, the FDIC thinks it may be necessary and appropriate to adopt regulations similar to the OTS Revisions. For these reasons, as discussed below, the FDIC is issuing this proposed rule.

Because the fundamental problem concerning the distribution of existing economic value in mutual-to-stock conversions is not addressed by the OTS Revisions, however, the Board believes other forms of abuse may still arise. The FDIC believes that it is necessary to re-examine the conversion process to explore whether the existing economic value of a converting mutual institution can be better distributed directly to those who should receive it.

The FDIC is particularly concerned about the appraisals of converting institutions. The FDIC believes that under the current process it may be difficult to prepare an appraisal of a well capitalized mutual institution which accurately reflects "pro forma value" while at the same time reflecting the appraised value cogently in a business plan of the institution. The incidence of significant appreciation in the stock price immediately after the initial public offering, which tends to exceed the stock appreciation of initial public offerings in other industries, suggests that appraisals may be too low. As a possible consequence of underpricing the institution, insiders may be able to acquire more shares than they are entitled to; moreover, a low appraisal may deprive an institution of the additional capital it should receive in the sale of conversion stock.

To address the possible need for fundamental changes to the mutual-to-stock conversions process, concurrently with the publication of this proposed rule, the Board also is publishing a request for comments on ways to address concerns about the overall conversion process (Request For Comments). The Request For Comments is a separate notice contained elsewhere in this issue of the **Federal Register**.

V. Explanation of the Proposed Rule

1. Overview

The proposed rule would impose several specific requirements upon State Savings Banks that propose to undergo mutual-to-stock conversions. The proposed requirements are similar to the OTS Revisions. Currently and during the pendency of this proposed rulemaking, the FDIC intends to continue to use the case-by-case methodology explained in the Interim Rule in reviewing notices of proposed conversions of State Savings Banks. As noted above and in the Interim Rule, this FDIC review includes an analysis of whether the proposed conversion would comply with current OTS mutual-to-stock conversions rules. Subsequent to the adoption of a final rule, the FDIC intends to continue to use a case-by-case approach in reviewing aspects of proposed conversions that are outside the scope of the specific requirements in the proposed rule.

Among other things, the proposed rule also would indicate that the requirements thereof apply, to the extent appropriate, to the reorganization of State Savings banks to the mutual holding company form of ownership. The FDIC also is involved in the mutual holding company reorganizations of federal and state savings associations. That involvement entails FDIC action on the application for deposit insurance required to be filed with the FDIC in such transactions for the *de novo* stock depository institution organized to facilitate the reorganization. In acting on applications for deposit insurance the FDIC must consider the factors listed in section 6 of the Federal Deposit Insurance Act (12 U.S.C. 1816), one of which is the "general character and fitness of the management of the depository institution." In the course of that review the FDIC considers, among other things, the same issues of fiduciary duty that it considers in reviewing proposed mutual-to-stock conversions of State Savings Banks.

As discussed below, preliminarily, the FDIC believes that each of the requirements in the proposed rule is necessary to satisfy specific FDIC concerns about safety and soundness and/or breaches of fiduciary duty in connection with mutual-to-stock conversions. At the same time, the FDIC believes that it is essential to consider the existence of state regulation and supervision in determining the proper role in the conversion process for the FDIC as the primary federal regulator of State Savings Banks. As discussed below, many of the comments that the FDIC received on the Proposed Policy Statement and the Interim Rule expressed agreement with the FDIC's federal oversight role in mutual-to-stock conversions of State Savings Banks, but several also suggested that deference be paid to states' rights on issues outside the FDIC's areas of concern.

With the issuance of the proposed rule, the Board is attempting to strike the proper balance in this regard. In particular, the proposed rule includes a provision stating that, in the event that a State Savings Bank proposing to convert determines that compliance with any provision of the proposed rule would be inconsistent or in conflict with applicable state law, the bank may file with the FDIC a written request for waiver of compliance with the provision. The request would have to demonstrate that the requested waiver would not be detrimental to the safety and soundness of the bank, entail a breach of fiduciary duty by the bank's management, or otherwise be detrimental or inequitable to the bank, its depositors, any other insured depository institution(s), the federal deposit insurance funds or the public interest.

As noted above, recently the OTS revised its regulations on mutual-to-stock conversions of savings associations. OTS' concerns about avoiding insider abuses in mutual-to-stock conversions of federal and state savings associations are the same as the FDIC's concerns about insider abuses in conversions of State Savings Banks. Thus, as noted above, to the extent necessary and appropriate, the proposed rule incorporates most of the same requirements recently adopted by the OTS.

The proposed rule would: Require the submission of a full appraisal report, including a complete and detailed description of the elements that make up an appraisal report, justification for the methodology employed and sufficient support for the conclusions reached therein; require a depositor vote on all mutual-to-stock conversions of State Savings Banks and prohibit management's use of previously executed (or "running") proxies to satisfy depositor voting requirements; for one year following the date of the conversion, among other things, require that any management recognition plans

or stock option plans be implemented only after shareholder approval is received, require that stock options (if any) be granted at no lower than the market price at which the stock is trading at the time of grant and prohibit MRP's funded by conversion proceeds; require that the record date for determining depositors eligible to receive rights to participate in the subscription offering of the conversion stock not be less than one year prior to the date of adoption of the plan of conversions by the converting bank's board of trustees; require that the subscription offering provide a preference to eligible depositors and others in the bank's "local community" (as defined in the proposed rule) or within 100 miles of the bank's home office or branch(es); require that employee stock ownership plans (ESOPs) not have a priority over subscription rights of "eligible depositors" (as defined in the proposed rule); require the submission of a business plan, including, among other things, a detailed discussion of how management intends to deploy the capital raised through the sale of stock in the conversion; and prohibit stock repurchases within one year following the conversion.

2. Discussion of Each Proposed Requirement

The following is a discussion of each of the requirements in the proposed rule. Many of the requirements are engendered by the Board's concerns about bank management's proper exercise of its fiduciary duties. As discussed in the preamble to the Interim Rule, the duties and obligations of trustees and officers of mutual savings banks are identical to the responsibilities the FDIC has historically enunciated and enforced concerning directors and officers of commercial banks.[2] The two principal duties of care and loyalty that directors and officers of commercial banks must exercise on behalf of the institution and its constituencies (*i.e.*, depositors, creditors and shareholders) also obligate trustees of mutual savings banks. Both duties have long antecedents in the common law of corporations and financial institutions.[3]

Trustees (as well as officers) of mutual savings institutions are held to the same standard of care and loyalty as directors and officers of stock banks. Thus, the trustees must fulfill their duty of loyalty to the institution by administering its affairs with the utmost candor, personal honesty and integrity. They are prohibited from advancing their own personal or business interests or those of others at the expense of the bank. This general fiduciary duty has been frequently interpreted to include an element of fairness and good faith which, in the context of mutual-to-stock conversions, affords protection to the various stakeholders (particularly depositors) of mutual savings banks.

The FDIC, through the Interim Rule, also requires the trustees of mutual savings banks to adhere to the same standards of loyalty and care that are required of directors and officers of stock institutions in order to prevent insider abuse. Publicized insider abuse (and the lawsuits that such abuses may engender) may have a sufficiently significant impact upon the reputation of a bank to affect its continued viability and, thus, its safety and soundness, resulting in a regulatory violation.

As indicated above, the requirements in the proposed rule are rooted in concerns about safety and soundness, breaches of fiduciary duty and/or other violations of law.

A. Submission of a Full Appraisal Report

The proposed rule would require State Savings Banks that propose to convert to stock ownership to submit to the FDIC, along with the other required materials, a full appraisal report on the value of the converting bank and the pricing of the conversion stock. Many of the states require that a converting mutual savings banks sell its capital stock at a total price equal to its estimated *pro forma* market value, based on an independent valuation. The purpose of this requirement is to assure that the converting institution receives the full value for the conversion stock sold. As indicated above and in the Request For Comments, the FDIC has identified what may be significant problems with the overall conversion process.

As discussed in detail in the Request For Comments, many recent mutual-to-stock conversions have exhibited significant increases in the immediate post-conversion trading market for the stock. The FDIC is concerned that such increases have resulted from appraisal reports (submitted in connection with these recent conversions) that have set the *pro forma* market value significantly below the true value of the converting institution. If an appraisal is too low and the shares of stock are underpriced, the institution receives less of an increase in capital than it should from the sale of conversion stock; in addition, the deposit insurance fund is provided with less of a capital cushion than would have resulted if the stock was based on a proper and adequate appraisal. Also, an underpriced appraisal could entice insiders to undertake a conversion (in order to acquire shares below their fair value) that may not be in the best interests of the institution. Sophisticated investors also are able to benefit, undeservedly, from the sale of underpriced conversion stock.

For these reasons, the proposed rule would require that a full appraisal be provided to the FDIC in a proposed mutual-to-stock conversion of a State Savings Bank. The appraisal report would have to be prepared by an independent appraiser and include a complete and detailed description of the elements that make up the report, justification for the methodology employed and sufficient support for the conclusions reached therein. This would include a full discussion of the applicability of each peer group member and documented analytical evidence supporting any variance (above or below) the converting institution may have from the peer group statistics. The FDIC would require a complete analysis of the institution's *pro forma* earnings which should include the bank's full potential once it fully deploys the new capital pursuant to its business plan. In reviewing appraisal reports the FDIC would continue to consider the appraisal standards and guidelines, if any, of the applicable state and/or the appraisal guidelines issued by the OTS.

The FDIC generally has been disappointed with the appraisal reports it has reviewed in connection with proposed conversions. As noted above, many appraisals have set the *pro forma* market value of the converting institution significantly below the true value of the institution as derived from its peer group. Reasons for this have included inappropriate peer-group selections, inconsistencies between the analysis in the appraisal report and the business plan submitted with the conversion notice and continued unfounded justification for new issue discounts in stock issuances that have been well oversubscribed.

The FDIC has noted that appraisals lack specific detail on the inclusion of peer group members regarding particular information on the markets within which they operate; the adjustments made to normalize their earnings or design comparable *pro*

[3] *Greenfield Savings Bank v. Abercrombie*, 211 Mass. 252, 97 N.E. 897, 39 L.R.A.n.s. 173 (1912) provides a detailed discussion of liability of trustees of a savings bank.

forma earnings; and the price appreciations experienced by each member since its conversion. Converting institutions are almost always considered inferior to the peer group—a fact which raises questions about the composition of the peer group. Little or no analytical evidence is typically given in appraisals for the discounts suggested for the converting institution compared to the peer members. In addition, every appraisal contains a new issue discount without any analytical support for exactly how much that discount should be or why it is needed. Our analysis indicates market activity where virtually every conversion has traded up over the last few years. Finally, when subscription offerings are completed and oversubscriptions have occurred (in some case, quite substantially) appraisers have not justified why the original appraisal should not be increased beyond the "supermax" but rather in virtually every case confirm the original valuation.

Many appraisals that the FDIC has reviewed contain only cursory analysis of the expected future earnings of the institution. The FDIC believes that buyers of conversion stocks need to analyze institutions with much more financial sophistication than what appears in the appraisal and, therefore, appraisals should be augmented. Earnings rarely reflect a true expected use of conversion proceeds and others are understated by investments in low-rate securities. Earnings are rarely estimated in conjunction with the converting institution's future business plan—a fact that the FDIC finds inconsistent and unacceptable.

During the pendency of this rulemaking and subsequent to the adoption of a final rule, the FDIC will continue to review appraisal reports to ensure that converting institutions and the conversion stock are properly valued. The FDIC will continue to object to proposed conversions supported by unacceptable appraisal reports.

B. Depositor Voting Requirement and Prohibition on the Use of Running Proxies

The Board believes that, in order for a board of trustees of a mutual savings bank to properly exercise its fiduciary responsibilities to the bank and its depositors, the board should obtain a vote of depositors in favor of the proposed conversion before the proposed conversion is completed. Most states, but not all, require a depositor vote for mutual-to-stock conversions. The OTS also requires both federal and state savings associations to obtain a majority vote of association members as one of the pre-conditions to converting. Some states, however, require only that the board of trustees (or similar group) approve the plan of conversion and do not require a vote of members.

As discussed below, several of the comments on the Interim Rule voiced opposition to "voting rights" for depositors in states that do not provide such rights. In preliminary response to those comments, and subject to others that the FDIC hopes to receive on this issue, the Board thinks that it is necessary and appropriate for the FDIC to require a depositor vote on proposed conversions. Such a requirement would not necessarily contradict state laws (that do not require a depositor vote), but supplement the state law by requiring the member vote. The FDIC's concern is with the board of trustees' proper exercise of its fiduciary duties of loyalty and care to the bank and its depositors. Preliminarily, the Board believes that the proper exercise of such duties requires that depositors, as stakeholders of the bank, have the opportunity to approve or disapprove the proposed conversion. This requirement is, in part, rooted in the foregoing concern that bank insiders often benefit personally from bank conversions. This almost inherent conflict of interest (between self interest and the interests of the bank) may be mitigated by the existence of a depositor vote on the proposed conversion. The proposed rule, therefore, would require a depositor vote in favor of the proposed conversion of a State Savings Bank to stock form. Unless otherwise prescribed by the applicable state law, the required vote would be a majority of the bank's depositors and other stakeholders of the bank who the bank's trustees reasonably determine are entitled to vote on the conversion.

In the same vein, the Board believes that a proxy specifically designed for the proposed conversion should be used to obtain a depositor vote on the conversion. In some states the management of converting banks and savings associations, subject to certain conditions, may use so-called "running proxies" (proxies obtained when a depositor opened his or her account with the institution) to vote in favor of the proposed conversion. The former OTS mutual-to-stock conversion regulations also permitted the use of running proxies, under certain circumstances. Running proxies are prohibited by the OTS Revisions.

The FDIC believes, preliminarily, that given the material change in structure represented by the bank's conversion to stock form, it is imperative that depositors be permitted to vote separately on the proposed conversion and that the most effective manner to assure that depositors are fully informed of the proposed conversion and have an opportunity to participate fully in the conversion would be to prohibit the use of running proxies in such transactions. This is in keeping with the FDIC's concern that the management of a State Savings Bank fulfill its fiduciary responsibilities by assuring that the depositors are in agreement with the proposed conversion. Thus, the proposed rule would prohibit the use of running proxies in the mutual-to-stock conversion process.

C. Restrictions on Management Stock Benefit and Recognition Plans (MRPs)

The OTS Revisions prohibit MRPs in conversions of federal and state savings associations. Currently, however, the regulations and policies of some state banking and thrift regulators permit MRPs to purchase a certain percentage of the stock sold in a mutual-to-stock conversion of a bank or savings association depending on the institution's capital position. Under some of these regulations and guidelines, management also may be granted stock options up to a certain percentage of the shares issued in the conversion. Based on a review of numerous proposed conversions, the Board believes that some bank insiders may be sacrificing the interests of their institutions and depositors in order to acquire significant amounts of conversion stock and other benefits more advantageously than depositors. Also, in some instances, the issuance of conversion stock to an MRP decreases the opportunity for depositors to obtain conversion stock. Moreover, the issuance of stock options at the conversion price, rather than at the aftermarket trading price, which in recent years has been substantially higher than the conversion price, creates the impression that insider enrichment may be the main reason for the conversion.

These factors reflect negatively on management's fulfillment of its fiduciary obligations. In fact, it may be an inherent conflict of interest for management to decide to convert the bank to stock form when, as part of the proposed conversion, management will reap significant benefits. Independent business judgment is essential to the proper carrying out of a manager's obligations. This judgment may be severely clouded when MRPs are provided as part of the conversion transaction.

As discussed below, the FDIC received several comments on the Proposed Policy Statement and the Interim Rule about management compensation in the conversion process. Many of these comments argued that the management of converting institutions should benefit from the conversion because such insiders are responsible for the bank's success and will undertake additional and perhaps more difficult challenges upon the bank's conversion to stock form. The Board does not disagree with this general point of view. While the Board believes that management and trustees would have increased responsibilities as a public company, preliminarily, the Board believes that, in most cases, market-based management compensation should be determined by the stockholders after the conversion is completed.

In particular, the proposed rule would provide that no converted savings bank shall, for one year from the date of the conversion, implement a stock option plan or management or employee stock benefit plan, other than a tax-qualified employee stock ownership plan, unless: each of the plans was fully disclosed in the proxy solicitation and conversion stock offering materials; all such plans are approved by a majority of the bank's stockholders, or in the case of a recently formed holding company, its stockholders, prior to implementation and no sooner than the first annual meeting following the conversion; in the case of a savings bank subsidiary of a mutual holding company, all such plans are approved by a majority of stockholders other than its parent mutual holding company prior to implementation and no sooner than the first annual meeting following the stock issuance; for stock option plans, stock options are granted at no lower than the market price at which the stock is trading at the time of grant; and for management or employee stock benefit plans, no conversion stock is used to fund the plans.

The proposed restrictions on MRPs do not include specific percentage limitations. Preliminarily, the FDIC believes that the proposed restrictions would adequately safeguard against potential management self-interest in mutual-to-stock conversions. Also, pursuant to the Interim Rule, the FDIC would continue to look to MRP percentage limitations in the OTS regulations, as well as in the applicable state law and regulations, as a frame of reference for reviewing proposed conversions of State Savings Banks. In addition, the FDIC believes that specific percentage limitations on MRPs may be too rigid and not serve to stem management abuses in every situation. The Board requests specific comments on whether MRP percentage limitations should be specified in the FDIC's regulations and, if so, what those percentages should be.

D. Eligibility Record Date, Priority to Depositors Residing in the Bank's Local Community, Priority of Employee Stock Ownership Plans (ESOPs)

The OTS Revisions require, among other things, that the record date established by a converting institution to determine which depositors will be afforded a priority in obtaining subscription rights in the conversion stock be set at no less than a year prior to the board of director's approval of the conversion. The Board believes, preliminarily, that, in order for a board of trustees of a State Savings Bank to carry out its fiduciary responsibilities to the bank and its depositors, the board must assure an equitable and lawful conversion process. From numerous comments we have received thus far and from our own review of proposed and completed conversions, it is apparent that so-called professional depositors, who place funds in mutual banks and savings associations throughout the country in order to gain a purchase priority if the institution converts to stock form, have reaped substantial profits on conversions of mutual institutions. A proper exercise of fiduciary responsibilities toward the bank and its longer-term depositors dictates that professional depositors not be allowed to experience windfall gains in conversions. Requiring that the eligibility record date be no less than one year prior to the board's adoption of the plan of conversion would help assure that longer-term depositors are more likely than professional depositors to benefit from the stock purchase priority. Thus, the proposed rule would require that the eligibility record date be no less than one year prior to the date the board of trustees approves the plan of conversion. The FDIC requests specific comment on whether the one-year period is sufficient and on whether the date chosen should be based on the board of trustees' first consideration of whether the bank should be converted to the stock form of ownership.

In a further effort to mitigate the exploitation of the mutual-to-stock conversion process by professional depositors, the proposed rule would provide a stock purchase preference to eligible depositors in the bank's "local community" or within 100 miles of a home or branch office of the converting bank. The term "local community" would be defined as all counties in which the converting bank has its home office or a branch office, each county's standard metropolitan statistical area or the general metropolitan area of each of these counties and such other area(s) as provided for in bank's plan of conversion. The Board believes that it is likely that the double requirement (for a stock purchase priority) of having a depositor relationship with the bank for at least one year prior to the date of the board's adoption of the plan of conversion and of having to reside in the bank's local community would decrease the participation of professional depositors in conversions of State Savings Banks.

The Board is mindful, however, that there may be depositors, particularly long-term depositors, of a State Savings Banks who are not "professional depositors," but happen to live outside the "local community" or the 100-mile area designated by the proposed requirement. Thus, the FDIC requests specific comment on whether and how such depositors can be included within the proposed stock purchase preference for "local depositors." One possible alternative would be to expand the definition of "local depositor" to include all depositors who have had a deposit relationship with the bank for, say, three or five years prior to the board of trustees' adoption of the plan of conversion. The Board is interested in comments on all aspects of the proposed priority requirement for local depositors, including views on whether the requirement is necessary, sufficient and/or equitable.

In the same vein, the Board believes that ESOPs (tax-qualified or otherwise) should not be accorded higher purchase priority rights than long-term depositors. The Board believes that general principles of fiduciary duty require that the board of trustees of a State Savings Bank put the interest of long-term depositors ahead of the interests of management and employees. Thus, the proposed rule would require that ESOPs not be accorded a higher subscription right priority than "eligible depositors." The term "eligible depositors" would be defined as a depositor holding qualifying deposits at the bank as of a date designated in the bank's plan of conversion that is not less than one year prior to the date of adoption of the plan of conversion by the converting bank's board of trustees. The FDIC requests specific comment on whether the one-year period is sufficient and on whether the period chosen should be based on the board of trustees' first consideration of whether to convert to stock ownership.

E. Submission of Business Plans

For safety and soundness purposes the FDIC must know the institution's business plan for post-conversion operation, growth and investment of any newly injected capital. The reason is that institutions converting from mutual form undertake a major restructuring that possibly could lead to significant changes in the nature or volume of business conducted. Converted institutions become answerable to shareholders for the first time, and the shareholders are concerned with obtaining a reasonable return on their investment. As discussed in the preamble to the Interim Rule, in the past some institutions, in leveraging capital raised through a conversion and reaching for a return on equity, have vigorously competed for loans and unduly liberalized underwriting standards. Such practices led to loan losses that in many instances depleted more capital than was raised through conversion and, in some cases, failures and losses to the Bank Insurance Fund.

For these reasons, the proposed rule would require State Savings Banks that propose to undergo a mutual-to-stock conversion to submit a business plan including, among other things, a detailed discussion of how management intends to deploy the capital raised through the sale of stock in the conversion, expected returns resulting from the plan, and the justification for any intended stock repurchases.

F. Post-conversion Stock Repurchases

As indicated above, the proposed rule would require that the business plan submitted to the FDIC in connection with a proposed mutual-to-stock conversion include a detailed discussion of how the capital acquired in the conversion will be utilized, including, among other things, a justification for any proposed stock repurchases. The FDIC is concerned that substantial buyback programs begun immediately after the bank's conversion to stock form may not have a legitimate business purpose. Such repurchases also raise issues about whether the conversion stock was appropriately valued. In addition, the FDIC is concerned that a recently converted institution have a capital base adequate to safeguard against possible unexpected losses that may occur under the new organizational structure. To protect against these potential problems, the proposed rule would prohibit stock repurchases for one year following the conversion. Stock repurchases after that period would be considered on a case-by-case basis under section 18(i)(1) of the FDI Act (12 U.S.C. 1828(i)(1)) which prohibits state nonmember banks from reducing or retiring capital without the prior consent of the FDIC.

VI. Merger/Conversions

In some cases, mutual institutions convert to stock ownership in the course of a merger or acquisition transaction with another depository institution or holding company. This is generally known as a merger/conversion. In merger/conversions depositors of the converting institutions obtain the right to purchase stock in the acquiring institution and not the converting savings bank. In exercising its fiduciary responsibilities the board of trustees of a State Savings Bank must assure that value of the converting institution is fairly distributed. This means not only guarding the interests of long-term depositors against insiders and professional depositors, but against acquiring institutions. Based on the proposed conversions we have reviewed in the recent past and other merger conversions we have studied, the Board has observed that, in virtually every merger conversion, the acquiring institution captures a large portion of the value of the converting institution. It is also not uncommon in merger/conversions for the management of the converting mutual institution to receive extremely generous compensation and benefit packages. The OTS Revisions prohibit merger/conversions.

As indicated in the preamble to the OTS Revisions, there is an issue whether the management of a mutual institution is opting for a merger/conversion, instead of a standard conversion, based on the best interests of the institution and its depositors or in response to the level of benefits offered to management by the acquiring entity. As noted in the preamble to the Interim Rule, there have been numerous complaints recently by depositors and others that permitting healthy mutual savings banks to be acquired by means of a merger/conversion has resulted in some savings bank insiders putting their interest ahead of the interests of the converting bank and its depositors.

For the foregoing reasons, the Board believes that merger/conversions should, in most cases, be permitted only in situations where a State Savings Bank is "undercapitalized," "significantly undercapitalized" or "critically undercapitalized" as defined in the FDIC's capital maintenance regulations. At this time, however, the Board does not propose to impose a blanket prohibition on non-supervisory merger/conversions. The FDIC will continue to review proposed merger/conversions with an emphasis on whether the fair value of the State Savings Bank would be delivered to the rightful recipients. The FDIC is requesting specific comment on this topic and specifically whether a moratorium should be placed on merger/conversions involving sufficiently capitalized State Savings Banks.

VII. Comparison With OTS Regulations

As noted above, the requirements imposed by the proposed rule would essentially parallel the OTS Revisions. There are numerous other provisions in the OTS' mutual-to-stock conversion regulations (12 CFR part 563b), however, that are not included in either the FDIC Interim Rule or the proposed rule. Those OTS regulations impose upon converting savings associations specific and detailed requirements on, among other things: items to be included in the plan of conversion, stock purchase priorities, percentage limitations on stock purchases and MRPs, proxy solicitation and the form and content of proxy statements, the form and content of offering circulars, accounting rules, liquidation accounts, notices of filing, availability of conversion documents and pricing and sale of securities.

Preliminarily, the FDIC believes that the requirements imposed by the proposed rule, coupled with the requirements of the Interim Rule, would enable the FDIC to monitor the conversions of State Savings Banks for issues involving safety and soundness, fiduciary duty and other violations of law. Pursuant to the Interim Rule, the FDIC uses the OTS regulations as a frame of reference in reviewing proposed mutual-to-stock conversions of State Savings Banks. The FDIC also looks to the applicable state law and regulations in reviewing proposed conversions. To date, the FDIC has not identified a need to adopt a more comprehensive set of regulations addressing all aspects of the mutual-to-stock conversion process. It has been suggested, however, that in order to achieve greater uniformity with the OTS' conversion regulations the FDIC's conversion regulations should be expanded to match the scope and depth of the OTS rules. Thus, the Board specifically requests comment on whether the FDIC's regulations should be expanded to include provisions similar to those of the OTS regulations that are not already included in either the Interim Rule or the proposed rule.

VIII. Convenience and Needs Requirement

The OTS has issued a proposed rule that would add a requirement to its mutual-to-stock conversion regulations that, in determining whether to approve such a conversion transaction, the OTS would consider the convenience and needs of the community served by the converting institution. 59 FR 22764 (May 3, 1994.) The "convenience and needs of the community to be served" by the applicant is one of the statutory factors required to be considered by the Board in acting on applications for deposit insurance (12 U.S.C. 1816). Thus, in connection with the review of mutual holding company reorganizations of insured depository institutions the FDIC already is required to (and does) apply a convenience and needs test. The Board requests comment on whether the FDIC could and should also consider imposing such a requirement in connection with the mutual-to-stock conversions of State Savings Banks.

IX. Summary of Comments on the Proposed Policy Statement and Interim Rule

The FDIC received 85 written comments on the Proposed Policy Statement and Interim Final Rule: 60 from banks, savings banks, cooperative bank and saving associations; 7 from bank and thrift industry trade groups; 6 from state banking and thrift regulators; 5 from individuals; 5 from law firms; 1 from a bank holding company; and 1 from a regulatory "shadow" group.

1. FDIC Oversight Role

The comments did not focus on describing recent abuses in mutual-to-stock conversions. They generally acknowledged that there had been notable examples of insider abuse in the recent past and then suggested how future potential abuses could be avoided. Many of those who commented recommended that the FDIC play an oversight role in the mutual-to-stock conversions of State Savings Banks. One state stock savings bank that is owned by a mutual holding company noted that "present abuses in several recent and proposed conversions have demonstrated the need for the FDIC to maintain oversight of the conversion process, to ensure that issues of both safety and soundness and of fiduciary care are identified and adequately addressed." One state savings association trade group commented that "with recent publicity over some apparent abuses in the [conversion] process and resulting Congressional concerns, * * * it is most appropriate and important for the FDIC to assert regulatory jurisdiction over conversions by state nonmember banks." One state thrift regulator noted that the FDIC had issued an "excellent set of rules" with a "very conservative, realistic approach to a situation which could have gotten out of hand if left to go unchecked." One State Savings Bank said simply that "past abuses [in mutual-to-stock conversions] support the need for FDIC oversight."

Several commenters suggested that the FDIC have oversight authority of State Savings Bank mutual-to-stock conversions, but with prescribed limitations. For example, a national banking industry trade group noted that it "deplores instances in which it can be demonstrated that insiders involved in mutual-to-stock conversions received benefits so large that they bear no reasonable relationship to the institution's performance * * * Unjustifiable windfall profits, depletion of capital without concern for safety and soundness and manipulation of the value of the institution to benefit limited interests are practices that deserve close scrutiny and action by the appropriate authorities * * * In responding to these issues, the FDIC should act quickly and decisively in concert with the state authorities." The trade group further commented that the "cornerstone" for the FDIC's response to issues arising from the mutual-to-stock conversion issue is the state regulatory authorities. One state thrift regulator expressed support for FDIC oversight of conversions if such involvement assures "reasonableness and relative uniformity of benefits for both state- and OTS-regulated institutions * * * and allows state variation from OTS requirements if such variations benefit the institution and the depositors."

One mutual savings bank noted that the FDIC should focus on broad safety-and-soundness issues and that detailed regulations, like the OTS', are not necessary. Another state mutual savings bank said that the FDIC should be involved in conversion oversight, but only in terms of setting minimum standards rather than superseding state regulation. Many savings banks in Massachusetts and a banking trade association in that state commented that the FDIC should issue conversion regulations similar to the OTS and Massachusetts mutual-to-stock conversion regulations, noting that the FDIC has broad statutory authority to regulate issues that affect safety and soundness. They noted that the FDIC's focus should be to eliminate abuses in stock evaluation, depositor disclosures, depositors' ability to purchase stock at conversion and insider compensation programs. They also asserted that state statutory and regulatory conversion rules should not be superseded by federal law. One mutual savings bank noted that promulgating federal laws or regulations "should not be allowed when it is determined that state requirements are generally consistent or more stringent than existing federal rules."

Some commenters contended that state regulation was sufficient in the area of mutual-to-stock conversions and that the Interim Rule is not necessary. One mutual savings bank asserted that the "averments made by the FDIC in support of the Interim Rule that it is needed for safety and soundness reasons and to protect the interest of depositors are without merit and are being offered only to support continued federal intrusion into issues which are primarily the concern of state law and regulation." One state mutual savings bank stated that the "proposed policy statement is overkill" and that "state regulation can handle insider abuse issues." One state banking and thrift regulator asserted that state regulators are not to blame for insider abuses in conversions and that "states' rights should not be tramped on." The regulator suggested that a committee of state and federal regulators work together to address issues and concerns.

All those who commented on the issue expressed objection to Congressional legislation to address current issues in mutual-to-stock conversions. One mutual savings bank commented that "if the FDIC does not act, Congress will—in an uninformed manner." Another mutual savings bank noted that "regulation is far preferable than legislation." A national banking industry trade group noted that the "FDIC has full statutory authority in the conversion area to ensure the integrity of the conversion process and no new legislation is necessary to address these issues."

2. Transferable Subscription Rights

The FDIC received many comments on the issue whether conversion rules should be modified to require converting institutions to provide depositors with transferable subscription rights to purchase the stock issued in the mutual-to-stock conversion. This issue was not addressed in either the Proposed Policy Statement or the Interim Rule. In recent Congressional testimony the FDIC Chairman has indicated that the FDIC may consider whether depositors and other stakeholders of converting

institutions should receive transferable subscription rights so they can participate more equitably in the conversion process and receive benefits from the conversion without having to purchase conversion stock to do so. With one exception, all the comments received on this issue opposed the idea. One mutual savings bank stated that "we are outraged that any governmental body would consider provisions such as depositor subscription rights that could enable speculators to force a mutual bank to convert to a stock bank. Such a provision would not just endanger this bank, but destroy it, along with many other community institutions." A national banking industry trade group echoed these sentiments, noting that "permitting or requiring transferable subscription rights would undermine the integrity of conversions by generating intense pressures to convert mutuals to stock form. All mutuals would be put into play."

Many mutual savings and cooperative banks in Massachusetts expressed their objection to "mandatory depository transferable/saleable subscription rights" noting that "they could subject our depositors to professional flippers [out-of-area depositors who are just interested in short-term investment gains], attorneys and investment firms who may bring pressure to force a mutual-to-stock conversion." A shadow regulatory group expressed the opposite view, arguing that subscription rights should be transferable to provide an incentive for depositors to exercise their subscription rights.

3. Contributions to the Community/FDIC

Most of those who commented on the issue expressed opposition to requiring converting institutions to contribute part of the conversion proceeds directly to their communities. Many noted such a requirement would impose a "social tax" on converting institutions. A state savings bank stated that "a capital giveaway wouldn't further the FDIC's legitimate goal of preserving safety and soundness." Another state savings bank noted that such a "social tax would jeopardize the safety and soundness of the bank and would negatively affect credit availability to local consumers and small businesses. These are not public funds." One of the numerous savings banks in Massachusetts who commented negatively on this issue asserted that "a social tax would replace insider greed with a form of outsider greed."

Some commenters, however, suggested that the FDIC should share in conversion proceeds. A regulatory "shadow" group stated that the FDIC should receive at least 50 percent of [the transferable subscription] rights [issued in a mutual-to-stock conversion], which it would sell in the market. The group argued that: "the taxpayer, through the FDIC, has the strongest claim on the existing surplus of converting mutual institutions. The taxpayer has taken the risk of loss that is usually borne by the stockholder. The public, that had to pay for the loss of failed thrifts, should reap some of the benefits that all usually go to the stockholder." A state bank commented that "windfall appreciation from stock conversions should accrue to the FDIC. The FDIC has provided protection for thrifts over the years and deserves the benefit."

4. Merger/Conversions

An individual who commented on the Proposed Policy Statement and Interim Rule stated that merger/conversions should not be allowed because they "only serve management's interests and not the depositors." He suggested that any merger take place only after an initial "free-standing" standard conversion. A bank holding company commented that merger/conversions are desirable because they increase competition in the industry and support safety and soundness. It noted that state law is the "proper authority" to regulate management compensation issues in merger/conversions. A law firm commented that the problems with merger/conversions could be "reduced substantially if the OTS revised its policy to encourage a discount in the acquirors' stock as offered to depositors of the acquired institution." A state banking and thrift regulator suggested that the FDIC and OTS collaborate in a joint determination on whether merger/conversions will be approved in the future and, if so, adopt specific requirements to provide parity among savings associations and savings banks. A state banking and thrift industry trade group recommended that merger/conversions be permitted only in the case of undercapitalized institutions or at the discretion of the regulators on a case-by-case basis. A national banking and thrift industry trade group said it would not oppose a "regulatory pause by the FDIC to evaluate its rules governing merger/conversions."

5. Depositor Voting/Running Proxies

Several commenters stated that the FDIC should not provide "voting rights" to depositors in connection with conversions of mutual savings banks in states that do not provide such voting rights. One state bank asserted that "voting rights should be left to state law. To impose some sort of depositor approval requirement in a state that does not have depositor voting could lead to expanded ownership claims by depositors that could operate to the detriment of mutuals." One state banking and thrift regulator (of a state that does not provide a depositor voting right) asserted that "any FDIC requirement of a depositor vote in a mutual-to-stock conversion * * * [would be] wholly unsupported by any expressly preemptive federal statute." Many banks in Massachusetts commented that any depositor voting right requirements imposed by the FDIC would put undue pressure on mutuals in that state to convert to stock ownership.

An individual noted that general proxies should be prohibited and that all conversions should be subject to a special proxy, or proxies should be entirely eliminated in favor of a majority-rules scheme. A national banking and thrift industry trade group noted that the use of general proxies is reasonable under the OTS' rules.

6. Management Benefits

Many of the commenters discussed the issue of management benefits in conversions. Several of them stated that insiders should share in the benefits of conversions because the insiders managed the institution in a safe-and-sound manner. One state thrift regulator (and other commenters) suggested that MRPs be based on the size of the institution and not on "straight across-the-board percentages." One national banking and thrift industry trade group noted that "avoiding the use of across-the-board percentages for MRPs and tailoring their availability more to the size of the institution and their specific business plan objectives and needs would be a reasonable approach." One mutual savings bank noted that MRPs, stock option plans and employee stock ownership plans "all encourage more stock ownership and cement an identity among outside shareholders and those who run and work for the company." It also noted that OTS rules are workable in this regard and should be adopted by the FDIC. Another savings association commented that conversions should not be permitted where there is excessive compensation for insiders, but "without benefits to insiders there will be no conversions."

An individual commented that the FDIC should not regulate director remuneration in conversions of healthy mutuals because those conversions do not place the insurance fund at risk and shareholders' votes are dispositive under the "corporate waste" doctrine. A law firm, commenting on behalf of a state thrift industry trade group, also noted that compensation benefits are not a safety-and-soundness concern if the institution meets the applicable capital requirements. In addition, it stated that a "uniformity of benefits between state- and OTS-regulated conversions" is necessary to assure the end of "regulatory arbitrage." A state bank and thrift regulator (and several other commenters) suggested that the FDIC and OTS publish joint MRP guidelines permitting or prohibiting MRPs, along with specific rules therefore. It noted that "proper resolution of the MRP issue will have a substantial impact on fairness to depositors in conversions." One savings bank commented that "when an institution contemplates going public for the right reasons (expansion, market share, competitive advantage) the benefits should go to those willing to risk their careers (board and management team) or their capital (shareholders) not to the faceless non-entity group known as the existing depositors."

7. Appraisals

A state savings association noted that one of the basic problems with conversions is the appraisal of the institution. It stated that "the FDIC needs to be satisfied that the various states are as well equipped [as the "qualified" OTS staff] to perform a definitive analysis of institution appraisals as well as know with certainty that the appraiser is qualified to assess a financial institution's value." The commenter also noted that fairness and moderation are the keys to governing stock conversions. An individual commented that the FDIC should not regulate the offer price for healthy mutuals because those conversions do not place the insurance fund at risk. An individual suggested that the applicable regulator should retain its own appraiser to assure fair valuation of the converting entity. A state bank and thrift regulator stated that appraisal rules required by the FDIC should be specifically stated in the Interim Rule.

8. Other Comments

An attorney commented that the Interim Rule should allow depositors full access to all papers filed in connection with proposed merger/conversions, as well as standard conversions. He also suggested that depositors be permitted to file with the FDIC objections to such proposed transactions.

A few commenters noted that the FDIC should clarify that the Interim Rule applies to mutual holding company formations and merger/conversions.

An individual suggested that, to protect the insurance fund, a converting institution should prepare a business plan regarding the proposed use of the new capital. The plan should be reviewed by the applicable state; however, if the FDIC feels state review will be insufficient, the FDIC is empowered by the Federal Deposit Insurance Act (FDI Act) to assume jurisdiction.

Two law firms suggested that the FDIC's review time on conversion notices be reduced from 60 days to 45 days because of the potential that financial information might become "stale" under rules issued by the Securities and Exchange Commission and the converting institution would have to go through the expense of producing updated financial statements.

Request for Public Comment

The FDIC is hereby requesting comment during a 30-day comment period on all aspects of this proposed rule.

List of Subjects in 12 CFR Part 333

Banks, banking, Corporate powers.

The Board of Directors of the Federal Deposit Insurance Corporation hereby proposes to amend part 333 of title 12 of the Code of Federal Regulations as follows:

PART 333—EXTENSION OF CORPORATE POWERS

1. The authority citation for part 333 is revised to read as follows:

Authority: 12 U.S.C. 1816, 1818, 1819 ("Seventh", "Eighth" and "Tenth"), 1828, 1828(m), 1831p-1(c).

2. Section 333.4 is added to read as follows:

§ 333.4 Conversions from mutual to stock form.

(a) *Scope.* This section applies to the conversion of insured mutual state savings banks to the stock form of ownership. It supplements the procedural and other requirements for such conversions in § 303.15 of this chapter. This section also applies, to the extent appropriate, to the reorganization of insured mutual state savings banks to the mutual holding company form of ownership. As determined by the Board of Directors of the FDIC on a case-by-case basis, this section does not apply to mutual-to-stock conversions of insured mutual state savings banks whose capital category under § 325.103 of this chapter is "undercapitalized," "significantly undercapitalized" or "critically undercapitalized." The Board of Directors of the FDIC may grant a waiver in writing from any requirement of this section for good cause shown.

(b) *Conflicts with state law.* In the event that an insured mutual state savings bank that proposes to convert to the stock form of ownership finds that compliance with any provision of this section would be inconsistent or in conflict with applicable state law, the bank may file a written request for waiver of compliance with such provision by the FDIC. In making such request, the bank shall demonstrate that the requested waiver, if granted, would not result in any effects that would be detrimental to the safety and soundness of the bank, entail a breach of fiduciary duty on part of the bank's management or otherwise be detrimental or inequitable to the bank, its depositors, any other insured depository institution(s), the federal deposit insurance funds or to the public interest.

(c) *Definitions.* For purposes of this section:

(1) *Local community* includes all counties in which the converting bank has its home office or a branch office, each county's standard metropolitan statistical area or the general metropolitan area of each of these counties and such other area(s) as provided for in the plan of conversion, acceptable to the FDIC; and

(2) *Eligible depositors* are depositors holding qualifying deposits at the bank as of a date designated in the bank's plan of conversion that is not less than one year prior to the date of adoption of the plan of conversion by the converting bank's board of trustees.

(d) *Requirements.* In addition to other requirements that may be imposed by the applicable state statutes and regulations and other federal statutes and regulations, including § 303.15 of this chapter, an insured mutual state savings bank shall not convert to the stock form of ownership unless the following requirements are satisfied:

(1) The subscription offering of the stock to be offered or sold in the conversion shall provide a stock purchase priority to eligible depositors, other depositors and others entitled to vote on the bank's proposed conversion residing in the bank's local community or within 100 miles of a home office or branch of the converting bank;

(2) Employee stock ownership plans shall not have priority over subscription rights of eligible depositors;

(3) Any direct community offering by the converting bank shall give a purchase priority to natural persons

residing in the bank's local community or within 100 miles of a home office or branch of the bank;

(4) The proposed conversion shall be approved by a vote of at least a majority of the bank's depositors and other stakeholders of the bank who the bank's trustees reasonably determine are entitled to vote on the conversion, unless the applicable state law requires a higher percentage, in which case the higher percentage shall be used. Voting may be in person or by proxy;

(5) Management shall not use proxies executed outside the context of the proposed conversion to satisfy the voting requirement imposed in paragraph (d)(4) of this section; and

(6) In addition to the materials to be submitted to the FDIC pursuant to § 303.15(c) of this chapter, the bank must submit to the FDIC:

(i) A full appraisal report on the value of the converting bank and the pricing of the stock to be sold in the conversion. The report must be prepared by an independent appraiser and must include a complete and detailed description of the elements that make up an appraisal report, justification for the methodology employed and sufficient support for the conclusions reached therein, including a full discussion of the applicability of each peer group member and documented analytical evidence supporting any variance (above or below) the institution proposing to convert may have from the peer group statistics and a complete analysis of the institution's *pro forma* earnings which should include its full potential once the institution fully deploys its new capital pursuant to its business plan; and

(ii) A business plan which must include, in part, a detailed discussion of how the capital acquired in the conversion will be utilized, expected returns resulting from the plan and a justification for any proposed stock repurchases.

(e) *Restriction on repurchase of stock.* An insured mutual state savings bank that has converted from the mutual to stock form of ownership may not repurchase its capital stock within one year following the date of its conversion to stock form. Any stock repurchases after the one year period shall be subject to the requirements of section 18(i)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1828(i)(1)).

(f) *Stock benefit plan limitations.* No converted insured mutual state savings bank shall, for one year from the date of the conversion, implement a stock option plan or management or employee stock benefit plan, other than a tax-qualified employee stock ownership plan, unless each of the following requirements is met:

(1) Each of the plans was fully disclosed in the proxy soliciting and conversion stock offering materials;

(2) All such plans are approved by a majority of the bank's stockholders, or in the case of a recently formed holding company, its stockholders, prior to implementation and no sooner than the first annual meeting following the conversion;

(3) In the case of a savings bank subsidiary of a mutual holding company, all such plans are approved by a majority of stockholders other than its parent mutual holding company prior to implementation and no sooner than the first annual meeting following the stock issuance;

(4) For stock option plans, stock options are granted at no lower than the market price at which the stock is trading at the time of grant; and

(5) For management or employee stock benefit plans, no conversion stock is used to fund the plans.

By the order of the Board of Directors.

Dated at Washington, D.C., this 31st day of May, 1994.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Acting Executive Secretary.

Approval and Promulgation of Air Quality Implementation Plans; Designation of Areas for Air Quality Planning Purposes; Redesignation of the Charleston West Virginia Ozone Nonattainment Area to Attainment and Approval of the Area's Maintenance Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: On November 13, 1992, the West Virginia Department of Commerce, Labor & Environmental Resources; Division of Environmental Protection; Office of Air Quality (WVOAQ) submitted a request to EPA to redesignate the Charleston moderate ozone nonattainment area (Kanawha and Putnam Counties) from nonattainment to attainment. On November 13, 1992, the WVOAQ also submitted a maintenance plan for the Charleston area as a revision to the West Virginia State Implementation Plan (SIP). On February 28, 1994, West Virginia submitted an update to its November 13, 1994 submittal. The EPA is proposing to redesignate the Charleston ozone nonattainment area from nonattainment to attainment and proposing to approve the maintenance plan submitted by the WVOAQ as a revision to the West Virginia SIP because the relevant requirements set forth in the Clean Air Act, as amended in 1990, have been met. This proposal to approve the redesignation is contingent upon West Virginia's submittal of a revision to its maintenance plan's provisions for implementation of contingency measures. These actions are being taken in accordance with the Act. The approved maintenance plan will become a federally enforceable part of the SIP for the Charleston area.

DATES: Comments must be received on July 13, 1994.

ADDRESSES: Written comments should be sent to Thomas J. Maslany, Director, Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. The state submittal and EPA's Technical Support Document (TSD) prepared on these proposed actions is available for public review at the above address and at the West Virginia Division of Environmental Protection, Office of Air Quality 1558 Washington Street, East Charleston, West Virginia, 25311–2599.

FOR FURTHER INFORMATION CONTACT: Michael Dubowe at (215) 597–1109 or Todd Ellsworth at (215) 597–2906.

SUPPLEMENTARY INFORMATION:

I. Background

The Clean Air Act, as amended in 1977 (1977 Act), required areas that were designated nonattainment based on a failure to meet the ozone national ambient air quality standard (NAAQS) to develop SIPs with sufficient control measures to expeditiously attain and maintain the standard. (1977 Act, sections 110(a)(1) and 172.) The Charleston, West Virginia nonattainment area was designated under section 107 of the 1977 Act as nonattainment with respect to the ozone NAAQS on September 12, 1978. (40 CFR 81.347) In accordance with section 110 of the 1977 Act, West Virginia submitted a part D ozone SIP on November 15, 1979 which EPA approved as meeting the requirements of section 110 and part D of the 1977 Act. In its SIP, the State of West Virginia projected that the Charleston, West

Virginia nonattainment area would attain the ozone standard by December 31, 1982. The area failed to attain the standard.

On November 15, 1990, the Clean Air Act Amendments of 1990 (hereafter the Act) were enacted. Public Law 101–549, 104 Stat. 2399, codified at 42 U.S.C. 7401–7671q. The nonattainment designation of the Charleston, West Virginia area continued by operation of law according to section 107(d)(1)(C)(i) of the Act, furthermore, it was classified by operation of law as moderate for ozone pursuant to section 181(a)(1) of the Act. See 56 FR 56694 (Nov. 6, 1991) and 57 FR 56762 (Nov. 30, 1992), codified at 40 CFR 81.347.

The Charleston, West Virginia ozone nonattainment area more recently has attained the ozone NAAQS, based on air quality data from 1989 through 1991. In an effort to comply with the Act and to ensure continued attainment of the NAAQS, on November 13, 1992 the WVOAQ submitted an ozone maintenance plan for the Charleston, West Virginia area as a revision to the West Virginia SIP.

On November 13, 1992, the State of West Virginia also requested that EPA redesignate the Charleston, West Virginia area to attainment with respect to the ozone NAAQS. In addition, on February 28, 1994, West Virginia submitted an update to its November 13, 1992 submittal, collectively referred to hereafter as the "State of West Virginia's redesignation request."

II. Evaluation Criteria

According to section 107(d)(3)(E) of the Act, five specific requirements must be met in order for EPA to redesignate an area from nonattainment to attainment:

1. The area must have attained the applicable NAAQS;
2. The area has met all relevant requirements under section 110 and part D of the Act;
3. The area has a fully approved SIP under section 110(k) of the Act;
4. The air quality improvement must be permanent and enforceable; and
5. The area must have a fully approved maintenance plan pursuant to section 175A of the Act.

III. Review of West Virginia's Submittal

The State of West Virginia's redesignation request for the Charleston, West Virginia area included information and documentation sufficient for EPA to determine that the five requirements of section 107, noted above have been met. Following is a brief description of how each of these requirements has been fulfilled. Because the maintenance plan is a critical element of the redesignation request, EPA will discuss its evaluation of the maintenance plan under its analysis of the redesignation request. A Technical Support Document (TSD) has also been prepared by EPA on these rulemaking actions. That TSD is available for public inspection at the EPA Regional Office listed in the ADDRESSES section of this document.

1. Attainment of the Ozone NAAQS

The submittal contains an analysis of ozone air quality data which is relevant to the maintenance plan and to the redesignation request. Ambient ozone monitoring data for 1989 through 1991 show attainment of the ozone NAAQS in the Charleston, West Virginia area. See 40 CFR § 50.9 and appendix H. The State of West Virginia's request for redesignation included documentation that the Charleston, West Virginia ozone nonattainment area has complete, quality-assured data showing attainment of the standard over the most recent consecutive three calendar year period. Therefore, the Charleston, West Virginia area has met the first statutory criterion for redesignation to attainment of the ozone NAAQS found at section 107(d)(3)(E)(i) of the Act. It is important to note that EPA has also reviewed the ozone data monitored during the 1992 and 1993 ozone seasons in the Charleston area and determined that no violations of the standard were monitored during those years. Therefore, there have been no violations of the ozone standard monitored in the Charleston area since the 1988 ozone season.

2. Meeting Applicable Requirements of Section 110 and Part D

As previously stated, EPA fully approved the State of West Virginia SIP for the Charleston, West Virginia area as meeting the requirements of section 110(a)(2) and part D of the 1977 Act. The amended Act, however, modified section 110(a)(2) and, under Part D, revised section 172 and added new requirements for all nonattainment areas. Therefore, for purposes of redesignation, EPA has reviewed the SIP to ensure that it contains all measures that were due under the Act as of November 13, 1992, the date the State of West Virginia submitted its redesignation request.

2.A. Section 110 Requirements

Although section 110 of the 1977 Act was amended in 1990, the Charleston, West Virginia SIP meets the requirements of section 110(a)(2) of the amended Act. A number of the requirements did not change in substance and, therefore, EPA believes that the pre-amendment SIP met these requirements. As to those requirements that were amended, See 57 FR 27936 and 23939 (June 23, 1993), many are duplicative of other requirements of the Act. EPA has analyzed the SIP and determined that it is consistent with the requirements of section 110(a)(2) of the Act. It contains enforceable emission limitations, it requires monitoring, compiling, and analyzing ambient air quality data, it requires preconstruction review of new major stationary sources and major modifications to existing ones, it provides for adequate funding, staff, and associated resources necessary to implement its requirements, and requires stationary source emissions monitoring and reporting.

2.B. Part D Requirements

Before the Charleston, West Virginia ozone nonattainment area may be redesignated to attainment, it also must have fulfilled applicable requirements of part D due as of the date of the State's redesignation request. Under part D, an area's classification indicates the requirements to which it will be subject. Subpart 1 of part D sets forth the basic nonattainment requirements applicable to all nonattainment areas, classified as well as nonclassifiable. Subpart 2 of part D establishes additional requirements for nonattainment areas classified under table 1 of section 181(a). The Charleston, West Virginia ozone nonattainment area was classified as moderate. (See 56 FR 56694, codified at 40 CFR 81.347). Therefore, in order to be redesignated to attainment, West Virginia must meet the applicable requirements of subpart 1 of part D—specifically sections 172(c) and 176—as well as the applicable requirements of subpart 2 of part D—due as of the date of the State's November 13, 1992 request for redesignation. EPA interprets section 107(d)(3)(E)(v) to mean that for a redesignation request to be approved, the State has met all requirements that applied to the subject area prior to or at the time of the submission of a complete redesignation request. Requirements of the Act that come due subsequently continue to be applicable to the area at those later dates (see section 175A(c)) and, if the redesignation of the area is disapproved, the State remains obligated to fulfill those requirements.

2.B.1. Subpart 1 of Part D—Section 172(c) Provisions

Under section 172(b), the section 172(c) requirements are applicable no later than 3 years after an area has been designated as nonattainment under the Act. EPA has determined that these requirements were not applicable to ozone nonattainment areas on or before

November 13, 1992—the date the State of West Virginia submitted a complete redesignation request and maintenance plan for Charleston. Therefore, the State of West Virginia is not required to meet these requirements for purposes of redesignation. West Virginia has, however, completed and submitted a 1990 base year emissions inventory for its ozone nonattainment areas (including the Charleston area) in accordance with EPA's guidance. It is also important to note that upon redesignation to attainment, the preconstruction new source review requirements for prevention of significant deterioration (PSD) would apply in the Charleston area. EPA approved West Virginia's PSD SIP program on April 11, 1986 (51 FR 12517).

2.B.2. Subpart 1 of Part D—Section 176 Conformity Provisions

Section 176(c) of the Act requires States to revise their SIPs to establish criteria and procedures to ensure that Federal actions, before they are taken, conform to the air quality planning goals in the applicable State SIP. The requirement to determine conformity applies to transportation plans, programs and projects developed, funded or approved under title 23 U.S.C. or the Federal Transit Act ("transportation conformity"), as well as to all other Federal actions ("general conformity"). Section 176 further provides that the conformity revisions to be submitted by States must be consistent with Federal conformity regulations that the Act required EPA to promulgate. Congress provided for the State revisions to be submitted one year after the date for promulgation of final EPA conformity regulations. When that date passed without such promulgation, USEPA's General Preamble for the Implementation of Title I informed States that its conformity regulations would establish a submittal date (see 57 FR 13498, 13557 (April 16, 1992)).

The EPA promulgated final transportation conformity regulations on November 24, 1993 (58 FR 62188) and general conformity regulations on November 30, 1993 (58 FR 63214). These conformity rules require that States adopt both transportation and general conformity provisions in the SIP for areas designated nonattainment or subject to a maintenance plan approved under CAA section 175A. Pursuant to § 51.396 of the transportation conformity rule and § 51.851 of the general conformity rule, the State of West Virginia is required to submit a SIP revision containing transportation conformity criteria and procedures consistent with those established in the Federal rule by November 25, 1994. Similarly, West Virginia is required to submit a SIP revision containing general conformity criteria and procedures consistent with those established in the Federal rule by December 1, 1994. Because the deadlines for these submittals have not yet come due, they are not applicable requirements under section 107(d)(3)(E)(v) and, thus, do not affect approval of this redesignation request.

2.B.3. Subpart 2 of Part D—Section 182 Provisions for Ozone Nonattainment Areas

The Charleston, West Virginia nonattainment area is classified as moderate and is subject to the requirements of section 182(b) of the Act. As of November 13, 1992, the date West Virginia submitted a complete redesignation request for the Charleston, West Virginia nonattainment area, the Charleston, West Virginia area was required to meet the provisions of section 182(a)(2)(A) to correct its Reasonably Available Control Technology (RACT) requirements in effect prior to enactment of the 1990 amendments to the Act. The State of West Virginia submitted those RACT corrections as SIP revisions to EPA on June 4, 1991. A final rule approving these RACT corrections was published on September 17, 1992 (57 FR 42895).

On January 15, 1993, EPA notified the Governor of West Virginia that it had made a finding that West Virginia had failed to submit either a full or committal SIP revision for a basic inspection and maintenance (I/M) program for its ozone nonattainment areas. On January 18, 1994, EPA notified the Governor of West Virginia that it had made a finding that West Virginia had failed to submit a 15% rate of progress plan SIP revision for its ozone nonattainment areas. Upon the effective date of a final approval by EPA of West Virginia's redesignation request, these findings will be automatically rescinded in the Charleston nonattainment area.

3. Fully Approved SIP Under Section 110(k) of the Act

As stated previously, EPA has approved the RACT corrections noted above. Therefore, the State of West Virginia has a fully approved SIP under section 110(k), which also meets the applicable requirements of section 110 and part D as discussed above. Therefore, the redesignation requirement of section 107(d)(3)(E)(ii) has been met.

4. Improvement in Air Quality Due to Permanent and Enforceable Measures

Under the 1977 Act, EPA approved the State of West Virginia SIP control strategy for the Charleston, West Virginia nonattainment area. EPA determined that the rules and the emission reductions achieved as a result of those rules were enforceable. Since enactment of the 1990 amendments, the State of West Virginia submitted corrections to its RACT regulations as identified above. EPA finds that these additional measures contribute to the permanence and enforceability of reductions in ambient ozone levels in the Charleston, West Virginia area.

Between 1988 and 1990, because of permanent and enforceable state and federal provisions, emissions of volatile organic compounds (VOCs) were reduced by 8.14 tons/day and emissions of nitrogen oxides (NO_x) were reduced by 3.1 tons/day in Charleston. Most of the reductions came from mobile sources and gasoline marketing-related activities. The Reid Vapor Pressure (RVP), of gasoline marketed for use in the Charleston, West Virginia area decreased from 10.5 RVP to 9.5 RVP in 1990 and was reduced to 9.0 in 1992. In addition, due to automobile fleet turnover, there was an increase in the percent of automobiles operated in the Charleston area meeting more stringent emission standards as required by the Federal Motor Vehicle Control Program (FMVCP). It must be noted here that since 1992 the federal RVP requirement of 9.0 has been the applicable standard in the Charleston, West Virginia area.

The State of West Virginia maintenance plan requires the continuation of the federal RVP program. These reductions due to lower RVP and more stringent tailpipe standards resulting from the FMVCP were determined using the mobile emission inventory model MOBILE 5.0a and the relevant vehicle miles traveled data.

Permanent and enforceable decreases in VOCs at stationary sources contributed a small amount to the total VOC reduction in the Charleston, West Virginia area. In association with its emission inventory, the State of West Virginia demonstrated that point source VOC emissions were not artificially low due to local economic downturn during the period in which the Charleston, West Virginia area's ambient air quality came into attainment. Reductions due to decreases in production levels or from other unenforceable scenarios such as voluntary reductions were not included in the determination of the emission reductions.

EPA finds that the combination of measures contained in the SIP and federal measures have resulted in permanent and enforceable reductions in ozone precursors that have allowed the Charleston West Virginia area to attain the NAAQS, and therefore, that the redesignation criterion of section 107(d)(3)(E)(iii) has been met.

5. Fully Approved Maintenance Plan Under Section 175A

EPA is proposing approval of the State of West Virginia maintenance plan for the Charleston, West Virginia area because EPA finds that West Virginia's submittal meets the requirements of section 175A of the Act. If EPA determines after notice and comment that it should give final approval to the maintenance plan, the Charleston, West Virginia nonattainment area will have a fully approved maintenance plan in accordance with section 175A of the Act.

Section 175A of the Act sets forth the elements of a maintenance plan for areas seeking redesignation from nonattainment to attainment. The plan must demonstrate continued attainment of the applicable NAAQS for at least ten years after the area is redesignated. Eight years after the redesignation, the state must submit a revised maintenance plan which demonstrates attainment for the ten years following the initial ten-year period.

To provide for the possibility of future NAAQS violations, the maintenance plan must contain contingency measures, with a schedule for implementation, adequate to assure prompt correction of any air quality problems.

5.A. Emissions Inventory—Base Year Inventory

On November 13, 1992, the State of West Virginia submitted comprehensive inventories of VOC and NO_x emissions from area, stationary, and mobile using 1990 as the base year for calculations to demonstrate maintenance. The 1990 VOC inventory is considered most representative of attainment conditions because no violations occurred in 1990 and it reflects the typical inventory for the three-year period demonstrating attainment of the standard.

The State of West Virginia submittal contains detailed inventory data and summaries by source categories. The State of West Virginia submittal also contains information related to how it comported with EPA's guidance, which model and emission factors were used (note MOBILE 5.0a was used), how Vehicle Miles Travelled (VMT) data was generated, what RVP was considered in the base year, and other technical information verifying the validity of the Charleston West Virginia emission inventory.

The State of West Virginia's submittal contains the detailed inventory data and summaries by source category. This inventory was prepared in accordance with EPA guidances. A summary of the base year and projected maintenance year inventories are shown in the following six tables. The TSD which has been prepared for this action contains more in-depth details regarding the base year for the Charleston area.

SUMMARY OF EMISSIONS FROM THE CHARLESTON NONATTAINMENT AREA FOR 1990

Source category	VOC (tpd)	CO (tpd)	NO_x (tpd)
Area	27.5	83.9	16.9
Point	49.0	27.9	389.2
Highway Mobile	28.5	222.2	27.9
Total Emissions	105.0	334.1	434.0

SUMMARY OF EMISSIONS FROM THE CHARLESTON NONATTAINMENT AREA FOR 1993

Source Category	VOC (tpd)	CO (tpd)	NO_x (tpd)
Area	28.4	84.7	17.0
Point	42.3	27.4	392.7
Highway Mobile	23.8	191.7	27.2
Total Emissions	94.5	303.8	437.0

All Emissions in Tons Per Day (tpd).

SUMMARY OF EMISSIONS FROM THE CHARLESTON NONATTAINMENT AREA FOR 1996

Source category	VOC (tpd)	CO (tpd)	NO_x (tpd)
Area	26.8	85.5	17.1
Point	41.0	27.0	356.0
Highway mobile	23.0	179.9	26.7
Total emissions	90.7	292.5	399.8

SUMMARY OF EMISSIONS FROM THE CHARLESTON NONATTAINMENT AREA FOR 1999

Source Category	VOC (tpd)	CO (tpd)	NO_x (tpd)
Area	27.5	87.0	
Point	39.7	26.8	

SUMMARY OF EMISSIONS FROM THE CHARLESTON NONATTAINMENT AREA FOR 1999—Continued

Source Category	VOC (tpd)	CO (tpd)	NO_x (tpd)
Highway mobile	22.6	171.8	26.3
Total emissions	89.8	235.6	405.6

All Emissions in Tons Per Day (tpd).

SUMMARY OF EMISSIONS FROM THE CHARLESTON NONATTAINMENT AREA FOR 2002

Source category	VOC (tpd)	CO (tpd)	NO_x (tpd)
Area	28.2	87.8	17.5
Point	39.0	26.6	364.2
Highway Mobile	22.4	172.0	26.1
Total emissions	89.6	286.4	407.7

SUMMARY OF EMISSIONS FROM THE CHARLESTON NONATTAINMENT AREA FOR 2005

Source category	VOC (tpd)	CO (tpd)	NO_x (tpd)
Area	29.0	89.3	17.6
Point	37.9	26.2	366.9
Highway Mobile	23.0	179.5	27.0
Total emissions	89.9	295.0	411.5

All Emissions in Tons Per Day (tpd).

5.B. Demonstration of Maintenance—Projected Inventories

In addition to the continued use of lower RVP gasoline (9.0) and fleet turnover to automobiles meeting more stringent emission standards, mobile source emission projections are dependent upon the implementation of the federal reformulated gasoline program. Total VOC and NO_x emissions were projected from the 1990 base year out to year 2005. These projected inventories were prepared in accordance with EPA guidance. The projections demonstrate that the ozone standard will be maintained (i.e., emissions are not expected to exceed the level of the base year inventory during this time period. EPA believes that the emissions projections demonstrate that the area will continue to maintain the ozone NAAQS because this area achieved attainment through VOC controls and reductions.

5C. Verification of Continued Attainment

Continued attainment of the ozone NAAQS in the Charleston, West Virginia area depends, in part, on the State of West Virginia efforts toward tracking indicators of continued attainment during the maintenance period. The State of West Virginia will track the status and effectiveness of the maintenance plan by periodically updating the emissions inventory every three years. The WVOAQ has committed to perform this tracking on an annual basis in order to enable the State of West Virginia to implement the contingency measures of its maintenance plan as expeditiously as possible.

The State of West Virginia annual update will indicate new source growth, as indicated by annual emission statements. The State of West Virginia will continue to monitor ambient ozone levels by operating its ambient ozone air quality monitoring network in accordance with 40 CFR part 58.

5D. Contingency Plan

The level of VOC and NO_x emissions in the Charleston area will largely determine its ability to stay in compliance with the ozone NAAQS in the future. Despite the State of West Virginia's best efforts to demonstrate continued compliance with the NAAQS, the Charleston area may exceed or violate the NAAQS. Therefore, West Virginia has provided contingency measures with a schedule for implementation in the event of future ozone air quality problems. In the event that exceedances of the ozone NAAQS are measured such that nonattainment is indicated in any of the areas or in the event that periodic emission inventory updates or major permitting activity reveals that excessive or unanticipated growth in ozone precursor emissions has occurred or will occur, the West Virginia will accordingly select and adopt measures including the following to assure continued attainment:

1. Extend the applicability of 45CSR21 (VOC/RACT rule) to include source categories previously excluded.
2. Revised new source permitting requirements requiring more stringent emissions control technology and/or emissions offsets.
3. NO_x RACT requirements.
4. Stage II Vapor Recovery Regulations
5. Regulations to establish plant-wide emission caps (potentially with emissions trading provisions).
6. Implementation of basic (or enhanced) programs for motor vehicle inspection and maintenance.

One or more of these regulatory revisions would be selected within three (3) months after verification of a monitored ozone standard violation and a draft rule submitted to the WVOAQ. Quality assurance procedures must confirm the monitored violation within 45 days of occurrence. The WVOAQ will be requested to adopt the control measure(s) as emergency rule(s) which will be implemented within six (6) months after adoption. EPA's approval of West Virginia's redesignation request is contingent upon West Virginia

promulgating a revision to its contingency plan that includes a schedule for the mandatory implementation of the selected contingency measures.

5E. Subsequent Maintenance Plan Revision

In accordance with section 175A(b) of the Act, the State of West Virginia has agreed to submit a revised maintenance SIP eight years after the area is redesignated to attainment. Such revised SIP will provide for maintenance for an additional ten years. EPA has determined that the maintenance plan adopted by the State of West Virginia and submitted to EPA on November 13, 1992, meets the requirements of section 175A of the CAA. Therefore, EPA is proposing to approve the maintenance plan submittal. In addition EPA has determined that upon final approval of the maintenance plan the provisions of section 107(d)(3)(E)(iv) for redesignation will have been met.

Proposed Action

EPA proposes to approve the ozone maintenance plan for the Charleston, West Virginia area submitted by the State of West Virginia on November 13, 1992 as a revision to the West Virginia SIP because it meets the requirements of section 175A. In addition, EPA is proposing to redesignate the Charleston, West Virginia nonattainment area to attainment, subject to final approval of the maintenance plan, because the Agency has determined that the provisions of section 107(d)(3)(E) of the Act for redesignation of nonattainment areas to attainment have been met.

EPA is soliciting public comments on this notice and on issues relevant to EPA's proposed action. Comments will be considered before taking final action. Interested parties may participate in the federal rulemaking procedure by submitting written comments to the person and address listed in the **ADDRESSES** section at the beginning of this document.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements. Ozone State Implementation Plans (SIPs) are designed to satisfy the requirements of part D of the Clean Air Act and to provide for attainment and maintenance of the ozone NAAQS. Today's proposed redesignation action should not be interpreted as authorizing the State of West Virginia to delete, alter, or rescind any of the VOC emission limitations and restrictions contained in the currently approved ozone SIP. Changes to the ozone SIP's regulations rendering them less stringent than those contained in the EPA approved plan cannot be made unless a revised plan for attainment and maintenance is submitted to and approved by EPA. Unauthorized relaxations, deletions, and changes could result in both a finding of nonimplementation under section 173(b) of the Act and in a SIP deficiency call made pursuant to section 110(k)(5).

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000. SIP approvals under section 110 and subchapter I, part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, it does not have any economic impact on any small entities. Redesignation of an area to attainment under section 107(d)(3)(E) of the Act does not impose any new requirements on small entities. Redesignation is an action that affects the status of a geographical area and does not impose any regulatory requirements on sources. Accordingly, I certify that EPA's approval of West Virginia's request to redesignate the Charleston ozone nonattainment area to attainment and the associated maintenance plan will not have an impact on any small entities.

The Office of Management and Budget has exempted this rule from the requirements of section 6 of Executive Order 12866.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[Docket No. 93–48; DA 94–588]

Children's Television Programming

AGENCY: Federal Communications Commission.

ACTION: Proposed Rule; extend comment date.

SUMMARY: The Commission sought comments on the implementation of rules relating to the broadcast of educational and informational programming for children. After a request by several parties, the date for filing comments was extended by one week in order to allow adequate time for parties to prepare their submissions.

DATES: Comments are due June 15, 1994. Reply Comments due July 15, 1994.

ADDRESSES: Secretary, Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Larry Miller, (202) 418–1600.

SUPPLEMENTARY INFORMATION:

In the Matter of: Policies and Rules Concerning Children's Television Programming; Revision of Programming Policies for Television Broadcast Stations

Order

Adopted: June 2, 1994.
Released: June 2, 1994.
Comment Date: June 15, 1994.
Reply Comment Date: July 15, 1994

By the Chief, Mass Media Bureau.

1. This action extends the deadline for filing further comments by interested parties and proposed remarks by panelists in the *En Banc* hearing on Children's Television in the above-cited docket (58 FR 14367) pertaining to rules and policies relating to the levels and types of television programming necessary to adequately serve the educational and informational needs of children. The deadline for further comments and proposed remarks by panelists was originally set for June 8, 1994.

2. The Center for Media Education and the American Psychological Association request a one-week extension of the comment period in

order to adequately prepare their presentations for the Commission's hearing.

3. In light of the foregoing, the Bureau finds that good cause exists for an extension. Pursuant to 47 CFR 0.283, the deadline for filing further comments by interested parties and proposed remarks by panelists in the *En Banc* hearing is extended to June 15, 1994. The deadline for filing reply comments remains July 15, 1994.

Federal Communications Commission.

Roy J. Stewart,

Chief, Mass Media Bureau.

Federal Register
Vol. 59, No. 112
Monday, June 13, 1994

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE OFFICE OF THE UNITED STATES COURTS

Interpreters in Courts of the United States; Announcement of Written Segment of Certification Examination for Spanish, Cantonese, Mandarin, and Korean; and Written Segment of "Otherwise Qualified" Examination for Arabic, Hebrew, Italian, Mien, Polish, and Russian

AGENCY: Administrative Office of the United States Courts.

ACTION: Notice of Written Segment of Certification Examination for Spanish, Cantonese, Mandarin, and Korean; and Written Segment of "Otherwise Qualified" Examination for Arabic, Hebrew, Italian, Mien, Polish, and Russian.

SUMMARY: The Administrative Office of the United States Courts will conduct the written portion of the examination for individuals who desire to be certified (in Spanish, Cantonese, Mandarin, and Korean) or "otherwise qualified" (in Arabic, Hebrew, Italian, Mien, Polish, and Russian) to serve as interpreters in courts of the United States. This is in accordance with the Court Interpreter Amendments Act of 1988, Title VII of Pub. L. 100–702, (28 U.S.C. 1827). To take the examination, an individual must file a written application, or apply by telephone.

DATES: The agency will administer the written portion of the examination August 27, 1994, at 1 p.m. The deadline for filing an application is 4 p.m. on July 15, 1994.

ADDRESSES: Applications, along with an $80 money order, cashiers check, or personal check payable to the University of Arizona are to be sent to the Federal Court Interpreter Certification Project, Modern Languages Building, room 445, University of Arizona, Tucson, Arizona 85721.

FOR FURTHER INFORMATION CONTACT: Dr. Roseann Gonzalez, University of Arizona, (602) 621–3687 (Mountain Time). Fax (602) 624–8130.

SUPPLEMENTARY INFORMATION:

I. Background

The Director of the Administrative Office of the United States Courts (AOUSC) is responsible for the establishment of a program to facilitate the use of certified and otherwise qualified interpreters in courts of the United States. He must prescribe, determine, and certify the qualifications of person who may serve as certified interpreters in bilingual proceedings and proceedings involving the hearing impaired (28 U.S.C. 1827(b)). Whenever an interpreter is required for a person in any criminal or civil action initiated by the United States, the presiding judicial officer must utilize the services of the most available certified interpreter, unless no certified interpreter is reasonably available, or the services of an otherwise qualified interpreter.

The AOUSC will provide the courts with a roster of certified, professionally qualified, and language skilled court interpreters selected on the basis of specific qualification criteria and/or the successful completion of written ad oral examinations.

II. This Examination

For Spanish language interpreter candidates, a comprehensive written Spanish/English examination testing bilingual proficiency in Spanish and English will be administered. For candidates in the Cantonese, Mandarin, and Korean languages, a written English examination testing proficiency in English will be administered. Successful candidates will be invited to sit for the second part of the certification examinations, an oral examination. The oral examination will test, in simulated settings, the applicant's ability to: (1) interpret precisely from source language to English, in consecutive and simultaneous modes; (2) interpret from English to the target language in consecutive and simultaneous modes; and (3) perform sight interpretations. The oral portion of the examination does not necessarily require previous experience in court interpreting. Applicants who successfully complete the written examination will receive notice of the time and place of the oral portion of the examination.

For Arabic, Hebrew, Italian, Mien, Polish, and Russian interpreter candidates, a written English examination testing proficiency in English will be administered. The second part of the qualification process as a professional or language skilled court interpreter will require the candidate to provide additional qualifications and credentials or perform back translation exercises successfully.

All of the examinations are developed and administered under contract by the University of Arizona. The written portion of the examination does not require a special knowledge of legal vocabulary.

Testing Sites

Applicants may schedule the written examination at any of the locations identified below. Applicants must identify the testing location which they desire to use to use for taking the written examinations. The following are the cities where the written test will be administered:

Alaska: Anchorage.
Arizona: Phoenix, Tucson.
California: Fresno, Los Angeles, Monterey, Sacramento, San Diego, San Francisco.
Colorado: Denver.
Connecticut: Hartford.
District of Columbia.
Florida: Miami, Orlando.
Georgia: Atlanta.
Hawaii: Honolulu.
Idaho: Boise.
Illinois: Chicago.
Iowa: Sioux City.
Louisiana: New Orleans.
Massachusetts: Boston.
Minnesota: Minneapolis.
Missouri: Kansas City.
Nevada: Las Vegas, Reno.
New Jersey: Newark, Trenton.
New Mexico: Albuquerque, Las Cruces.
New York: Brooklyn, Buffalo, Manhattan.
Ohio: Cincinnati and Cleveland.
Oregon: Portland.
Puerto Rico: San Juan.
Tennessee: Memphis.
Texas: Brownsville, Corpus Christi, Dallas, Houston, Laredo, San Antonio.
Utah: Salt Lake City.
Washington: Seattle.

Oral testing sites will be announced when the examinations are scheduled.

Filing

Written applications are preferred, but phone applications will be accepted if the fee is received by July 15, 1994. Applicants who do not have an application form should type or print the following information on an 8½×11 paper:

1. Name.
2. Mailing address, including zip code.
3. Daytime telephone number.
4. Evening telephone number.
5. Testing location requested (City and State).
6. Date of birth.
7. Social Security Number.
8. Special arrangements necessary because of physical disability or keeping of the Sabbath.
9. I did/did not take the Spanish written and/or oral examination in 1993.
10. I.D. number of exam (if known).
11. Enclosed money order, cashiers check, or personal check payable to University of Arizona Federal Court Project.

Exam Procedures

Each applicant will receive an admission ticket to the exam shortly before the exam date. It will list the exact location of the exam. Each applicant must present the admission ticket and a photo identification: driver's license, passport, work/student identification, etc., to be admitted to the exam.

III. Qualifications

Sucessful completion of the written examination is the first step in the process of receiving certification or "otherwise qualified" status. There is no formal educational requisite, either in languages or interpreting, for successfully completing the written examinations. However, the difficulty of the written examinations are at the college degree level of proficiency in both English and the target languages. Successful completion of the oral portion of the examination normally would require prior training or professional experience in simultaneous and consecutive interpreting and sight translation. Qualification as "otherwise qualified" will require additional credentials and experience as an interpreter.

IV. Duties

Certification or "otherwise qualified" status will not necessarily lead to full-time employment as a staff or contract interpreter. Most of the requirements for court interpretation services in the Federal courts are met by independent interpreter contractors on an as-needed basis. However, where full-time interpreters are needed, only certified interpreters are eligible for appointment.

As the federal courts require full-time salaried interpreters, these interpreters will be chosen from the eligibility lists. The annual salary range is JSP–10 to JSP–14 ($31,898–$76,733) for full-time salaried interpreters. For certified interpreters who provide services as independent contractors, the fee is $250 per day.

Court interpreters perform all or some of the following duties: (1) Interpret verbatim in simultaneous and consecutive modes a foreign language into English, and vice versa, at arraignments, preliminary hearings, pretrial hearings, trials, and other court proceedings; (2) transcribe and translate electronic sound recordings; and (3) sight translate or translate in written form technical, medical, and legal documents and correspondence for introduction as evidence.

Dated: June 6, 1994.

Robert Lowney,

Acting Chief, District Court Administration Division.

[FR Doc. 94–14219 Filed 6–10–94; 8:45 am]

BILLING CODE 2210–55–M

DEPARTMENT OF AGRICULTURE

Forest Service

RIN 059–AB47

Animal Damage Management

AGENCY: Forest Service, USDA.

ACTION: Notice of proposed policy; request for comment.

SUMMARY: The Forest Service gives notice of and requests comment on proposed revisions to its policy on animal damage management to be published in the Forest Service Manual Chapter 2650. This direction would replace current agency procedures for implementing the provisions of a Memorandum of Understanding (MOU) between the Animal and Plant Health Inspection Service (APHIS)—Animal Damage Control unit and the Forest Service. This proposed policy is intended to clarify the role and responsibility of the Forest Service in coordinating with APHIS on animal damage management and in cooperating with APHIS in discharging Federal obligations to manage wild vertebrates causing damage on National Forest System lands under the Animal Damage Control Act of 1931.

DATES: Comments must be received in writing by August 12, 1994.

ADDRESSES: Send written comments to the Director, Wildlife, Fish and Rare Plants Staff (2650), Forest Service, USDA, P.O. Box 96090, Washington, DC 20090–6090.

The public may inspect comments received on this proposed policy in the Office of the Director, Wildlife, Fish and Rare Plants Staff, 4th floor, Northwest, Auditor's Building, 205 14th Street, SW., Washington, DC. Those wishing to inspect comments are encouraged to call ahead (202–205–1367) to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: Tom Darden, Wildlife Program Leader, (202–205–1206).

SUPPLEMENTARY INFORMATION: The Forest Service and APHIS cooperate in discharging Federal obligations under the Animal Damage Control Act of 1931 (7 U.S.C. 426–426b) which governs animal damage management activities on National Forest System lands. These activities include actions to provide wildlife damage management through direct control, as well as technical assistance to achieve desired management objectives. APHIS, in cooperation with the Forest Service and states, carries out animal damage management activities on some National Forest System lands, mostly to minimize livestock losses from predation by coyotes, black bears, and other predators. Under other authorities (e.g., Multiple-Use Sustained-Yield Act of 1960 [16 U.S.C. 528(note), 528–531]), the Forest Service conducts activities to control animal damage caused by small mammals and other animals to National Forest System resources, such as timber stands and roads.

APHIS has responsibility for animal damage management activities, as designated by the Secretary of Agriculture (7 CFR 2.51(41)). The principal change being proposed in existing Forest Service Manual policy (FSM 2650) is the designation of APHIS as the lead agency for preparing environmental documentation on animal damage management activities initiated by APHIS on National Forest System lands. The Forest Service will cooperate with APHIS and the states in environmental analysis and documentation of actions proposed by APHIS that will occur on or affect National Forest System lands and provide mitigation measures needed to ensure that animal damage management activities performed by APHIS are compatible with direction provided in forest land and resource management plans.

The proposed policy would bring the Forest Service Manual provisions into conformance with current field-level animal damage management practice. Current operational procedures for animal damage management activities are outlined in an August 25, 1992 letter to Forest Service Regional Foresters from Deputy Chief James C. Overbay and the subsequent Memorandum of Understanding (MOU) between APHIS and the Forest Service, signed June 18, 1993. Notice of availability of the MOU was published in the **Federal Register** on July 13, 1993 (58 FR 37704).

The 1993 MOU clarifies the role of each Forest Supervisor in cooperating with APHIS and the states in documentation of environmental actions proposed by APHIS, and in providing mitigation measures to ensure that animal damage management activities performed by APHIS are compatible with direction provided in forest plans. The MOU also clarifies that APHIS, in cooperation with the Forest Service, develops work plans for animal damage management activities on National Forest System lands. These plans address control areas, specific control techniques, emergency control procedures, timeframes, and other limitations and restrictions. The MOU recognizes APHIS work plans as the definitive plans for predator control actions on National Forest System lands.

After discussion with the Council on Environmental Quality, the Forest Service has decided to publish this proposed animal damage management policy in the **Federal Register**, inviting public comment on the role and responsibility of the Forest Service in coordinating with APHIS on animal damage management. In the interim, the Forest Service and APHIS will follow procedures outlined in the 1993 MOU for which notice was published in the **Federal Register**.

Environmental Impact

Section 31.1b(2) of Forest Service Handbook 1909.15 (57 FR 43180, Sept. 18, 1992) excludes from documentation in an environmental assessment or impact statement "rules, regulations, or policies to establish Servicewide administrative procedures, program processes, or instructions." This proposed policy would provide administrative instructions to Forest Service field offices on the procedures and processes to follow in the case of coordination with APHIS on animal damage management activities. Accordingly, the agency's preliminary assessment is that this proposed policy falls within this category of action and that no extraordinary circumstances exist which would require preparation of an environmental assessment or environmental impact statement. A final determination will be made upon adoption of the final policy.

Controlling Paperwork Burden on the Public

This policy will not result in additional paperwork. Therefore, the review provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3507) and implementing regulations at 5 CFR part 1320 do not apply.

Regulatory Impact

This proposed policy has been reviewed under USDA procedures and Executive Order 12866 on Regulatory Planning and Review. It has been determined that this is not a significant policy.

Dated: May 23, 1994.

David A. Harcharik,

Acting Chief.

Proposed Manual Revision

Note: The Forest Service organizes its directive system by alpha-numeric codes and subject headings. Only those sections of the Forest Service Manual that are the subject of this notice are set out here. The audience for this direction is Forest Service employees charged with coordinating with the Animal and Plant Health Inspection Service—Animal Damage Control Unit on animal damage management activities on National Forest System lands.

Forest Service Manual—Chapter 2650—Animal Damage Management

The Forest Service and Animal and Plant Health Inspection Service (APHIS)—Animal Damage Control unit, along with the states, cooperate in discharging the Federal obligations under the Animal Damage Control Act of 1931 to manage animal damage on National Forest System lands. These activities include actions to provide wildlife damage management through direct control, as well as technical assistance to achieve desired management objectives. APHIS carries out animal damage management activities on National Forest System lands, mostly to minimize livestock losses from predation by coyotes, black bears, and other predators. The Forest Service conducts activities to control animal damage caused by small mammals and other animals to National Forest System resources, such as timber stands and roads.

2650.1—Authority. In addition to the authorities listed in FSM 2601, the following authorities govern animal damage management activities on National Forest System lands:

1. The Animal Damage Control Act of March 2, 1931 (7 U.S.C. 426–426b) as amended by the Rural Development, Agriculture, and Related Agencies Appropriations Act of 1988 (Pub. L. 100–202) authorizes the Secretary of Agriculture to provide animal damage management services, to maintain technical expertise for evaluating and recommending animal damage management techniques, and to conduct forest and range animal damage research. The Secretary has delegated this authority to the Animal and Plant Health Inspection Service (APHIS)—Animal Damage Control unit.

2. Executive Order 12342, January 24, 1982, permits the use of chemical toxicants registered by the Environmental Protection Agency for predator damage control on federal lands.

3. Department of Agriculture Regulation (DR) 9500–4 (FSM 2601.2) requires Department of Agriculture programs to include measures to alleviate damage by plant and animal pests; develop new techniques and methodologies through management and research programs to limit damage to agriculture or forestry production; and apply integrated pest management practices, where feasible, in carrying out these responsibilities.

4. A Memorandum of Understanding (MOU) between APHIS and the Forest Service outlines the cooperative approach to animal damage management on National Forest System lands. Both agencies have a joint responsibility for limiting damage caused by wildlife. In this MOU, APHIS and state agencies are recognized as having the authority and expertise to conduct predator control on National Forest System lands, to determine livestock losses, and to determine methodology for animal damage management. See FSM § 1543.14 for the full text of the MOU.

2650.2—Objective. The objective of animal damage management activities is to protect National Forest System resources, to protect activities taking place on National Forest System lands, and to reduce threats to human health and safety.

2650.3—Policy. National Forest System resources must be adequately protected during animal damage management activities authorized by the states and conducted by the states or Animal and Plant Health Inspection Service (APHIS)—Animal Damage Control unit. When the Forest Service conducts animal damage management activities, such as controlling small mammal populations on plantations, the agency must comply fully with state and federal laws. In carrying out animal damage management activities:

1. Rely upon APHIS or the state agencies to provide the expertise and conduct predator control on National Forest System lands, to determine livestock losses, and to determine methodology for animal damage management.

2. Cooperate with APHIS, the lead agency, in preparing environmental documentation for predator control and other animal damage management activities initiated by APHIS on National Forest System lands. The Forest Service shall cooperate to ensure that the animal damage management plans developed by APHIS will provide for protection of National Forest System resources.

3. Cooperate with APHIS in the development of work plans to ensure consistency with forest land and resource management plans.

4. Conduct non-predator animal damage management, such as controlling small mammal populations on plantations, and necessary environmental analysis and disclosure on National Forest System lands consistent with forest plans.

5. Recognize that taking of predators, including removal of depredating animals (for example, removal of a nuisance bear in a high-use recreation area), may be carried out on National Forest System lands by an individual in accordance with state and federal law.

6. Coordinate with the Bureau of Land Management (BLM) and other federal and state agencies to improve effectiveness of control program activities conducted on National Forest System and other public lands.

7. Use an integrated approach to the prevention of animal damage and management of animal damage control programs. Consider a full range of methods, including physical barriers, repellents, habitat manipulation, biological controls, silvicultural methods (for example, fertilizing to improve soil fertility), pesticides, and hunting and trapping. Use licensed hunting, fishing, and trapping as a control technique where practicable.

8. Use only pesticides that are properly registered in accordance with federal and state requirements for animal damage management and that conform to policies on pesticide-use management and coordination (FSM 2150). Follow label directions.

9. Follow direction in FSM 2670. Threatened, Endangered, and Sensitive Plants and Animals, for federally proposed, threatened, endangered, or sensitive species listed by the Forest Service to determine whether proposed control measures conducted by the Forest Service are likely to have an effect on these species. The lead agency for completing environmental documentation (40 CFR 1508.16) is responsible for completion of all Endangered Species Act-mandated interagency consultations (16 U.S.C. 1536.7; FSM 2671.4).

2650.4—Responsibility.

2650.42—Deputy Chief for National Forest System. The Deputy Chief for the National Forest System is responsible for resolving any difficulties arising between Regions and Animal and Plant Health Inspection Service (APHIS)—Animal Damage Control unit that cannot be resolved by Regional Foresters under the Memorandum of Understanding (FSM 1543.14).

2650.42—Regional Foresters. Regional Foresters are responsible for:

1. Reviewing and approving all proposed pesticide uses for animal damage management on National Forest System lands (FSM 2151). Regional Foresters may redelegate this authority to Forest Supervisors; however, only Regional Foresters may approve animal damage management in wilderness (FSM 2323).

2. Establishing or amending existing Memorandums of Understanding between the Region and appropriate state and other federal agencies regarding animal damage management.

3. Reviewing all proposed Forest Service animal damage management activities within areas occupied by and habitat of federally proposed or listed threatened or endangered species and Regional Forester approved sensitive species. Regional Foresters may redelegate this authority to Forest Supervisors.

4. Meeting with state or regional representatives, such as the APHIS Regional Director, as needed to coordinate animal damage management operations. Regional Foresters may designate a representative.

5. Resolving any difficulties arising among APHIS personnel and Forest Supervisors under the Memorandum of Understanding (FSM 1543.14). Or referring them to the Chief for resolution.

2650.43—Forest Supervisors. Forest Supervisors are responsible for:

1. Ensuring appropriate environmental analysis requirements are met for proposed non-predator control activities conducted by the Forest Service and ensuring consistency with forest plan direction.

2. Recommending changes in state hunting, fishing, or trapping regulations to accommodate animal damage management activities on National Forest System lands (FSM 2640).

3. Meeting with APHIS personnel and responsible state agencies to cooperate where proposed predator control is needed to ensure coordination of Forest Service resources or activities on National Forest System lands.

4. Cooperating with APHIS in preparation of environmental documentation for predator control or other animal damage management activities conducted by APHIS on National Forest System lands (40 CFR 1508.15).

5. Referring any difficulties arising from activities with APHIS under the Memorandum of Understanding (FSM 1543.14) for resolution by the Regional Forester.

6. When needed, requesting training in animal damage management techniques by APHIS.

7. Ensuring that licensing and certification of Forest Service personnel performing animal damage management activities comply with applicable federal and state regulations. Only certified pesticide applicators may use or supervise the use of restricted-use pesticides on National Forest System lands (FSM 2150).

2650.6—Cooperation in Animal Damage Management Activities. Both the Forest Service and Animal and Plant Health Inspection Service (APHIS)—Animal Damage Control unit have a responsibility for limiting damage caused by wildlife, consistent with other wildlife values and resource management objectives. APHIS responsibilities are generally directed toward the management and control of animals causing damage to livestock, agriculture, wildlife, human health and safety. Forest service responsibilities are related to the management of National Forest System resources. See FSM § 1543.14 for the text of the Memorandum of Understanding between the Forest Service and APHIS for animal damage management activities.

The role of APHIS (7 CFR 2.51(41)) is as follows:

1. Evaluate animal damage management needs and conduct predator control in cooperation with the Forest Service, state agencies, and permittees.

2. Serve as lead agency for preparing environmental documentation on animal damage management activities initiated by APHIS on National Forest System lands.

3. Develop and update animal damage management work plans in cooperation with the Forest Service and appropriate state and federal agencies, and interested publics to ensure compliance with forest plans.

4. Inform the Forest Service about animal damage management requests, management activities, and results on a timely basis.

5. Provide the Forest Service with technical information on recommended animal damage management tools and techniques.

6. Conduct animal damage management training sessions for Forest Service personnel, when requested.

2651—Wildlife and Fish Damage Management

2651.1—Threatened and Endangered Species. Follow specific species control plans for federally listed species (for example, grizzly bear and wolf) cleared through consultation with the Fish and Wildlife Service and National Marine Fisheries Service.

2651.2—Game and Furbearers. Control damage caused by game animals and furbearers through hunting or trapping, where practicable, in cooperation with the state fish and wildlife agencies, and APHIS, where appropriate.

2651.3—Nongame Species. Control damage caused by nongame species on National Forest System lands in close cooperation with the state fish and wildlife agencies, or other involved state or federal agencies.

2651.4—Birds. Where birds damage reforestation or other resources or where they create health hazards, nonlethal repellents, frightening devices, pesticides, or physical barriers may be used to prevent or reduce resource damage or hazards. Obtain permits from the Fish and Wildlife Service for any lethal control of species protected under the Migratory Bird Treaty Act. Consult the Fish and Wildlife Service for permit requirements and procedures.

2651.5—Fish and Aquatic Animals. States or other responsible agencies have the authority to control undesirable fish and aquatic animals in National Forest System waters. The Forest Service is responsible for coordinating with the responsible agencies to develop a work plan to ensure control activities are consistent with direction provided in forest plans. Control activities conducted by the Forest Service must meet appropriate environmental analysis requirements and be consistent with forest plan direction.

2651.6—Wildlife and Fish Damage Management in Wilderness Areas. Follow direction in FSM 2151, FSM 2323, and FSM 4063 for management of wildlife or fish damage in wilderness and Research Natural Areas. Animal damage management is permitted in wilderness when it was used prior to wilderness designation; when it conforms with direction in FSM 2323.33 on resource management in wilderness; and when it is needed for the recovery of federally listed threatened or endangered species.

2652—Reports. Report pesticide uses annually following direction in FSM 2158.

BILLING CODE 3410–11–M

DEPARTMENT OF COMMERCE

International Trade Administration

[A–427–812]

Antidumping Duty Order: Calcium Aluminate Flux From France

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: June 13, 1994.

FOR FURTHER INFORMATION CONTACT: V. Irene Darzenta or Katherine Johnson, Office of Antidumping Duty Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482–6320 or (202) 482–4929, respectively.

Scope of Order

The product covered by this order is calcium aluminate (CA) flux, other than white, high purity CA flux. This product contains by weight more than 32 percent but less than 65 percent alumina and more than one percent each of iron and silica.

CA flux is currently classifiable under *Harmonized Tariff Schedule of the United States* (HTSUS) subheading 2523.10.0000. Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the scope of this investigation remains dispositive.

Antidumping Duty Order

In accordance with section 735(d) of the Act, on March 25, 1994 the Department published in the **Federal Register** its final determination that CA flux from France is being sold at less than fair value (59 FR 14136). We amended our final determination on May 9, 1994 (see 59 FR 25446, May 16, 1994) to correct a clerical error. On June 6, 1994, in accordance with section 735(d) of the Act, the U.S. International Trade Commission (ITC) notified the Department that imports of CA flux from France materially injure a U.S. industry.

Suspension of Liquidation

In accordance with section 736(a)(1) of the Act, the Department will direct U.S. Customs officers to assess antidumping duties equal to the amount by which the foreign market value of the merchandise exceeds the United States price for all entries of CA flux from France. These antidumping duties will be assessed on all unliquidated entries of CA flux from France entered, or withdrawn from warehouse, for consumption on or after March 25, 1994, the date on which the Department published its final determination notice in the **Federal Register**.

On or after the date of publication of this notice in the **Federal Register**, U.S. Customs officers must require, at the same time as importers would normally deposit estimated duties, the following cash deposits for the subject merchandise:

Manufacturer/producer/exporter	Weighted-average margin percentage (percent)
Lafarge Fondu International	37.93
All Others	37.93

This notice constitutes the antidumping duty order with respect to CA flux from France, pursuant to section 736(a) of the Act. Interested parties may contact the Central Records Unit, Room B–099 of the Main Commerce Building, for copies of an updated list of antidumping duty orders currently in effect.

This order is published in accordance with section 736(a) of the Act and 19 CFR 353.21.

Dated: June 8, 1994.

Susan G. Esserman,

Acting Assistant Secretary for Import Administration.

[FR Doc. 94–14310 Filed 6–10–94; 8:45 am]
BILLING CODE 3510–DS–P

[A–423–807]

Preliminary Determination of Sales at Less Than Fair Value: Steel Wire Rod From Belgium

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: June 13, 1994.

FOR FURTHER INFORMATION CONTACT: Ellen Grebasch or Erik Warga, Office of Antidumping Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230;

telephone (202) 482–3773 or (202) 482–0922.

Preliminary Determination

We preliminarily determine that imports of steel wire rod from Belgium are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the initiation of this investigation on March 7, 1994, (59 FR 11773, March 14, 1994), the following events have occurred:

On March 31, 1994, the U.S. International Trade Commission (ITC) issued an affirmative preliminary injury determination in this case.

On April 7, 1994, the Department issued an antidumping duty questionnaire to Forges de Thy-Marcinelle ("Thy-Marcinelle") for the investigation. The questionnaire had four sections: section A, requesting general information; section B, requesting information on U.S. sales; section C, requesting information on home market sales; and section D, requesting information on cost of production and constructed value. In that same month, the Department presented the antidumping duty questionnaire to Thy-Marcinelle, because it represented at least 60 percent of exports to the United States during the POI.

On April 22, 1994, Thy-Marcinelle requested a two-week extension for filing the response to the Department's questionnaire. The Department granted this extension request.

In May 1994, Thy-Marcinelle notified the Department that it would not be participating in this investigation.

Scope of Investigation

The products covered by this investigation are hot-rolled carbon steel and alloy steel wire rod, in coils, of approximately round cross section, between 0.20 and 0.75 inches in solid cross-sectional diameter. The following products are excluded from this investigation:

- Free-machining steel containing 0.03% or more of lead, 0.05% or more of bismuth, 0.08% or more of sulfur, more than 0.4% of phosphorus, more than 0.05% of selenium, and/or more than 0.01% of tellurium;
- Wire rod, which is 5.5 mm or less in diameter, with tensile strength greater than or equal to 1040 Mega-Pascals (MPa), and the following chemical content, by weight: carbon greater than or equal to 0.79 percent, aluminum less than or equal to 0.005 percent, phosphorous plus sulfur less than or equal to 0.040 percent and nitrogen less than or equal to 0.006 percent;
- Wire rod, which is 7.9 to 18.0 mm in diameter, containing 0.48 to 0.73 percent carbon by weight and certified as having partial decarburization and seams no more than 0.075 mm in depth; and
- Stainless steel rods, tool steel rods, ball bearing steel and deformed concrete reinforcing bars (as defined in the *Harmonized Tariff Schedule of the United States* (HTSUS)).

The products under investigation are currently classifiable under subheadings 7213.31.3000, 7213.31.6000, 7213.39.0030, 7213.39.0090, 7213.41.3000, 7213.41.6000, 7213.49.0030, 7213.49.0090, 7213.50.0020, 7213.50.0040, 7213.50.0080, 7227.20.000, 7227.90.6000, and 7227.90.6050 of the HTSUS. Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this investigation is dispositive.

Period of Investigation

The period of investigation is September 1, 1993, through February 28, 1994.

Such or Similar Comparisons

We have determined that the merchandise covered by this investigation constitutes a single category of "such or similar" merchandise.

Best Information Available

Because Thy-Marcinelle failed to respond to our questionnaire, we based our determination on best information available (BIA) pursuant to section 776(c) of the Act which provides that the Department shall use BIA when a party refuses to provide requested information.

In determining what rate to use as BIA, the Department follows a two-tiered methodology, whereby the Department normally assigns lower margins to those respondents who cooperated in an investigation and margins based on more adverse assumptions for those respondents who did not cooperate in an investigation. According to the Department's two-tiered BIA methodology outlined in the *Final Determination of Sales at Less Than Fair Value: Certain Hot-Rolled Carbon Steel Flat Products, Certain Cold-Rolled Carbon Steel Flat Products, and Certain Cut-to-Length Carbon Steel Plate From Belgium*, 58 FR 37083 (July 9, 1993), when a company refuses to provide the information requested in the form required, or otherwise significantly impedes the Department's investigation, it is appropriate for the Department to assign to that company the higher of (1) The highest margin alleged in the petition, or (2) the highest calculated rate of any respondent in the investigation. (See *Allied Signal Aerospace Co.* v. *United States*, 996 F. 2d 1185, 1191–92 (Fed. Cir. 1993).) Because there were no cooperative respondents in this investigation, we are assigning to all exporters, as BIA, a margin of 52.34 percent, the highest margin calculated in the petition (adjusted for methodological errors as explained in the initiation notice).

Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, we are directing the Customs Service to suspend liquidation of all entries of steel wire rod from Belgium that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. The Customs Service shall require a cash deposit or posting of a bond equal to the estimated preliminary dumping margin, as shown below. The suspension of liquidation will remain in effect until further notice.

Manufacturer/producer/exporter	Margin percentage
All Companies	52.34

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination. If our final determination is affirmative, the ITC will determine whether these imports are materially injuring, or threaten material injury to, the U.S. industry before the later of 120 days after the date of this preliminary determination or 45 days after our final determination.

Public Comment

In accordance with 19 CFR 353.38, case briefs or other written comments in at least ten copies must be submitted to the Assistant Secretary for Import Administration no later than June 28, 1994, and rebuttal briefs, no later than July 1, 1994. In accordance with 19 CFR 353.38(b), we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, the hearing will be held on July 7, 1994, at 10 a.m. at the U.S. Department of Commerce, room

3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

Interested parties who wish to request a hearing, or to participate if one is requested, must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, Room B–099, within ten days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. In accordance with 19 CFR 353.38(b), oral presentations will be limited to issues raised in the briefs. If this investigation proceeds normally, we will make our final determination within 75 days of the signing of this preliminary determination.

This determination is published pursuant to section 733(f) of the Act and 19 CFR 353.15(a)(4).

Dated: June 6, 1994.

Susan G. Esserman,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

National Oceanic and Atmospheric Administration

Final Policy Guidance on Public Participation Under § 306(d)(14) of the Coastal Zone Management Act (CZMA)

AGENCY: Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Issuance of final policy guidance section 306(d)(14) of the CZMA.

SUMMARY: The Office of Ocean and Coastal Resource Management is issuing final policy guidance on section 306(d)(14) of the Coastal Zone Management Act, which requires that state coastal management programs provide public participation in permitting decisions, consistency determinations, and other similar decisions. This final guidance follows review and consideration of comments of draft guidance issued in the **Federal Register**, Vol. 58, No. 212, Nov. 4, 1993, pp 58840–58841.

DATES: States with approved coastal zone management programs must comply with this guidance June 13, 1995.

FOR FURTHER INFORMATION CONTACT: Elaine Vaudreuil at NOAA/NOS/OCRM, 1305 East-West Hwy, N/ORM4, Silver Spring, MD 20910, by telephone at 301–713–3086, or by FAX at 301–713–4370.

SUPPLEMENTARY INFORMATION:

I. Authority

This guidance is issued pursuant to the authority of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1451–1464)

II. Background

The following guidance outlines OCRM standards for states and territories with Federally approved coastal management programs, and those developing management programs, to meet the public participation requirement under the Coastal Zone Management Act section 306(d)(14), as amended by Pub. L. 101–508, the Coastal Zone Act Reauthorization Amendments of 1990. This section states that before approving a management program submitted by a coastal state, the Secretary of Commerce shall find that "[t]he management program provides for public participation in permitting processes, consistency determinations, and other similar decisions."

The scope of this requirement extends to all activities that require specific or general authorization through permitting, consistency review, or other means pursuant to the enforceable policies of the coastal management program, and applicable state law. This guidance applies to all state authorizations subject to the statutory public participation requirement and shall not conflict with existing state or Federal regulations pertaining to Federal permitting processes, state permitting processes, and Federal consistency review of Federally permitted or licensed activities.

NOAA has reviewed public participation opportunities under state coastal zone management programs and has determined that existing public participation procedures under state law satisfy the public participation requirement under section 306(d)(14) for state permits. For applications under state general permits, public participation in the review of administrative procedures or regulations allowing for a general determination of consistency with the Federally approved state coastal management program will satisfy the public participation requirement. NOAA's regulations already require public participation in state Federal consistency reviews of Federally permitted or licensed activities.

Therefore, NOAA finds that section 306(d)(14) imposes a new requirement for effective public participation only on the state's review of Federal agency consistency determinations for direct Federal activities under section 307(c)(1) of the CZMA and any other state coastal management decisions not now covered by an existing public participation procedure.

The following guidance outlines an acceptable standard for meaningful public participation. State coastal zone management programs will have one year to comply with this guidance. Within one year, each state is to: (1) Develop public participation procedures for the review of direct Federal activities under section 307(c)(1) of the CZMA, if necessary, and submit a copy of those procedures to OCRM as a program change or submit documentation that procedures are already incorporated into the approved program and (2) conduct a review to determine if other public participation procedures are necessary. If additional procedures are necessary, the state must submit a copy of the procedures developed to OCRM as a program change. If no further procedures are needed, the state must submit to OCRM a notice that a review has been conducted and that no additional procedures are necessary.

This guidance is sufficiently broad to give states flexibility in developing public participation procedures that meet the intent of section 306(d)(14). OCRM will review each state's procedures during regularly scheduled evaluations of state coastal zone management programs under section 312 of the CZMA for compliance with the public participation requirement under section 306(d)(14), and will recommend procedural changes if necessary to meet OCRM's guidance.

III. Availability of Comments

All comments received in response to the notice of draft policy guidance (58 FR 58840, November 4, 1993) are available for inspection at the Office of Ocean and Coastal Resource Management during normal business hours (8:00 to 4:30 p.m.) in room 11614, 1305 East-West Highway, Silver Spring, Maryland, 20910.

IV. Response to Comments

The following comments were received on the draft policy guidance. NOAA's response appears below:

Comment: The draft language of the Policy Guidance itself does not clearly specify that the procedures apply only to consistency reviews under section 307(c)(1) of the CZMA and other state coastal management decisions not now

covered by an existing public participation procedure, although that fact is stated in the discussion preceding the guidance.

Response: NOAA concurs and has added specific language in the guidance to clarify this point.

Comment: Several states expressed concern that implementing this guidance will add to the state's administrative costs.

Response: NOAA is sensitive to this issue and structured the guidance to provide coastal states with a range options for implementing the requirement in a cost-effective manner.

Comment: NOAA should change the language under (a)(1) to say that "States must issue or cause to be issued, public notice * * *".

Response: Recognizing that this comment is consistent with the provision allowing for joint public notice with Federal agencies, NOAA has clarified this point in the final guidance.

Comment: The use of the word "guidance" coupled with the use of mandatory terms such as "must", "mandatory", and "at a minimum" may be confusing.

Response: This guidance represents NOAA's interpretation of the statutory requirement by outlining what it considers to be effective public public participation. NOAA recognizes that the guidance itself is not the enforceable policy. Rather, the obligation of coastal states to comply rests in the language of section 306(d)(14).

V. Guidance to Implement CZMA Section 306(d)(14)

Section 306(d)(14) imposes a new requirement for effective public participation only on the state's review of Federal agency consistency determinations for direct Federal activities under section 307(c)(1) of the CZMA and any other state coastal management decisions not now covered by an existing public participation procedure. For applications under state general permits, public participation in the review of administrative procedures or regulations allowing for a general determination of consistency will satisfy the public participation requirement. The public should have an opportunity to comment on a project's relationship with the state coastal management program's goals and policies. NOAA interprets the statute to require the following:

(a) States must provide timely public notice.

(1) States must issue, or cause to be issued, public notice at the earliest practicable time after the application and/or consistency determination has been received by the lead state coastal management agency, except in cases where earlier public notice on the consistency determinations by the relevant Federal agency meets OCRM's standards for acceptable public notice listed below.

(2) A public comment period must be provided. The length of the comment period may vary in accordance with state or Federal law, and as appropriate for the type of authorization involved. However, the comment period must be sufficient to give the public a meaningful opportunity to develop and provide comments.

(b) Public participation, at a minimum, must consist of written public notice and solicitation of public comments. Provision for a public hearing or meeting may also be provided. If a state chooses to use public hearings or public meetings to provide for effective public participation, such hearings or meetings should be held in a location accessible to most interested or affected parties to the maximum extent possible.

The written public notice must:

(1) specify that the proposed activity is subject to review for consistency uunder the policies of the state coastal management program;

(2) provide sufficient information to serve as a basis for meaningful comment;

(3) specify a source for additional information; and

(4) specify a contact for submitting comments to the state coastal management program.

(c) At a minimum, the public notice must be provided in the area(s) of the coastal zone likely to be affected by the activity. Procedural options that may be used include, but are not limited to, the options listed below.The use of one or more of the following must also conform with the guidelines set forth in (a) and (b) above.

(1) public notice through an official state gazette;

(2) public notice through a local newspaper serving areas of coastal zone likely to be affected by the activity;

(3) public notice through individual state mailings;

(4) public notice through a state coastal zone management newsletter;

(5) arrangements between a state coastal management program and appropriate Federal agencies for joint public notice to be provided by the state and Federal agency where direct Federal activities under section 307(c)(1) are involved OCRM also encourages other streamlined procedures for providing public participation. Federal agency notice of a proposed activity would suffice if it meets the guidelines set forth in (a) and (b) above.

W. Stanley Wilson,

Assistant Administrator for Ocean Services and Coastal Zone Management.

BILLING CODE 3510–08–M

[Docket No. 940420–4120]

RIN 0648–ZA05

Announcement of Opportunities for Research Funding in the National Estuarine Research Reserve System for Fiscal Year 1995

AGENCY: Sanctuaries and Reserves Division (SRD), Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice.

SUMMARY: The Sanctuaries and Reserves Division of the Office of Ocean and Coastal Resource Management is soliciting proposals for funding research within the National Estuarine Research Reserve System. The focus of funding for the upcoming annual grant period is the restoration of estuarine and estuarine-like ecosystems. This notice sets forth funding priorities, selection criteria, and procedures for proposal submission.

DATES: All pre-proposals must be postmarked no later than July 15, 1994. Notification regarding the disposition of the pre-proposals will be issued on or about September 1, 1994. Final proposals must be postmarked no later than November 1, 1994.

ADDRESSES: CAPT. Francesca M. Cava, Chief, Sanctuaries and Reserves Division, NOAA/Office of Ocean and Coastal Resource Management, 1305 East-West Highway, SSMC4, #12520, Silver Spring, MD 20910, Attn: FY95 NERRS Research. FAX: 301–713–0404. See Appendix I for National Estuarine Research Reserve addresses.

FOR FURTHER INFORMATION CONTACT: For further information on research opportunities under the National Estuarine Research Reserve System, contact the on-site personnel listed in Appendix I or CAPT. Francesca M. Cava of the Sanctuaries and Reserves Division (see **ADDRESSES** above).

SUPPLEMENTARY INFORMATION:

I. Authority and Background

Section 315 of the Coastal Zone Management Act of 1972, as amended (CZMA), 16 U.S.C. 1461, establishes the

National Estuarine Research Reserve System (NERRS). 16 U.S.C. 1461 (e)(1)(B) authorizes the Secretary of Commerce to make grants to any coastal state or public or private person for purposes of supporting research and monitoring within a national estuarine reserve that are consistent with the research guidelines developed under subsection (c). This program is listed in the Catalog of Federal Domestic Assistance under "Coastal Zone Management Estuarine Research Reserve," Number 11.420.

II. Information on Established National Estuarine Research Reserves

The NERRS consists of estuarine areas of the United States which are designated, developed, and managed for research and educational purposes. Each National Estuarine Research Reserve (Reserve) within the NERRS is chosen to reflect regional differences and to include a variety of ecosystem types in accordance with the classification scheme of the national program as presented in 15 CFR part 921.

Each Reserve is suited to support a wide range of beneficial uses of ecological, economic, recreational, and aesthetic value which are dependent upon maintenance of a healthy ecosystem. Each site provides habitat for a wide range of ecologically and commercially important species of fish, shellfish, birds, and other aquatic and terrestrial wildlife. Each Reserve has been designed to ensure its effectiveness as a conservation unit and as a site for long-term research and monitoring. As part of a national system, the Reserves collectively provide an excellent opportunity to address research questions and estuarine management issues of national significance. For a detailed description of the sites, contact individual site Managers and/or Research Coordinators. The on-site contacts and addresses of the National Estuarine Research Reserves are provided in Appendix I.

III. Availability of Funds

Funds are available on a competitive basis to any public or private university, qualified public or private institution, individual, or coastal state (including Great Lakes States, Puerto Rico, Virgin Islands, Guam, American Samoa, and the Northern Marianas Islands) to conduct research within National Estuarine Research Reserves. Because NOAA has substantial involvement in the research, NERRS research funds are normally awarded through a cooperative agreement. NOAA may be involved in the project in the following manner:

The Sanctuaries and Reserves Division (SRD), Office of Ocean and Coastal Resource Management, reserves the right to immediately halt activity on this project if it becomes obvious that the project is not fulfilling the mission of the National Estuarine Research Reserve System goals. Day-to-day management is the responsibility of the Principal Investigators, however, frequent guidance and direction is provided by the Federal Government for the successful conduct of this project. Non-compliance with a Federally approved management plan may result in immediate halting of the project.

It is our intention to review and approve each stage of work before the next begins to assure quality scientific progression and results that will produce viable information on which to form valid, productive coastal management decisions.

Managers, Research Coordinators, and all other staff at NERRS sites are ineligible to submit competitive research proposals under this Announcement. In FY92 through FY94, SRD provided funding in the amount of approximately $700,000, each year, for research in the NERRS. The approximate range of funding per successful project in recent years has been between $30,000 and $70,000. In FY95, it is expected that approximately $700,000 will be available for funding new one- and two-year projects at similar levels. Federal funds requested must be matched by the applicant by at least 30% of the total cost of the project. For example, it the total project cost is $10,000, the Federal share is $7,000, the non-Federal match is $3,000.

Note: The match requirement was decreased from 50% to 30% by Coastal Zone Act Reauthorization Amendments of 1990.

The required match must be with cash or the value of goods and services directly benefiting the project in accordance with 15 CFR part 24, "Uniform Administrative Requirements for Grants and Cooperative Agreements with State and Local Governments," and OMB Circular A–110, "Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations." It is anticipated that projects receiving funding under this announcement will begin in the spring/summer of 1995. Earliest anticipated start date is May 1, 1995. Applicants not familiar with the requirements of a cooperative agreement or who need additional information on application requirements are encouraged to contact SRD.

IV. Purpose and Priorities

Research funds are used to support management-related projects that will: enhance scientific understanding of Reserve environments; provide information needed by Reserve Managers and coastal zone decision makers; and improve public awareness of estuaries and estuarine management issues. Research projects may be oriented to specific Reserves; however, projects that involve or benefit more than one Reserve in the national system will be given higher priority.

The primary research objective for the NERRS is the study of the causes and effects of natural and anthropogenically-induced change in the ecology of esturaine and estuarine-like ecosystems. All research funded through SRD should be designed to provide information of significant value to the development and implementation of resource management policy governing the U.S. coastal zone, for which NOAA's Office of Ocean and Coastal Resource Management has management and regulatory responsibilities. Beginning in FY93, SRD established a series of two-year research priority categories to serve as foci for the SRD competitive research program (see below). The FY95–96 research priority, which is the subject of this notice, is habitat restoration. Every two years, SRD will review future research needs and establish the next two-year research priority.

NERRS Research Priorities for FY 1993–1998

FY 1993, 1994: Non-point Source Pollution.

FY 1995, 1996: Habitat Restoration.

FY 1997, 1998: Effects of Habitat Alteration on Coastal Biota.

Research proposals for FY95 should be designed to answer some aspect(s) of the following broad management-oriented question: What are the most appropriate methods, experimental designs, models and/or evaluative criteria for restoring estuarine and estuarine-like ecosystems? While this theme is the primary funding priority for SRD in FY95/96, consideration may also be given to other projects of special merit that address other significant coastal management issues (e.g., non-point source pollution) on a regional or national scale. The availability of funding for such projects of special merit will, however, be extremely limited, and will be determined after the primary research priority has been addressed.

Research proposals submitted in response to this announcement must: address coastal management issues identified as having regional or national significance; relate them to the National Research Priority described in this announcement; and be conducted (at least partially) within one or more designated NERRS sites. Research

projects are funded for a duration of either one or two years. Multiple year projects will always be initiated in the first year of a two-year priority. One-year projects may be submitted in either year of a two-year priority. Therefore, proposals submitted under this announcement for FY95 funding may be of one- or two-year duration.

The research topic and the Reserve must be carefully chosen to ensure that the resource management issues of primary concern to the Reserve and the NERRS are addressed. Thus, it is critical that all prospective researchers contact the appropriate Reserve manager or research coordinator before submitting a proposal responding to this announcement.

V. Guidelines for Proposal Preparation, Proposal Review and Evaluation, and Reporting Requirements

Applicants for SRD research funds must follow the guidelines presented herein when preparing pre-proposals and proposals for research in Reserves. Pre-proposals and proposals not following these guidelines will be returned to the applicant without further review.

Proposals for research in the NERRS are solicited annually for award the following fiscal year. Proposal due dates and other pertinent information are contained in this announcement of research opportunities. All proposals sent to SRD must cite and reference this **Federal Register** notice. Proposers must submit an original and two (2) copies of each proposal and all supporting documents (curricula vitae, literature-referenced, etc.).

Each proposal will be reviewed only as a one- or two-year project, as specified by the applicant. Applicants whose pre-proposals are approved for further review must submit an original and two (2) copies of their full proposals as well.

A. Pre-proposals

Pre-proposals will be used by SRD to evaluate the applicability of the research plan with regard to the goals of this announcement. Pre-proposals may not exceed six (6) double-spaced pages including the abstract, introduction, objectives, statement of hypothesis, brief methods description, and discussion of anticipated results and benefits. A discussion of coordination with other research in progress or proposed is encouraged. Each pre-proposal must include a cover page which lists principal investigator(s) name(s), address(es) and telephone number(s), proposal title, name of institution providing matching funds, amount of Federal funds requested and amount of match, requested start date (month), and site(s) where research is to be conducted. Curricula vitae (not to exceed 3 pages each) for each researcher and a detailed budget showing matching funds must be included. The 6 double-spaced page limit does not include budget and budget description, cover page, curriculum vitae, literature cited section, and any tables or figures. No Federal forms need be submitted with a pre-proposal. The pre-proposal and additional sections should be submitted to CAPT Francesca M. Cava at the address provided in the Addresses section. Receipt of all pre-proposals will be acknowledged and a copy sent to the appropriate Reserve Manager. All pre-proposals will be reviewed by SRD research staff, the SRD Headquarters Regional Managers and their staff, an outside technical review panel, and the relevant Reserve Manager, Research Coordinator, and their research advisory committees, where applicable. Pre-proposals will be rated using the criteria listed in section C below, "Proposal Review and Evaluation." Applicants whose research projects are selected for further consideration will be requested to submit full proposal. Applicants whose projects are eliminated at this point will be notified.

Incomplete pre-proposals will be returned to the Principal Investigator without further review.

B. Full Proposals

Full proposals may be submitted only by those individuals requested to do so following review of pre-proposals. Unsolicited full proposals will be returned without review. One (1) original and two (2) copies of the proposal (including all forms, curricula vitae, etc.) must be submitted to the same address as the pre-proposals. The proposal may not exceed 20 double-spaced pages, excluding Federal forms, table of contents, title page, literature cited, curricula vitae, budget, and figures and table. Incomplete proposals will be returned without further review.

An Application Kit will be sent to those individuals who are requested to submit full proposals. This kit will include all required Federal forms, with instructions, as well as SRD guidelines for content and format of the full proposal.

C. Proposal Review and Evaluation

Pre-proposals will be reviewed as outlined in section A, "Pre-proposals," above. All full proposals will be reviewed by: SRD research staff; at least two outside individuals who are acknowledged experts in the particular field represented by the proposal; and an outside panel of experts. Each full proposal is also forwarded to the appropriate SRD Regional, State Coastal Zone Management, and Reserve staffs for comments. Verbatim copies of all peer reviews, excluding the name of the reviewer, will be sent to the applicant. Applicants will have two weeks to address and rebut peer reviews. These rebuttals will be considered by SRD when final funding decisions are made. All recommendations for funding by SRD must be approved by the NOAA Grants Management Division before awards are made.

In order to provide for the fair and equitable selection of the most meritorious research projects for support, SRD has established specific criteria for their review and evaluation. These criteria are intended to be applied to all research proposals in accordance with the SRD Research Priorities set forth in this announcement. The criteria used in both pre-proposal and full proposal review process are listed below, together with the elements that constitute each criterion and their relative weights (in parenthesis):

1. Scientific Merit (40%). This criterion is used to evaluate whether the objectives of the proposal are: important to the field; consistent with the stated national research priorities; and likely to improve the scientific understanding of estuarine processes within the Reserve(s) as well as in other similar estuaries.

2. Technical Approach (40%). This criterion is used to assess: the technical feasibility of the proposed effort; the reasonableness of the hypotheses; the degree to which the proposed timeline is realistic; the appropriateness and scientific validity of the proposed analytical methods; the degree to which the proposal demonstrates an understanding of the Reserve environment and management needs; the current state of knowledge in the particular field of research interest; and the total research requirements.

3. Qualifications of P.I. and Key Personnel (10%). This criterion relates to the experience and past performance of the principal investigator and key personnel, their familiarity with the geographic area of the proposed study, and their publication record.

4. Institutional Support and Capabilities (5%). This criterion relates to the extent of the applicant institution's support for and commitment to the proposed research and what facilities, equipment, and other resources are available to the principal investigator and key person-

from his/her institution for use in accomplishing the proposed work.

5. Budget (5%). This criterion is used to determine whether the budget is realistic and reasonable for accomplishing the proposed tasks.

The external panel will review and rank the proposals based solely on the technical criteria above. The panel will submit its rankings to SRD. In making final funding decisions among qualified proposals ranked highly by the above technical criteria, SRD will also take into consideration the following programmatic policy factors:

Utility to Reserve Management and to Regional Coastal Management Issues. This criterion is used to assess the likelihood that results of this research will support the management of the affected Reserve(s) and will enhance wise coastal resource management within the region(s) of study.

Relevance to National Research Priorities and Utility to National Coastal Management Issues. This criterion is used to assess the relationship between the objectives of the proposed project and the National Research Priorities established by NOAA, and to assess the likelihood that results of this research will be important to national coastal management issues across the NERR System and coastal states.

Consequently, proposals ranked highest on technical criteria will not necessarily receive funding from SRD. Final funding decisions will be made by the Chief of the Sanctuaries and Reserves Division, based upon review panel rankings and programmatic considerations.

VI. Other Requirements

Recipients and subrecipients are subject to all Federal laws and Federal and DOC policies, regulations, and procedures applicable to Federal financial assistance awards.

All non-profit and for-profit applicants are subject to a name-check review process. Name checks are intended to reveal if any key individuals associated with the applicant have been convicted of or are presently facing criminal charges such as fraud, theft, perjury, or other matters which significantly reflect on the applicant's management honesty or financial integrity.

No award of Federal funds shall be made to an applicant who has an outstanding delinquent Federal debt until either: (1) The delinquent account is paid in full; (2) A negotiated repayment schedule is established and at least one payment is received; or (3) Other arrangements satisfactory to the Department of Commerce are made.

Unsatisfactory performance under prior Federal awards may result in an application not being considered for funding. In addition, any recipients who are past due for submitting acceptable final reports under any previous SRD-funded research will be ineligible to be considered for new awards until final reports are received, reviewed and deemed acceptable by SRD.

A false statement on an application is grounds for denial or termination of funds and grounds for possible punishment by a fine or imprisonment as provided in 18 U.S.C., 1001.

If an application is selected for funding, the Department of Commerce (DOC) has no obligation to provide any additional future funding in connection with that award. Renewal of an award to increase funding or extend the period of performance is at the total discretion of DOC. However, funding priority will be given to the second year of multi-year proposals upon satisfactory completion of the first year of research.

Applications under this program are subject to Executive Order 12372, "Intergovernmental Review of Federal Programs."

All primary applicants must submit a completed Form CD–511, "Certifications Regarding Debarment, Suspension and Other Responsibility Matter; Drug-Free Workplace Requirements and Lobbying," and the following explanations are hereby provided:

1. Nonprocurement Debarment and Suspension. Prospective participants (as defined at 15 CFR part 26, section 105) are subject to 15 CFR part 26, "Nonprocurement Debarment and Suspension," and the related section of the certification form prescribed above applies;

2. Drug-Free Workplace. Grantees (as defined at 15 CFR part 26, section 605) are subject to 15 CFR part 26, subpart F, "Governmentwide Requirements for Drug-Free Workplace (Grants)" and the related section of the certification form prescribed above applies;

3. Anti-Lobbying. Persons (as defined at 15 CFR part 28, section 105) are subject to the lobbying provisions of 31 U.S.C. 1352, "Limitation on the use of appropriated funds to influence certain Federal contracting and financial transactions," and the lobbying section of the certification form which applies to applications/bids for grants, cooperative agreements, and contracts for more than $100,000, and loans and loan guarantees for more than $150,000, or the single family maximum mortgage limit for affected programs, whichever is greater; and

4. Anti-Lobbying Disclosures. Any applicant that has paid or will pay for lobbying using any funds must submit an SF–LLL, "Disclosure of Lobbying Activities," as required under 15 CFR part 28, Appendix B.

5. Lower Tier Certifications. Recipients shall require applicants/bidders for subgrants, contracts, subcontracts, or other lower tier covered transactions at any tier under the award to submit, if applicable, a completed CD–512, "Certifications Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion—Lower Tier Covered Transactions and Lobbying," and disclosure form SF–LLL, "Disclosure of Lobbying Activities." The original form CD–512 is intended for the use of recipients. SF–LLL submitted by any tier recipient or subrecipient should be submitted to DOC in accordance with the instructions contained in the award document.

Buy American-Made Equipment or Products: Applicants are hereby notified that any equipment or products authorized to be purchased with funding provided under this program should be American-made to the extent feasible in accordance with Public Law 103–121, sections 606(a) and (b).

Indirect Costs: The total dollar amount of the indirect costs proposed in an application under this program must not exceed the indirect cost rate negotiated and approved by a cognizant Federal agency prior to the proposed effective date of the award or 100 percent of the total proposed direct costs dollar amount in the application, whichever is less.

Preaward Activities: If applicants incur any costs prior to an award being made, they do so solely at their own risk of not being reimbursed by the Government. Notwithstanding any verbal or written assurance that may have been received, there is no obligation on the part of DOC to cover preaward costs.

VII. Classification

This notice has been determined to be "not significant" for purposes of E.O. 12866.

This action is categorically excluded from the requirement to prepare an environmental assessment by NOAA Administrative Order 216–6.

This notice does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612.

This notice contains a collection of information requirement subject to the Paperwork Reduction Act. The

collection of this information has been approved by the Office of Management and Budget, OMB Control Number 0648–0121.

(Federal Domestic Assistance Catalog Number 11.420 Coastal Zone Management Estuarine Research Reserves)

Dated: June 1, 1994.

Frank W. Maloney,

Deputy Assistant Administrator, Ocean Services and Coastal Zone Management.

Appendix I—Nerrs On-Site Staff

Alabama

Mr. Thomas McAlpin, Manager, Weeks Bay National Estuarine Research Reserve, 10936–B, U.S. Highway 98, Fairhope, AL 36532, (205) 928–9792

California

Mr. Steve Kimple, Manager, Dr. Andrew deVogelaere, Research Coordinator, Elkhorn Slough National Estuarine Research Reserve, 1700 Elkhorn Road, Watsonville, CA 95076, (408) 728–2822

BILLING CODE 3510–08–M

[I.D. 051994B]

Draft National Contingency Plan for Response to Unusual Marine Mammal Mortality Events

AGENCY: National Marine Fisheries Service (NMFS), National Oceanographic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability; request for comments.

SUMMARY: NMFS announces the availability of the draft National Contingency Plan for Response to Unusual Marine Mammal Mortality Events prepared in accordance with section 404 of Marine Mammal Protection Act.

DATES: Comments on the draft report must be received by September 12, 1994.

ADDRESSES: Written comments and requests for copies of the draft plan should be sent to Dean Wilkinson, Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Highway, Silver Spring, MD 20910–3226.

FOR FURTHER INFORMATION CONTACT: Dean Wilkinson at (301) 713–2322.

SUPPLEMENTARY INFORMATION: Section 404 of the Marine Mammal Protection Act, as amended (16 U.S.C. *et seq.*) outlines the procedures to be followed if an unusual mortality event affecting marine mammals occurs. An unusual mortality event is defined as an event that: (1) Is unexpected, (2) involves a significant die-off of any marine mammal population, and (3) demands an immediate response.

Section 404 also mandates preparation of a national contingency plan for responding to unusual

mortality events. The plan is to be made available for public comment before being finalized. The plan is to be in place by November 1994. NMFS has prepared a draft plan detailing contacts to be made, sources of information, analyses to be conducted, and the logistics of response. This plan is available to the public (see **ADDRESSES**).

Dated: June 6, 1994.

William W. Fox, Jr.,

Director, Office of Protected Resources, National Marine Fisheries Service.

Advisory Council; Meeting

AGENCY: Sanctuaries and Reserves Division (SRD), Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Monterey Bay National Marine Sanctuary Advisory Council Open Meeting.

SUMMARY: The Advisory Council was established in December 1993 to advise and assist the Secretary of Commerce in the implementation of the management plan for the Monterey Bay National Marine Sanctuary.

TIME AND PLACE: June 24, 1994 from 9 until 12:30. The meeting location will be at the Hilton Park Center, Monterey, California.

AGENDA: General issues related to the Monterey Bay National Marine Sanctuary are expected to be discussed, including the water quality protection program and vessel traffic.

PUBLIC PARTICIPATION: The meeting will be open to the public. Seats will be available on a first-come, first-served basis.

FOR FURTHER INFORMATION CONTACT: Aaron King at (408) 647–4257 or Elizabeth Moore at (301) 713–3141.

Federal Domestic Assistance Catalog Number 11.429 Marine Sanctuary Program

Dated: June 7, 1994.

[I.D. 052694C]

Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Receipt of application to modify permit no. 843 (P771 #68).

SUMMARY: Notice is hereby given that the Alaska Fisheries Science Center, NMFS, NOAA, National Marine Mammal Laboratory, 7600 Sand Point Way, NE., Bldg. 4, Seattle, WA 98115, has requested a modification to permit No. 843.

ADDRESSES: The modification request and related documents are available for review upon written request or by appointment in the following offices:

Permits Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13130, Silver Spring, MD 20910 (301/713–2289);

Director, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802–1668 (907/586–7221); and

Director, Northwest Region, NMFS, NOAA, 7600 Sand Point Way, NE., BIN C15700, Seattle, WA 98115 (206/526–6150).

Written data or views, or requests for a public hearing on this request should be submitted to the Director, Office of Protected Resources, NMFS, NOAA, U.S. Department of Commerce, 1315 East-West Highway, Room 13130, Silver Spring, MD 20910, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular modification request would be appropriate.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

SUPPLEMENTARY INFORMATION: The subject modification to permit No. 843, issued on June 2, 1993 (58 FR 32520), is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216).

Permit No. 843 authorizes the permit holder to conduct aerial, boat, and ground surveys and scat collections for harbor seals (*Phoca vitulina*) at haulouts and rookeries in Alaska over a 4-year period ending in 1997. The permit holder now seeks authorization to capture and radio tag up to 50 harbor seals in order to determine a correction factor to be applied towards the number of seals at sea or moving between haulout sites, and thus missed by aerial surveys. The permittee estimates that up to 200a dditional seals may be disturbed incidental to the capture/tagging activities.

Dated: June 3, 1994.

William W. Fox, Jr.,

Director, Office of Protected Resources, National MarineFisheries Service.

BILLING CODE 3510–22–F

[I.D. 052594A]

Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Modification No. 1 to scientific research permit No. 868 (P539).

SUMMARY: Notice is hereby given that a request for modification of Scientific Research Permit No. 868 submitted by Dr. Norihisa Baba, Chief, Fur Seal Section, the National Research Institute of Far Seas Fisheries, Fisheries Agency of Japan, 5–7–1 Orido, Shimizu, Shizuoka, 424 Japan, has been granted.

ADDRESSES: The modification and related documents are available for review upon written request or by appointment in the following offices:

Permits Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Suite 13130, Silver Spring, MD 20910 (301/713–2289); and

Director, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802–1668 (907/586–7221).

SUPPLEMENTARY INFORMATION: On April 25, 1994, notice was published in the **Federal Register** (59 FR 19695) that a modification of permit No. 868, issued July 16, 1993 (58 FR 39525), had been requested by the above-named individual. The requested modification has been granted under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the provisions of §§ 216.33(d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Fur Seal Act of 1966, as amended (16 U.S.C. 1151 *et seq.*), and fur seal regulations at 50 CFR part 215.

Permit No. 868 has been modified to initiate the field season on June 15, 1994, to extend the effective date through September 1996, and to increase the number of fur seals authorized as subjects of the research.

Dated: June 6, 1994.

William W. Fox, Jr., Director,

Office of Protected Resources, National Marine Fisheries Service.

Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Issuance of scientific research permit (P420C).

SUMMARY: Notice is hereby given that Permit No. 801 issued to Dr. Michael Castellini, Ph.D., Institute of Marine Science, University of Alaska, on October 16, 1992 (57 FR 48312, October 26, 1992) has been modified. The modification becomes effective upon publication in the Federal Register.

ADDRESSES: The Permit, as modified, and associated documents are available for review upon written request or by appointment in the following offices:

Permits Division, Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Hwy., Suite 7324, Silver Spring, MD 20901 (301/713–2289); and

Director, Alaska Region, National Marine Fisheries Service, Federal Annex, 9109 Mendenhall Mall Road, Suite 6, Juneau, AK 99802 (907/586–7221).

SUPPLEMENTARY INFORMATION: Pursuant to the provisions of §§1A216.33(d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the subject Scientific Research Permit authorized harassment of up to 3200 Weddell seals (*Leptonychotes weddellii*), 30 each of crabeater seals (*Lobodon carcinophagus*), leopard seals (*Hydrurga leptonyx*), Ross seals (*Ommatophoca rossii*), Antarctic fur seal (*Arctocephalus gazella*) and southern elephant seal (*Mirounga leonina*) during various scientific experiments, and import specimens from McMurdo Sound, Antarctica.

The Permit has been modified to expand the research protocol on animals already authorized by inserting catheters in six pups. No increase in the total take authority is authorized.

Dated: June 6, 1994.

BILLING CODE 3510–22–F

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Restraint Limits for Certain Wool and Man-Made Fiber Textile Products Produced or Manufactured in the Czech Republic

June 7, 1994.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits for the new agreement year.

EFFECTIVE DATE: June 15, 1994.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–5850. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The Bilateral Textile Agreement, effected by exchange of notes dated August 12, 1993 and April 11, 1994, between the Governments of the United States and the Czech Republic establishes limits for the period beginning on June 1, 1994 and extending through May 31, 1995.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 58 FR 62645, published on November 29, 1993).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

June 7, 1994.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on December 9, 1993; pursuant to the Bilateral Textile Agreement, effected by exchange of notes dated August 12, 1993 and April 11, 1994, between the Governments of the United States and the Czech Republic; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on June 15, 1994, entry into the United States for consumption and withdrawal from warehouse for consumption of wool and man-made fiber textile products in the following categories, produced or manufactured in the Czech Republic and exported during the twelve-month period beginning on June 1, 1994 and extending through May 31, 1995, in excess of the following levels of restraint:

Category	Twelve-month restraint limit [1]
410	1,515,000 square meters.
433	5,950 dozen.
435	3,915 dozen.
443	72,533 numbers.
624	1,590,000 square meters.

[1] The limits have not been adjusted to account for any imports exported after May 31, 1994.

Imports charged to these category limits for the period June 1, 1993 through May 31, 1994 shall be charged against those levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The limits set forth above are subject to adjustment in the future pursuant to the provisions of the current bilateral agreement between the Governments of the United States and the Czech Republic.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

June 7, 1994.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on December 9, 1993; pursuant to the Bilateral Textile Agreement, effected by exchange of notes dated August 6, 1993 and October 6, 1993, between the Governments of the United States and the Slovak Republic; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on June 15, 1994, entry into the United States for consumption and withdrawal from warehouse for consumption of wool textile products in the following categories, produced or manufactured in the Slovak Republic and exported during the twelve-month period which began on June 1, 1994 and extends through May 31, 1995, in excess of the following levels of restraint:

Category	Twelve-month restraint limit [1]
410	395,635 square meters.
433	11,050 dozen.
435	16,691 dozen.
443	92,315 numbers.

[1] The limits have not been adjusted to account for any imports exported after May 31, 1994.

Imports charged to these category limits for the period June 1, 1993 through May 31, 1994 shall be charged against those levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The limits set forth above are subject to adjustment in the future pursuant to the provisions of the current bilateral agreement between the Governments of the United States and the Slovak Republic.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 5000–04–M

Defense Science Board Task Force on the DoD Biological Defense Program

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on the DoD Biological Defense Program will meet in closed session on June 27–29, 1994, at the Joint Program Office for Biological Defense (JPO–BD), Falls Church, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense through the Under Secretary of Defense for Acquisition and Technology on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will review the ongoing Military Departments research,

development, and acquisition programs and provide recommendations to the JPO–BD. The Task Force should also review the biological defense aspects of the medical research and development program to ensure that the scope of the science and technology is adequate.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Public Law 92–463, as amended (5 U.S.C. App. II, (1988)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1988), and that accordingly this meeting will be closed to the public.

Dated: June 8, 1994.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Defense Science Board Task Force on Information Architecture for the Battlefield

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on Information Architecture for the Battlefield will meet in closed session on July 11–12 and August 4–5, 1994 at Strategic Analysis, Inc., Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense through the Under Secretary of Defense for Acquisition and Technology on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Task Force will provide recommendations for implementing an information architecture for commanders and forces at all levels.

In accordance with section 10(d) of the Federal Advisory Committee Act, Public Law 92–463, as amended (5 U.S.C. App. II (1988)), it has been determined that these DSB Task Force meetings concern matters listed in 5 U.S.C. 552b(c)(1) (1988), and that accordingly these meetings will be closed to the public.

Dated: June 8, 1994.

Defense Science Board Task Force on Joint Advanced Strike Technology Program (JASTP)

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on Joint Advanced Strike Technology Program (JASTP) will meet in closed session on June 29–30, July 5–6, and July 19–20, 1994 at the Institute for Defense Analyses, Alexandria, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense through the Under Secretary of Defense for Acquisition and Technology on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Task Force will provide recommendations for implementing a Joint Advanced Strike Technology Program in the FY 95–05 period.

In accordance with section 10(d) of the Federal Advisory Committee Act, Public Law 92–463, as amended (5 U.S.C. App. II (1988)), it has been determined that these DSB Task Force meetings concern matters listed in 5 U.S.C. 552b(c)(1) (1988), and that accordingly these meetings will be closed to the public.

Dated: June 8, 1994.

DEPARTMENT OF ENERGY

Pittsburgh Energy Technology Center; Unsolicited Financial Assistance Award

AGENCY: Pittsburgh Energy Technology Center, DOE.

ACTION: Acceptance of an Unsolicited Proposal Application for a Cooperative Agreement with Southern Company Services, Inc.

SUMMARY: The U.S. Department of Energy (DOE), Pittsburgh Energy Technology Center (PETC) announces that pursuant to 10 CFR 600.14 (d) and (e), it intends to award a Cooperative Agreement to Southern Company Services, Inc. for "Generic NO_x Control Intelligent System". The application has been determined to be meritorious in a general evaluation in accordance with 10 CFR 600.14(d) and would not be eligible for financial assistance under a recent, current or planned solicitation and a competitive solicitation would be inappropriate.

ADDRESSES: U.S. Department of Energy, Pittsburgh Energy Technology Center, Acquisition and Assistance Division, P.O. Box 10940, MS 921–118, Pittsburgh, PA 15236–0940.

FOR FURTHER INFORMATION CONTACT: David L. Hunter, Contract Specialist, 412/892–4524.

SUPPLEMENTARY INFORMATION:

Cooperative Agreement No.

DE–FC22–94PC94253.

Title of Research Effort

Generic NO_x Control Intelligent System.

Awardee

Southern Company Services, Inc.

Term of Assistance Award

6 months.

Cost of Assistance Effort

The total estimated project value is $435,357.

Objective

The objective of this project is to develop a "Generic NO_x Control Intelligent System" that is designed to be an enhancement to a power plant's existing digital control system to allow identification of operating conditions that reduce NO_x emissions while meeting other operational constraints on the unit.

Dated: May 11, 1994.

Richard D. Rogus,

Contracting Officer.

[FR Doc. 94–14302 Filed 6–10–94; 8:45 am]

BILLING CODE 6450–01–M

Financial Assistance Award; Intent To Award Cooperative Agreement To University of Illinois

AGENCY: Department of Energy (DOE).

ACTION: Notice of intent.

SUMMARY: DOE announces that pursuant to 10 CFR 600.6(a)(5), it is making a discretionary financial assistance award based on the criteria set forth at 10 CFR 600.7(b)(2)(i) (B), (C), (D) and 600.14(d) to the University of Illinois, Department of the Illinois State Geological Survey (ISGS) under cooperative agreement number DE–FC01–94E124855. The purpose of the proposed agreement is to revise the Energy Information Administration (EIA) demonstrated reserve base (DRB) of coal for the State of Illinois, with new quantity/quality data. This agreement is necessary to achieve program objectives, conserve public funds and is essential to the

public interest. This effort will have a total estimated cost of $83,000 to be provided by the DOE.

The (ISGS) is the State authority on Illinois coal resources. This agreement will assist the State of Illinois in its efforts to continually collect analyses on coal quality and perform geological mapping to determine the quantity and quality of coal reserves in the state.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Office of Placement and Administration, Attn: Shirley A. Jones, HR–531.21, 1000 Independence Ave., SW., Washington, DC 20585.

SUPPLEMENTARY INFORMATION: The cooperative agreement will provide funding for the ISGS to develop Phase I Coal Reserves Data Base (CRDB) coal resource data for updated estimates of the demonstrated reserve base (DRB) and recoverable reserves of coal in Illinois, allocated to specified ranges of sulfur content and heat content. The DRB constitutes the foundation data for coal reserve analyses. Recoverable reserve data derived from the DRB comprise the pivotal data base for analyzing future coal supplies. Data development may include analyses of coal geology, resource quantities, coal quality characteristics, and other factors that affect resource accessibility and minability. Data output must include remaining identified resources, DRB, remaining accessible reserve base, recoverable reserves, allocated by coal rank, type of mining, and (excepting identified resources) heat and sulfur content.

DOE has determined that the proposed agreement meets the criteria set forth at 10 CFR 600.7(b)(2) (B), (C) and (D) in that (1) The activities are being conducted by the applicant using its own resources or these donated or provided by third parties; however, DOE support of that activity would enhance the public benefits to be derived and DOE knows of no other entity which is conducting or is planning to conduct such an activity, (2) the ISGS is a unit of state government and the activity to be supported is related to performance of a governmental function within the subject jurisdiction, thereby precluding DOE provision of support to another entity, and (3) the ISGS has exclusive domestic capability to perform the activity successfully, based upon unique equipment, proprietary data and technical expertise, or other such unique qualifications.

The ISGS is charged with the responsibility of mapping and estimating the coal resources for the State of Illinois and possesses over 1,300 agency-collected analyses including sulfur contents and heat values. This data, along with data from other sources, will enable them to revise the coal reserves by quality and mining method for Illinois. No other private or government entity is known to have the data and mapping capability required to estimate the coal reserves by quality for the State of Illinois.

Term: The term of the proposed cooperative agreement is expected to be 12 months from the effective date of award.

Issued in Washington, DC on June 6, 1994.

Scott Sheffield,

Director, Headquarters Operations, Division B, Office of Placement and Administration.

[FR Doc. 94–14303 Filed 6–10–94; 8:45 am]

BILLING CODE 6450–01–P

Federal Energy Regulatory Commission

[Docket No. ER87–483–005, et al.]

Southern California Edison Co., et al.; Electric Rate and Corporate Regulation Filings

June 6, 1994.

Take notice that the following filings have been made with the Commission:

1. Southern California Edison Company

[Docket No. ER87–483–005]

Take notice that on May 27, 1994, Southern California Edison Company (Edison or Company), tendered for filing its compliance filing in the above-referenced docket.

Comment date: June 20, 1994, in accordance with Standard Paragraph E at the end of this notice.

2. Virginia Electric and Power Company

[Docket No. ER94–1022–000]

Take notice that on May 31, 1994, Virginia Electric and Power Company, tendered for filing an amendment to its filing in the above-captioned docket. The Power Sales Tariff, which was submitted as an amendment, provides for the sale for resale of Merom unit power, system power, and emergency energy to eligible purchasers under the tariff.

Copies of the filing were served upon intervenors in this docket as well as upon the Virginia State Corporation Commission and the North Carolina Utilities Commission.

Comment date: June 20, 1994, in accordance with Standard Paragraph E at the end of this notice.

3. Pacific Gas and Electric Company

[Docket No. ER94–1150–000]

Take notice that on June 1, 1994, Pacific Gas and Electric Company (PG&E) tendered for filing an Amendment to its April 12, 1994, filing of a Control Area Rate Schedule for the City of Redding (Redding) provided by PG&E.

According to PG&E, on May 31, 1994, it reached an interim letter agreement that will make the Western Area Power Administration a "Third Party Provider of Spring Reserve and Regulation services" under the proposed Control Area Rate Schedule. PG&E states that "this event is of great relevance to the Commission's consideration of the [Control Area Rate Schedule]."

Comment date: June 17, 1994, in accordance with Standard Paragraph E at the end of this notice.

4. Entergy Services, Inc.

[Docket No. ER94–1306–000]

Take notice that on May 27, 1994, Entergy Services, Inc. (Entergy Services), on behalf of Mississippi Power & Light Company (MP&L), Arkansas Power & Light Company, Gulf States Utilities Company, Louisiana Power & Light Company, New Orleans Public Service Company (collectively, the Entergy Operating Companies), and itself, filed the Amendment (Amendment) to Interconnection Agreement between MP&L and Municipal Energy Agency of Mississippi (MEAM), effective as of July 1, 1984, as amended (Interconnection Agreement), which is on file with the Commission as MP&L Rate Schedule FERC No. 268. Entergy Services states that the purpose of the Amendment is to set forth how MEAM may use the Entergy Operating Companies Transmission Service Tariff in conjunction with the Interconnection Agreement. Entergy Services asks that the Amendment be made effective on May 17, 1994.

Comment date: June 20, 1994, in accordance with Standard Paragraph E at the end of this notice.

5. Golden Spread Electric Cooperative, Inc.

[Docket No. ER94–1307–000]

Take notice that on May 27, 1994, Golden Spread Electric Cooperative, Inc. tendered for filing proposed changes to Schedule A of its FERC Electric Service Rate Schedule Nos. 12–22, and in addition filed a related Special Facilities Agreement with one of its members, Midwest Electric Cooperative, Inc.

Golden Spread proposes to amend Schedule A for each Rate Schedule to add a special facilities charge provision

and a Rider A, which contains the formula to be used in calculating the special facilities charge. The special facilities charge will allow Golden Spread to recover costs from a member related to a transmission or distribution facility which that member has requested that Golden Spread acquire, construct, or cause to be constructed. In addition, Golden Spread filed a Special Facilities Agreement with Midwest which provides for the construction by Golden Spread of a nine mile segment of 69 Kv line on the Midwest system, with associated costs being recovered from Midwest under the special facilities charge provision.

Copies of the filing were served upon Golden Spread's jurisdictional customers, the Public Utility Commission of Texas, and the Oklahoma Corporation Commission.

Comment date: June 20, 1994, in accordance with Standard Paragraph E at the end of this notice.

6. Northeast Utilities Service Company

[Docket No. ER94–1309–000]

Take notice that on May 31, 1994, Northeast Utilities Service Company (NUSCO) tendered for filing two Service Agreements to provide non-firm transmission service under the NU System Companies' Transmission Service Tariff No. 2 to Central Vermont Public Service Corporation (CVPS) and to city of Holyoke, Massachusetts Gas and Electric Department (Holyoke). NU requests that the Service Agreements become effective on the date of receipt of the filing by the Commission.

NUSCO states that a copy of this information has been mailed to CVPS and Holyoke.

Comment date: June 20, 1994, in accordance with Standard Paragraph E at the end of this notice.

7. Central Vermont Public Service Corporation

[Docket No. ER94–1310–000]

Take notice that on May 31, 1994, Central Vermont Public Service Corporation (CVPS) tendered for filing the Actual 1993 Cost Report required under Article 2.4 on Second Revised Sheet No. 18 of FERC Electric Tariff, Original Volume No. 3, of Central Vermont under which Central Vermont provides transmission and distribution service to the following Customers: Vermont Electric Cooperative, Inc., Lyndonville Electric Department, Village of Ludlow Electric Light Department, Village of Johnson Water and Light Department, Village of Hyde Part Water and Light Department, Rochester Electric Light and Power Company, Woodsville Fire District Water and Light Department.

Comment date: June 20, 1994, in accordance with Standard Paragraph E at the end of this notice.

8. Central Vermont Public Service Corporation

[Docket No. ER94–1311–000]

Take notice that on May 31, 1994, Central Vermont Public Service Corporation (CVPS) tendered for filing the Actual 1993 Cost Report required under Article 2.3(A) on Original Sheet No. 21 of FERC Electric Tariff, Original Volume No. 4, of Central Vermont Public Service Corporation (Company) under which the Company provided Unreserved System Power Service to the following Customers: Lyndonville Electric Department, Village of Ludlow Electric Light Department, Village of Johnson Water and Light Department, Village of Hyde Park Water and Light Department.

Comment date: June 20, 1994, in accordance with Standard Paragraph E at the end of this notice.

9. Central Vermont Public Service Corporation

[Docket No. ER94–1312–000]

Take notice that on May 31, 1994, Central Vermont Public Service Corporation (CVPS) tendered for filing the Actual 1993 Cost Report required under Paragraph Q–1 on Original Sheet No. 18 of the Rate Schedule FERC No. 135 (RS–2 rate schedule) under which Central Vermont Public Service Corporation (Company) sells electric power to Connecticut Valley Electric Company Inc. (Customer). The Company states that the Cost Report reflects changes to the RS–2 rate schedule which were approved by the Commission's June 6, 1989, order in Docket No. ER88–456–000.

Comment date: June 20, 1994, in accordance with Standard Paragraph E at the end of this notice.

10. United Illuminating Company

[Docket No. ER94–1313–000]

Take notice that on May 31, 1994, The United Illuminating Company (UI) submitted for informational purposes all individual Purchase Agreements executed under UI's Wholesale Electric Sales Tariff, FERC Electric Tariff, Original Volume No. 2 during the six-month period of November 1, 1993, through April 30, 1994.

Comment date: June 20, 1994, in accordance with Standard Paragraph E at the end of this notice.

11. Niagara Mohawk Power Corporation

[Docket No. ER94–1314–000]

Take notice that on May 31, 1994, Niagara Mohawk Power Corporation (Niagara) tendered for filing with the Commission a Transmission Services Agreement (TSA) between Niagara and the New York Power Authority (NYPA) and Supplement No. 1 to the TSA between Niagara, NYPA and the Municipal Electric Utilities Association (MEUA). The TSA provides for firm transmission service from NYPA to its Municipal and Cooperative Customers (M&C Customers) at rates phased-in over five years. Supplement No. 1 to the TSA provides that future changes in the TSA be negotiated prior to filing with the Commission. Niagara Mohawk requests and effective date of August 1, 1994.

Comment date: June 20, 1994, in accordance with Standard Paragraph E at the end of this notice.

12. Northern States Power Company (Wisconsin)

[Docket No. ER94–1315–000]

Take notice that on May 31, 1994, Northern States Power Company, Wisconsin (NSP–W) filed Amendment No. 1 to its Power and Energy Supply Agreement with the Village of Bloomer. According to the filing utility the Amendment extends the term of the agreement in exchange for a discount on the power and energy supply rate.

Comment date: June 20, 1994, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–P

[Docket No. RP94–265–000]

Algonquin LNG, Inc.; Petition for Waiver

June 7, 1994.

Take notice that on May 31, 1994, Algonquin LNG, Inc. (ALNG) filed a request for waiver of § 284.8(b)(3)–(5) of the Commission's Regulations, requiring an electronic bulletin board (EBB), including the Order No. 563 standardization requirements. ALNG states that it will not be able to provide standardized downloadable data sets by June 1, 1994, as required by Order No. 563. ALNG also states that it has concluded that the cost of operating an EBB outweighs the benefits to ALNG's customers. ALNG proposes to provide information concerning the availability of service by means of telephone and facsimile.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before June 14, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP94–273–000]

Columbia Gas Transmission Corporation; Compliance Filing

June 7, 1994.

Take notice that Columbia Gas Transmission Corporation (Columbia) on June 1, 1994, tendered for filing a filing in compliance with the Commission's May 31, 1994 Order (Order) in this docket containing support for the reconciliation of transportation and exchange imbalances.

Columbia states that the Order stated that "[i]f Columbia intends to propose recovery of T&E imbalances during the nine-month close-out period [October 31, 1993 to July 31, 1994]. Columbia should provide complete support for such a proposal." (Order, mimeo at p. 7). The nine-month close-out period is specified in section 39 (section 39) of the General Terms and Conditions of Columbia's FERC Gas Tariff, Second Revised Volume No. 1. On May 2, 1994, Columbia filed a request for rehearing of the Order in which, among other things, Columbia indicated that it would make the instant filing in connection with the Commission's statement regarding transportation and exchange imbalances.

In this compliance filing, Columbia is also seeking a waiver of the nine-month close-out period in section 39 that ends July 31, 1994. Specifically, Columbia is requesting that the Commission extend the close-out period for an additional eight months to March 31, 1995.

Columbia states that copies of the filing were served upon each of Columbia's former sales customers and interested State Commissions, and to each of the parties set forth on the Official Service List in these proceedings.

Any person desiring to intervene or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedures (18 CFR 385.211 or 385.214). All such interventions or protests should be filed on or before June 14, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene in accordance with the Commission's rules. Copies of Columbia's filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. CP94–582–000]

National Fuel Gas Supply Corp.; Request Under Blanket Authorization

June 7, 1994.

Take notice that on June 2, 1994, National Fuel Gas Supply Corporation (National), 10 Lafayette Square, Buffalo, New York, 14203, filed in Docket No. CP94–582–000 a request pursuant to §§ 157.205 and 157.212 of the Commission's Regulations under the National Gas Act (18 CFR 157.205 and 157.212) for authorization to construct and operate a delivery point and appurtenant facilities to provide service to an existing firm transportation customer, National Fuel Gas Distribution Corporation (Distribution) under authorization issued in Docket No. CP83–4–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Specifically, National proposes to construct and operate a delivery point located in the Town of Clarence, Erie County, New York. The facilities will include valves, regulators, heaters, filters, meters, piping and appurtenant facilities. National indicates that all facilities will be placed in a previously disturbed area.

National indicates that the total volume to be delivered to the customer is estimated to be 250,000 Mcf annually. National states that the total volumes to be delivered to the customer would not exceed the total volume authorized prior to this request. National states that this FERC Gas Tariff does not prohibit the addition of delivery points. National further states that it has sufficient capacity to accomplish the deliveries proposed herein without detriment or disadvantage to its other customers and that this will have a minimal impact on its peak day and annual deliveries.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity is deemed to be authorized effective on the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filling a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TM94–10–59–000]

Northern Natural Gas Co.; Proposed Changes in FERC Gas Tariff

June 7, 1994.

Take notice that on June 3, 1994, Northern Natural Gas Company (Northern), tendered for filing changes in its FERC Gas Tariff, Fifth Revised Volume No. 1.

Northern filed Eleventh Revised Sheet No. 53 to establish the May 1994 Index Price for determining the dollar/volume equivalent for any transportation imbalances that may exist on contracts between Northern and its Shippers.

Northern states that copies of the filing were served upon the company's customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with § 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before June 14, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. RP94–281–000]

Pacific Interstate Transmission Co.; Intent to Recover Costs of Gas Purchase Agreement Restructuring

June 7, 1994.

Take notice that on June 2, 1994, Pacific Interstate Transmission Co., (PITCO) tendered for filing its notice of intention to recover from its sole customer Southern California Gas Company (SoCalGas) on or immediately following August 15, 1994, pursuant to PITCO's cost-of-service tariff, $192 million in payments made to Northwest Alaska Pipeline Company's (Northwest Alaskan) supplier, Pan-Alberta Gas Ltd. (Pan-Alberta) as consideration for revisions to the terms of gas purchase agreements among PITCO and Northwest Alaskan, Northwest Alaskan and Pan-Alberta.

PITCO states that the revised gas purchase agreement's pricing mechanism is designed to assure that PITCO's sales to SoCalGas will be at a market sensitive rate. PITCO further states that the term of the agreement will be reduced by ten years, from a termination date of October 31, 2012 to October 31, 2003.

PITCO states that recovery by PITCO of its payment to Pan-Alberta shall be achieved by a single payment from SoCalGas. SoCalGas, with the prior approval of the California Public Utilities Commission (CPUC) will raise the necessary funds and pursuant to CPCU authorization will recover a portion of its payment to PITCO from its customers over a five-year period.

PITCO states that Northwest Alaskan shall make the necessary tariff filings to reflect the new pricing provisions and terms of the sale agreements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before June 14, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

BILLING CODE 6717–01–M

[Docket No. RP94–276–000]

Tennessee Gas Pipeline Co.; Proposed Settlement and Proposed Changes in FERC Gas Tariff

June 7, 1994.

Take notice that on May 26, 1994, Tennessee Gas Pipeline Company (Tennessee) filed a Stipulation and Agreement (Stipulation) proposing amendments to its FERC Gas Tariff, Fifth Revised Volume No. 1, pursuant to Rule 602 (18 CFR 385.602). Tennessee has included an appendix with pro forma tariff sheets containing the modifications necessitated by the Stipulation.

The Stipulation effects service changes in three areas: (1) Supply aggregation through pooling; (2) automatic balancing through storage in conjunction with a balancing agreement; and (3) determination and resolution of imbalances. Tennessee states that these service changes are the result of discussions between Tennessee and various groups of customers on its system. Tennessee states that the Stipulation serves to complement the service structure recently implemented pursuant to Order No. 636 so as to provide customers with enhanced services while protecting operational integrity. Tennessee states that the filing has been served on all parties listed in the Docket No. RS92–23 service list.

All parties to the proceedings in Docket No. RS92–23, *et al.* are automatically parties to this proceeding. Any other person desiring to be heard or to make any protest with reference to said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.211 and 385.214. All such petitions or protests should be filed on or before June 15, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to this proceeding. Any persons wishing to become a party must file a petition to intervene. Copies of this filing are on file and available for public inspection in the public reference room. Pursuant to Rule 602, initial comments on the proposed Stipulation must be filed on or before June 15, 1994, and reply comments on June 27, 1994.

Lois D. Cashell,

Secretary.

[FR Doc. 94–14240 Filed 6–10–94; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. TM94–4–43–001]

Williston Basin Interstate Pipeline Co.; Annual Take-or-Pay Reconciliation Filing

June 7, 1994.

Take notice that on June 3, 1994, Williston Basin Interstate Pipeline Company (Williston Basin), tendered for filing a revision to its Annual Take-or-Pay Reconciliation Filing, which was filed May 31, 1994, pursuant to the General Terms and Conditions of its FERC Gas Tariff.

Williston Basin has requested that the Commission accept Substitute First Revised Sheet No. 308 of this filing to become effective July 1, 1994.

Williston Basin states that the substitute tariff sheet is being filed to correct the recalculated fixed monthly surcharges in Docket No. RP90–137–000 to be effective during the period July 1, 1994 through June 30, 1995 pursuant to the procedures contained in Section 36 of the General Terms and Conditions of Williston Basin's FERC Gas Tariff, Second Revised Volume No. 1.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington DC 20426, in accordance with Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214). All such protests should be filed on or before June 14, 1994. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of the filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[FRL–4997–5]

Ohio: Final Determination of Adequacy of State Municipal Solid Waste Permit Program

AGENCY: Environmental Protection Agency.

ACTION: Notice of final determination of full program adequacy for Ohio's application.

SUMMARY: Section 4005(c)(1)(B) of the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments (HSWA) of 1984, requires States to develop and implement permit programs to ensure that municipal solid waste landfills (MSWLFs) which may receive hazardous household waste will comply with the revised Federal Criteria (40 CFR part 258). RCRA section 4005(c)(1)(C) requires the United States Environmental Protection Agency (USEPA) to determine whether States have adequate permit programs for MSWLFs, but does not mandate issuance of a rule for such determinations. The USEPA has drafted and is in the process of proposing a State/Tribal Implementation Rule (STIR) that will provide procedures by which the USEPA will approve, or partially approve, State/Tribal MSWLF permit programs. The Agency intends to approve adequate State/Tribal MSWLF permit programs as applications are submitted. Thus, these approvals are not dependent on final promulgation of the STIR. Prior to promulgation of the STIR, adequacy determinations will be made based on the statutory authorities and requirements. In addition, States/Tribes

may use the draft STIR as an aid in interpreting these requirements. The Agency believes that early approvals have an important benefit. Approved State/Tribal MSWLF permit programs provide interaction between the State/Tribe and the owner/operator regarding site-specific permit conditions. Only those owners/operators located in States/Tribes with approved MSWLF permit programs can use the site-specific flexibility provided by the revised Federal Criteria to the extent the State/Tribe MSWLF permit program allows such flexibility. The USEPA notes that regardless of the approval status of a State/Tribe and the permit status of any facility, the revised Federal Criteria apply to all permitted and unpermitted MSWLF facilities.

Ohio applied for a determination of adequacy under section 4005 of RCRA. At the same time, Ohio proposed rule revisions that would facilitate full approval of its solid waste program. The proposed rule revisions added definitions and requirements that were no less stringent than portions of the revised Federal Criteria. The USEPA reviewed Ohio's application and tentatively determined that Ohio's existing MSWLF permit program, along with the incorporation of certain portions of the revised Federal Criteria, would be adequate to assure compliance with the revised Federal Criteria. Ohio successfully incorporated the needed portions of the revised Federal Criteria into its MSWLF permit program and the revised regulations are now fully effective. Review of the finalized Ohio Environmental Protection Agency (OEPA) regulations occurred prior to the USEPA's final determination of program adequacy. After consideration of all comments received during the public comment period, the USEPA is today issuing a final determination that the State's program is adequate.

EFFECTIVE DATE: The determination of adequacy for Ohio shall be effective on June 13, 1994.

FOR FURTHER INFORMATION CONTACT: USEPA Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, Attn: Mr. Andrew Tschampa, mailcode HRP–8J, telephone (312) 886–0976.

SUPPLEMENTARY INFORMATION:

A. Background

On October 9, 1991, the USEPA promulgated revised Federal MSWLF Criteria (40 CFR part 258). Subtitle D of RCRA, as amended by the Hazardous and Solid Waste Amendments of 1984 (HSWA), requires States to develop permitting programs to ensure that MSWLFs comply with the revised Federal Criteria. Subtitle D also requires in section 4005 that the USEPA determine the adequacy of State MSWLF permit programs to ensure that facilities comply with the revised Federal Criteria. To fulfill these requirements, the Agency has drafted and is in the process of proposing the State/Tribal Implementation Rule (STIR). The rule will specify the requirements which State/Tribal programs must satisfy to be determined adequate.

The USEPA intends to approve State/Tribal MSWLF permit programs prior to the promulgation of the STIR. The USEPA interprets the requirements for States or Tribes to develop "adequate" programs for permits or other forms of prior approval to impose several minimum requirements. First, each State/Tribe must have enforceable standards for new and existing MSWLFs that are technically comparable to the revised Federal Criteria. Next, the State/Tribe must have the authority to issue a permit or other notice of prior approval to all new and existing MSWLFs in its jurisdiction. The State/Tribe also must provide for public participation in permit issuance and enforcement as required in section 7004(b) of RCRA. Finally, the USEPA believes that the State/Tribe must show that it has sufficient compliance monitoring and enforcement authority to take specific action against any owner or operator who fails to comply with an approved MSWLF permit program.

The USEPA Regional offices will determine whether a State/Tribe has submitted an adequate program based on the interpretation outlined above. The USEPA plans to provide more specific criteria for this evaluation when it proposes the STIR. The USEPA expects States/Tribes to meet all of these requirements for all elements of a MSWLF permit program before it gives full approval to a MSWLF permit program.

As provided in the revised Federal Criteria, the USEPA's national subtitle D standards took effect on October 9, 1993. On October 1, 1993, the USEPA published a final ruling which modified the effective date of the landfill criteria for certain classifications of landfills (58 FR 51536). For certain small landfills that accept less than 100 tons of waste per day, the Federal landfill criteria were not effective until April 9, 1994, instead of October 9, 1993. The exact classifications of landfills and details on the effective date extensions are contained in the final rule. See 58 FR 51536 (October 1, 1993).

B. State of Ohio

On October 9, 1993, Ohio submitted an application to obtain a MSWLF program adequacy determination. On January 14, 1994, the USEPA published a tentative determination of adequacy for all portions of the Ohio program. Further background information on the tentative determination of adequacy appears in 59 FR 2406 (January 14, 1994).

The current Ohio regulations, contained in the Ohio Administrative Code (OAC–3745–27), are considered equivalent to the revised Federal Criteria. In its application, Ohio demonstrated that the State's revised permit program would adequately meet all elements of the revised Federal Criteria. The USEPA reviewed the finalized OEPA regulations prior to making today's final determination of program adequacy. The revised Ohio regulations were officially adopted on May 2, 1994, by the Director of the Ohio Environmental Protection Agency (OEPA), and the effective date of the requirements which fully incorporate the revised Federal Criteria was June 1, 1994. The USEPA recognizes the complexity of the rulemaking process in Ohio, and feels that an effective date of June 1, 1994, for revised State rules incorporating the Federal Criteria is adequate. The revised OEPA regulations apply to all existing units designated by the landfill owner or operator, as well as all new units.

Along with the tentative determination, the USEPA announced the availability of the application for public comment and the date of a public hearing on the application. A public hearing was held at the offices of the Ohio Environmental Protection Agency in Columbus, Ohio, on March 1, 1994.

C. Comments

The USEPA received public comment concerning the tentative determination of full program adequacy for Ohio's MSWLF permit program. One commenter suggested that the USEPA approve the State's existing groundwater sampling and analysis procedures with regard to the field filtration requirement currently set forth in 40 CFR 258.53. The revised Federal Criteria require unfiltered groundwater samples to be used in laboratory analysis. Currently, Ohio regulations require sampling and analysis procedures which ensure monitoring results that provide an "accurate representation" of groundwater quality. Because this is currently interpreted to require unfiltered samples, the USEPA is approving this provision of the State's

program. However, the USEPA intends to revisit this issue during a proposed rulemaking. If the proposed rulemaking upholds the ban on field filtering, the State has agreed to continue to incorporate the provisions of 40 CFR 258.53(b) into its policy regarding groundwater sampling and analysis procedures.

One commenter expressed concern about the adequacy of OEPA's MSWLF permit program because it lacked provisions against what the commenter referred to as "strategic lawsuits against public participation." The commenter described such lawsuits as preventing an individual or group from communicating their views to the government on public issues. The revised Federal Criteria require a State/Tribe to provide for public participation in permit issuance and enforcement as required in section 7004(b) of RCRA. The Ohio MSWLF permit program provides three opportunities for public involvement during the permitting process. This process is delineated in the Ohio Revised Code(ORC), section 3734.05(a)(2)(d)–(f). The Ohio MSWLF program further provides a verified complaint procedure, delineated in ORC section 3745.08, for members of the public who are or will be aggrieved or adversely affected by a violation of the Ohio solid waste regulations. In addition, members of the public may commence civil action against any person, the State, or a political subdivision alleged to be in violation of the Ohio regulations by utilizing citizens' suit provisions delineated in ORC section 3734.101(A). It is the opinion of the USEPA that the provisions detailed above and further explained in Ohio's application fulfill the requirements of section 7004(b) of RCRA.

The same commenter also expressed concern regarding the adequacy of various other aspects of the Ohio MSWLF program, such as staff and financial resources for effective implementation, organizational structure of the OEPA to support the program, and administrative costs associated with the MSWLF permitting process. In its application for program approval, Ohio described an organizational structure with staffing and financial resources that the State feels will be appropriate to effectively support the permitting and enforcement activities associated with its MSWLF permitting program. The USEPA feels that Ohio demonstrated that it will be able to provide adequate resources to effectively administer and support its MSWLF permit program. Regarding the administrative costs associated with the MSWLF permitting process, this issue lies outside the scope of the revised Federal Criteria.

Another commenter expressed concern regarding the proper implementation of the location restrictions for wetland areas contained in the revised Federal Criteria (40 CFR 258.12) by the Ohio MSWLF permit program. The commenter acknowledged that the Ohio.regulations incorporating the Federal Criteria for wetlands location restrictions were adequate, however, concern was expressed regarding implementation of this provision in actual practice. The commenter specifically referenced a site located in Richland County, Ohio, where a permit is under consideration by the OEPA for a proposed landfill which is adjacent to the Fowler Woods State Nature Preserve. A portion of the proposed site would displace existing wetlands and be located immediately adjacent to sensitive wetland areas of the nature preserve area. He referred to the application of the wetland restrictions, particularly in this situation, as being arbitrary and subject to political influence. Another commenter noted that the application of the wetland restrictions in this case is inconsistent with the intent of the revised Federal Criteria.

The USEPA agrees with the commenter's opinion that the Ohio regulations, as written, incorporate the wetland restrictions adequately to ensure compliance with the wetlands restrictions contained in the revised Federal Criteria (40 CFR 258.12). In addition, the USEPA shares the concern of the commenter that all portions of the revised Federal Criteria are implemented appropriately and uniformly in actual practice. Since Ohio has properly adopted into regulation the location restrictions for wetland areas contained in the revised Federal Criteria, the USEPA has no reason to not approve this portion of the Ohio MSWLF permit program. However, Ohio has been formally advised of the concerns of the commenter as well as USEPA regarding the proper implementation of the location restrictions for wetlands.

Finally, one commenter expressed concern with the practice of allowing the applicant for a MSWLF permit to demonstrate compliance with the regulations using its own contractors or consultants. The commenter noted the absence of independent or State controlled field analysis of reports and data to confirm the accuracy of the information. The commenter also suggested that the State should choose a consultant or contractor to perform the required demonstrations of compliance with the regulations for individual MSWLF permit applications.

The USEPA shares the concern of the commenter that all information and data submitted to the State which serve to support MSWLF permitting decisions be performed properly and accurately. The USEPA is aware of the State's practice of extensively reviewing all submitted information and data to ensure compliance with all applicable regulations. It is the opinion of the USEPA that the procedures outlined in the Ohio application for adequacy determination will support the effective implementation of the revised Federal Criteria. The issue of requiring independent or State chosen contractors and consultants to provide data and information to support permitting decisions lies beyond the scope of the revised Federal Criteria.

D. Decision

After reviewing the public comment, I conclude that Ohio's application for adequacy determination meets all of the statutory and regulatory requirements established by RCRA. Accordingly, Ohio is granted a determination of adequacy for all portions of its MSWLF permit program.

Section 4005(a) of RCRA provides that citizens may use the citizen suit provisions of section 7002 of RCRA to enforce the revised Federal Criteria independent of any State/Tribal enforcement program. As the USEPA explained in the preamble to the final revised Federal Criteria, the USEPA expects that any owner or operator complying with the provisions in a State/Tribal program approved by the USEPA should be considered to be in compliance with the Federal Criteria See 56 FR 50978, 50995 (October 9, 1991).

Today's action takes effect on the date of publication. The USEPA believes it has good cause under section 553(d) of the Administrative Procedures Act, 5 U.S.C. 553(d), to put this action into effect less than 30 days after publication in the **Federal Register**. All of the requirements and obligations in the State's program are already in effect as a matter of State law. The USEPA's action today does not impose any new requirements with which the regulated community must begin to comply. Nor do these requirements become enforceable by the USEPA as Federal law. Consequently, the USEPA finds that it does not need to give notice prior to making its approval effective.

Compliance With Executive Order 12866

The Office of Management and Budget has exempted this notice from the requirements of section 6 of Executive Order 12866.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this tentative approval will not have a significant impact on a substantial number of small entities. It does not impose any new burdens on small entities. This proposed notice, therefore, does not require a regulatory flexibility analysis.

Authority: This notice is issued under the authority of sections 2002, 4005, and 4010(c) of the Solid Waste Disposal Act, as amended; 42 U.S.C. 6912, 6945, 6949a(c).

Dated: June 3, 1994

David A. Ullrich,

Acting Regional Administrator.

BILLING CODE 6560–50–F

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirements Submitted to Office of Management and Budget for Review

June 6, 1994.

The Federal Communications Commission has submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of these submissions may be purchased from the Commission's copy contractor, International Transcription Service, Inc., 2100 M Street, NW., suite 140, Washington, DC 20037, (202) 857–3800. For further information on these submissions contact Judy Boley, Federal Communications Commission, (202) 632–0276. Persons wishing to comment on these information collections should contact Timothy Fain, Office of Management and Budget, room 3221 NEOB, Washington, DC 20503, (202) 395–3561.

Note: The Commission has requested expedited review of these items by June 29, 1994, under the provisions of 5 CFR 1320.18.

OMB Number: 3060–0563.

Title: Section 76.915, Change in status of cable operator.

Action: Extension of currently approved collection.

Respondents: State or local governments, and businesses or other for-profit (including small businesses).

Frequency of Response: On occasion reporting requirement.

Estimated Annual Burden: 465 responses; 2.39 hours average burden per response; 1,111 hours total annual burden.

Needs and Uses: Section 76.915 is used to determine whether or not a cable television system is subject to effective competition and therefore, not subject to rate regulation under the 1992 Cable Act. If the collection of information was not conducted under §§ 76.915(b) and (d), the potential for franchise authority error in determining the presence of effective competition would be unchecked and could lead to deregulation of cable rates for systems not subject to effective competition in contravention of the 1992 Cable Act. Franchising authority decisions on petitions for change in status must be made within 30 days after the pleading cycle set for in § 76.915(a) closes. Franchising authorities must notify the Commission within ten (10) days of any decision changing status. Unless the Commission receives an opposition to such changes in status, the decision will become final 30 days after adoption by the franchising authority.

OMB Number: 3060–0564.

Title: Section 76.924, Cost accounting and cost allocation requirements.

Action: Revision of a currently approved collection.

Respondents: Businesses or other for-profit (including small businesses).

Frequency of Response: Recordkeeping requirement.

Estimated Annual Burden: 30,070 recordkeepers; 80 hours average burden per recordkeeper; 2,405,600 hours total annual burden.

Needs and Uses: The requirements of this section are applicable to cable operators for which the basic service tier is regulated by local franchising authorities or the Commission, or, with respect to a cable programming services tier, for which a complaint has been filed with the Commission. The requirements of this section are applicable for purposes of rate adjustments on account of external costs and for cost-of-service showings. Cable operators shall maintain their accounts in accordance with generally accepted accounting principles, except as otherwise directed by the Commission. Cable operators shall maintain accounts in a manner that will enable identification of appropriate costs and application of the Commission's cost assignment and allocation procedures, to cost categories necessary for rate adjustments due to changes in external costs and for cost-of-service showings. Such categories shall be sufficiently detailed and supported to permit verification and audit against the company's accounting records. The Commission determined that it will include a Second Further Notice of Proposed Rulemaking issues pertaining to what cost accounting and cost allocation requirements it should adopt on a permanent basis.

OMB Number: 3060–0565.

Title: Section 76.944, Commission review of franchising authority decisions on rates for the basic service tier and associated equipment.

Action: Extension of a currently approved collection.

Respondents: State or local governments, business or other for-profit (including small businesses).

Frequency of Response: On occasion reporting requirement.

Estimated Annual Burden: 2,000 responses; 40 hours average burden per response; 80,000 hours total annual burden.

Needs and Uses: Section 76.944 ensures that any participant at the franchising authority level in a ratemaking proceeding may file an appeal of the franchising authority's decision with the Commission within 30 days of release of the text of the franchising authority's decision. Oppositions may be filed within 15 days after the appeal is filed, and must be served on the party(ies) appealing the rate decision. Replies may be filed 7 days after the last day for oppositions and shall be served on the party(ies) to the proceeding. Commission review of appeals is necessary to ensure uniformity of interpretation of these federal guidelines. Otherwise, rulings by state or local courts in different parts of the country could produce varying and conflicting determinations about Section 623 and the Commission's Rules which could frustrate the purpose of having federal guidelines.

OMB Number: 3060–0569.

Title: Section 76.975, Commercial leased access dispute resolution.

Action: Extension of a currently approved collection.

Respondents: Individuals or households, businesses or other for-profit (including small businesses).

Frequency of Responses: On occasion reporting requirement.

Estimated Annual Burden: 500 responses; 8 hours average burden per response; 4,000 hours total annual burden.

Needs and Uses: Section 76.975 provides that (1) any person aggrieved by the failure or refusal of a cable operator to make commercial channel

capacity available or to charge rates for such capacity may file a petition for relief with the Commission; (2) this petition must state concisely the facts constituting a violation of the FCC's leased access rules and the specific rule or regulation violated, and certify that the petition for relief was served on the cable operator; and (3) any petition for relief must be filed within 60 days of the alleged violation. A cable operator would then have 30 days from the date of filing the petition in which to respond. These requirements are designed to assure that the leased access option brings about the intended diversity of programming and competition in programming delivery. The information will be reviewed by FCC staff to resolved access disputes. These expedited leased access procedures may obviate the need for oral rulings or other emergency processing of leased access disputes.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

BILLING CODE 6712-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Mutual-to-Stock Conversions of State Nonmember Savings Banks

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice; request for comments.

SUMMARY: As previously indicated in Congressional testimony and in public statements, the FDIC has been at work on a fundamental review of the process by which mutual thrifts convert to stock form. This request for comments reflects that study. The intended effect of this notice is to obtain comments on the suggested approach to resolving fundamental concerns about the current mutual-to-stock conversion process.

DATES: Written comments must be received by the FDIC on or before August 12, 1994.

ADDRESSES: Written comments shall be addressed to the Office of the Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429. Comments may be hand-delivered to room F–400, 1776 F Street, NW., Washington, DC, on business days between 8:30 a.m. and 5 p.m. (FAX number: (202) 898–3838). Comments will be available for inspection in room 7118, 550 17th Street, NW., Washington, DC between 9 a.m. and 4:30 p.m. on business days.

FOR FURTHER INFORMATION CONTACT: Robert H. Hartheimer, Acting Director, Division of Resolutions (202/898–8789), John G. Finneran, Jr., Acting Deputy General Counsel, Legal Division (202/898–3766), Robert F. Miailovich, Associate Director, Division of Supervision (202/898–6918), Robert W. Walsh, Manager, Planning and Program Development Section, Division of Supervision (202/898–6911), Joseph A. DiNuzzo, Counsel, Legal Division (202/898–7349), Federal Deposit Insurance Corporation, Washington, DC 20429.

SUPPLEMENTARY INFORMATION:

Historical Background

Mutual savings institutions were founded to fill gaps in the market—and for a social purpose. Commercial banks have not always welcomed retail customers as either depositors or borrowers. Mutual savings banks were in many respects charitable organizations designed to encourage and facilitate thrift on the part of urban wage-earners. Their trustees were self-perpetuating groups of leading citizens, some of whom may have contributed the capital to establish the bank in the first place, who took no fees and did no business with the bank. Savings and loan associations were essentially cooperatives. One became a "member" in order to save—in order eventually to borrow the money to build a home. There were limitations on the ability to withdraw one's funds. The right to be the next borrower, when enough funds had accumulated, was often decided by lot. Trustees were elected by the members—and in the early days members were required to attend meetings and take their turn as officers. The notion of "self-help" motivated both sorts of formations. At one time, people spoke of the spread of these institutions as a "movement."

As a legacy of that tradition, today there are approximately 1,100 mutuals in the United States. (Ten years ago there were about 2,500, five years ago 1,775.) From time to time, one or another of them desires to convert to stock form. It may be that they need more capital—in some cases on an urgent basis. It may be that they see expansion opportunities and need a currency (stock) with which to acquire. For many small institutions, it makes sense to join a larger organization, and they often need to convert to be able to do so. Based on our own research and analysis, as well as published cases, there is also little question that some institutions have converted primarily to enrich those who controlled them.

The existing form of transaction by which both federal and state mutuals convert was developed by the Federal Home Loan Bank Board ("FHLBB") in 1974. What happens, essentially, is that the mutual sells itself, for cash, to whoever buys its newly issued stock. Various categories of potential purchasers get priority. In general, depositors stand at the head of the line. To the extent depositors and others with priority rights do not subscribe for stock, an attempt is made to sell it locally. If stock is still left over, it is sold to investors with no particular connection to the converting institution.

The FHLBB was conscious, when it first wrote rules for conversions, that there might be value to the right to subscribe for stock in a conversion. For example, if a mutual with $100 million of net worth raised only $20 million of new capital in converting, whoever got to buy the stock would have a claim on $120 million of net worth. In such a situation, the stock would almost certainly be worth much more than the buyers had paid for it. For about a year, in the early '70s, the FHLBB took the view that rights to buy stock in a converting institution should be distributed to its depositors, who could either exercise and become owners or sell the rights for their intrinsic value.

The FHLBB subsequently abandoned this approach, however, primarily out of concern that depositors would shift funds from association to association, hoping to capture the intrinsic value of the rights when the conversion occurred—and on a scale that could be destabilizing. At the same time, it adopted the current approach, which included an "appraisal" requirement, providing that a converting institution issue and sell its capital stock at a total price equal to the estimated *pro forma* value of such stock in the converted institution.

Because of moratoria imposed in 1973 and 1974, the existing form of transaction was not tested in great numbers until the '80s. At that point, it worked quite well, because many converting institutions had little net worth or economic value, and the market was extremely wary even of those that did. Depositors and other investors who subscribed for stock got securities with a market value approximately equal to what they paid for them.

Problems With the Existing Process

In the last two-plus years, as non-viable institutions have been closed and the industry has returned to health, the existing form of transaction has delivered windfalls to those who

subscribed. In the more than 100 standard conversions in 1992 and 1993, the trading price at the end of the first day has exceeded the subscription price by, on average, 26%. In 40 instances, this price increase (the "pop") has exceeded 30%; in 6 instances it exceeded 50%.

As it has become obvious to everyone familiar with the process that buying stock in a conversion is an easy way to make money, a class of "professional depositors" has emerged—wealthy individuals and investment partnerships with $50 to $500 accounts at literally hundreds of mutuals across the country. Investment banking firms active in the conversion arena advise us that there are perhaps 500 to 1,000 such professional depositors, and that they can take the account list of almost any mutual in the nation and recognize hundreds of names at sight. These professional depositors buy the maximum amount of stock allowed—and consequently the overwhelming majority of the stock issued in almost every conversion. Market participants have told us that in a typical conversion, less than 5% of depositors participate at all—and that the majority of them are professionals or insiders.

Giving depositors the *opportunity* to subscribe for stock has not resulted in broad distribution of stock among them. The vast majority of depositors in mutual savings institutions keep their savings there precisely because they are risk-averse. They are likely to read and ignore or discard the offering circular. The money they keep in a savings institution has been put aside for retirement, or for emergencies, or for the down payment on first house, and cannot be invested in an initial public offering. They do not participate. The existing conversion process does not benefit them at all.

As it has become obvious to everyone who understands the process that the stock of converting institutions often trades up sharply on the first day of issue, those who control mutual institutions have become more and more interested in converting. Managers and even non-executive trustees have been awarded free stock and options (at the subscription price). Employee Stock Ownership Plans ("ESOPs") have been created and given priority in buying stock. These and other devices have resulted in substantial transfers of value.

As it has become clear that most conversions would be oversubscribed, the "allocation" process has clearly been subject to abuse. For example, we have been told that in transactions where allocations were likely to be based on size of deposit because of expected oversubscription, insiders and others in a position to know the relevant record date have been able to transfer large amounts of money into their accounts on that single day. Where the right to subscribe has been limited to long-term depositors, or depositors with local addresses, we are told that professionals are sometimes able to persuade other depositors to "front" for them (despite rules to the contrary).

Problems With Appraisals

As market valuation of thrifts has risen (and as conversions have come to be oversubscribed, with stocks generally trading up), the integrity of the appraisal process has been compromised. The FDIC's experience with appraisals is that they typically follow a certain pattern. A "peer group" of stock savings institutions is identified. (How they were selected out of the much larger universe of potential "peers" typically is not well explained.) The peer group market/book ratio is calculated. It is then stated that the converting institution should be valued (on a pro forma basis) at a discount from that ratio. Two reasons for this are typically given. The first is that the converting mutual is actually inferior to the peer group—which raises the question, why were they chosen as peers in the first place. The second, discussed below, is the need for a "new issue discount." (Price/earnings ratios are also calculated, but there is rarely a cogent analysis of the converting institution's earnings potential once it appropriately deploys its new capital.)

At March 31, 1994, the thrift industry average market/book ratio was 99% and the median was 95%. (At year-end 1993, those figures were five percentage points higher, a year before that 15 percentage points lower.) The market tends to value recently converted institutions below the industry average—primarily, in our judgment, because the return on a newly converted institution's book, or capital, will be low by industry standards until it is able to leverage the new capital it raises in the conversion. During 1992 and 1993 as a whole, the average market/book ratio of a newly converted institution, at the end of the first day of trading, was 72%. To meet the "appraisal" requirement that an institution's stock trade at what it was sold for in a situation where a 72% market/book ratio was a reasonable expectation, a mutual would have to more than triple its capital base. To be precise, a mutual with a $100 million net worth would need to raise $257 million (ignoring expenses and the effects of establishing an ESOP or a management retention plan), since 72% of $357 million (the resulting book value) equals $257. It is extremely hard for a company in a highly competitive industry prudently to employ that much new capital.

What appraisal firms did, in 1992 and 1993, was to "appraise" converted institutions on average at 57% of book. They did this despite the fact that, on average, these institutions traded up the first day by 26%.

Appraisers' principal rationalization for this discrepancy has been that, in the context of an initial public offering, a "new issue discount" is required. While it is certainly true that it is difficult to bring a company public without pricing the shares at a level that stimulates unfilled demand—resulting in a "pop"—we question the magnitude required in an environment where virtually all conversions are trading up. In some circumstances, the need for a "new issue discount" has been asserted in appraisal updates issued *after* the end of the subscription period, and in the face of 100–300% oversubscriptions. We would also observe that the literal language of the OTS regulations and guidelines on conversion appraisals does not allow for a market discount. The question to be answered is: how much stock has to be sold to eliminate any "pop"?

We suspect that the practices we describe developed over time as appraisers, and mutuals and their advisers, attempted to deal in good faith with the inherent contradictions of, on the one hand, a form of transaction perfectly suited to institutions on the brink of failure, or which the market feared, and, on the other, a thrift industry that has returned to health.

As a footnote to the conversions of the 80's, it is worth observing that many institutions which emerged with very high capital ratios were so anxious to earn a good return for their new, demanding stockholders, that they grew their balance sheets more quickly than they should have and took risks they did not fully understand. A total of 77 New England savings banks converted in the years 1984 through 1989; these transactions increased their weighted average capital ratio to 15.2% from 6.6%; 16 of them (or 21%) subsequently failed.[1] In addition, the rush by converted institutions to increase assets quickly tended to reduce credit standards throughout the market, imperiling other institutions.

[1] "Understanding the Experience of Converted New England Savings Banks," Eccles and O'Keefe, FDIC (1994)

Changing the Process

What this history demonstrates is the need for fundamental change:

- The "appraisal" process puts the government in the awkward position of substituting its judgement for that of the market...
- . . . and forces most converting institutions to raise far more capital than they can prudently deploy...
- . . . but still fails to eliminate windfalls.
- This has put well-intended individuals involved in more than a few conversions in the ethically uncomfortable position of pretending the appraisal requirement is met when they know it isn't.
- The required form of transaction transfers the existing value of the mutual to a small group of individuals with the cash, sophistication and risk appetite to buy the stock.
- Because value is being "given away," the process invites insider abuse. And because the value has to go somewhere, the ingenuity of market participants eventually frustrates attempts to eliminate the problem.

We share with others a desire to address problems arising under the existing rules. We do not in any way want to prevent valid conversions from taking place—nor encourage conversions that fail to meet a valid business need. We also desire that our handling of conversions be generally consistent with that of the OTS.

For these reasons we are publishing elsewhere in this issue of the **Federal Register** a proposed rule which: (a) reaffirms our intention to review conversion applications submitted by state-chartered nonmember insured savings banks (and applications for insurance from newly established associations to be owned by mutual holding companies), and (b) explicitly establishes certain criteria which are comparable to those of the OTS.

At the same time, we feel it is only fair to put the public on notice that we believe it may be difficult for a healthy mutual to develop a sound business plan while raising enough new capital to receive a valid appraisal.

The noted investment manager, Peter Lynch, describes this problem, and the existing form of conversion generally, in graphic terms. Buying stock in a converting mutual, he writes, is like going to an automobile dealer to buy a car, giving him a check for the purchase price, and discovering on the way home that the dealer has put your check in the glove compartment of the car. Unless the car is an extraordinary lemon, this is bound to be a good deal. And increasing the size of the check—which is what "disciplining the appraisal process" amounts to—won't make it stop being a good deal.

It is possible that the recent OTS amendments (and the requirements in the FDIC proposed rule mentioned above) which aim to give long-term, local depositors more rights—but within the framework of the existing form of transaction—may produce similarly frustrating results. As noted earlier, "real" depositors are not going to benefit, no matter what priorities they receive, because "real" depositors still may not subscribe in significant numbers.

We believe that "insider abuse," which is the focus of much recent discussion and of several of the OTS amendments and the requirements of the FDIC proposed rule, is only a piece of the problem. In one recent conversion, for example, state authorities forced the institution to rescind stock grants which would have benefited insiders by approximately $40 million.

This was laudable. But the "pop" in the price of the converted institution's shares benefited those who subscribed by more than $200 million on the first day of trading and by $275 million after one month's trading. All who had their subscriptions filled were depositors—but only 5% of all depositors subscribed. We question whether it can be an adequate response to the trustees' fiduciary duty to deliver that much value to the tiny fraction of a mutual institution's depositors with the capacity to line up and collect it.

We continue to believe—as stated in testimony before the Congressional Banking Committees—that the conversion process is fundamentally flawed. Thus, in addition to the proposed rule published elsewhere in this issue of the **Federal Register** (which is intended to address concerns within the existing mutual-to-stock conversion framework) we also are issuing this request for comments seeking views on an approach which might address the basic flaws in the existing scheme.

The (Misguided) Question of "Ownership"

The most vexing question facing everyone who has ever dealt with mutual-to-stock conversions is: "Who owns mutuals?" That may be the wrong way to ask the question. As indicated earlier, mutuals were originally closer to charities or community organizations than to commercial enterprises. As a by-product of doing what they were founded to do, they have accumulated net worth. The trustees hold that value in trust. The right question more likely should be: "If the trustees decide to convert, to whom should that value be delivered?"

We believe there are two ways to answer the question: leaving it to the trustees in the reasonable exercise of their fiduciary duty, or legislation.

Leaving the decision to the trustees is logical, but may be impractical. The best argument in favor of this approach is that the history and circumstances of institutions vary, that boards are designed to balance competing interests and considerations, that existing law should be adequate to prevent abuse, and that the government should not interfere unless it has to. As different boards of trustees wrestle with the issues, a consensus should *tend* to emerge.

The argument against leaving the decision to the trustees is twofold. Taking the positive view of such boards, it places an unfair burden on them and their institutions. They will be lobbied by potential claimants. Someone will object to whatever decision they make. Taking the skeptical view—and there is no question that *some* boards have interpreted their fiduciary responsibilities rather loosely—leaving the decision to the trustees is unwise. The FDIC will in the end have to expend significant resources providing informal guidance to the conscientious and making sure that trustees' determinations *are* reasonable.

Some could well believe that the preferable way to answer the question of "to whom the value should be delivered" would be legislation. In fact, the main purpose of this notice and request for comments is to solicit views from the public on a legislative proposal that the FDIC could prepare and present to the appropriate legislative body(ies). Legislation could take the form of state law, through which each state would decide the question for the mutual banks it charters (or has chartered), or federal legislation, through which the Congress decides the issue on a nationwide basis. Uniformity argues for federal legislation, but questions of federal preemption of state law would have to be considered.

If federal legislation is decided upon, the Congress could either establish in the statute explicit value-distribution rights or authorize the appropriate federal agency (presumably, the FDIC for state savings banks and the OTS for federal and state savings associations) to determine to whom the value of the mutual institution should be delivered.

Who Should Get the Value?

We are aware of at least seven groups (in no particular order) which might lay a claim to a mutual's value:

(1) Depositors.

(2) Other creditors, including holders of subordinated debt.

(3) Borrowers.

(4) Employees—whether through the medium of an ESOP, which acquires shares in the conversion, or other arrangements designed for senior management.

(5) Trustees.

(6) The Bank Insurance Fund or the Savings Association Insurance Fund, the U.S. Treasury or the relevant state government.

(7) Charitable organizations or trusts serving the community and purposes for which the converting institution was originally founded.

The question of who receives the value is primarily a political one. Accordingly, we do not believe the FDIC should be the one to decide among these (or other) claimants. We have a supervisory interest in seeing the question answered, however, and answered in a way that is generally seen to be sensible and fair.[2] To that end, the following comments are intended to focus public discussion of the question.

Taking each of the seven parties in turn, we believe that at least some of the value will have to go to depositors. Although the law of many states implies that they are not "owners" of mutual institutions in the classic sense of the term, and, at least since the creation of the FDIC, they have not borne significant risk, they have supplied the institution with its resources and in many cases have a vote on conversion. Although we have scant sympathy for those professional depositors who have opened small accounts in the expectation of large windfalls and whose hopes would be disappointed by the reforms we propose, it is perhaps the case that some depositors of all types have known that conversion was a possibility, and in a sense may have "bargained for" at least some share of the value of the institution. The fact that existing OTS regulations and most states' laws give savings and loan association depositors preference in subscribing for stock may not create an *entitlement*, but it has probably created an *expectation*—which will probably have to be satisfied to some degree.

Among depositors, there are questions of allocation: by size, by tenure, by address. What is theoretically desirable is often beyond the scope of the converting institution's data processing systems. Attempts to favor "local" depositors can be frustrated in various ways. There is also the question of record date—and the problem of long-term depositors who unwittingly close their accounts shortly before the record date. Our current inclination would be to make the record date fairly recent (as a convenience) and to award one share of the aggregate value going to depositors for each year that each account has been open. We expect that allocating shares to accounts closed prior to the record date, while theoretically equitable, would prove impractical.

In contrast to depositors, creditors are uninsured and do take risk—especially since the adoption of federal depositor preference. On the other hand, most creditors have that status as an incident of some other relationship—*e.g.*, as a supplier of goods and services—and would be surprised (if delighted) to discover that it gave them any claim on the value of the institution, We would therefore expect a consensus to emerge favoring their exclusion.

The argument for giving debtholders part of the value is stronger. They have the position they do because of a conscious financial transaction. In most cases, such debt is subordinated and does represent capital. Debtholders, while subordinating themselves to depositors for a higher rate of return, did not "bargain for" any share of the mutual's net worth—but neither did most depositors. Were it to be established that subordinated debtholders were entitled to a share of the value, it might make it slightly easier for small mutuals to raise debt capital, which has appeal from a safety and soundness standpoint. As an equitable approach and from our perspective as insurer, we would favor giving debtholders some of the value of a converting institution, and we would not expect such a decision to strike people as unreasonable or unfair.

If such a decision is made, we believe the most feasible method of allocation is by size of holding, with debtholders as a whole receiving a share of the value going to debtholders and depositors combined that is proportionate to debt's share of the institution's combined liability to depositors and debtholders. The length of time the debt has been outstanding, or in any particular holder's hands in the case of tradable debt, should not, in our judgement, have bearing.

Federal Home Loan Bank advances are an important part of the liability structure of many banks. The question arises: if other debtholders should receive some of the value of a converting institution, why not the relevant Federal Home Loan Bank? We believe there is a good reason for excluding them: the fact that advances are fully secured, making the Banks effectively senior to depositors.

Although borrowers are technically "members" of some mutual savings institutions, we believe most borrowers think of the institution as having a claim on them, rather than the reverse. During that period when they are borrowers, they are in fact already receiving a benefit. Borrowers are typically required to open deposit accounts as well. Finally, borrowers' loans can be, and often are, sold to third parties; distinguishing their rights from those of borrowers whose loans have not been sold would present formidable legal and logistical challenges. For all these reasons, we do not believe the consensus would be to give them a claim, as borrowers, on the value being transferred.

We would point out, however, that at least some knowledgeable observers view the rights of depositors to a share of the converting institution's value as not really that much stronger than those of borrowers. The vast majority of both groups do business with mutuals on an arms-length basis, at market terms, at no significant risk, and with no expectation of a windfall. In the view of some observers, it is only the absence of any other "owners," the fact that depositors turn up on the side of the balance sheet where stockholders would be if there were any, and the practice of treating depositors as stand-ins for owners that give depositors the presumption of a right to receive value.

Rewarding Employees and Managers

It is sometimes said that managers—and to a lesser degree employees—of mutual institutions enjoy more job security and a less demanding work environment that their counterparts at organizations subject to stockholder discipline, but are in turn less well compensated. Conversion changes their situation. Some argue that these considerations—and years of loyal service—entitle managers to a share of the value. The opposing view is that managers of mutuals chose to work there and "bargained for" whatever pay they got.

We understand both sets of arguments. The no-entitlement view, if

[2] Pending a legislative determination of this question, we also have a supervisory interest in ensuring that the boards of mutual institutions fulfill their fiduciary duties in preserving the value of the institution. Accordingly, the FDIC will continue to review proposed conversion transactions of state mutual savings banks and take appropriate action where the transaction raises fiduciary concerns.

we can call it that, has logical purity. The view that managers deserve part of the value has emotional appeal, especially when they have spent decades at the converting institution. The issue of appropriate treatment of long-serving employees is a good example of the essentially political nature of the value-distribution question.

Were we required to decide this issue without legislative guidance, we would prefer to see all benefits to employees of insured institutions be delivered as *compensation*. We would certainly endorse the creation of an ESOP immediately after conversion. If the conversion process has entailed extra effort on the part of some (or all) employees, they may be entitled to bonuses. And if conversion entails a radical reduction in job security, it may be appropriate to adopt a severance policy consistent with standard industry practice for stock institutions.

Focussing on the top few executives and non-executive trustees, it is certainly the case that their jobs become harder and less secure following conversion. They may be entitled to significant raises. It may be appropriate for a few senior executives to receive employment contracts. Again, all such steps should be evaluated within the context of "compensation." We believe that for individuals who control the conversion transaction to lay any claim, in their capacity as managers and trustees, to a portion of the value being transferred creates a conflict of interest.

It is currently common practice for converting institutions to create stock option plans. We believe it is appropriate for stock institutions to have incentive compensation plans of this type. As indicated in the FDIC proposed rule mentioned above, we agree with the OTS that such plans should, at the earliest, be adopted at the first stockholders' meeting following conversion and that the exercise price for any such options should be set at that time, rather than being based on the conversion price. The latter practice, which had been common, gave those who controlled the transaction an incentive to underprice the shares, and masked transfers of value to those executives receiving options, which, if properly measured, and viewed as compensation, would have been deemed excessive.

A "Government" Share?

Several individuals and organizations have suggested that a share of the existing value of converting mutuals should go to one of the deposit insurance funds, or to the U.S. Treasury, or to the government of the state which chartered the institution. We are uncomfortable with the first suggestion. Converting institutions have been paying premiums, just as stock institutions have. No one would lay claim to a portion of the latter's net worth. The FDIC should not do so with regard to mutuals.

Some have advanced the argument—based on the cost of the savings and loan crisis—that taxpayers generally, through the medium of the Treasury, should get a portion of the value that conversion releases. As a fairness matter, we believe this argument is flawed: Institutions now converting have *not* failed, and have *not* cost taxpayers anything. Most state savings banks, whose conversions fall under our jurisdiction, are insured by the Bank Insurance Fund, which taxpayers have not had to support.

Another argument for conveying the value of converting mutuals to the government—whether state or federal—is that "no one owns them," and that the fairest course is therefore to avoid giving the value to anyone in particular. We will have more to say on this topic later in this Notice, but would observe that if the form of transaction suggested below is adopted, many of those who receive the value of the institution will get cash, and will pay taxes on it as income, giving government its "share."

Fulfilling Mutuals' Original Purpose?

As indicated earlier, mutuals were created for reasons that have now largely disappeared. Ordinary citizens have plenty of places to put their savings. A host of private- and public-sector entities facilitate home-ownership. The trustees of a mutual savings institution having regard for their fiduciary duties might liken their situation to that of the board of the March of Dimes, which had to redefine its mission after polio ceased to be a major threat. From that perspective, it may be appropriate for a portion of the value of a converting mutual to be transferred to one of more community organizations or charities.

This approach raises the question, "*Which* organizations?"—which could be extremely hard to answer. As with the matter of dividing up the value in the first place, leaving the decision to the trustees places a burden on them. Nevertheless, under this approach, the trustees are the ones to decide. If no appropriate vehicles existed, a trust might be established to receive the transferred value and make grants over time. The responsibility for allocating funds is borne by thousands of trustees of colleges and hospitals and foundations and charities all over the country; there are plenty of examples to follow—and laws to prevent abuse.

An alternative to endowing a new or existing charitable organization is for the converted institution to accept special obligations to serve the convenience and needs of the community for banking services. This is a very broad subject, which we are not prepared to explore exhaustively here. We would make three basic points, however. First, while all banks clearly have public obligations, it seems likely that imposing different burdens on institutions which are otherwise direct competitors will ultimately create safety and soundness concerns. For that reason alone we would oppose this approach.

Second, the value transfer inherent in an institution's voluntary acceptance of a special obligation to the community—*e.g.*, a promise to make affordable housing loans, or to open branches in distressed neighborhoods—is difficult to measure against immediately cashable value delivered to depositors or others. We think it would be difficult for trustees to know what they'd actually done.

Third, the history of mutual savings banks does suggest that organizations to which any portion of the value of a converting institution might be transferred should be locally focussed, and should have the encouragement of self-help as a major objective. To give only two of many possible examples, helping to capitalize a community development bank, or establishing a day care facility which permitted single mothers to work, would have satisfying historic resonance.

No Entitlement; No Forced Conversion

The idea that some of the value of a converting institution should be delivered to the "community" it was chartered to serve is as strongly opposed by some as it is supported by others. This is another excellent example of the political (rather than regulatory) character of the issue.

At least two arguments against a "community" share have been advanced. The first is that the "wrong" charities and community organizations would be chosen—wrong from the speaker's point of view, that is—because of their skill and persistence in lobbying the board. The second is that such organizations, seeing latent wealth available, would put pressure on boards to convert.

This second argument is also advanced, as it was in the early '70s, against giving *depositors* transferrable rights: if value is "available," they will put pressure on institutions to convert.

Being *exempt* from constituent "pressure" is unhealthy for any organization. Legislators have to face the voters. Independent agencies are subject to oversight. Stock organizations can be taken over. We do not believe that the trustees of mutuals should be allowed to ignore completely the views of those the institution exists to serve.

Nevertheless, we would emphasize that however one decides the value-distribution issue, that does *not* answer the (misguided) question, "Who owns a mutual?" It does not, in our view, give anyone standing to demand that an institution convert—any more than a group of private citizens could demand that the Red Cross "convert"! Conversion is a decision for the trustees, and until they make such a decision, the FDIC will not get involved—except where inadequate capital makes it desirable from a safety and soundness standpoint. Mutuality has a distinguished history in America. In the aggregate, mutuals have cost the FDIC proportionately less than have stock institutions. We would not endorse a system that compelled mutual institutions to change their character.

New Form of Transaction

Having adopted *an* answer to the question, "Who gets the existing value?", the problem of delivering that value is easier to address. We would suggest the following approach:

- The trustees decide how much capital they need to raise as a business matter. (There is no "appraisal" process.)
- The trustees hire underwriters to conduct an initial public offering—and an escrow agent for the purposes described below.
- Rights to subscribe for the stock of the converted institution are distributed to "rightholders" in accordance with the principles outlined above.
- Each of these rights will have value. For example, if a mutual with $100 million of net worth elected to raise $20 million, and distributed 4 million rights to buy 4 million shares (at $5 each), and the market valued the converted institution at 80% of resulting book (or $96 million), the shares would trade at $24 each, and the right to buy a share for $5 would be worth $19.
- The rights would be "transferrable" only in the sense that, at the end of the subscription period, the escrow agent would exercise on behalf of any rightholder who had not done so, turn the stock over to the underwriter for sale, give $5/share of the proceeds to the company and send the difference to the rightholder.

It is likely, under this form of transaction, that very few rightholders would chose to exercise, and that the underwriters would essentially be selling the whole institution. This gives rise to several questions. For example, wouldn't the transaction costs be awfully high, relative to the amount of new capital being raised? The answer has to be yes—but the cost should be measured relative to the major strategic accomplishment of conversion itself; presumably there was a reason to convert, or the trustees wouldn't have undertaken it. It is also worth observing that the need (opportunity) to sell nearly 100% of the stock will lead many more underwriting firms to compete for the business.

Another question is why not just distribute stock certificates instead of rights? The basic answer is that the selling effort of a public offering is what gets the market to focus on the fair value of the shares, and gets a group of underwriters committed to make a market in them afterwards. A direct distribution of shares could saddle the bank with an uneconomically large number of shareholders. It would leave unsophisticated holders of small numbers of shares in danger of being persuaded to sell at prices below intrinsic value. Finally, to the extent that rights were distributed to a community-oriented charity, a stock sale should probably be required to avoid leaving a controlling block of stock in the hands of a foundation or organization which might be governed by the directors of the converted mutual.

One argument advanced against this form of transaction is that the existing process has raised enormous amounts of money to recapitalize ailing thrifts, and that while the industry is healthy now, we may need to be able to do that again some day. True—but the approach here proposed would be able to do that as well. If a thrift with a low equity ratio wanted to convert, it could distribute rights and hire an escrow agent and an underwriter, just the same. The shares could be priced wherever they had to, to be sold. The rights just wouldn't have much value—but that would appropriately reflect the institution's perilous condition.

Another argument advanced is that the recent market is a highly unusual one, that the embarrassing increases in share price on the day of conversion have already begun to shrink and could soon disappear. They may or may not—and "pops" *per se*, though on a more modest scale, are effectively a requirement of the initial public offering market—but the transactions the existing conversion process requires would still be inefficient to the point of being improper. Under current rules, a well capitalized thrift is only able to avoid a "pop" by increasing its equity ratio to the point where its market/book ratio falls below industry norms—which says that a lot of the new capital will either be underutilized for several years, or used imprudently. What all parties at interest should want is the *highest* market/book ratio that can be obtained, because that suggests the right business judgements have been made regarding capital structure and growth prospects. The elimination of "pops" would suggest a destruction of the value the trustees hold in trust, and a violation of their fiduciary duty of care—regardless of who that duty is owed to.

Merger Conversions

The OTS interim final rule would prohibit merger conversions—whereby a stock institution acquires the assets and assumes the liabilities of a mutual with no significant payment to anyone—except where the survival of the converting institution is in question. The form of transaction we here propose would permit merger conversions, but would make them essentially a purchase of subscription rights by the acquiror, with the value paid for the rights—either in cash or other consideration—going to rightholders. This would have efficiency benefits for those smaller institutions whose decision to convert flowed from a decision to affiliate with a larger organization. Trustees who decided to convert and be acquired would of course have the same obligation to get the best possible price for rightholders.

Mutual Holding Companies

The Competitive Equality Banking Act of 1987 and the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 authorized conversion of mutual savings institutions into federal mutual holding companies, which in turn transfer virtually all their assets and liabilities to new, stock savings institutions, part of whose stock is acquired by subscribers in the conversion, with the majority retained by the mutual parent. This structure has the benefit of permitting converting institutions to raise only the amount of new capital they actually need. It has, however, in our view, potential for even a higher level of insider abuse than in standard conversions. We note that many newly formed mutual holding companies propose to refuse dividends declared by their operating subsidiary—with no corresponding change in their

percentage ownership of the subsidiary as dividends flowed to its minority stockholders. It seems to us that this could constitute a breach of fiduciary duty on the part of the trustees—which would be particularly acute were the trustees significant stockholders of the subsidiary. (It is worthy of note that "pops" in conversions involving mutual holding have been in the 40% range, compared to 26% for standard conversions.) As our suggested form of standard conversion would eliminate the need to raise excessive amounts of capital, we believe use of the mutual holding company structure should be discouraged in future conversions.

Summary

As we have studied the mutual-to-stock conversion process, it has become clear that there are two intertwined problems to be solved. One is technical: how to do it? The other is political: who should get the value? The first problem is interesting and challenging, but the second one is fundamental.

Deciding who should get the value makes a lot of people uncomfortable. Almost every answer makes someone angry. As we read the history, the FHLBB settled on the existing form of transaction precisely because it allowed them to avoid answering the value-distribution question. We have come to believe that the primary appeal of some value-distribution schemes—*e.g.*, giving it to depositors or to "the government"—is that they appear to disperse value enough to make the issue moot. As we have discussed the subject over the past two months, we have observed how tempting it is to continue to avoid it. Lawyers and investment bankers and professional depositors with a vested interest have urged us to drop the subject—which is not surprising. But even disinterested individuals wind up asking, "Do we care?"—and they reach that point with remarkable consistency.

We should care. The integrity of a banking system is a national treasure. Careless distribution of the value of converting institutions undermines that integrity. A form of transaction in part designed to avoid the value-distribution question—though it worked well for a while—today forces well-meaning bankers and lawyers and trustees and regulators to wink at polite fictions. Many have suggested that this is hardly a crime, since there is no victim. We disagree. Honor is the victim.

Life is full of compromises. There is no "right" answer to the value-distribution question. But there is a right process for addressing it. We invite broad participation in fashioning a compromise, as only democracy can, with which no one is entirely satisfied, but in which all can take pride.

Questions on Which Comment Is Sought

The FDIC is hereby requesting comment during a 60-day comment period on all aspects of this notice, including the following specific issues:

(1) Should a mutual institution be required, as a threshold issue, to demonstrate a need to convert—or is it sufficient that it provide an adequate business plan for the future?

(2) In the absence of legislation, could and should the FDIC adopt guidelines or set standards for the distribution of the existing value of a converting institution, or could or should the matter be left entirely to the trustees?

(3) Whether it is legislation or the FDIC or the board of trustees that sets standards, what should they be? Who should get some of the value, how much, and how specific should the rules be?

(4) If depositors (or creditors or borrowers or employees) are to receive some of the value, how should it be allocated among them? Should amount of deposit or tenure of association be accorded more weight? Must depositors and debtholders be treated identically? What practical constraints exist, based on mutuals' information systems and resources? What should the record date be?

(5) If charitable organizations or foundations are to receive a portion of the value, how should the suitability of the recipients be determined? Should there be a presumption that the trustees' selection of recipients is reasonable? Do there need to be rules to prevent abuse of such entities—*e.g.*, through "consulting contracts" with trustees? Should such entities be required to sell at the time of conversion, or should they be permitted to diversify over time, in accordance with existing federal tax and banking laws?

(6) Does "pressure to convert" from parties who would receive value if an institution did so represent a legitimate public policy concern? How great might that pressure be? How can trustees of institutions which have not elected to convert be protected from unreasonable litigation?

(7) What potential problems (including tax issues and insider abuses) are there with the proposed new form of transaction, and how can they be avoided or alleviated? On the assumption that the market will gradually improve on any form of transaction, how specific does legislation or regulation need to be in that area?

(8) Should converting institutions (including those doing merger conversions) be required or encouraged to obtain "fairness opinions" from independent financial advisors? Should the FDIC attempt to "police" the market judgements involved in the process in any way?

(9) Should new mutual holding company creations be permitted? If not how should existing ones be regulated?

By the order of the Board of Directors.

Dated at Washington, D.C., this 31 day of May, 1994.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Acting Executive Secretary.

BILLING CODE 6714–01–P

FEDERAL RESERVE SYSTEM

Banco Bilbao; Acquisition of Company Engaged in Permissible Nonbanking Activities

Banco Bilbao Vizcaya, S.A., Bilbao, Spain (Applicant), a foreign banking organization subject to the Bank Holding Company Act (BHC Act), has applied pursuant to section 4(c)(8) of the BHC Act and § 225.23(a)(2) and (3) of the Board's Regulation Y (12 CFR 225.23(a)(2) and (3)), to retain an interest in its indirect subsidiary, Probursa International Incorporated, New York, New York (Company), and thereby engage in the following securities-related activities:

(1) providing investment advisory services pursuant to § 225.25(b)(4) of the Board's Regulation Y (12 CFR 225.25(b)(4));

(2) providing full service brokerage services pursuant to §§ 225.25(b)(4) and (b)(15) of Regulation Y (12 CFR 225.25(b)(4) and (b)(15)), including exercising investment discretion on behalf of institutional customers;

(3) buying and selling, on the order of customers, all types of securities as a riskless principal; and

(4) engaging in the private placement of all types of securities as agent.

Section 4(c)(8) of the BHC Act provides that a bank holding company may, with Board approval, engage in any activity "which the Board, after due notice and opportunity for hearing, has determined (by order or regulation) to be so closely related to banking or managing or controlling banks as to be a proper incident thereto." This statutory test requires that two separate tests be met for an activity to be permissible for a bank holding company. First, the Board must

determine that the activity is, as a general matter, "closely related to banking." Second, the Board must find in a particular case that the performance of the activity by the applicant bank holding company may be reasonably be expected to produce public benefits that outweigh possible adverse effects.

The Board previously has determined by regulation that the proposed investment advisory and full-service brokerage activities are closely related to banking under section 4 of the BHC Act. *See* 12 CFR 225.25(b)(4) and (b)(15). Applicant has committed that it will conduct these activities in accordance with the Board's limitations and restrictions on the conduct of such activities. The Board also has previously determined that the proposed riskless principal and private placement activities are closely related to banking, subject to certain prudential limitations on the conduct of such activities which address the potential for conflicts of interest, unsound banking practices, and other adverse effects. *See, e.g., J.P. Morgan & Company Inc.*, 76 Federal Reserve Bulletin 26 (1990); *Bankers Trust New York Corporation*, 75 Federal Reserve Bulletin 829 (1989). Applicant has committed to conduct the proposed riskless principal and private placement activities subject to the conditions and limitations contained in these and other Board orders approving these activities.

In order to satisfy the proper incident to banking test, section 4(c)(8) of the BHC Act requires the Board to find that the performance of the activities by Company can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices. Applicant believes that the proposed activities will benefit the public by promoting competition and by providing a wider range of services and added convenience to Company's customers. Thus, Applicant believes that the proposed activities will result in benefits to the public that would outweigh any adverse effects associated with the proposal.

In publishing the proposal for comment, the Board does not take a position on issues raised by the proposal. Notice of the proposal is published solely in order to seek the views of interested persons on the issues presented by the application and does not represent a determination by the Board that the proposal meets, or is likely to meet, the standards of the BHC Act.

Any views or requests for hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, not later than July 6, 1994. Any request for hearing on this application must, as required by § 262.3(e) of the Board's Rules of Procedure (12 CFR 262.3(e)), be accompanied by a statement of the reasons why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of New York.

Board of Governors of the Federal Reserve System, June 7, 1994.

Jennifer J. Johnson,

Associate Secretary of the Board.

BNCCORP, Inc.; Notice of Application to Engage de novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than July 5, 1994.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. BNCCORP, Inc., Bismarck, North Dakota; to engage *de novo* in providing management consulting to nonaffiliated bank and nonbank depository institutions pursuant to § 225.25(b)(11) of the Board's Regulation Y. These activities will be conducted in North Dakota, South Dakota, Minnesota, and Montana.

Board of Governors of the Federal Reserve System, June 7, 1994.

Jennifer J. Johnson,

Associate Secretary of the Board.

FirsTier Financial, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than July 7, 1994.

A. Federal Reserve Bank of Kansas City (Stephen E. McBride, Assistant Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. FirsTier Financial, Inc., Omaha, Nebraska; to merge with Cornerstone Bank Group, Inc., Council Bluffs, Iowa, and thereby indirectly acquire First National Bank, Council Bluffs, Iowa; Nevada National Bank, Nevada, Iowa; Security Savings Bank, Williamsburg, Iowa; and Valley State Bank, Rock Valley, Iowa.

B. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director, Bank Holding Company) 101 Market Street, San Francisco, California 94105:

1. D.L. Evans Bancorp, Burley, Idaho; to become a bank holding company by acquiring 100 percent of the voting shares of D.L. Evans Bank, Burley, Idaho.

2. Heritage Oaks Bancorp, Paso Robles, California; to become a bank holding company by acquiring 100 percent of the voting shares of Heritage Oaks Bank, Paso Robles, California.

Board of Governors of the Federal Reserve System, June 7, 1994.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Toxic Substances and Disease Registry

Workshop to Assist in Developing Criteria for Establishing Medical Surveillance Programs in Communities Exposed to Hazardous Substances: Meeting

The Agency for Toxic Substances and Disease Registry (ATSDR) announces the following meeting.

Name: Workshop to Assist in Developing Criteria for Establishing Medical Surveillance Programs in Communities Exposed to Hazardous Substances.

Time and Date: 8:30 a.m.–4 p.m., June 23, 1994.

Place: Days Hotel at Lenox, (soon to be Holiday Inn), 3377 Peachtree Road, NE, Atlanta, Georgia 30326.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 50 people.

Purpose: This workshop is to assist ATSDR in developing standardized criteria for recommending the establishment of medical surveillance programs in communities where exposure to hazardous substances has resulted in an increased risk of disease.

Matters To Be Considered: Participants will be divided into the following three workgroups:

Workgroup 1: Exposure Criteria.
Workgroup 2: Outcome Criteria.
Workgroup 3: System Criteria.

Workgroup participants will discuss aspects of the working draft criteria developed by ATSDR and provide individual recommendations regarding the criteria.

Contact Person For More Information: Joyce Smith, Division of Health Studies, ATSDR (MS E31), 1600 Clifton Road, NE, Atlanta, Georgia 30333, telephone 404/639-6200.

Dated: June 7, 1994.

William H. Gimson,

Acting Associate Director for Policy Coordination, Centers for Disease Control and Prevention (CDC).

BILLING CODE 4163-70-M

Centers for Disease Control and Prevention

Notice of Meeting

The National Center for Environmental Health (NCEH) of the Centers for Disease Control and Prevention (CDC) will convene the following meeting sponsored by the Division of Environmental Health Laboratory Sciences.

Name: Development of Innovative Technology for Measurement of Lead in Blood; Meeting of Grant Recipients and Cooperative Research and Development Agreement (CRADA) Partners.

Time and Date: 6:30 p.m.–9 p.m., July 19, 1994.

Place: New Orleans Marriott Hotel, 555 Canal Street, Mardi Gras Ballroom Sections F & G, New Orleans, Louisiana 70140.

Status: Open to the public, limited only by space available.

Purpose: The primary of this meeting is to brief the grantees and CRADA partners about CDC expectations for the grant and CRADA program, to encourage collaboration among grantees and CRADA partners and to review progress toward the objectives of the program.

Matters to be Discussed: Topics to be discussed include objectives of the CDC grant and CRADA program for the development of innovative technology for the measurement of lead in blood, impact of the Clinical Laboratory Improvement Act on the Technology; and an overview of each grantee and CRADA organization.

Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Robert L. Jones, Ph.D., Supervisory Research Chemist, Nutritional Biochemistry Branch, Division of Environmental Health Laboratory Sciences, (F18), NCEH, CDC, 4770 Buford Highway, NE, Atlanta, Georgia 30341-3724, telephone 404/488-4367.

Written comments are welcome and should be received by the contact person no later than July 13, 1994. Persons wishing to make oral comments at the meeting should notify the contact person in writing or by telephone no later than July 13, 1994. All requests to make oral comments should contain the name, address, telephone number, and organizational affiliation of the presenter. Depending on the time available and the number of requests to make oral comments, it may be necessary to limit the time of each presenter.

Dated: June 2, 1994.

William H. Gimson,

Acting Associate Director for Policy Coordination, Centers for Disease Control and Prevention (CDC)

BILLING CODE 4163-18-M

Neurobehavioral Health Risks in Farmworkers: Meeting

The National Institute for Occupational Safety and Health (NIOSH) of the Centers for Disease Control and Prevention (CDC) announces the following meeting.

Name: Neurobehavioral Health Risks in Farmworkers.

Time and Date: 9 a.m.–4 p.m., June 30, 1994.

Place: Robert A. Taft Laboratories, Room B-28, NIOSH, CDC, 4676 Columbia Parkway, Cincinnati, Ohio 45226.

Status: Open to the public, limited only by the space available.

Purpose: The purpose of the meeting is to review a NIOSH project entitled, "Neurobehavioral Health Risks in Farmworkers." The project will evaluate existing tests and develop new methods that can be caused in agricultural environments for assessing neurobehavioral impairment in groups of agricultural workers or in individual farmers who have been exposed to chemical and physical hazards. Participants will evaluate the scientific and technical dimensions of the project protocol, seek individual suggestions, and identify and address any deficiencies in the experimental study design. Copies of the protocol maybe obtained prior to the meeting from the contact persons listed below. Viewpoints and suggestions from industry, labor, other government agencies, and the public are invited.

Contact Person For Additional Information: Robert B. Dick, Ph.D., NIOSH, CDC, 4676 Columbia Parkway, Mailstop C-24, Cincinnati, Ohio 45226, telephone 513/533-8383.

Dated: June 2, 1994

BILLING CODE 4163-19-M

National Institutes of Health

National Cancer Institute; Meeting (Division of Cancer Treatment Board of Scientific Counselors)

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, DCT, National Cancer Institute, National Institutes of Health, June 13–14, 1994, Building 31C, Conference Room 10, 9000 Rockville Pike, Bethesda, Maryland 20892.

This meeting will be open to the public on June 13 from 9 a.m. to approximately 4:45 p.m., and again on June 14 from 11 a.m. to approximately 12 p.m., to review program plans, concepts of contract recompetitions and budget for the DCT program. In addition, there will be scientific reviews by several programs in the Division. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sec. 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Public Law 92–463, the meeting will be closed to the public on June 13 from approximately 4:45 p.m. to approximately 5:45 p.m., and again on June 14 from approximately 8 a.m. to approximately 11 a.m., for the review, discussion and evaluation of individual programs and projects conducted by the National Cancer Institute, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Carole Frank, Committee Management Officer, National Cancer Institute, Executive Plaza North Building, Room 630, National Institutes of Health, Bethesda, Maryland 20892 (301–496–5708) will provide summaries of the meeting and rosters of committee members upon request.

Dr. Bruce A. Chabner, Director, Division of Cancer Treatment, National Cancer Institute, Building 31, Room 3A44, National Institutes of Health, Bethesda, Maryland 20892 (301–496–4291) will furnish substantive program information.

Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact Dr. Bruce Chabner (301–496–4291) in advance of the meeting.

This notice is being published less than 15 days prior to the meeting due to difficulty of coordinating the attendance of members because of conflicting schedules.

BILLING CODE 4140–01–M

Public Health Service

National Institutes of Health; Statement of Organization, Functions, and Delegations of Authority

Part H, Chapter HN (National Institutes of Health) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services (40 FR 22859, May 27, 1975, as amended most recently at 59 FR 25952–25953, May 18, 1994) is amended to reflect the reorganization of the nutrition research coordination function within the NIH. The reorganization consists of (1) transferring the functions of the Division of Nutrition Research Coordination (DNRC) from the Office of Disease Prevention (ODP), Office of the Director, NIH (OD/NIH), to the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK); (2) abolishing the DNRC within the ODP, OD/NIH; and (3) establishing the Division of Nutrition Research within the NIDDK. The transfer of the nutrition coordination function is consistent with Title VI of the NIH Revitalization Act of 1993 (Pub.L. 103–43) which reiterates the lead role of the NIDDK in nutrition and obesity research and mandates an expanded NIDDK role in the coordination of trans-NIH nutrition research and translation efforts.

Section HN–B, Organization and Functions, is amended as follows: (1) Under the heading *Office of the Director (HNA), Office of Disease Prevention (HNA2),* delete the title and functional statement of the *Division of Nutrition Research Coordination (HNA24)* in their entirety.

(2) Under the heading *National Institute of Diabetes and Digestive and Kidney Diseases (HNK),* insert the following after the heading *Division of Extramural Activities (HNK7):*

Division of Nutrition Research Coordination (HNK8). (1) Through the NIDDK Director, advises the NIH Director and others on nutrition research issues; (2) coordinates the nutrition research and training activities of the research institutes; (3) works with the NIH organizational components to coordinate the development of RFAs, PAs, and RFPs to enhance the nutritional research activities of the NIH; (4) coordinates the NIH contribution to the Departmental Research Initiative in Nutrition that includes developing the 5-year Plan on Nutrition and Training, and the NIH Program in Biomedical and Behavioral Nutrition Research and Training; (4) inputs and maintains all Federal (NIH, FDA, DOD, etc.) nutrition research into the Human Nutrition Research and Information Management System; (6) represents the NIH and provides liaison at the DHHS and interagency level on various committees on nutrition research and policy issues such as the Interagency Committee on Human Nutrition Research and Nutrition Policy Board; (7) prepares the *Annual Report of the NIH Program in Biomedical and Behavioral Nutrition Research and Training;* and (8) develops and maintains effective liaison with other departments and agencies that have nutrition mechanisms.

Dated: May 25, 1994.

Harold Varmus,

Director, NIH.

BILLING CODE 4140–01–M

Social Security Administration

1994 Advisory Council on Social Security; Meeting

AGENCY: Social Security Administration, HHS.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, this notice announces a meeting of the 1994 Advisory Council on Social Security (the Council).

DATES: June 24, 1994, 9 a.m. to 5:30 p.m.; June 25, 1994, 9 a.m. to 1 p.m.

ADDRESS: Embassy Row Hotel, 2015 Massachusetts Avenue, NW., Washington, DC 20036, (202) 939–4123.

FOR FURTHER INFORMATION CONTACT: Dan Wartonick, 1994 Advisory Council on Social Security, room 639H, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201, (202) 205–4861.

SUPPLEMENTARY INFORMATION:

1. Purpose

Under section 706 of the Social Security Act (the Act), the Secretary of Health and Human Services (the Secretary) appoints the Council every 4 years. The Council examines issues affecting the Social Security Old-Age, Survivors, and Disability Insurance (OASDI) programs, as well as the Medicare and Medicaid programs, which were created under the Act.

In addition, the Secretary has asked the Council specifically to address the following:

- Social Security financing issues, including developing recommendations for improving the long-range financial status of the OASDI programs;
- General program issues such as the relative equity and adequacy of Social Security benefits for persons at various income levels, in various family situations, and various age cohorts, taking into account such factors as the increased labor force participation of women, lower marriage rates, increased likelihood of divorce, and higher poverty rates of aged women.

In addressing these topics, the Secretary suggested that the Council may wish to analyze the relative roles of the public and private sectors in providing retirement income, how policies in both sectors affect retirement decisions and the economic status of the elderly, and how the disability insurance program provisions and the availability of health insurance and health care costs affect such matters.

The Council is composed of 12 members in addition to the chairman: Robert Ball, Jean Bok, Ann Combs, Edith Fierst, Gloria Johnson, Thomas Jones, George Kourpias, Sylvester Schieber, Gerald Shea, Marc Twinney, Fidel Vargas, and Carolyn Weaver. The chairman is Edward Gramlich.

The Council is to report to the Secretary, and such reports shall thereupon be transmitted to the Congress and to the Board of Trustees of each of the Trust Funds.

II. Agenda

The Council will discuss:

- Economic well-being of today's elderly and those soon to retire;
- Prognoses for baby-boom cohorts and beyond;
- Issues facing the Social Security program;
- Issues concerning pensions and other retirement saving; and
- Matters relating to technical panels of experts.

The agenda items are subject to change as priorities dictate.

The meeting is open to the public to the extent that space is available, beginning at 1:00 p.m. on June 24, 1994. That day's morning session will deal only with internal personnel and administrative matters of the Council not relating to the substantive purpose of the meeting. Therefore, under the Government in the Sunshine Act (5 U.S.C. 552b(c)(2)), that session is exempt from being open to the public. Interpreter services for persons with hearing impairments will be provided. A transcript of the meeting will be available to the public on an at-cost-of duplication basis. The transcript can be ordered from the Designated Federal Officer of the Council.

(Catalog of Federal Domestic Assistance Program Nos. 93.802, Social Security-Disability Insurance; 93.803, Social Security-Retirement Insurance; 93.805, Social Security-Survivors Insurance.)

Dated: June 3, 1994.

David Lindeman,

Designated Federal Officer, 1994 Advisory Council on Social Security.

BILLING CODE 4190–29–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

[Docket No. N–94–3761; FR–3538–N–01]

NOFA for Vacancy Reduction Program: Technical Correction

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Correction of NOFA

SUMMARY: This notice corrects a NOFA to be published on June 13, 1994, in the **Federal Register**. This correction is necessary because of errors that were discovered in the document after it had been submitted to the **Federal Register** for publication. The correction clarifies that program funds are not intended to be used to support the normal maintenance associated with routine turnover of units.

FOR FURTHER INFORMATION CONTACT: MaryAnn Russ, Director, Office of Assisted Housing, Department of Housing and Urban Development, 451 Seventh Street SW., room 4204, Washington, D.C. 20410, telephone (202) 708–1800 or (202) 708–1380 (TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: Accordingly, the NOFA for Vacancy Reduction Program, scheduled for publication in the **Federal Register** on Monday, June 13, 1994, as Part V, is amended as follows:

1. In the Summary, a new sentence is added as the sixth sentence, immediately preceding the sentence

beginning "The NOFA contains information on the following:", to read as follows:

It is still the PHA's responsibility to support the normal maintenance associated with routine turnover of units from operating or other funds.

* * * * *

2. In Section I.D, "Definitions", the word "routine" is removed from the definition of *"Repair"*.

Authority: 42 U.S.C. 1437l and 3535(d).

Dated: June 9, 1994.

Myra L. Ransick,

Assistant General Counsel for Regulations.

[FR Doc. 94–14461 Filed 6–10–94; 8:45 am]

BILLING CODE 4210–33–P

DEPARTMENT OF THE INTERIOR

Office of the Secretary

RIN 1094–AA45

Use of Alternative Dispute Resolution (ADR)

AGENCY: Office of the Secretary.

ACTION: Notice of interim ADR policy and opportunity for comment.

SUMMARY: The Department of the Interior (Department) has developed this two-year interim policy to implement the requirements of the Administrative Dispute Resolution Act (ADR Act), Public Law No. 101–552. This interim policy also addresses the Negotiated Rulemaking Act, Public Law No. 101–648. The Department is adopting this interim policy to allow time to acquire data on the applicability of ADR techniques to selected program disputes. During this interim period, the Department through its bureaus and offices will implement ADR pilot programs and other program initiatives in an effort to establish a baseline of experience in the practical uses of ADR. At the conclusion of this interim phase, the Department will assess the results of the ADR initiatives in conjunction with both external and internal comments received, develop a proposed final policy, allow for public comment, and publish a final ADR policy in the **Federal Register**.

The Department seeks comments from the public, including, among others, those persons whose activities the Department regulates, on any aspect of this interim policy and its implementation, and those persons who have engaged in or may in the future engage in ADR processes with the Department. At the end of the 60 day comment period the Department will consider issues raised by interested persons and may modify the interim policy based on public comment.

DATES: Comments must be received on or before August 12, 1994.

ADDRESSES: Written comments should be mailed or delivered to Philip G. Kiko, Deputy Director, Office of Hearings and Appeals (OHA), U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Philip G. Kiko, Deputy Director and the Alternate Dispute Resolution Specialist, OHA (703) 235–3810.

SUPPLEMENTARY INFORMATION:

I. Administrative Dispute Resolution Act

The Administrative Dispute Resolution Act (ADR Act), Public Law No. 101–552, 5 U.S.C. 581–583, enacted November 15, 1990, authorizes and encourages federal agencies to employ consensual methods of dispute resolution as alternatives to litigation. Under the ADR Act, a federal agency is required: (1) To designate a senior official as a dispute resolution specialist; (2) to establish training programs in the use of dispute resolution methods; (3) to adopt a policy on the use of ADR techniques; and (4) to review the standard language in agency contracts, grants or other agreements, to determine whether to include a provision on ADR. Federal agencies are also required to consult with the Administrative Conference of the United States (ACUS) and the Federal Mediation and Conciliation Service (FMCS) on the development of their ADR policies.

Additionally, section 3(a) of the ADA Act requires the Department to adopt a formal policy as to how it intends to implement the ADR Act in each of the following areas: (a) Formal and informal adjudications; (b) rulemakings; (c) enforcement actions; (d) issuing and revoking licenses or permits; (e) contract administration; (f) litigation brought by or against the Department; and (g) other departmental action.

Congress enacted the ADR Act to reduce the time, cost, inefficiencies and contentiousness that are too often associated with litigation and other adversarial dispute mechanisms. Moreover, experience at other federal agencies shows that ADR can help achieve mutually acceptable solutions to disputes more effectively than either litigation or administrative adjudication. In fact, Vice President Gore recommended in September 1993 that federal agencies "increase the use of alternative means of dispute resolution." National Performance Review, Recommendation REG06 (September 7, 1993).

While ADR techniques have proven to be useful in resolving serious conflicts, the day-to-day operations of the Department's bureaus should provide conflict avoidance methods, where possible. Moreover, the ADR Act, 5 U.S.C. 582(b), specifically cautions that:

An agency shall consider not using a dispute resolution proceeding if—

(1) a definitive or authoritative resolution of the matter is required for precedential value, and such a proceeding is not likely to be accepted generally as an authoritative precedent;

(2) the matter involves or may bear upon significant questions of Government policy that require additional procedures before a final resolution may be made, and such a proceeding would not likely serve to develop a recommended policy for the agency;

(3) maintaining established policies is of special importance, so that variations among individual decisions are not increased and such a proceeding would not likely reach consistent results among individual decisions;

(4) the matter significantly affects persons or organizations who are not parties to the proceeding;

(5) a full public record of the proceeding is important, and a dispute resolution proceeding cannot provide such a record; and

(6) the agency must maintain continuing jurisdiction over the matter with authority to alter the disposition of the matter in the light of changed circumstances, and a dispute resolution proceeding would interfere with the agency's fulfilling that requirement.

The decision whether to use ADR, however, remains within each federal agency's discretion, and participation in ADR processes is by mutual consent of the disputants.

The ADR Act fosters the use of ADR by ensuring appropriate protection of parties' and neutrals' communication. The ADR Act, however, is not a statute exempting disclosure under the Freedom of Information Act (FOIA). To establish a baseline of understanding, concerned parties should establish confidentiality guidelines consistent with FOIA requirements before entering into negotiations.

Within the limitations set forth in the ADR Act, and elsewhere, the Department plans to explore, over the next two years, whether and in which contexts the use of ADR facilitates fairer, faster, or more rational resolutions of disputes than present dispute resolution methods provide. Additionally, the Department will conduct an evaluation of the interim policy. On the basis of this evaluation, the Department will consider modifying any of its current procedures or rules, as

appropriate, to allow for greater use of ADR.

II. Negotiated Rulemaking Act

In enacting the Negotiated Rulemaking Act, Public Law No. 101–648, Congress indicated its concern that traditional notice and comment rulemaking procedures may discourage agreement among the potentially affected parties and the Federal Government. Congress addressed this concern by purposefully designing the Negotiated Rulemaking Act's procedures to facilitate the cooperative development of regulations by interested persons and agencies. Moreover, Vice President Gore's report recently recommended improving agencies' regulatory systems by "[e]ncourag[ing] agencies to use negotiated rulemaking more frequently in developing new rules." National Performance Review, Recommendation REG03.

Negotiated Rulemaking (Reg-Neg) does not replace the traditional notice and comment rulemaking. Rather, Reg-Neg supplements the more traditional process by developing consensus around the candidate proposed rule before an agency publishes it in the **Federal Register.** Combining early consensus-building and information-gathering with an opportunity for broad public consideration, the Reg-Neg process meets the prescription of the Administrative Procedure Act, 5 U.S.C. 551 *et seq.*, and can facilitate more effective regulatory development and regulations. Moreover, on September 30, 1993, President Clinton issued a Memorandum in conjunction with the issuance of Executive Order 12866 on Regulatory Planning and Review. The Memorandum required each department to identify to the Office of Information and Regulatory Affairs at least one rulemaking within the upcoming year to be developed through negotiated rulemaking or to explain why negotiated rulemaking would not be feasible, 58 FR 52391 (Oct. 7, 1993).

Decisionmakers should view Reg-Neg as one of a variety of information-gathering and consensus-building or consultative processes used to achieve effective, efficient, rational, and fair agency policy. Although the Negotiated Rulemaking Act does not address less formal decisionmaking processes, including, among others, policy roundtables and public meetings, such nonadversarial processes may help gather information to assist the Department in policy development.

Participation in informal regulatory development processes can require significant commitment of resources on the part of all participants, including federal agencies. The Department's experience, however, has shown that consensus-building techniques can result in better policy, reduce the high rate of litigation, and lower the costs of program implementation for the Department's bureaus and the regulated community.

III. Interim Policy

A. Application of the Interim Policy

The Department encourages the effective use of ADR and Reg-Neg to the fullest extent compatible with existing law, and the Department's resources and missions. Based on almost one hundred and fifty years of experience, the Department recognizes that the use of consensus-building techniques and nonadversarial planning processes can increase the wisdom, efficiency, equity, and long-term stability of departmental decisions.

The interim policy is intended to govern both the programmatic side of the Department's broad responsibility, as well as many of the human resources aspects. With regard to human resources, this interim ADR policy embraces the ADR policy of the Department's Office for Equal Opportunity. The use of ADR is expected to be very useful in matters involving equal employment opportunity. Workplace dispute issues outside the jurisdiction of actions governed by regulations issued by the Merit Systems Protection Board will also be governed by this policy. Where the use of ADR would impede effective supervisory action in routine matters of employee discipline or performance appraisal, supervisors may elect not to use ADR.

B. Purpose of the Interim Policy

The Department has developed a two-year ADR interim policy in response to the requirements of the ADR Act. The policy encourages the Department's bureaus to identify disputes amenable to ADR and to use ADR, whenever practicable. After testing ADR methods in a variety of contexts, the Department, through the Interior Dispute Resolution Council, at the conclusion of the two-year interim phase, will assess the appropriateness of the use of ADR and determine which program areas could most benefit from the institutionalization of ADR processes. Existing bureau ADR efforts should continue as this final policy is developed.

The Department's interim ADR policy is also designed to disseminate knowledge about ADR both within the Department and to those whom the Department serves, as well as to introduce new ADR initiatives and to provide guidelines for bureaus to apply in the implementation of ADR pilot programs. These initiatives will produce a baseline of experience that will be used in developing the Department's final ADR policy. Without the full commitment and cooperation of all involved in the two-year interim phase, the Department will lose a valuable opportunity to learn what works, what does not, and how best to capture potential benefits from ADR use.

C. Implementation of Interim Policy

1. Role of the Department's Dispute Resolution Specialist

Pursuant to the ADR Act, the Secretary appointed the Director, Office of Hearings and Appeals (OHA) to serve as the Department's Dispute Resolution Specialist (DRS). This high level, Department official was appointed as the DRS in order: (1) To facilitate intra-departmental coordination and communication; (2) to ensure consistent, quality training; (3) to establish minimum qualifications for mediators, arbitrators, and certain departmental employees with ADR responsibilities; and (4) to reduce administrative redundancy. The DRS will maintain an "open door" policy, welcoming inquiries from and offering assistance to the bureaus and interested persons. During the period that the interim policy is being implemented, ongoing input from the public is encouraged. The DRS will also develop and make available a roster of neutrals who are trained in ADR and who would be available to participate in a dispute resolution proceeding. Despite this focal point for ADR activity, the Department's interim ADR policy is to encourage decentralized decisionmaking to the greatest extent possible.

2. Role of the Interior Department Resolution Council

In order to keep the Department's bureaus informed during the implementation of the interim phase, the DRS shall, 30 days after publication of the Department interim policy, convene the Interior Dispute Resolution Council (IDRC). Composed of the Department's Assistant Secretaries, Solicitor and the Director of the Office of Regulatory Affairs (ORA), or their respective designees, and chaired by the DRS, the IDRC shall monitor and evaluated the Department's use of ADR and Reg-Neg and assist in intradepartmental policy and process coordination. The IDRC shall act as an

information clearinghouse, recommend personnel training courses in ADR techniques and program design, and act as the liaison between the ACUS and FMCS.

Additionally, the IDRC will consider the benefits of appointing a departmental ombudsman and the benefits of appointing an ombudsman for selected departmental bureaus. An ombudsman could serve the following functions: (1) To address specific categories of workplace disputes through the investigation of the circumstances giving rise to the disputes and based on their findings to recommend corrective actions, if appropriate; or (2) to investigate and propose the resolution, if appropriate, of citizen complaints against the Department, including recommendations for changes in agency structure or organization to better address or avoid persistent problems. The IDRC will submit a written report at the end of the Interim period on the use of an ombudsman.

3. Training in ADR

The Department recognizes, consistent with the philosophy of the National Performance Review, that bureaus can best evaluate and develop specific ADR programs and initiatives to meet bureau needs. Therefore, each Bureau Head shall appoint a Bureau Dispute Resolution Specialist (BDRS). The BDRS shall receive training recommended by the DRS in ADR consensus-building techniques, conflict resolution, and program design.

The DRS shall recommend appropriate BDRS training, such training to be completed no later than 60 days following issuance of the interim policy. Additionally, the DRS shall provide ADR training opportunities for selected groups of senior managers of the Department, whose job responsibilities include determining or influencing how disputes will be managed. The DRS will also identify opportunities for advanced training in facilitation and mediation for judges and attorneys within OHA, as appropriate.

4. Development of Bureau Alternative Dispute Resolution Plans

The BDRS shall develop and submit the Bureau's Alternate Dispute Resolution Plan (ADRP) through the Bureau Head to the appropriate Assistant Secretary no later than 60 days following the completion of training. The ADRP shall include at least one category of disputes amenable to ADR methods, and a discussion of how the bureau will implement ADR to address such disputes. Additionally, to facilitate the monitoring and evaluation of the bureau's initiative(s), the ADRP should address, among other topics, the (1) Goals; (2) objectives; (3) timetable; (4) implementation strategy; (5) monitoring criteria; and (6) evaluation methodology. It is permissible if two or more bureaus adopt the same plan or parts of a plan.

In selecting appropriate ADR pilot initiatives, a bureau can focus, for example, on a particular category of dispute (e.g., contract cases), on a variety of disputes involving a particular organizational segment or region of the agency, or on a particular ADR process that would be applied in a variety of disputes across the bureau. In selecting a focus for an ADR pilot initiative, the Department encourages bureaus to consider using some of the disputes that are central to the Department's mission. While a bureau should not avoid identifying personnel and small contract disputes, for example, as candidates for a pilot initiative, a bureau should not focus exclusively on these areas so that the effectiveness of ADR for a bureau can be judged in a programmatic context.

Some offices of the Department, such as the Office of the Solicitor, assist bureaus in carrying out their programs rather than conducting programs of their own. For the purposes of this policy, such offices should assist their client bureaus in implementing ADR in a programmatic context. Nonetheless, such offices should develop an ADRP for internal, human resource management purposes.

Consistent with the many activities and functions of the Department and the Federal Acquisition Regulations' (FAR) recognition of the usefulness of ADR in government contracts, each BDRS, or appointed designees, should review categories of all proposed new and renewal contracts, agreements, permits, memoranda of understanding, and other documents, to determine whether to include ADR provisions. Moreover, the Department encourages the use of ADR in contract disputes prior to these disputes reaching the Interior Board of Contract Appeals. To avoid duplication of effort by bureau personnel, the Office of the Solicitor, working with the Department's Senior Procurement official, will develop standardized ADR-related clauses that bureaus can use in contracts and other documents.

The Department expects, as well, that those bureaus with comparatively more dispute resolution experience will, on a voluntary basis, assist bureaus less familiar with dispute resolution in the development of the ADRP. The Department expects, as well, that inter-bureau initiatives such as "one stop permitting," for example, be coordinated with the BDRSs. Each BDRS and others involved with the implementation of the interim policy are encouraged to consult with other federal agencies, and others in the dispute resolution field in the development of their ADR initiatives. The DRS is available to provide the names of contact persons within various federal agencies who have effectively utilized ADR methods in resolving disputes.

Judges within all boards and divisions of OHA will be encouraged to utilize, where appropriate, ADR methods, including, among others, the use of settlement judges, minitrials, and the referral of litigants to mediation or arbitration in advance of a judge's consideration of a case on the merits. OHA will develop an internal policy for the appointment of settlement judges and will refer litigants to a list of approved mediators and arbitrators.

The appropriate Assistant Secretary or designee shall, upon receipt of a bureau's ADRP, review and approve the ADRP in consultation with the IDRC. Within 30 days after approval of an ADRP, a bureau shall publish its ADRP in the **Federal Register** or otherwise make the ADRP accessible to interested persons.

D. Monitoring and Evaluation

Each BDRS shall monitor the implementation of his or her bureau's dispute resolution initiatives on an ongoing basis, using the criteria developed in their ADRP. Each BDRS shall submit to the IDRC, through the proper Bureau Head and Assistant Secretary, every 180 days, an evaluation of the bureau's progress toward meeting the goals, objectives, and timetables on the basis of the methodology outlined in the ADRP. The evaluation should also discuss any unanticipated issues that each bureau may have encountered and how those issues have been or are being resolved.

The BDRSs in conjunction with the IDRC shall, at the conclusion of the two-year interim phase, catalogue and evaluate the bureaus' respective initiatives and experiences under their ADRPs in a report to the Secretary. This evaluation, coordinated by the DRS, as chair of the IDRC, will focus on the categories of dispute and types ADR methods that were most helpful in achieving resolution of disputes.

Moreover, because the usefulness of ADR to the Department is dependent on the processes' ability to facilitate rational, fair, efficient, and stable

solutions among the Department's bureaus, the regulated community and the public, evaluation of the interim policy should receive the benefit of public public comment and participation.

A concluding section of the evaluation should explain how dispute resolution will be integrated on a permanent basis into each bureau's program offices. This process of review, evaluation, and modification will allow each bureau to systematically and regularly improve its ADR programs.

E. Development of Final ADR Policy

The IDRC in conjunction with the BDRSs, and with the benefit of public comment and participation, will develop a permanent Department ADR policy on the basis of the Department's two-year interim policy experience. The DRS will be responsible for the coordination of the development of the Department's final policy, and shall ensure issuance of that policy no later than 90 days after the conclusion of the interim policy. During the time between conclusion of the interim policy and issuance of the final policy, the interim policy shall remain in effect, as appropriate.

F. Negotiated Rulemaking

Pursuant to Executive Order 12866 and the Presidential Memorandum on Negotiated Rulemaking, issued September 30, 1993, the Department will use, where appropriate, negotiated rulemaking or other consensus-building techniques to develop rules that are fair, technically accurate, and clear. Each bureau will evaluate, prior to drafting or amending any regulation, whether negotiated rulemaking is appropriate for developing or amending that regulation and will explain, on the Regulatory Alert Form submitted to the ORA, the basis for determining whether or not the regulation will be developed or amended using negotiated rulemaking.

In explaining whether negotiated rulemaking should be used for a particular rulemaking, each bureau should address at least the following:

(1) Whether there exists a small and identifiable group of constituents (the "parties") with significant interests in the rulemaking, so that all reasonably foreseeable significant interests can be represented by individuals in the negotiation;

(2) Whether the parties believe it to be in their best interest to enter into a negotiated rulemaking;

(3) Whether the parties are willing and able to enter into negotiated rulemaking in good faith;

(4) Whether any single party has, or is perceived to have, the ability to dominate negotiations, thereby making a compromise solution unlikely;

(5) Whether there are clear and identifiable issues that are agreed to be ripe for a negotiated solution;

(6) Whether a negotiated solution would require one or more parties to compromise a fundamental value;

(7) Whether the use of negotiated rulemaking is reasonably likely to result in an agreement or course of action satisfactory to all parties; and

(8) Whether there are legal deadlines or other legal issues that either mitigate against negotiation or provide incentives to reach a negotiated solution.

If a bureau has decided to enter into a negotiated rulemaking, it will prepare a brief report describing the goals, objectives, anticipated parties, and projected timetables of the negotiation. Throughout the negotiation, the bureau will prepare brief periodic reports discussing the progress toward achieving the goals, objectives, and timetables of the negotiation, and highlighting any successes and unanticipated events or issues encountered during the negotiation. These reports shall be submitted to ORA and the IDRC.

At the end of the two-year interim policy, ORA, the DRS, and IDRC shall prepare a report to the Secretary evaluating the Department's experiences with negotiated rulemaking. This report will focus upon the types of policies, categories of rulemakings, and methods of negotiation that were most successful in achieving customer satisfaction and the cost-effective implementation of mutually agreeable rulemakings. This report will be based upon evaluations conducted by the bureaus and submitted to ORA, IDRC, and the DRS for review and assimilation into the report to the Secretary.

IV. Executive Order 12866

This interim policy was not subject to Office of Management and Budget review under Executive Order 12866.

Dated: June 2, 1994.

Bonnie R. Cohen,

Assistant Secretary, Policy, Management and Budgets.

Appendix I—Glossary of ADR Terms
Appendix II—Examples of ADR Initiatives

Appendix I—Glossary of ADR Terms

The following terms are commonly associated with ADR and negotiated rulemaking and contain many recognized forms of ADR. They are provided for the reader's convenience and have been adapted from the ADR Act, the Negotiated Rulemaking Act, and other sources.

Alternative means of dispute resolution—An inclusive term used to describe a variety of problem-solving processes that are used in lieu of litigation or administrative adjudication to resolve issues in controversy, including but not limited to, settlement negotiations, conciliation, facilitation, mediation, fact-finding, minitrials, and arbitration, or any combination thereof.

Arbitration—A process, quasi-judicial in nature, whereby a dispute is submitted to an impartial and neutral third party who considers the facts and merits of a case and decides the matter. To be revised consistent with 5 U.S.C. 588, et. seq.

Conciliation—Procedures intended to help establish trust and openness between the parties to a dispute.

Dispute—An issue which is material to a decision concerning an administrative or mission-related program of an agency and with which there is disagreement between the agency and a person or persons who would be substantially affected by the decision.

Dispute resolution communication—Any oral or written communication prepared for the purposes of a dispute resolution proceeding, including any memoranda, notes, or work product of the neutral, parties, or nonparty participants. A written agreement to enter into a dispute resolution proceeding, or a final written agreement or arbitration award reached as a result of a dispute resolution proceeding, is not a dispute resolution communication.

Dispute resolution proceeding—Any process in which an alternative means of dispute resolution is used to resolve an issue in controversy in which a neutral is appointed and specified parties participate.

Facilitation—Involves the assistance of a third party who is impartial toward the issues under discussion and who works with all participants in a whole group session providing procedural directions on how the group can effectively move through the problem-solving steps of the meeting and arrive at the jointly agreed upon goal.

Fact-finding—Involves the use of neutrals acceptable to all parties to determine disputed facts. This can be particularly useful where disagreements about the need for or the meaning of data are impeding resolution of a dispute, or where the disputed facts are highly technical and would be better resolved by experts. Fact-finding usually involves an informal

presentation of its case by each party. The neutral(s) then provide an advisory opinion on the disputed facts, which can be used by the parties as a basis for further negotiation.

Litigation—A dispute brought in a court of law to enforce a statute, right, or legally created cause of action that will be decided based upon legal principles or evidence presented.

Mediation—Involves the intervention into a dispute of an impartial and neutral third party, who has no decisionmaking authority but who will procedurally assist the parties to reach voluntarily an acceptable settlement of issues in dispute.

Minitrial—A structured settlement process in which the disputants agree on a procedure for presenting their cases in highly abbreviated versions (usually no more than a few hours or a few days) to senior officials for each side with authority to settle the dispute. This process allows those in senior positions to see firsthand the relative strengths and weaknesses of their cases and can serve as a basis for more fruitful negotiations. Often, a neutral presides over the hearing, and may, subsequently, mediate the dispute or help parties evaluate their cases.

Negotiated rulemaking—Rulemaking accomplished through the use of a negotiated rulemaking committee.

Negotiated rulemaking committee—An advisory committee established by an agency in accordance with the Negotiated Rulemaking Act and the Federal Advisory Committee Act to consider and discuss issues for the purpose of reaching a consensus in the development of a proposed rule.

Negotiation—Involves a bargaining relationship between two or more parties who have either perceived or actual conflicts of interest. The participants join voluntarily in a temporary relationship to educate each other about their needs and interests and exchange specific resources or promises that will resolve on or more issues. Almost all of the ADR procedures, in which the parties maintain control over the outcome of the conflict, are variations upon or elaborations of the negotiation process.

Neutral—An individual, who with respect to an issue in controversy, functions specifically to aid the parties in resolving the controversy. The individual may be a permanent or temporary officer or employee of the Federal Government, or any other individual who is acceptable to the parties to a dispute resolution proceeding. A neutral shall have no official, financial, or personal conflict of interest with respect to the dispute, unless such interest is fully disclosed in writing to all parties and all parties agree that the neutral may serve.

Ombudsman—A person designated to address selected categories of disputes by investigating the circumstances that gave rise to the matter; and based upon the investigative findings, recommending corrective action, as appropriate.

Roster—A list of persons qualified to provide services as neutrals that is maintained by the agency.

Appendix II—Examples of ADR Initiatives

Various bureaus and offices within the Department have been involved in implementing ADR processes. Some of the more prominent examples of ADR initiatives that reflect the Department's commitment to ADR include:

In 1990, the Department disseminated to each of the Department's bureaus and offices an ADR survey designed to identify program areas that could be amenable to ADR techniques. Among the questions asked were: (1) The categories of disputes in which the organization is typically involved; (2) the number of cases during the prior 2 fiscal years that were (a) docketed, (b) settled, and (c) litigated, and the approximate cost involved; and (3) the organization's experience to date in utilizing ADR techniques.

The Department conducted an orientation program on ADR. Included in the orientation program was Senator Charles Grassley, one of the sponsors of the ADR Act, together with representatives of the Administrative Conference of the United States (ACUS) and the Federal Mediation and Conciliation Service (FMCS).

The Department conducted a one day training program on ADR. The training focused on the various methods of ADR and included representatives from the U.S. Army Corps of Engineers, the Environmental Protection Agency, the Department of Health and Human Services, and the Department of Transportation, each of whom shared their experiences in developing successful ADR programs.

The Department's Office for Equal Opportunity (OEO) provided training in basic and advanced mediation skills for OEO and personnel program officials and Equal Employment Opportunity (EEO) counselors. OEO also issued a directive to bureaus and offices providing guidance on the development and implementation of ADR pilot programs consistent with 29 CFR part 1614. Under this directive each bureau and office is to submit an ADR pilot program plan delineating specific actions to be taken to incorporate ADR techniques into the EEO complaints process.

The Department recently made consideration of the use of ADR in the resolution of discrimination complaints mandatory and has designated a Departmental EEO/ADR Coordinator and directed each bureau to designate a Bureau EEO/ADR Coordinator.

The Department designated the Bureau of Reclamation as a pilot bureau in FY–93 for the purpose of testing the effectiveness of mediation in the resolution of EEO complaints and administrative grievances. The Bureau has relied exclusively on contract neutrals to serve as mediators for all dispute referred for ADR. Mediation has also been utilized by Reclamation in other program areas, including resource management and contract administration. Reclamation is assessing the results of its mediation program to determine whether to expand its usage to other program areas.

The Department's Office of Hearings and Appeals has implemented ADR as an alternative to administrative litigation. The Board of Indian Appeals and the administrative law judges vested with authority for adjudicating Indian probate cases have encouraged the use of settlement agreements to resolve these matters. Under 43 CFR 4.207, administrative law judges have been authorized to effect compromise settlements in probate actions where the parties concerned agree to compromise and where the judge establishes that all necessary conditions have been met. The Board of Contract Appeals has been effectively implementing ADR processes over the last 2 years in its cases. At the time a case is docketed, the Board issues an order notifying the parties to the dispute of the availability and benefits of ADR. Through actively promoting ADR as a viable alternative, the Board has settled a majority of its cases without the need to conduct a hearing.

The Bureau of Land Management (BLM) has recognized the benefits of ADR techniques, and a presentation on the topic was made at the Bureau's Solid Minerals Conference in Albuquerque, New Mexico, in April 1993. The BLM, in partnership with the Bowie State University's Center for Alternative Dispute Resolution, has provided basic Conflict Management ADR training to Personnelists and EEO practitioners, as well as to key management officials. The BLM will continue to work with the Center for ADR and other outside resources to provide training during Fiscal Year 1994.

The Minerals Management Service (MMS) has a rich history of ADR. The MMS's examples include (1) a process targeted at settling outstanding and contentious mineral royalty claims which has reduced appeals and litigation and increased royalty collections, and (2) more than a decade of conflict resolution training for offshore minerals management personnel and establishment and conduct of a joint review panel for constituent review of environmental documents.

The Bureau of Mines (USBM) has recognized the benefits of ADR techniques and has provided training to principal officials in the use of ADR techniques. Training was provided by a contractor for the Directorates of the Bureau on orientation to ADR techniques; Information and Analysis on September 28, 1993; Finance and Management, December 8, 1993; and Research on January 11, 1994. Training will also be provided to EEO Counselors by the EEO Staff and the Federal Mediation and Conciliation Service in June 1994. The Bureau plan to continue the use of ADR for EEO complaints and to expand it to other types of disputes. The EEO Office has used mediation and negotiation for EEO complaints in the precomplaint stage and also the formal complaint stage.

BILLING CODE 4310–79–M

Bureau of Land Management

[NV–930–04–4210–04; N 57154]

Realty Action; Termination of Segregation and Opening Order, Nevada

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This notice terminates a segregation of public land which is no longer necessary. The land will be opened to operation of the public lands laws generally, including the mining laws.

EFFECTIVE DATE: The segregation will be terminated and the land opened upon publication of this notice in the **Federal Register**.

SUPPLEMENTARY INFORMATION: The following described public land in Douglas County, Nevada, was proposed for disposal by exchange under Section 206 of the Federal Land Policy and Management Act of October 21, 1976 (43 U.S.C. 1716):

Mount Diablo Meridian, Nevada

T. 11 N., R. 21 E.
Sec. 4: SW¼NW¼SE¼, NW¼SW¼SE¼, N½SW¼SW¼SE¼, N½S½SW¼SE¼, S½SW¼SW¼SW¼SE¼, W½SW¼SE¼SW¼SW¼SE¼;
aggregating approximately 29.0625 acres;

as announced in the Notice of Realty Action published on page 18414 of the April 9, 1993, **Federal Register**. This land is no longer involved in the land exchange proposal. Therefore, the segregation of this land from appropriation under the public land laws, including the mining laws, is now terminated upon publication of this notice in the **Federal Register**. Simultaneously, the land is again open to the operation of the public land laws, including the mining laws.

FOR FURTHER INFORMATION CONTACT: More detailed information is available from the Area Manager or Steep Weiss, Bureau of Land Management, Walker Resource Area, 1535 Hot Springs Road, suite 300, Carson City, Nevada 89706; telephone (702) 885–6000.

Dated: June 1, 1994.

John Matthiessen,

Area Manager, Walker Resource Area.

BILLING CODE 4310–HC–M

[NV–930–4210–05; N–48693]

Notice of Realty Action: Lease/Purchase for Recreation and Public Purposes

AGENCY: Bureau of Land Management.

ACTION: Recreation and public purpose lease/purchase.

SUMMARY: The following described public land in Henderson, Clark County, Nevada has been examined and found suitable for lease/purchase for recreational or public purposes under the provisions of the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 *et seq.*). The Clark County School District proposes to use the land for a junior high school.

Mount Diablo Meridian, Nevada

T. 22 S., R. 63 E.,
Section 16: E½SE¼SE¼
Containing 20 acres, more or less.

The land is not required for any federal purpose. The lease/purchase is consistent with current Bureau planning for this area and would be in the public interest. The lease/patent, when issued, will be subject to the provisions of the Recreation and Public Purposes Act and applicable regulations of the Secretary of the Interior, and will contain the following reservations to the United States:

1. A right-of-way thereon for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

2. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove such deposits from the same under applicable law and such regulations as the Secretary of the Interior may prescribe and will be subject to:

1. Easements in favor of the City of Henderson for roads, public utilities and flood control purposes as follows. 30 feet in width along the north boundary, 50 feet in width along the east boundary, 40 feet in width along the south boundary, 30 feet in width along the west boundary, together with the following radius curves: NW corner having a 15 foot radius, NE corner having a 25 foot radius, SE corner having a 54 foot radius, and the SW corner having a 20 foot radius.

2. Those rights for power transmission line purposes which have been granted to Nevada Power Company by Permit No. N–33079 the under the Act of October 21, 1976 (43 U.S.C. 1761).

Detailed information concerning this action is available for review at the office of the Bureau of Land Management, Las Vegas District, 4765 W. Vegas Drive, Las Vegas, Nevada.

Upon publication of this notice in the **Federal Register**, the above described land will be segregated from all other forms of appropriation under the public land laws, including the general mining laws, except for lease/purchase under the Recreation and Public Purposes Act, leasing under the mineral leasing laws and disposals under the mineral disposal laws.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, Las Vegas District, P.O. Box 26569, Las Vegas, Nevada 89126. Any adverse comments will be reviewed by the State Director.

In the absence of any adverse comments, the classification of the land described in this Notice will become effective 60 days from the date of publication in the **Federal Register**. The lands will not be offered for lease/purchase until after the classification becomes effective.

Dated: June 1, 1994.

Gary Ryan,

Acting District Manager, Las Vegas, NV

BILLING CODE 4310–HC–M

National Park Service

Delaware and Lehigh Navigation Canal National Heritage Corridor Commission Meeting

AGENCY: National Park Service, Interior.

ACTION: Notice of meeting.

SUMMARY: This notice announces an upcoming meeting of the Delaware and Lehigh Navigation Canal National Heritage Corridor Commission. Notice of this meeting is required under the Federal Advisory Committee Act (Public Law 92–463).

Meeting Date and Time: Thursday, June 23, 1994; 1:30 p.m. until 4:30 p.m.

Address: Kemerer Museum of Decorative Arts, 427 North New Street, Bethlehem, PA 18018.

The agenda for the meeting will focus on implementation of the Management Action Plan for the Delaware and Lehigh Canal National Heritage Corridor and State Heritage Park. The Commission was established to assist the Commonwealth of Pennsylvania and its political subdivisions in planning and implementing an integrated strategy, for protecting and promoting cultural, historic and natural resources. The Commission reports to the Secretary of the Interior and to Congress.

SUPPLEMENTARY INFORMATION: The Delaware and Lehigh Navigation Canal National Heritage Corridor Commission was established by Public Law 100–692, November 18, 1988.

FOR FURTHER INFORMATION CONTACT: Executive Director, Delaware and Lehigh Navigation Canal National Heritage Corridor Commission, 10 E. Church Street, room P–208, Bethlehem, PA 18018, (610) 861–9345.

Karen Wade,

Acting Regional Director, Mid-Atlantic Region.

BILLING CODE 4310–70–M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–55 (Sub-No. 485)]

CSX Transportation, Inc.—Abandonment—Between Lynchburg and Sumter in Lee and Sumter Counties, SC

AGENCY: Interstate Commerce Commission.

ACTION: Notice of findings.

SUMMARY: The Commission has issued a certificate authorizing CSX Transportation, Inc. (CSXT) to abandon 16.01 miles of rail line between milepost AK–313.43 at Lynchburg and milepost AK–329.44 at Sumter, which is located in Lee and Sumter Counties, SC. The abandonment certificate will become effective July 10, 1994, unless the Commission finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer and any requests for a public use condition must be filed with the Commission and CSXT no later than 10 days from the date of publication of this Notice. The following notation shall be typed in bold face in the lower left-hand corner of the envelope containing the offer: "Office of Proceedings, AB–OFA." Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

Dated: June 7, 1994.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 94–14340 Filed 6–9–94; 12:48 pm]

BILLING CODE 7035–01–P

[Finance Docket No. 32517]

Pickens Railway Corporation, Inc.—Acquisition and Operation Exemption—Pickens Railroad Company

Pickens Railway Corporation, Inc., a noncarrier, has filed a notice of exemption to acquire and operate approximately 8 miles of rail line from Pickens Railroad Company. The line extends between milepost 0.0 at Pickens and milepost 8.0 at Easley, in Pickens County, SC. The transaction was expected to be consummated after May 30, 1994, the exemption's effective date.

Any comments must be filed with the Commission and served on: R. Murray Hughes, P. O. Box 1389, 208 Garvin Street, suite G, Pickens, SC 29671.

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: June 7, 1994.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary

[FR Doc. 94–14284 Filed 6–10–94; 8:45 am]

BILLING CODE 4510–23–M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Nuclear Waste; Meeting

The Advisory Committee on Nuclear Waste (ACNW) will hold its 65th meeting on Wednesday and Thursday

June 29 and 30, 1994, in Room P-110, 7920 Norfolk Avenue, Bethesda, Maryland.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Wednesday, June 29, 1994—8:30 a.m until 6 p.m.

Thursday, June 30, 1994—8:30 a.m. until 6 p.m.

During this meeting the Committee plans to consider the following:

A. *Proposed Amendments to 10 CFR part 60, on Disposal of High-Level Radioactive Wastes in Geologic Repositories—Design Basis Events for the Geologic Repository Operations Area*—Review the proposed amendments with emphasis on the definition of "important to safety" for certain structures, systems, and components.

B. *Problems in the Siting of the Proposed Low-Level Radioactive Waste Disposal Facility at Martinsville, IL*—Discuss the failed attempt to site a LLW disposal facility at Martinsville, IL with participants in the process, with a focus on lessons learned from the experience.

C. *Substantially Complete Containment*—Hear a briefing by the NRC staff on this topic; interest lies in exploring current views on reliance placed on geologic versus engineered barriers in an HLW repository.

D. *Tectonics of the Proposed HLW Repository at Yucca Mountain*—Hear a briefing from representatives of the State of Nevada on its concerns related to and investigations of tectonic and magmatic processes at the proposed Yucca Mountain site.

E. *Update on the Systematic Regulatory Analysis*—Discuss with the NRC staff the current status of the systematic regulatory analysis and current products from this effort such as the License Application Review Plan and the Standard Format and Content Guide for an HLW Repository.

F. *Compatibility and Adequacy of Agreement States Programs*—Discuss among the ACNW issues associated with the disposal of LLW in Agreement States.

G. *Preparation of ACNW Reports*—Prepare ACNW reports on issues considered during this and previous meetings.

H. *Future Activities*—Discuss topics proposed for consideration by the full Committee and working groups.

I. *Miscellaneous*—Discuss miscellaneous matters related to the conduct of Committee activities and organizational activities and complete discussion of matters and specific issues that were not completed during previous meetings, as time and availability of information permit.

Procedures for the conduct of and participation in ACNW meetings were published in the **Federal Register** on June 6, 1988 (53 FR 20699). In accordance with these procedures, oral or written statements may be presented by members of the public, electronic recordings will be permitted only during those portions of the meeting that are open to the public, and questions may be asked only by members of the Committee, its consultants, and staff. Persons desiring to make oral statements should notify the ACNW Executive Director, Dr. John T. Larkins, as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture, and television cameras during this meeting may be limited to selected portions of the meeting as determined by the ACNW Chairman. Information regarding the time to be set aside for this purpose may be obtained by contacting the ACNW executive Director prior to the meeting. In view of the possibility that the schedule for ACNW meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACNW Executive Director if such rescheduling would result in major inconvenience.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by contacting the ACNW Executive Director, Dr. John T. Larkins (telephone 301–492–4516), between 7:30 a.m. and 4:15 p.m. e.s.t.

Dated: June 7, 1994.

Andrew L. Bates,

Advisory Committee Management Officer.

[FR Doc. 94–14257 Filed 6–10–94; 8:45 am]

BILLING CODE 7590–01–M

Organization of Agreement State Managers' Workshop and Public Meeting on Rulemakings

AGENCY: Nuclear Regulation Commission.

ACTION: Notice of meeting.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) staff plans to hold a public workshop for managers of the Organization of Agreement States. The Commission has directed the staff to review and prepare for the Commission's consideration recommendations to improve NRC's Agreement States Program to assure adequate protection of the public health and safety. In this process, the Commission staff has solicited the opinions of those with historical backgrounds in the Agreement State program and representatives of the Agreement States. Topics for discussion at the upcoming workshop include: Open Discussion of Agreement State Issues; New Policy Statement of NRC Agreement States Program; Integrated Materials Performance Evaluation Program; Sealed Source and Device Review; Federal Advisory Committee Act Update; Medical Management Plan; Allegations Received Against Radiation Control Programs; National Data Base for Events Reporting; and OAS Task Force on National Event Data Base. A Session on NRC Rulemakings will be held on the afternoon of July 12, 1994.

DATES: The workshop will be held on July 12–14, 1994. The times are:

Tuesday, July 12, 1994—8:30 a.m.–5 p.m.

Wednesday, July 13, 1994—8:30 a.m.–5 p.m.

Thursday, July 14, 1994—8:30 a.m.–12 noon

ADDRESSES: The workshop will held at the Washington Dulles Marriott Suites, located at 13101 Worldgate Drive, Herndon, Virginia 22070 (703/709–0400).

FOR FURTHER INFORMATION CONTACT: Rosetta Virgilio, Office of State Programs, Mail Stop 3–D–23, U.S. Nuclear Regulatory Commission, Washington, DC 20555 Telephone 301/504–2307.

CONDUCT OF THE MEETING: The workshop will be conducted in a manner that will expedite the orderly conduct of business. A transcript of the workshop will be available for inspection, and copying for a fee, at the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC 20555 on or about September 15, 1994.

The following procedures apply to public attendance at the workshop:

1. Questions or statements will be entertained as time permits.
2. Seating will be on a first-come, first-served basis.

Dated at Rockville, Maryland this 7th day of June 1993.

For the Nuclear Regulatory Commission

Richard L. Bangart,

Director, Office of State Programs

BILLING CODE 7590–01–M

[Docket No. IA-94-011 and ASLBP No. 94-696-05-EA]

Establishment of Atomic Safety and Licensing Board

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register**, 37 F.R. 28710 (1972), and Sections 2.105, 2.700, 2.702, 2.714, 2.717 and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established in the following proceeding.

In The Matter of Dr. James E. Bauer
Enforcement Action IA 94-011

This Board is being established pursuant to the request of James E. Bauer, M.D., in response to an immediately effective order. On May 10, 1994, the Deputy Executive Director for Nuclear Materials Safety, Safeguards and Operations Support issued IA 94-011 to Dr. Bauer, entitled "Order Prohibiting Involvement in NRC-Licensed Activities (Effective Immediately)." 59 Fed. Reg. 25673, May 17, 1994. The Order prohibits Dr. Bauer from being named on any NRC license in any capacity and from otherwise performing licensed activities for a period of five years from the date of this order. For an additional two years, Dr. Bauer is required to notify the NRC of any involvement in licensed activities.

Dr. Bauer has been listed as the Radiation Safety Officer and sole authorized user on NRC license No. 37-28179-01 (license) issued to the Indiana Regional Cancer Center (Licensee) located in Indiana, Pennsylvania. By an order Modifying and Suspending License (Effective Immediately), issued November 16, 1993, the license has been modified to prohibit Dr. Bauer from engaging in activities under the license and to suspend the Licensee's authority to receive and use licensed material.

An order designating the time and place of any hearing will be issued at a later date.

All correspondence, documents and other materials shall be filed in accordance with 10 CFR 2.701. The Board consists of the following Administrative Judges:

G. Paul Bollwerk, Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555

Dr. Charles N. Kelber, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555

Dr. Peter S. Lam, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Issued at Bethesda, Maryland, this 6th day of June 1994.

B. Paul Cotter, Jr.,
Chief Administrative Judge Atomic Safety and Licensing Board Panel.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-34160; File No. SR-MSRB-94-5]

Self-Regulatory Organizations; Filing and Order Granting Accelerated Approval of Proposed Rule Change by the Municipal Securities Rulemaking Board Relating to Rule G-37 on Political Contributions and Prohibitions on Municipal Securities Business, and Rule G-8 on Recordkeeping

June 3, 1994.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 24, 1994, the Municipal Securities Rulemaking Board ("Board" or "MSRB") filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The purpose of the proposed rule change is to provide procedures for dealers to seek exemptive relief from rule G-37, in limited circumstances, and to clarify certain definitions in rules G-37 and G-8. The Board has requested accelerated approval of the proposed rule change to facilitate compliance with rule G-37. The Commission is publishing this notice to solicit comments on the propose rule change from interested persons. As discussed below, the Commission finds good cause for granting accelerated approval of the proposed rule change.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Board is filing the proposed rule change to amend rule G-37 concerning political contributions and prohibitions on municipal securities business, and rule G-8 concerning recordkeeping. The proposed rule change: (i) Provides procedures for dealers to seek exemptive relief from rule G-37's prohibition on business, in limited circumstances; and (ii) clarifies certain definitions in rules G-37 and G-8. The Board has requested accelerated approval of the proposed rule change to facilitate compliance with the rule.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Board included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In response to the Board's initial proposal on political contributions and prohibitions on municipal securities business and its rule G-37 filing with the Commission,[1] the Board received a number of comments recommending that the Board consider providing, in limited instances, a "good faith exemption" to the rule's prohibition on municipal securities business.[2] In light of these comments, the Board has determined to submit the proposed rule change.

A registered securities association or appropriate regulatory agency may exempt a dealer who is prohibited from engaging in municipal securities business with an issuer from such prohibition.

A number of commenters on rule G-37 have expressed concern that imposing a prohibition on municipal securities business may be unfair in certain limited situations when political contributions have been made.[3] For example, a disgruntled municipal finance professional may make a contribution purposely to injure the dealer, its management or employees. Also, a municipal finance professional eligible to vote for an issuer official may make a number of small contributions during an election cycle (*e.g.*, over four years) which, when consolidated, amount to slightly over the $250 *de minimis* exemption (*e.g.*, $255). In both examples, the contributions would trigger the prohibition on business under rule G-37(b), thereby prohibiting the dealer from engaging in municipal

[1] The Commission approved rule G-37 in Securities Exchange Act Release No. 33868 (April 7, 1994), 59 FR 17621. Rule G-37 became effective on April 25, 1994.

[2] The Board previously considered and rejected the inclusion of a good-faith exception to the rule. See Securities Exchange Act Release No. 33482 (January 14, 1994), 59 FR 3389.

[3] See rule G-37 approval order, *supra* note 1

securities business with the issuer for two years.

The Board recognizes that in certain circumstances, such as those discussed above, the rule's prohibition on business may be too harsh a consequence for truly inadvertent contributions or the contributions of disgruntled employees. Thus, the Board has determined to add new paragraph (i) to rule G–37 to establish a procedure whereby the National Association of Securities Dealers ("NASD") and the federal bank regulatory agencies (*i.e.*, the Office of Comptroller of the Currency, Federal Reserve Board, and Federal Deposit Insurance Corporation), upon application by a dealer subject to such association's or agency's inspection and enforcement authority, may exempt, conditionally or unconditionally, a dealer who is prohibited from engaging in municipal securities business from such prohibition.[4] In determining whether to grant such an exemption, the proposed rule change would require that the NASD and bank regulatory agencies consider, among other factors, whether:

(i) such exemption is consistent with the public interest, the protection of investors and the purposes of this rule; and

(ii) such dealer (A) prior to the time the contribution(s) which resulted in such prohibition was made, had developed and instituted procedures reasonably designed to ensure compliance with this rule; (B) prior to or at the time the contribution(s) which resulted in such prohibition was made, had no actual knowledge of the contribution(s); (C) has taken all available steps to cause the person or persons involved in making the contribution(s) which resulted in such prohibition to obtain a return of the contribution(s); and (D) has taken such other remedial or preventive measures, as may be appropriate under the circumstances.

The Board believes that a dealer that is subject to the prohibition on business should have to make a substantial effort to be exempted from that prohibition. The proposed rule change would require the dealer to petition the NASD or appropriate bank regulatory agency to seek such an exemption and to provide sufficient evidence to justify an exemption. In making a determination concerning an exemption, the NASD or appropriate bank regulatory agency would then review the facts and circumstances presented by the dealer, as well as the factors set forth in the proposed rule change. The Board would expect that this prohibition exemption not be routinely requested by dealers and that exemptions would be granted by the NASD and the bank regulatory agencies only in limited circumstances. The Board believes that the proposed rule change will offer relief from the prohibition on business in appropriate circumstances without sacrificing the rule's purpose and intent, *i.e.*, to ensure that the high standards and integrity of the municipal securities industry are maintained, to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to perfect a free and open market, and to protect investors and the public interest. The Board will seek information from the NASD and bank regulatory agencies regarding the granting of any exemptions in order to monitor the implementation of this provision, and to determine if any changes are necessary.

[4] The NASD and the bank regulatory agencies are statutorily authorized to inspect for compliance with, and to enforce Board rules. See Sections 15A(b)(7), 15B(c)(5), and 15B(c)(7) of the Act: [15 U.S.C. §§ 78o–3(b)(7), 78o–4(c)(5), 78o–4(c)(7)].

Definition of "Official of an Issuer"

An "official of an issuer" is defined in rule G–37(g)(vi) as any incumbent, candidate or successful candidate for elective office of the issuer, which office is directly or indirectly responsible for, or can influence the outcome of, the hiring of a dealer for municipal securities business. The definition is intended to include any state or local official or candidate (or successful candidate) who has influence over the awarding of municipal securities business, including certain state-wide executive or legislative officials.

The Board, however, was concerned that because the definition focuses on "an elective office of the issuer," it did not clearly include certain other officials. For example, a state may have certain issuing authorities whose boards of directors are appointed by the governor. Although the governor is an official with influence over the awarding of municipal securities business, the governor, in this illustration, is not an incumbent or candidate for "elective office of the issuer" (*i.e.*, the state authority). Thus, a contribution to the governor would not prohibit a dealer from engaging in business with the state authority. The Board intended to include the governor as an official of the issuer in such circumstances and, therefore, has determined to amend the definition to clarify its intent.

The amended definition of official of an issuer includes any incumbent or candidate "for any elective office of a state or of any political subdivision, which office has authority to appoint any official(s) of an issuer, as defined in [paragraph (g)(vii)(A) of rule G–37]."

Definition of "municipal securities business" does not include competitive financial advisory activities.

The definition of "municipal securities business" in rule G–37(g)(vii) includes certain dealer activities, such as acting as negotiated underwriters, financial advisors and consultants, placement agents, and negotiated remarketing agents. In its rule G–37 filing with the Commission, the Board noted that the rule would not prohibit dealers from acting as competitive underwriters or competitive remarketing agents.[5] The Board is amending this definition to clarify that the rule also would not prohibit dealers from engaging in competitive advisory activities.

Only associated persons come under definition of "municipal finance professional."

The Board determined to amend the definition of "municipal finance professional," as set forth in rule G–37(g)(iv), to clarify that only associated persons would fall within the rule's four categories of municipal finance professionals.[6]

Dealers shall send G–37 Reports to the Board by certified or registered mail or by some other means that provides a record of sending.

Rule G–37(e)(i) currently requires dealers to submit quarterly reports to the Board on Form G–37 concerning political contributions and municipal securities business. The Board is concerned, however, that some confusion could arise over whether particular reports were actually sent and/or lost in the mail. To obviate any such problem, the Board is amending this paragraph to require that dealers send such reports to the Board "by certified or registered mail, or some other equally prompt means that provides a record of sending." This will ensure that dealers have a record of all reports submitted to the Board.

The Board also is amending this paragraph to correct an erroneous cross-reference to rule G–8, which requires dealers to submit to the Board reports on contributions that are required to be recorded pursuant to rule G–8(a)(xvi).

The rule requires, among other things, that dealers disclose the name, company, role and compensation arrangement of any person, other than a municipal finance professional, employed by the dealer to obtain or retain business.

[5] *See supra* note 2.

[6] "Associated persons" is defined in Sections 3(a)(18) and 3(a)(32) of the Act: [15 U.S.C. 78c(a)(18), (32)].

Paragraph (e)(ii) of rule G–37 requires that the reports referred to in paragraph (e)(i) include, among other things, a list of issuers with which the dealer has engaged in municipal securities business, along with the type of municipal securities business and the name, company, role, and compensation arrangement of any person employed by the dealer to obtain or retain municipal securities business with such issuers. The Board intended that this provision apply to persons such as outside consultants that are not municipal finance professionals associated with the dealer. Thus, the amendment clarifies that this requirement does not require the dealer to disclose the name of such municipal finance professionals.

Dealers complying with Commission Rule 17a–3 must maintain the information and records required by Board rule G–37.

Board rule G–8(f) allows dealers, other than bank dealers, who are in compliance with Commission Rule 17a–3, on recordkeeping, to be deemed in compliance with Board rule G–8, on recordkeeping. However, the rule provides that specific information required by rule G–8 must be maintained, even though such information is not required by Rule 17a–3. The Board is amending rule G–8(f) to clarify that dealers complying with Rule 17a–3 are still required to maintain the information and records required by Board rule G–37.[7]

The Board believes that the proposed rule change is consistent with Section 15B(b)(2)(C) of the Act, which provides that the Board's rules shall be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in municipal securities, to remove impediments to and perfect the mechanism of a free and open market in municipal securities, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The board does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act, since it will apply equally to brokers, dealers, and municipal securities dealers.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Board has requested that the Commission find good cause, pursuant to Section 19(b)(2) of the Act, for approving the proposed rule change prior to the thirtieth day after publication of the notice of filing in the **Federal Register**. The Board believes that accelerated approval of the proposed rule change is necessary to facilitate dealer compliance with rules G–37 and G–8.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the Board, and, in particular, with Sections 15B(b)(2) (C) and (G) of the Act.[8] Section 15B(b)(2)(C) authorizes the MSRB to adopt rules designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating transactions in municipal securities, to remove impediments to and perfect the mechanism of a free and open market in municipal securities and, in general, to protect investors and the public interest. Section 15B(b)(2)(G) authorizes the MSRB to adopt rules that prescribe the records to be made and kept by municipal securities dealers and the periods for which such records shall be preserved.

The Commission received several comments to rule G–37 recommending that the rule provide an exemption process, based on the dealer's compliance procedures and supervision, for certain inadvertent violations.[9] The Commission approved the rule and recommended the MSRB separately address these concerns by filing a proposed rule change that provides an exemption process for inadvertent violations. The MSRB's proposal adequately addresses these concerns.[10] The proposal provides procedures for dealers to obtain exemptive relief from rule G–37's prohibition on business where, for example, covered persons inadvertently make contributions that slightly exceed the *de minimis* exemption provided by the rule. The proposal's exemptive relief is based on the dealers' supervision of covered persons, compliance procedures concerning rule G–37, and corrective and remedial action concerning inadvertent violations. The Commission expects that dealers will apply for exemptive relief only in certain, limited situations. Thus, the proposal provides an exemptive process to rule G–37 without providing dealers a "loop-hole" that would frustrate the rule's purpose to, among other things, ensure that high standards and integrity of the municipal securities industry are maintained.

The proposal also clarifies provisions of rules G–37 and G–8. Amendments to rule G–37's definitions of "official of an issuer," "municipal securities business," and "municipal finance professional," as well as amendments to rules G–37 and G–8 disclosure and recordkeeping requirements will facilitate compliance with the rules.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of the notice of filing in the **Federal Register**. Accelerated approval is necessary and appropriate to facilitate compliance with rules G–37 and G–8.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the principal office of the Board. All submissions should refer to File No. SR–MSRB–94–5 and should be submitted by July 5, 1994.

---

[7] In addition, the board is amending rule G–8(f) to include appropriate cross-references to rules G–27 on supervision, and G–36 on delivery to the Board of officials statements and advance refunding documents. This amendment, like the proposed rule change, clarifies that dealers complying with Rule 17a–3 must still maintain the information and records required by rules G–27 and G–36. These cross-references were inadvertently omitted when the Board previously amended these rules.

[8] Sections 15B(b)(2)(C), (G); [15 U.S.C. 78o–4(b)(2)(C), (G)].

[9] See *Supra* note 1

[10] Because an exemption to rule G–37 is appropriate in very limited circumstances,

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[11] that the proposed rule change be, and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority, 17 U.S.C. 200.30–3(a)(12).

Jonathan G. Katz,

Secretary.

[Release No. 34–34161; File No. SR–MSRB–94–6]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by the Municipal Securities Rulemaking Board Relating to Interpretation of Rule G–37 on Political Contributions and Prohibitions on Municipal Securities Business

June 6, 1994.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 24, 1994, the Municipal Securities Rulemaking Board ("Board" or "MSRB") filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The purpose of the proposed rule change is to provide interpretative guidance concerning rule G–37 on political contributions and prohibitions on municipal securities business. The Board, pursuant to Section 19(b)(3)(A) of the Act, filed the proposal as constituting a stated policy, practice, or interpretation with respect to the meaning, administration, or enforcement of an existing rule of the Board. This renders the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Board is filing the proposed rule change to provide interpretative guidance concerning rule G–37 on political contributions and prohibitions on municipal securities business.[1]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Board included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

On April 7, 1994, the Commission approved Board rule G–37, concerning political contributions and prohibitions on municipal securities business.[2] The Board has, and continues to receive, numerous inquiries concerning the application of the rule. In order to assist the municipal securities industry and, in particular, brokers, dealers and municipal securities dealers in understanding and complying with the provisions of the rule, the Board has determined to publish this notice of interpretation which provides, in question-and-answer format, general guidance on rule G–37. The Board will continue to monitor the application of rule G–37, and, from time to time, will publish additional notices of interpretations, as necessary.

The Board believes that the proposed rule change is consistent with Section 15B(b)(2)(C) of the Act, which provides that the Board's rules shall be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in municipal securities, to remove impediments to and perfect the mechanism of a free and open market in municipal securities, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

Because the proposed rule change would apply equally to all brokers, dealers and municipal securities dealers, the Board does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of rule 19b-4 thereunder because the rule change constitutes a stated policy, practice, or interpretation with respect to the meaning, administration, or enforcement of an existing rule of the Board. At any time within 60 days of the filing of such rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the principal office of the Board. All submissions should refer to File No. SR–MSRB–94–6 and should be submitted by July 5, 1994.

For the Commission by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Jonathan G. Katz,

Secretary.

DEPARTMENT OF TRANSPORTATION

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended June 3, 1994

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et. seq.). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: 49588.

Date Filed: June 1, 1994.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: June 29, 1994.

Description: Application of Air Transport International, Inc., pursuant to section 401(h) of the Act, requests a disclaimer of jurisdiction or, in the alternative, approval of the transfer of its certificates of public convenience and necessity to Air Transport International Limited Liability Company. The transfer of certificates from ATI to ATI LLC is part of a corporate restructuring intended to take advantage of tax and business-related benefits offered by the relatively new limited liability company organizational structure.

Docket Number: 49589.

Date Filed: June 2, 1994.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: June 30, 1994.

Description: Application of Aeroejecutivo, S.A. de C.V., pursuant to section 402 of the Act and subpart Q of the Regulations, applies to amend its foreign air carrier permit issued to engage in scheduled foreign air transportation of persons, property and mail between points in Mexico and points in the United States, and subject to applicable regulations of the Department, between points in the United States and other points worldwide.

Phyllis T. Kaylor,

Chief, Documentary Services Division.

BILLING CODE 4910–62–P

Federal Aviation Administration

RTCA, Inc.; New Document Releases

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C., Appendix I), notice is hereby given for the release of the following new documents:

RCRA DO–221 *Guidance and Recommended Requirements For Airport Surface Movement Sensors,* provides recommended standards for both sensor and system characteristics. The primary purpose for these sensors is to operate stop bars located on taxiways which provide entrance to low visibility runways. The sensors may also be used for other low visibility functions such as taxiway light sequencing, runway exiting notification and presence detection. This document provides guidance to airport system designers, manufacturers, installers and user. The cost of DO–221 is US$50.00 for U.S./Canada/Mexico and US$65.00 for all other countries, plus applicable shipping and handling charges.

RTCA DO–222 *Guidelines on AMS(R)S Near-Term Voice Implementation and Utilization,* contains operational guidelines and recommendations for the implementation and utilization of Aeronautical Mobile Satellite (Route) Services, voice communication functions in the near-term (circa 1993–1996) air traffic environment. It presents a system-level view of how satellite voice services can be implemented and used in the Air Traffic Services (ATS) and Aeronautical Operational Control (AOC) environments inclusive of aircraft installation requirements, ground infrastructure requirements and available AMS(R)S services. This document defines the functions and performance needed to facilitate the development, implementation, certification and operational use of satellite voice in an environment where satellite voice communication is not yet a required capability for air navigation. It uses as its basis the existing standards for satellite avionics and ground equipment. It should be useful to designers, manufacturers, installers and operators of equipment used in AMSS voice service. The cost of DO–222 is US$60.00 for U.S./Canada/Mexico and US$75.00 for all other countries, plus applicable shipping and handling charges.

Dave Ford,

Designated Officer

BILLING CODE 4910–13–M

Approval of Record of Decision (ROD) for a Mitigated Finding of No Significant Impact (FONSI); Greater Rockford Airport, Rockford, IL

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of availability.

SUMMARY: The Federal Aviation Administration (FAA) announces that on June 3, 1994, it approved the Mitigated FONSI/ROD on the proposed development at Greater Rockford Airport, Rockford, Illinois. Major development items, proposed to be completed over the next 5 to 10 years, are depicted on the Airport Layout Plan (ALP).

EFFECTIVE DATE: The effective date of the FAA's approval of the Mitigated FONSI/ROD is June 3, 1994.

FOR FURTHER INFORMATION CONTACT: Melissa Wishy, Community Planner, Federal Aviation Administration, Chicago Airports District Office, 2300 East Devon Avenue; Des Plaines, Illinois, 60018, (708) 294–7524.

SUPPLEMENTARY INFORMATION: The FAA approved the Mitigated FONSI/ROD for proposed development at Greater Rockford Airport. Below is a listing of major, associated and indirect development projects. This listing includes United Parcel Service's (UPS) recent announcement to initiate a cargo hub facility at the airport.

1. Develop the midfield area for aviation-related industrial users.
2. Expand the existing cargo apron and buildings west of the existing terminal building to accommodate a minimum of 26 cargo aircraft.
3. Extend Runway 7/25 to a length of 10,000 feet by constructing a 3,500-foot southwesterly extension with parallel and connecting taxiways and associated lighting and navigation aids. This would include the installation of a CAT II Instrument Landing System (ILS) for Runway 7.
4. Relocate approximately 12,000 feet of Belt Line Road and 9,300 feet of Kishwaukee Road.
5. Expand the existing terminal building and auto parking lot and upgrade the existing airport entrance roadway.
6. Construct a general aviation apron and T-hangars.
7. Close Runway 13/31
8. Remove miscellaneous support buildings.
9. Construct a new 4,000-foot general aviation visual approach runway, parallel to and 5,100 feet southeast of existing Runway 7/25, with associated taxiways and instrumentation
10. Construct and realign various taxiways parallel to Runway 1/19. The majority of the realignment work proposed is adjacent to and west of the approach end of Runway 19.

11. Implement actions recommended in the 1993 Master Drainage/Stormwater Management Plan.

12. Implement actions recommended in the updated Noise Compatibility Plan.

13. Acquire approximately 1,100 acres of land for airfield development. In addition to this acquisition, is the relocation of up to 28 residential dwellings (for noise and floodway mitigation), of which only eleven are considered to be noise impacted and must be acquired and residents relocated prior to the start of any operation resulting from the Proposed Action Alternative. The remaining residential dwellings would be acquired for purposes of airfield development and floodway mitigation. Those dwellings identified as floodway mitigation can be acquired either in fee-simple or through restrictive covenant. (Updated)

14. Compensate for wetland impacts caused by the development of the Proposed Action Alternative through the creation of approximately 25 acres of new wetlands.

15. An additional 1,500 flights annually beyond those originally forecasted but with an greater number of stage three aircraft. This is based on UPS's proposal to initiate an air cargo operation at Greater Rockford Airport.

The FAA issued a **Federal Register** Notice on April 22, 1993 announcing its intent to prepare an Environmental Document (possible Environmental Impact Statement) and to hold a May 26, 1993 scoping meeting. At the scoping meeting no significant impacts were identified. Some concerns were expressed over possible noise, floodplain and wetland impacts. The airport sponsor indicated that any impacts would be mitigated below the level of significance as an integral part of the development.

The FAA issued a subsequent **Federal Register** Notice on February 17, 1994 announcing the availability of the Draft Environmental Document and provided additional opportunity for scoping comments for the refined listing of the major, associated and indirect development projects, incorporating items scoped originally and those newly identified as part of the UPS proposed development. Notice was also given for a March 22, 1994 public hearing with written comments being received until April 6, 1994. Based on the analysis found in the Final Environmental Assessment and the results of the public hearing, the FAA published a May 2, 1994 **Federal Register** Notice that it intended to issue a Mitigated FONSI/ROD for the proposed development depicted on the Airport Layout Plan. The FAA received a letter from the Illinois Department of Agriculture (IDOA) stating their concerns with respect to farmland impacts. The FAA addressed IDOA's concerns in a June 2, 1994 letter. On June 3, 1994, the FAA approved the Record of Decision (ROD).

A copy of the Mitigated FONSI/ROD is available for review at the FAA-Chicago Airports District Office (address identified above). Copies of these documents will also be available for review locally at locations which have not yet been determined. These locations will be specified in a Public Notice or upon request of the Chicago Airports District Office (telephone number identified above).

Questions may be directed to the individual named above under the heading, FOR FURTHER INFORMATION CONTACT.

Issued in Des Plaines, Illinois on June 6, 1994.

Louis H. Yates,

Manager, Chicago Airports District Office, FAA, Great Lakes Region.

BILLING CODE 4910–13–M

Aviation Rulemaking Advisory Committee Meeting on Air Carrier Operations

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Notice of meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of the Federal Aviation Administration Aviation Rulemaking Advisory Committee to discuss air carrier operations issues.

DATES: The meeting will be held on June 30, 1994, at 9 a.m.

ADDRESSES: The meeting will be held in the Management Operations Center, 10th floor, Headquarters, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC, 20591.

FOR FURTHER INFORMATION CONTACT: Mrs. Marlene Vermillion, Flight Standards Service, Air Transportation Division (AFS–200), 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267–8166.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C. App II), notice is hereby given of a meeting of the Aviation Rulemaking Advisory Committee to be held on June 30, 1994, at the Federal Aviation Administration Building, Management Operations Center, 10th Floor, 800 Independence Ave., SW., Washington, DC, 20590. The agenda for this meeting will include a final report from the Flight Crewmember Flight/Duty/Rest Requirements Working Group and status reports on the recommendations of the Fuel Requirements Working Group, the Autopilot Working Group, and the Controlled Rest on the Flight Deck Working Group. The agenda will also include an open discussion of possible future tasks. Attendance is open to the interested public but may be limited to the space available. The public must make arrangements in advance to present oral statements at the meeting or may present written statements to the committee at any time. Arrangements may be made by contacting the person listed under the heading FOR FURTHER INFORMATION CONTACT.

Sign and oral interpretation can be made available at the meeting, as well as an assistive listening device, if requested 10 calendar days before the meeting.

Issued in Washington, DC, on June 7, 1994.

Quentin J. Smith, Jr.,

Assistant Executive Director for Air Carrier Operations, Aviation Rulemaking Advisory Committee.

Federal Interagency Committee on Aircraft Noise Meeting Agenda

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of public forum.

SUMMARY: The FAA is issuing this notice to advise the public of a forum sponsored by the Federal Interagency Committee on Aircraft Noise (FICAN) to discuss aircraft noise issues.

DATES: The forum will be held on July 27, 1994, at the Richard B. Russel Building.

ADDRESSES: The forum will be held at 75 Spring Street, Atlanta, Georgia.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas Connor, Manager, Technology Division (AEE–100), Office of Environment and Energy, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591, fax (202) 267–5594.

SUPPLEMENTARY INFORMATION: Notice is hereby given of a public forum sponsored by the Federal Interagency Committee on Aircraft Noise (FICAN) to be held on July 27, 1994.

On March 16, 1993, representatives of the agencies that participated on the Federal Interagency Committee on Noise (FICON) met and agreed to establish a standing committee to be known as FICAN. The standing interagency committee will provide a permanent aviation noise research and development (R&D) forum, which will assist agencies in providing adequate forums for discussion of public and private proposals, identify needed research, and encouraging R&D efforts in these areas.

The agenda for the meeting will include:

- Presentation of current and future aircraft noise research projects that are funded by the Federal members of FICAN.
- Public concern/discussion and comment period.

Attendance is open to the public, but will be limited to the space available. The public must make arrangements by July 15, 1994, to present oral statements at the forum. Arrangements may be made by contacting the person listed under the heading **FOR FURTHER INFORMATION CONTACT.** Sign and oral interpretation can be made available at the meeting, as well as an assistive listening device, if requested 10 calendar days before the forum. Written comments should be addressed to the person listed under the heading **FOR FURTHER INFORMATION CONTACT.** Comments must be received on or before August 12, 1994.

Thomas Connor,

Manager Technology Division, Office of Environment and Energy.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review.

June 2, 1994.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220.

Office of Thrift Supervision (OTS)

OMB Number: 1550–0025.

Form Number: OTS Form 1314 (Canceled) and OTS Forms 1584 (New), 1585 (New) and 1589 (Replaces OTS Form 1314).

Type of Review: Revision.

Title: Purchase of Branch Office(s)/Transfer of Assets and/or Liabilities.

Description: Information provided to OTS is evaluated to determine whether the proposed assumption of liabilities and/or transfer of assets transactions complies with applicable laws, regulations and policy, and will not have an adverse effect on the risk exposure to the insurance fund.

Respondents: Businesses or other for-profit.

Estimated Number of Respondents: 135.

Estimated Burden Hours Per Respondent: 4 hours, 2 minutes.

Frequency of Response: Other (Information is submitted each time a transfer of assets and/or liabilities are proposed.)

Estimated Total Reporting Burden: 545 hours.

OMB Number: 1550–0037.
Form Number: OTS Form No. 1240.
Type of Review: Extension.
Title: Trust Powers Application.
Description: 12 CFR 550.2 requires a Federal savings association proposing to exercise fiduciary powers to file an application indicating which trust services it wishes to offer and providing sufficient information for the OTS to approve or deny the application.
Respondents: Businesses or other for-profit.
Estimated Number of Respondents: 9.
Estimated Burden Hours Per Respondent: 9 hours.
Frequency of Response: Other (Submission is required when Federal association proposes to offer fiduciary services.)
Estimated Total Reporting Burden: 81 hours.

OMB Number: 1550–0060.
Form Number: H-(b)11 Report.
Type of Review: Extension.
Title: Savings and Loan Holding Company Report H-(b)11.
Description: The H-(b)11 Report is used to determine a savings and loan holding company's adherence to the statutes, regulations and conditions of approval to acquire an insured institution and whether any of the company's activities would be injurious to the operation of any subsidiary savings association.
Respondents: Businesses or other for-profit.
Estimated Number of Respondents: 587.
Estimated Burden Hours Per Respondent: 15 hours, 30 minutes.
Frequency of Response: Quarterly.
Estimated Total Reporting Burden: 36,394 hours.

Clearance Officer: Colleen Devine (202) 906–6025, Office of Thrift Supervision, 2nd Floor, 1700 G. Street, NW., Washington, DC 20552.
OMB Reviewer: Gary Waxman (202) 395–7340, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,
Departmental Reports, Management Officer.

Customs Service

Public Meetings on Customs Automated Export System

AGENCY: U.S. Customs Service, Department of the Treasury.
ACTION: Notice of meetings.

SUMMARY: This notice announces the first of a series of public meetings on the development of the Automated Export System (AES) and advises the public of other locations where additional meetings on this subject will be scheduled at a later date. The purpose of these meetings is: (1) To give Customs managers an opportunity to provide the public with information related to the development of AES and (2) to give attendees an opportunity to ask questions, make suggestions, and provide Customs with informal ideas related to AES design and functionality. The first meeting will be held in Washington, DC on Friday, July 8, 1994, commencing at 9 a.m. in Hearing Room B of the Interstate Commerce Commission Building. Those planning to attend the meeting are requested to so notify Customs in advance. Notice of additional meetings to be held at other locations around the country will be published at a later date.

DATES: July 8, 1994, commencing at 9 a.m.

ADDRESSES: Interstate Commerce Commission Building, Hearing Room B, 12th Street and Constitution Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Lorna Finley, AES Development Team, U.S. Customs Service, 1301 Constitution Avenue, NW., room 7331, Washington, DC 20229. Phone: 202–927–0280; FAX: 202–927–0742.

SUPPLEMENTARY INFORMATION:

Background

On February 24, 1994, the Commissioner of Customs directed that Customs develop an Automated Export System (AES). This system is being developed as a cooperative team effort involving Customs and the Bureau of the Census.

Since AES is in the very early design stage, the AES Development Team intends to hold a series of public meetings for the purpose of: (1) Giving Customs managers an opportunity to provide the public with information related to the development of AES and (2) giving attendees an opportunity to ask questions, make suggestions, and provide Customs with informal ideas related to AES design and functionality. Each meeting will open with a short presentation on AES, past, present and future, and after this presentation the floor will be open to all attendees for general informal discussion of the AES program.

The first meeting will be held in Washington, D.C. on Friday, July 8, 1994, commencing at 9:00 a.m. in Hearing Room B of the Interstate Commerce Commission Building. In order to ensure that overcrowding does not result, persons planning to attend the meeting are requested to preregister by contacting Lorna Finley, AES Development Team, preferably by FAX (202–927–0742) or, for those without access to FAX equipment, by telephone (202–927–0280).

Additional public meetings on AES are planned for the following locations: Boston, Massachusetts; New York, New York; Houston, Texas; New Orleans, Louisiana; Seattle, Washington; Los Angeles, California; and Portland, Oregon. Appropriate notice will be published in the **Federal Register** when the dates, times and specific locations for these meetings have been established.

Dated: June 8, 1994.

Harvey B. Fox,
Director, Office of Regulations and Rulings.

Fiscal Service

[Dept. Circ. 570, 1993—Rev., Supp. No. 24]

Surety Companies Acceptable on Federal Bonds Termination of Authority: Omaha Property and Casualty Insurance Co.

Notice is hereby given that the Certificate of Authority issued by the Treasury to Omaha Property and Casualty Insurance Company, of Omaha, Nebraska, under the United States Code, Title 31, Sections 9304–9308, to qualify as an acceptable surety on Federal bonds is terminated effective today.

The Company was last listed as an acceptable surety on Federal bonds at 58, CFR 35809, July 1, 1993.

With respect to any bonds currently in force with Omaha Property and Casualty Insurance Company, bond-approving officers may let such bonds run to expiration and need not secure new bonds. However, no new bonds should be accepted from Company. In addition, bonds that are continuous in nature should not be renewed.

Copies of the Circular may be obtained from the Department of the Treasury, Financial Management Service, Funds Management Division, Surety Bond Branch, Washington, DC 20227, telephone (202) 874–7116.

Dated: May 25, 1994.

Charles F. Schwan III,
Director, Funds Management Division, Financial Management Service.

Patricia D. Batie,

Corporate Secretary.

[FR Doc. 94–14372 Filed 6–9–94; 11:23 am]

BILLING CODE 7050–01–M

LEGAL SERVICES CORPORATION BOARD OF DIRECTORS

Presidential Search Committee Meeting

TIME AND DATE: A meeting of the Legal Services Corporation Board of Directors Presidential Search Committee will be held on June 16–17, 1994. The meeting will commence at 9:00 a.m. on June 16, 1994, and at 8:30 a.m. on June 17, 1994.

PLACE: Washington Court Hotel, June 16th: Board Room Lounges, 750 First Street, N.W., Washington, D.C. 20001 June 17th: Montpelier Room, (202) 628–2100.

STATUS OF MEETING: *Open*, except that part of the meeting may be closed on both days pursuant to a vote, to be solicited prior to the meeting, of a majority of the Board of Directors. Should the aforementioned majority vote to close all or a portion of the meeting be obtained, the Committee will, with its Advisory Committee, interview and consider applicants for the position of President of the Corporation. The Committee, with its Advisory Committee, will also consider the qualifications of the applicants interviewed for the position of President of the Corporation, after which the Committee will, alone, consider the recommendations of its Advisory Committee and the qualifications of the applicants interviewed for the position of President of the Corporation and will settle on a recommendation to make to the Board of Directors as to selection of a candidate for the position. In addition, the Committee will consider for approval the minutes of the executive session(s) held on March 12, 1994, April 14, 1994, and May 14, 1994.[1] The closing will be authorized by the relevant sections of the Government in the Sunshine Act [5 U.S.C. Sections 552b(c)(2) and (6)], and the corresponding regulation of the Legal Services Corporation [45 C.F.R. Section 1622.5(a) and (e)]. The closing will be certified by the Corporation's General Counsel as authorized by the above-cited provisions of law. A copy of the General Counsel's certification will be posted for public inspection at the Corporation's headquarters, located at 750 First Street, N.E., Washington, D.C., 20002, in its eleventh floor reception area, and will otherwise be available upon request.

June 16, 1994 Agenda

MATTERS TO BE CONSIDERED:

OPEN SESSION:

1. Approval of Agenda
2. Approval of Minutes of May 14, 1994 Meeting.

CLOSED SESSION:

3. Approval of Minutes of March 12, 1994 Executive Session.
4. Approval of Minutes of April 14, 1994 Executive Session.
5. Approval of Minutes of May 14, 1994 Executive Session.
6. Interview and Consider, With Advisory Committee, Applicants for the Position of President of the Corporation.

OPEN SESSION:

8. Consider and Act on Motion to Recess the Executive Session Until June 17, 1994, at 8:30 a.m.

June 17, 1994 Agenda

MATTERS TO BE CONSIDERED:

CLOSED SESSION:

1. Interview and Consider, With Advisory Committee, Applicants for the Position of President of the Corporation.
2. Consider, With Advisory Committee, Qualifications of Applicants Interviewed for the Position of President of the Corporation.
3. Presidential Search Committee's Consideration of the Relative Merits of Applicants Interviewed for the Position of President of the Corporation and Selection of Candidate(s) to Recommend to the Board of Directors for the Position.

OPEN SESSION: (Resumed)

4. Consider and Act on Other Business.

CONTACT PERSON FOR INFORMATION:
Patricia D. Batie, Executive Office, (202) 336–8800.

Upon request, meeting notices will be made available in alternate formats to accommodate visual and hearing impairments.

Individuals who have a disability and need an accommodation to attend the meeting may notify Patricia Batie at (202) 336–8800.

Date Issued: June 9, 1994.

Patricia D. Batie,

Corporate Secretary.

LEGAL SERVICES CORPORATION BOARD OF DIRECTORS

Operations and Regulations Committee Meeting

TIME AND DATE: The Legal Services Corporation Board of Directors Operations and Regulations Committee will meet on June 19–20, 1994. The meeting will commence at 9:00 a.m. on both days. On June 19, 1994, it is anticipated the substantive portion of the open session (i.e., deliberation of agenda item number 5) will commence at approximately 10:00 a.m.

PLACE: Legal Services Corporation, 750 First Street, NE., Board Room, Washington, DC 20002, (202) 336–8800.

STATUS OF MEETING: *Open*, except that portion of the meeting may be closed pursuant to a vote to be solicited prior to the meeting, of a majority of the Board of Directors. Should the aforementioned majority vote to close all or a portion of the meeting be obtained, the Committee will hear the report of the General Counsel on litigation to which the Corporation is or may become a party. In addition, the Committee will consider and act on internal personnel and operational matters related to the Executive Office, the Office of the General Counsel, the Office of Administration, and the Office of Human Resources/Equal Opportunity, the four offices of the Corporation under the Committee's purview. Finally, the Committee will consider for approval the minutes of the executive session(s) held on May 13, 1994. The closing will be authorized by the relevant sections of the Government in the Sunshine Act [5 U.S.C. Sections 552b(c) (2), (6), and (10], and the corresponding regulation of the Legal Services Corporation [45 C.F.R. Section 1622.5 (a), (e), and (h)].[1] The closing will be certified by the Corporation's General Counsel as authorized by the above-cited provisions of law. A copy of the General Counsel's certification will be posed for public inspection at the Corporation's headquarters, located at 750 First Street, NE., Washington, DC 20002, in its eleventh floor reception area, and will otherwise be available upon request.

LEGAL SERVICES CORPORATION BOARD OF DIRECTORS

TIME AND DATE: The Legal Services Corporation Board of Directors will meet on June 18, 1994. The meeting will commence at 8:00 a.m.[2]

PLACE: Washington Court Hotel, 525 New Jersey Avenue, NW., Ballroom West, Washington, DC 20001, (202) 628–2100.

STATUS OF MEETING: *Open*, except that a portion of the meeting may be closed pursuant to a vote of a majority of the Board of Directors to hold an executive session. At the closed session, in accordance with the aforementioned vote, the Board will receive the recommendation of its Presidential Search Committee regarding selection of an applicant for the position of President of the Corporation, and may settle on an applicant to fill that position. The Board will also consider and vote to approve draft minutes of executive sessions held on November 8, 1993; December 6, 1993; April 15, 1994; and May 13, 1994. Further, the Board will consult with the Inspector General on internal personnel, operational and investigative matters. The Board will also consult with the President on internal personnel and operational matters. Finally, the Board will deliberate regarding internal personnel and operational matters. The closing will be authorized by the relevant sections of the Government in the Sunshine Act [5 U.S.C. Sections 552b(c) (2) (5), (6) and (7)], and the corresponding regulation of the Legal Services Corporation [45 CFR Section 1622.5 (a), (d), (e), and (f)]. The closing will be certified by the Corporation's General Counsel as authorized by the above-cited provisions of law. A copy of the General Counsel's certification will be posted for public inspection at the Corporation's headquarters, located at

[1] As to the Committee's consideration and approval of the draft minutes of the executive session(s) held on the above-noted date(s), the closing is authorized as noted in the **Federal Register** notice(s) corresponding to that/those Committee meeting(s).

[2] Note that the Board will convene at 8:30 a.m. briefly in open session, but primarily in closed session until approximately 9:00 a.m., at which time the Board will recess the meeting until approximately 11:00 a.m. the same morning. The brief recess will be taken to permit two of the Board's standing committees to meet.

750 First Street, NE., Washington, DC 20002, in its eleventh floor reception area, and will otherwise be available upon request.

MATTERS TO BE CONSIDERED:

OPEN SESSION:

1. Approval of Agenda.

Federal Highway Administration

23 CFR Parts 657 and 658

[FHWA Docket Nos. 90-9 and 92-15]

RIN 2125-AC86

Truck Size and Weight; Restrictions on Longer Combination Vehicles and Vehicles With Two or More Cargo-Carrying Units

AGENCY: Federal Highway Administration (FHWA), DOT

ACTION: Final rule.

SUMMARY: The Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) restricts the operation of longer combination vehicles (LCV's) on the Interstate Highway System and commercial motor vehicle (CMV) combinations with two or more cargo-carrying units on the National Network (NN) to the types of vehicles in use on or before June 1, 1991, subject to whatever State restrictions were in effect on that date. The ISTEA also includes special variances from the June 1 date for Alaska, Ohio, and Wyoming. As required by the ISTEA and based on information provided by the States, industry, and the public, the final rule lists applicable limitations by specific vehicle combination, by State, in effect on June 1, 1991, and does not further restrict the operation of any vehicle in lawful operation on or before June 1, 1991. This rule also establishes criteria for States to make minor adjustments to the list of limitations; defines certain terms, such as "nondivisible load," "beverage container," and "maxi-cube" vehicle; makes technical amendments to the list of federally-designated routes on the NN; and makes other minor changes to conform existing regulations to the ISTEA.

EFFECTIVE DATE: July 13, 1994

FOR FURTHER INFORMATION CONTACT: Mr. Thomas Klimek, Office of Motor Carrier Information Management, at (202) 366-2212 or Mr. Charles Medalen, Office of the Chief Counsel, at (202) 366-1354, Federal Highway Administration, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except legal Federal holidays.

SUPPLEMENTARY INFORMATION: Section 1023 of the ISTEA (Pub. L. 102-240, 105 Stat. 1914, 1951, codified at 23 U.S.C. 127(d)) required States, within 60 days of the date of enactment, to submit to the Secretary of Transportation for publication in the **Federal Register** 30 days thereafter a complete list of (1) all operations of LCV's being conducted as of June 1, 1991; (2) State laws, regulations, and any other limitations and conditions, including routing-specific and configuration-specific designations governing the operation of LCV's; and (3) a copy of such laws, regulations, limitations, and conditions. An LCV is defined in the ISTEA as any combination of a truck tractor and two or more trailers or semitrailers which operates on the Interstate System at a gross vehicle weight greater than 80,000 pounds.

Similarly, section 4006 of the ISTEA (49 U.S.C. app. 2311(j)) required the States to submit a complete list of State length limitations applicable to CMV combinations with two or more cargo-carrying units in effect on or before June 1, 1991. This section prohibits States from allowing the operation (by statute, regulation, permit, or other means) of CMV's with cargo-carrying unit lengths that exceed the length, by specific configuration, allowed and in actual, lawful operation on a regular or periodic basis (including continuing seasonal operation) on the NN in that State on or before June 1, 1991. The NN is defined in 23 CFR 658.5, and includes the Interstate System, with minor exceptions, and selected non-Interstate routes. The non-Interstate NN highways are listed in appendix A to part 658.

Sections 1023 and 4006 provide that no statute or regulation shall be included on the list submitted by a State or published by the Secretary merely on the grounds that it authorized, or could have authorized, by permit or otherwise, the operation of LCV or CMV combinations not in actual operation on a regular or periodic basis on or before June 1, 1991.

States may continue to issue special permits, in accordance with applicable State laws, for those vehicles and loads which cannot be easily dismantled or divided. A definition of such nondivisible loads is included in this final rule.

The ISTEA included three narrow exceptions to the June 1, 1991, freeze date. Wyoming would have been able to allow the operation of additional vehicle configurations not in actual operation on June 1, 1991, provided they were authorized by State law not later than November 3, 1992. No additional vehicles were authorized, however, and accordingly no additional vehicles are included in appendix C over those listed in the previous two rulemakings on this issue.

Ohio may allow LCV's with three cargo-carrying units of 28.5 feet each (not including the truck tractor) not in actual operation on June 1, 1991, to be operated within its boundaries on the 1-mile segment of Ohio State Route 7 which begins at, and extends south of, Exit 16 on the Ohio Turnpike. Alaska may continue to allow the operation of CMV's which were not in actual operation on June 1, 1991, but which were in actual operation prior to July 6, 1991.

A preliminary list of the information provided by the States in response to sections 1023 and 4006 was published in the **Federal Register** as a notice of proposed rulemaking (NPRM) on March 20, 1992 (57 FR 9900). A second proposed list of vehicles and restrictions, including corrections, clarifications, and additional material submitted to the docket in response to the NPRM was published as a supplemental notice of proposed rulemaking (SNPRM) on February 25, 1993 (58 FR 11450). In the NPRM the information provided by the States was organized into appendices C and D to part 658; in the SNPRM that information was combined into a single list of vehicles and restrictions and presented as a new appendix C. The format of the SNPRM has been retained for the final rule.

In response to publication of the SNPRM, 154 sets of comments were received from 136 separate entities. The vast majority of those comments deal with specifics on the information published in the SNPRM, and they will be discussed under individual topical headings. Four of the commenters, however, the American Trucking Associations, Inc. (ATA), the Wyoming Trucking Association, Inc. (WTA), the Alaska Department of Transportation and Public Facilities, and the Citizens for Reliable And Safe Highways (CRASH), provided comments concerning the rulemaking in general, and the philosophy used by the FHWA in presenting the information. These particular comments provide an opportunity for the FHWA to explain its approach.

The ISTEA stipulates that the "final list" of LCV operational requirements for each State be published in the **Federal Register** not later than 180 days after the date of enactment. That date was June 15, 1992. The lead comment by the CRASH in its docket submission was that publication of the final list by the FHWA was "long overdue." The CRASH contends that since the freeze does not take effect until the Secretary publishes the final list, the FHWA's delay in publication has prevented the law from taking effect. This in turn means that LCV's may today be operating on highways from which

Congress intended they be barred. It concludes this comment by stating that the review and correction process included with the final rule can be used to make corrections after publication of the rule.

As the FHWA stated in the Supplementary Information section of the SNPRM, the content of the States' original responses to the ISTEA request for LCV operational information covered the full range of what could be supplied, both in terms of items covered and volume of material. The diversity of the contents of the responses was so great that the FHWA determined that before any list could be finalized, increased uniformity both in terms of items covered and the type of information would be necessary. Thus, despite the likelihood that the statutory due date for a final rule might be missed, the FHWA determined that it was in the public's interest to publish a SNPRM soliciting further public comment on revisions to the initial list. The FHWA considered publishing a "final list" without this additional public procedure, but believed that the list published at that stage would have required numerous subsequent changes. We believe that the intent of Congress in including a correction process was to take care of relatively minor single-issue situations which may be discovered after publication of this final rule, not to make wholesale changes in a State's submission without good cause.

The WTA expressed concern that the interpretations used by the FHWA in developing this rule have involved many combination vehicles that, until passage of the ISTEA, were not considered by anyone to be LCV's. In a similar vein, Alaska commented that the SNPRM "seeks to significantly expand the ISTEA legislation and, we believe, severely constrains the states' abilities to legitimately regulate commercial traffic within each state."

This final rule implements two similar, yet separate provisions of the ISTEA. Section 1023, as discussed earlier, involves LCV's and includes an LCV definition. The scope of vehicle combinations covered by this section is narrow. The definition requires that an LCV combination include a truck tractor, which by previous congressional action (section 411(f), Surface Transportation Assistance Act (STAA) of 1982) is defined as a noncargo-carrying power unit and two or more trailers or semitrailers. The combination must operate on the Interstate System, and its gross vehicle weight must be in excess of 80,000 pounds. The vehicles listed in appendix C as a result of this statutory definition include only what might best be described as the "traditional" LCV's, that is, the "Rocky Mountain" and "Turnpike" Doubles and the "Triple." Under the definition of LCV provided by the ISTEA, it is true that the State of Alaska has no LCV's because it has no Interstate System mileage in the sense used in the ISTEA; that is, Alaska does not have Interstate System mileage designated under 23 U.S.C. 103(e), 139(a), or 139(b). Accordingly, all references to LCV's for Alaska have been deleted from this final rule.

Alaska does, however, have mileage that is part of the NN. Section 4006 of the ISTEA requires the FHWA to include in the final list "any commercial motor vehicle combination * * * with 2 or more cargo carrying units." A "cargo-carrying unit" is defined as "any portion of a commercial motor vehicle combination * * * used for carrying cargo, including a trailer, semitrailer, or the cargo carrying section of a single unit truck." While section 1023 is relatively narrow in scope, section 4006 has very widespread applicability. If, as the WTA contends, vehicles not previously considered to be LCV's are covered by this final rule, it is because of section 4006. This section is also the reason that vehicles are listed in appendix C for Alaska. Thus, vehicles not previously considered LCV's are included in this final rule, because the statute applies to more than just LCV's.

The ATA expressed concern that the FHWA's attempt to organize the vehicles subject to the freeze into four basic categories requires the FHWA to go beyond the role established for it in the ISTEA. The ATA contends that the ISTEA limits the role of the Secretary to reviewing for accuracy and publishing State information and that the categorization made by the FHWA involves the interpretation of State laws and regulations. Similarly, Alaska commented that the nomenclature used in designating the four basic categories "is not universally acceptable." The categories used in appendix C, as included in the SNPRM, were (1) Rocky Mountain Doubles, (2) Turnpike Doubles, (3) Triples, and (4) Other. These names were chosen in an attempt to describe the vehicles covered by the freeze in terms commonly used in the trucking industry. Since there is no industry-wide or statutory definition for categories 1, 2, or 3, a degree of confusion remained as to just what vehicle combinations were covered, especially by categories 1 and 2.

The ISTEA required the FHWA to list vehicles by "configuration type" (section 1023) or "specific configuration" (section 4006). In creating the basic configuration categories used in the NPRM and SNPRM, the FHWA believed it had to go beyond just publishing State-submitted information. For example, many States do not differentiate between a "Rocky Mountain" and "Turnpike" Double in the statutes or regulations which authorize their operation. Typically, these States allow a truck tractor-semitrailer-trailer, or a truck tractor and two trailing units where each trailing unit can be up to some maximum length. Interpretations were required to develop the maximum parameters that would apply if the State did differentiate by vehicle type.

The FHWA has re-examined the meaning of "configuration," however, and determined that there is no statutory requirement to classify vehicle combinations according to industry usage.

In order to reduce confusion and simplify the description of vehicles covered by the freeze, the vehicles described in appendix C of this final rule have therefore been regrouped into three categories: (1) Truck tractor and two trailing units, (2) Truck tractor and three trailing units, and (3) Other. This preserves the freeze required by the ISTEA without limiting the discretion allowed by some States before June 1, 1991.

Vehicles Submitted by States but Excepted From or Not Subject to Section 4006 of the ISTEA

In preparing the March 20, 1992, NPRM and the February 25, 1993, SNPRM, the FHWA decided not to include certain vehicle combinations submitted by the States, which it determined Congress did not intend to include in the ISTEA freeze. No additional information regarding conditions, routes, or authority to operate these vehicles was required. In addition to describing the categories of vehicles proposed for exemption, a detailed listing by State of the vehicles submitted but exempted was contained in the SNPRM.

In its comments, the ATA urged the FHWA to include in the regulatory language of the final rule the list of exempted vehicles included in the preamble to the SNPRM. The basis for the ATA's suggestion was "to ensure that only the vehicles intended by Congress are restricted and to help clarify the intent of the restriction for enforcement and judicial purposes." The ATA's proposal was to include the list of excepted vehicles in an expanded definition of LCV in the final rule.

The categories of multiple cargo unit vehicles exempted from coverage by the

freeze include: (1) Truck tractor-semitrailer-trailer and truck tractor-semitrailer-semitrailer combinations with a maximum length of the individual cargo units of 28.5 feet or less, (2) conventional automobile and boat transporters with an overall length of 65 feet or less, (3) stinger-steered automobile and boat transporters with an overall length of 75 feet or less, (4) truck-trailer and truck-semitrailer combinations with an overall length of 65 feet or less, (5) maxi-cubes, (6) most tow trucks with vehicles in tow, and (7) combination vehicles which include a truck tractor containing a dromedary box, deck, or plate, and one semitrailer or trailer. With respect to the dromedary equipped vehicle exclusion, strict interpretation of ISTEA section 4006 would include this equipment under the freeze. By its function, a dromedary box, deck, or plate is a cargo-carrying unit. When combined with a semitrailer, the result is technically a combination with two cargo-carrying units, thus subjecting the combination to the freeze. However, dromedary equipped truck tractors in actual operation on December 1, 1982, are grandfathered under § 658.13(f), causing a combination consisting of one of these units and a semitrailer to be considered as simply a truck tractor-semitrailer under the provisions of part 658. Dromedary equipped semitrailer combinations are a minor segment of the industry which probably escaped the notice of Congress, and which would require a good deal of additional time and effort to list. Should States or carriers try to evade the ISTEA freeze mandate by expanding the size of these unlisted combinations, the FHWA may have to initiate rulemaking to close this loophole.

The exclusion information is codified by this final rule at § 658.23(b)(1) through (b)(5). The list of exempted vehicles by State included in the SNPRM has not been codified, however, because of the likelihood that it is not a complete list. The original instruction to the States about these vehicles was to submit anything they thought might be covered by the freeze. Since the effect of ATA's comment would be to exempt only those vehicle combinations listed, some States could be penalized in terms of allowing certain vehicles simply because they reviewed the guidelines and made a decision that certain vehicles were not involved in the freeze coverage.

The definition of LCV used throughout this proceeding is that established in the ISTEA. In the interest of avoiding confusion with respect to terminology, the FHWA will not amend the LCV definition at this time.

Documentation of Actual Operation

Under the terms of ISTEA section 1023, an LCV may continue to operate only if on or before June 1, 1991, the specific configuration was (1) legally allowed in the State and (2) was in actual lawful operation on a regular or periodic basis. Under section 4006, the overall length of two or more cargo-carrying units used in a specific configuration may not exceed the length allowed by State law, and in actual lawful operation on a regular or periodic basis, on or before June 1, 1991. If a specific multi-trailer configuration was authorized by State statute or regulation, but *not* in actual lawful operation on a regular basis on or before June 1, 1991, it may *not* now be put into service.

All of the vehicles listed in appendix C meet the requirements for continued operation set forth in ISTEA sections 1023 and 4006.

The information on these vehicles which the States supplied in response to the ISTEA, the March 20, 1992, NPRM and the February 25, 1993, SNPRM, satisfies the legal requirement for operation, i.e., authorized by State law. In a similar manner, various commenters, responding to a request contained in the SNPRM, have documented the actual operation on a regular or periodic basis of the vehicle combinations listed.

The SNPRM requested information, from any source, to show the actual operation of vehicles described in appendix C. While a copy of the special permit under which operations occurred was listed as the preferred means of satisfying the documentation requirement, any item which could support operation of these vehicles would be considered as acceptable.

In an early response to the docket, the ATA expressed concern that the FHWA was placing a "tremendous burden on State DOT's and the trucking industry to satisfy a totally new requirement in a very short time period." The SNPRM allowed for a 45-day comment period with April 12, 1993, as the docket closing date. The ATA also stated that "(i)t is unlikely that two year old copies of the actual permit will be available," and that working with the permit issuing offices in each State to locate these records would "no doubt be a very time consuming and cumbersome process." As an alternative, the ATA suggested that the FHWA allow the submission of an affidavit from a carrier and/or State agency to satisfy the documentation requirement, and further that a time extension be granted to allow appropriate review and certification of these documents, if allowed. A request for a time extension for the docket was also received from the WTA and Coastal Chem Sales Company of Cheyenne, Wyoming. The need to accurately comply with the actual operation documentation requirement was given as the reason for the request.

In its comments, the CRASH stated that the proof requirement contained in the SNPRM was "far too broad, and (could) easily lead to mistake or fraud." That organization argued that anything less than "verifiable documentary evidence created and dated on or before June 1, 1991, specifically detailing the vehicle length, weight, configuration and routes traveled" would fail to comply with ISTEA requirements.

In reviewing the time extension requests, the FHWA agreed that more time was needed to help assure that accurate and complete documentation information, including affidavits, was submitted to the docket. On April 14, 1993, a 45-day extension of the comment period, to May 27, 1993, was published in the **Federal Register** at 58 FR 19367. The type of information the CRASH argued the FHWA should require appears to exceed the documentation most States demand of LCV operators. It would distort the purpose of the ISTEA freeze to ban certain vehicles or routes simply because the States lacked the foresight to issue permits that met the maximum possible data requirements of a Federal law not yet enacted.

An affidavit made by an individual familiar with the issue at hand is both reasonable and within the documentation parameters established by the SNPRM. The authenticity of any document proposed as evidence to support activity occurring over 2½ years ago could be challenged by any party. Of the possible items of documentation which could be submitted, a notarized affidavit may be the least susceptible to alteration. It represents an individual's witnessed, sworn statement.

An affidavit could, of course, be fraudulent, and the FHWA would be reluctant to take regulatory action based solely on an affidavit without other support. In fact, however, affidavits are merely one kind of information which the FHWA has combined with other types of documentation to demonstrate the operation of vehicles that State law and/or regulation allows. In addition, section 1023(c) of the ISTEA amended 23 U.S.C. 141(b) by adding at the end the following sentence: "Each State shall also certify that it is enforcing and *complying with* the provisions of section 127(d) of this title and section 411(j) of the Surface Transportation Assistance

Act of 1982 (49 U.S.C. App. 2311(j))" (emphasis added). Additional discussion of the certification change is contained elsewhere in this document. However, for this discussion the statement means that if a State is found not to be complying with the ISTEA LCV requirements, it will be subject to Federal-aid highway funding sanctions involving millions of dollars annually.

Documentation of operation of the vehicles listed in appendix C for each State was provided to the docket by the following sources. All original submissions are filed in docket number 92–15.

Alaska: Five carriers, State Department of Commerce and Economic Development
Arizona: Seven carriers, one shipper, State Department of Transportation (DOT)
Colorado: Seven carriers, State DOT
Florida: Three carriers, three private fleets
Hawaii: One private fleet, State DOT
Idaho: Fifteen carriers, six private fleets, one agricultural cooperative, one owner-operator, State DOT
Indiana: Five carriers, State DOT
Kansas: Five carriers, one private fleet, State DOT, State Turnpike Authority
Massachusetts: Two carriers, State Turnpike Authority
Michigan: State DOT
Mississippi: State DOT
Missouri: Three carriers, State Highway & Transportation Department
Montana: Ten carriers, one shipper, five private fleets, one owner-operator, State DOT
Nebraska: State Department of Roads
Nevada: Thirteen carriers, one shipper, one private fleet, one agricultural cooperative, one owner-operator
New Mexico: One carrier, State Taxation and Revenue Department
New York: Two carriers, State Motor Truck Association, State DOT, State Thruway Authority
North Dakota: Four carriers, four private fleets, State DOT
Ohio: Four carriers, State Turnpike Commission
Oklahoma: Nine carriers, four private fleets
Oregon: Fourteen carriers, three private fleets, one agricultural cooperative, State DOT
South Dakota: Four carriers, one shipper, three private fleets, State Trucking Association, State Highway Patrol, State DOT
Utah: Sixteen carriers, one shipper, three private fleets, one agricultural cooperative, one owner-operator, State Motor Truck Association, State DOT
Washington: Five carriers, one shipper, two private fleets, one agricultural cooperative, one owner-operator, State DOT
Wyoming: Six carriers, two shippers, four private fleets, one owner-operator, three individuals, State DOT

The following vehicle combinations included in the SNPRM, or comments thereto, have *not* been included in appendix C for the reasons given.

California: "Triple," including a 28-foot semitrailer, two 28-foot trailers, an overall length of 107.4 feet, and a maximum gross vehicle weight of 111,000 pounds. "Rocky Mountain Double," including a 48-foot semitrailer, a 28-foot trailer, an overall length of 93.2 feet, and a maximum gross vehicle weight of 106,850 pounds. "Turnpike Double," including a 48-foot semitrailer, a 48-foot trailer, an overall length of 116.7 feet, and a maximum gross vehicle weight of 122,650 pounds.

Two permits were issued by the California Department of Transportation (Caltrans) for "Triples" at the request of the California legislature in 1971 in order to conduct a test to evaluate the possible allowance of "Triples" in California. In 1983, permits were issued to allow the operation of the above described vehicle combinations in order to conduct an over the road test of these vehicles. The State, in its comments, points out that the 1983 tests were conducted, in part, to assist the FHWA in its study of the costs and benefits of a national intercity LCV route network.

Based on these two occurrences, California claims the right to issue permits for good cause for the future operation of these vehicles up to the limits stated.

The FHWA has rejected California's claim because it fails to meet the standard for "regular or periodic" use established by Congress in writing the ISTEA. According to the Conference Report on the ISTEA (H.R. Conf. Rep. No. 404, 102d Cong., 1st Sess. 314 (1991)), "Use of an LCV on only one or two occasions pursuant to a special permit would not provide a basis for satisfactorily certifying grandfather rights or operations under this subsection." Clearly the California situation falls within the scope of the congressional guidance. "Triples" were allowed twice, for very brief periods 12 years apart, the last being more than 10 years ago. "Turnpike Doubles" and "Rocky Mountain Doubles" were authorized only once, over 10 years ago, during a single 5-day period. These occurrences do not constitute "regular or periodic" use.

Connecticut: Vehicle and trailer for carrying poles, lumber, piling, or structural units.

No documentation was received in the docket to support the actual operation of this vehicle on or before June 1, 1991. This vehicle was originally included because it appeared to meet the LCV or extra-length multi-unit commercial vehicle requirements. This vehicle is made up of a truck tractor and a dolly unit. Since the weight of a cargo, for example utility poles, is carried partially by the truck tractor and partially by the dolly unit, the argument might be made that this vehicle has two cargo-carrying units.

In fact, the load and rear dolly combine to create a *de facto* semitrailer. Truck tractor-semitrailers are not subject to the freeze.

Delaware: Truck tractor-semitrailer-trailer, with a cargo-carrying length of 62 feet.

No documentation was received in the docket to support the actual operation of this vehicle on or before June 1, 1991. The initial submission by Delaware, to satisfy the LCV freeze requirements, indicated that the listed combination was allowed by State law wherein each trailing unit could be up to 29 feet long. The 62-foot length was derived by adding 4 feet for interunit spacing to the twin 29-foot dimension. Due to the de-listing of a vehicle combination with twin 29-foot units, the maximum length of any one unit in a multi-unit combination vehicle reverts to 28.5 feet, that allowed by the STAA of 1982.

Louisiana: "Rocky Mountain Double-LCV," with a cargo- carrying length of 75 feet.

No documentation was received in the docket to support the actual operation of this vehicle on or before June 1, 1991. The initial submission by Louisiana, to satisfy the LCV freeze requirements, indicated the listed combination was allowed by State law wherein each trailing unit could be up to 30 feet long. The 75-foot length was derived by adding the maximum interunit spacing allowed by State regulation of 15 feet to the twin 30-foot dimension. Due to the de-listing of a vehicle combination with twin 30-foot units, the maximum length of any one unit in a multi-unit combination vehicle reverts to 28.5 feet, that allowed by the STAA of 1982.

New Hampshire: Truck-trailer combination with a cargo-carrying length of 85 feet.

No documentation was received in the docket to support the actual operation of this vehicle on or before June 1, 1991. The initial submission by New Hampshire, to satisfy the LCV freeze requirements, indicated the listed combination was allowed because State law does not prohibit a straight truck of up to 40 feet long from pulling a trailer that may be up to 48 feet long. Due to the de-listing of the described vehicle combination, the maximum cargo-carrying length of any truck-trailer combination on NN highways reverts to 58 feet. This length is derived by subtracting 7 feet for the cab from the 65-foot overall length for this combination allowed by this rule

without a requirement to document actual operations. Off the NN, the maximum lengths allowed by State law continue to apply.

List of ISTEA Vehicle Operations and Conditions

In addition to the lists of vehicle configurations, the ISTEA also required each State to submit a copy of all its statutes, regulations, limitations, and conditions which apply to the operation of each of the LCV's or extra-length vehicles reported as in use on or before June 1, 1991.

The content of the States' original responses to this request covered the full range of what could be supplied, both in terms of items covered and volume of material. The diversity of the contents of the responses was so great that the FHWA determined that before any list could be finalized, increased uniformity would be necessary. One of the subheadings for each LCV or extra-length vehicle described in the NPRM was "Operational Conditions." The information in the NPRM was taken directly from the initial State responses to the LCV information request contained in the ISTEA, regardless of content. In those cases where another document was referenced, the FHWA attempted to summarize that document. Because of the differences in State-provided responses, there was little consistency as to coverage or depth. Therefore, in addition to asking for comments, the NPRM also asked the States and all other sources, including industry trade groups, either to reformat existing information, or to provide new information following a suggested format. Those States which allow LCV's or extra-length vehicles were requested to provide the operational condition information in the following subheadings: *WEIGHT, DRIVER, VEHICLE, PERMIT,* and *ACCESS.*

The information included in the SNPRM reflected the States' and other responses to the NPRM request.

The SNPRM included specific vehicle descriptions for 30 States. Comments were received concerning those descriptions for 23 States. The vehicle descriptions included in appendix C to part 658 by this final rule have been modified, where appropriate, by comments received and by the change in categories described earlier. Comments, changes, and corrections made to appendix C information will be discussed by State, by subheadings, in the same order that they appear in appendix C:

STATE NAME
COMBINATION:
LENGTH OF THE CARGO-CARRYING UNITS:
MAXIMUM ALLOWABLE GROSS WEIGHT:
OPERATIONAL CONDITIONS:
WEIGHT:
DRIVER:
VEHICLE:
PERMIT:
ACCESS:
ROUTES:
LEGAL CITATIONS:
OTHER COMMENTS:

Other comments considered, that did not result in a change, will be discussed at the end. Any heading not included in the discussion means that the information included in the SNPRM was accurate, and the same information has been included in appendix C as published by this final rule.

Alaska

OPERATIONAL CONDITIONS:

WEIGHT: The State DOT commented that the weight restriction discussion in the SNPRM for Alaska should not apply because the section 1023 freeze applies only to the Interstate System, and Alaska does not have Interstate System mileage designated under 23 U.S.C. 103, 139(a), or 139(b). The FHWA agrees with this comment. Accordingly, the weight condition for each vehicle described has been revised to indicate that a carrier has to be in compliance with State laws and regulations and does not list maximum weight limit values. In addition, because LCV's, as defined in the ISTEA, do not operate in Alaska due to the lack of Interstate System mileage, the "LCV" notation previously included by the combination description has been removed.

VEHICLE: The State indicated that the hours of operation for three trailing unit combinations are established by permit and not by regulation. Accordingly, this has been removed from the "VEHICLE" discussion.

PERMIT: The SNPRM noted that permits were required for divisible loads. The State commented that this was incorrect. Permits are only required for nondivisible loads.

OTHER COMMENTS:

The CRASH stated that Alaska Administrative Permit Manual Section 11.6 provides that "all oversize or overweight vehicles not in convoy shall maintain a minimum distance of 800 to 1,500 feet from any other oversize vehicle or vehicle with load and pilot car traveling in the same direction on the same highway in rural areas." Since Alaska is not contiguous to any other State this type of information would be of little use to any out-of-State trucker. Any vehicle requiring a permit would be subject to the Alaska permit rules which would be given to the driver when the permit was obtained. Therefore, in view of its limited usefulness in terms of general information, we will not add this provision to appendix C.

Section 4006(a) of the ISTEA provides that Alaska "may allow operation of commercial motor vehicle combinations which were not in actual operation on June 1, 1991, but which were in actual operation prior to July 6, 1991." Verification has been furnished that "Triples" with trailers not over 45 feet in length were in actual operation under permit prior to July 6, 1991. The CRASH believes that the operation of "Triples" after June 1, 1991, was authorized only on an experimental basis as provided in 17 AAC 25.106(b)(4). However, the ISTEA allows the continued operation of any combinations put into service between June 2 and July 5, 1991, without further condition. Therefore, "Triples" may continue to operate, as indicated in appendix C.

The State advised that under Alaska regulations, a truck tractor equipped with a dromedary box is defined as not being cargo carrying. Dromedary boxes do in fact carry cargo. However, for the reasons given above, the FHWA has decided for the time being not to list the cargo-carrying length of dromedary tractor-semitrailer combinations.

The State indicated that an additional route, AK–1 from Palmer-Wasilla Highway Junction to Wishbone Hill Coal Access Road, must be added to Alaska's routes chart under the caption for "Rocky Mountain Double-LCV" (58 FR 11467) of the SNPRM. However, this is incorrect because the freeze on vehicle length is applicable only on the NN, and this is not an NN route. The State is free to regulate the size and weight of vehicles off the NN as it sees fit.

ARIZONA

LEGAL CITATIONS:

The CRASH stated that Arizona statute ARS 28–1011.N should not be shown as authority for permitting overweight vehicles on the NN since it only covers the issuance of permits on other than NN routes. We agree, since the provisions of Section 4006 of the ISTEA apply only to vehicles on the NN. Therefore, ARS 28–1011.N has been deleted from the "Legal Citations" for Arizona in appendix C

OTHER COMMENTS:

The CRASH stated that the legal size for "Rocky Mountain Doubles" is 90 feet, and not 92 feet as shown in proposed appendix C contained in the SNPRM. Arizona statute ARS 28–1011.A provides that the Arizona DOT may issue oversize permits for vehicles exceeding otherwise applicable length limits on the State highway system. Further, the change in categories from those listed in the SNPRM makes this a moot point insofar as the final appendix C is concerned.

The CRASH stated that the State may not issue "verbal policy directives" authorizing overlength vehicles. It adds that the State appears to be violating its own statutes. The question cannot be resolved in this proceeding but the FHWA will investigate the issue in connection with Arizona's certification of compliance with 49 U.S.C. app. 2311(j).

The CRASH also stated that weight limits for LCV's on US 89A and I–15 cannot be determined under ARS 28–1011.N. The FHWA agrees. Since the ISTEA freezes the weight of LCV's only on the Interstate System, we will not further consider weight limits on US 89A. The State indicated that the maximum allowable weight limits for all LCV's on the Interstate System is 111,000 pounds, except for "Triples," which it said are subject to a maximum allowable weight of 123,500 pounds. The 111,000-pound maximum weight limits are specifically authorized under ARS 28–1011.M, and higher maximum weights may be authorized under ARS 28–1011.A on the State highway system. Since the State indicated that the highest weight authorized for "Triples" on or before June 1, 1991, was 123,500 pounds, that value is retained in appendix C.

COLORADO

LENGTH OF THE CARGO-CARRYING UNITS:

Appendix C in the SNPRM showed the cargo-carrying length for "Rocky Mountain Doubles" in Colorado as 85 feet, for "Turnpike Doubles" 95 feet, for "Triples" 95 feet, and for truck-trailer combinations as 78 feet. However, on June 1, 1991, the State actually allowed one of the trailing units in "Rocky Mountain Doubles" to be up to 48 feet long and the other up to 28 feet 6 inches long, with not over 15 feet of hitch between the two units, or a total cargo-carrying length of 91.5 feet. The State also allowed "Turnpike Doubles" to have two trailers of approximately equal length, not to exceed 48 feet each, with a hitch not to exceed 15 feet in length. The resulting cargo-carrying length becomes 111 feet. Revised appendix C has been changed to reflect these values.

The State allowed "Triples" to have three trailing units, not to exceed 28.5 feet, with a 15-foot hitch between the trailing units. Appendix C has been changed to a cargo-carrying length of 115.5 feet to reflect this.

OPERATIONAL CONDITIONS:

PERMIT: The State requested that a new sentence be added after the first sentence under the "Permit" provisions for "Rocky Mountain Doubles" in appendix C as follows: "Also, the vehicle must purchase an overweight permit pursuant to C.R.S. 42–4–409(11)(a)(II)(A), (B), or (C), and comply with Rule 4–15 in the rules pertaining to Extra-Legal Vehicles or Loads." The State also commented that the time restrictions on the operation of "Rocky Mountain Doubles" in the next sentence should be changed from 7 a.m. to 6 a.m. and from 4 p.m. to 3 p.m. and that the sentence in parentheses should read as follows: "('Rocky Mountain' doubles not operating at greater than the legal maximum weight of 80,000 pounds are subject to different hours of operation restrictions. Refer to rules pertaining to the Operation of Longer Vehicle Combinations on Designated State Highway Segments)." The CRASH said motor carriers that operate ISTEA vehicles must have an established safety program as provided in Chapter 9 of the Colorado Department of Highways Rules and Regulations for Operation of Longer Vehicle Combinations on Designated State Highway Segments. Elements of the program include compliance with minimum safety standards at 8 CCR 1507–1; hazardous materials regulations at 8 CCR 1507–7, 8, and 9; Colorado Uniform Motor Vehicle Law, Articles 1 through 4 of Title 42, C.R.S., as amended; and Public Utility Commission's regulations at 4 CCR 723–6, 8, 15, 22, and 23. Revised appendix C includes these changes.

ROUTES:

Appendix C in the SNPRM indicated routes on which "Rocky Mountain Doubles" could travel as "National Network routes except that LCV's may not operate on I–70 from Exit 90 to Exit 259." However, the State indicated that they essentially may operate only on the Interstate System. Appendix C has been amended accordingly.

LEGAL CITATIONS:

The State said that in the "Legal Citations" for "Rocky Mountain Doubles," 42–4–407(1)(C)(III)(A), should be corrected by changing the capital "C" to a small "c." It also said that provisions following this citation should be deleted and the following added: "LVC's must comply with Longer Vehicle Combination Rules and the Extra-Legal Vehicles or Load Rules. However, when the rules address the same subject the LVC, since it is operating at greater than 80,000 pounds, must comply with the Extra-Legal Vehicles or Loads Rules. Such rules are: 4–1–2 and 4–1–3 concerning holiday travel restrictions, 4–1–5 concerning hours of operation restrictions, 4–8 concerning minimum distance between vehicles and 4–15 concerning maximum allowable gross weight." These changes have been made.

OTHER COMMENTS:

The State pointed out that no maximum gross weight is shown in connection with the truck-trailer combination listed in appendix C. This is correct because a truck-trailer combination is not an LCV as defined in the ISTEA since it is not a combination of a truck tractor and two or more trailers or semitrailers. Therefore, its maximum weight on the Interstates is not frozen as of June 1, 1991, but remains as provided in 23 U.S.C. 127(a). The listing for this combination has been changed in appendix C by adding "WEIGHT" as a separate category under "Operational Conditions" and indicating that the vehicle must be in compliance with State laws and regulations.

The State also noted that "Rocky Mountain Doubles" could operate from milepoint 8.9 to milepoint 9.7 on State Highway 133 in Delta. However, as this is not on the Interstate System or the NN, the ISTEA freeze provisions do not apply. Accordingly, the route is not listed in the vehicle descriptions. The CRASH said that prior to June 1, 1991, "Rocky Mountain Doubles" could operate on I–70 from the Utah State Line only to State Highway 65 (Exit 49). In fact, the route was extended from State Highway 65 to State Highway 13 (Exit 90) on April 5, 1990. Since this was prior to June 1, 1991, but remains as provided in 23 U.S.C. 127(a). Since this was prior to June 1, 1991, "Rocky Mountain Doubles" may continue to operate from the Utah State Line to State Highway 13 (Exit 90) after that date.

The State also commented that the freeze on the operation of LCV's on the Interstate System and the freeze on the operation of CMV's with two or more cargo-carrying units on the NN may create administrative and enforcement problems. However, it also recognized that this arises from the ISTEA and cannot be changed in this proceeding.

FLORIDA

COMBINATION:

The State commented that Florida law and rules contain no references to "Rocky Mountain Doubles" and that all references to them in appendix C should be deleted. The revision of the categories used in appendix C, as presented by this final rule, addresses the State's concern over nomenclature.

OTHER COMMENTS:

Florida commented that the 106-foot length previously given for "Turnpike Doubles," now shown for a truck tractor and two trailing unit combination, is incorrect. The maximum length should be 116 feet. The 116-foot dimension is the maximum overall vehicle length established by State regulation. Appendix C is a listing which includes maximum cargo-carrying length. The convention used throughout this rulemaking is that, in the absence of any information to the contrary, cargo-carrying length for a truck tractor combination is the maximum overall length minus 10 feet. Thus, 106 feet remains the cargo-carrying length value for Florida's truck tractor and two trailing unit combination.

The State also expressed concern over the fact that the vehicles listed for Florida are not considered LCV's as provided in the ISTEA definition, because the route on which they operate, Florida's Turnpike, is not part of the Interstate System. The State made the point that the twin-trailer combinations which operate on the Florida Turnpike match the configuration and weight criteria for LCV's, and only an administrative action, whether or not the Turnpike is part of the Interstate System, keeps them from being designated as such.

Until the ISTEA was enacted, the meaning of the term LCV differed from one region to another, and sometimes depended on the commodity being transported. By providing a definition of LCV, Congress has provided a basis for describing these combinations on a national basis. Any combination which does not meet all of the criteria, including operation on the Interstate System, is not to be considered an LCV.

IDAHO

OTHER COMMENTS:

The CRASH stated that the SNPRM omitted the provisions for time-of-travel restrictions for overlegal loads published in Idaho Transportation Department Rule 39.C.11.5, and the requirement that an applicant for a permit certify that the load is indivisible. These restrictions apply only to nondivisible loads as indicated in Rule 39.C.11.4.c. There are no time-of-day restrictions for Extra-Length Vehicle Combinations operating under permits issued pursuant to Rule 39.C.22. The CRASH also indicated that time-of-travel restrictions applied to overweight loads under Rule 39.C.11.5. Although the rule is entitled "Time of Travel Restrictions for Overlegal Loads," the text deals only with "oversize" loads. The CRASH said that the SNPRM omitted seasonal weight limits in Rule 39.C.14. The Rule simply provides that such limits will be posted. Therefore, they are in the same category as speed limits or other general restrictions that all vehicles must observe.

The "Dromedary tractor semitrailer" combination listed in the SNPRM has been removed from appendix C due to the exclusion of such combinations from the list as discussed earlier. The "Dromedary tractor semitrailer trailer" combination has also been removed from appendix C due to the dromedary equipment exclusion. This vehicle is covered by the listing for the truck tractor and two trailing unit LCV's.

INDIANA

OPERATIONAL CONDITIONS:

VEHICLE: The CRASH commented that the SNPRM omitted several equipment requirements for all LCV combinations including those for emergency equipment, safety chains, lights, reflectors, and for three trailing unit combinations, spray-suppressant mud flaps. All of these items have been added to appendix C.

PERMIT: The CRASH indicated that maximum speed and the State wind operational restrictions were omitted from the permit discussion. These have been added.

OTHER COMMENTS:

The CRASH also commented that the State 3-inch sway limitation was not included in the SNPRM. The requirement was, in fact, included in the SNPRM and has been retained in this final rule.

KANSAS

MAXIMUM ALLOWABLE GROSS WEIGHT:

The State commented that the maximum allowable gross weight listed for "Triples" in the SNPRM was incorrectly listed as 110,000 pounds and that the value should instead be 120,000 pounds. The 110,000-pound limit applies only to three trailing unit operations on I–70 between the Colorado State Line and Goodland. The Kansas Turnpike allows these combinations to operate at 120,000 pounds. This change has been made in appendix C.

OPERATIONAL CONDITIONS:

Under the Operational Conditions described for "Triple—LCV" in the SNPRM, the phrase at the beginning of the section "called special vehicle combinations (SVC's) in Kansas," has been deleted in appendix C at the request of the State. The term "SVC" applies only to operations on I–70 between the Colorado State Line and Goodland. It does not apply on the Turnpike.

DRIVER: At the request of the State, the wording has been corrected to accurately differentiate between SVC operations and operations on the Turnpike.

VEHICLE: The CRASH commented that vehicle equipment requirements concerning lateral movement in the travel lane and anti-spray devices were not included in the SNPRM for SVC operations. Both items are now included in appendix C.

PERMIT: The CRASH commented that the permit discussion for SVC operations did not include the requirement to have insurance coverage of certain amounts. Appendix C has been changed to reflect the requirement to have insurance coverage, however, the amounts are not included in appendix C. The amount of insurance coverage is not an item that is directly related to the size and weight of LCV's.

ACCESS: SVC access was not included in the SNPRM because SVC operations were not included. Appendix C now includes SVC access provisions according to comments provided by the State.

ROUTES:

I–70 in Western Kansas: Kansas allows SVC's on the short segment of I–70 from Goodland to the Colorado State line. Kansas submitted this information and it was published in the NPRM. The FHWA subsequently learned that SVC operations began on that route only on May 31, 1991, the day before the June 1 freeze date.

The ISTEA provides that LCV's (including SVC's) must have operated "on a regular or periodic basis" on or before June 1, 1991 (23 U.S.C. 127(d)(1)(A)). According to the ISTEA conference report:

To be considered "regular or periodic" use operations must have occurred at recurring intervals over a period of time. Moreover, periodic operations must have occurred on an intermittent but consistent basis. Use of an LCV on only one or two occasions pursuant

to a special permit would not provide a basis for satisfactorily certifying grandfather rights or operations * * *. (H.R. Rep. No. 404, 102d Cong., 1st Sess., at 314 (1991))

Because SVC operations on I–70 did not appear to be "regular or periodic" by this standard, the FHWA revised the SNPRM to remove the Goodland segment from the list of authorized Kansas LCV routes.

Thirty-seven commenters discussed this subject, and all of them favored restoration of the I–70 route. Yellow Corporation, the parent company of Yellow Freight, explained in detail how the problem arose. Yellow Freight uses a hub and spoke system. The company commented that "(w)here distances between hubs do not allow for the journey to be made within the ten-hour federal drivers hours of service limit, Yellow Freight has established driver relay facilities (where) * * * drivers * * * are changed, with the equipment moving on to meet customer service demands." Yellow Freight has for 25 years maintained a driver relay facility at Goodland which serves vehicles moving between its Kansas City and Denver hubs. "Linehaul drivers leave Kansas City westbound to Goodland, layover and return eastbound the next day. Goodland-domiciled linehaul drivers operate a turn between Goodland and the Denver hub."

Colorado authorized triple-trailer and other large combinations in 1989. Unlike competitors with facilities in eastern Colorado, Yellow Freight was unable to use these vehicles between Goodland and Denver because Kansas did not allow them on I–70. Rather than move its relay facility into Colorado or forgo the economic advantages of "Triples," Yellow Freight asked Kansas in September 1989, to allow SVC's on I–70 between Goodland and the Colorado line. The Kansas Department of Transportation (KDOT) announced a rulemaking proposal in January 1990, that would have allowed "Triples" on all Kansas Interstates. The Kansas Railroad Association (KRA) responded by having a bill to ban "Triples" introduced in the legislature; the KDOT withdrew its proposal. Yellow Freight and the KRA negotiated a compromise which, among other things, allowed triple-trailer combinations on the Goodland segment of I–70. The bill was approved on April 12, 1990, and SVC regulations to implement it were promulgated on March 4, 1991. Yellow Freight ran one "Triple" on May 31, 1991, and a second on June 1.

Both Yellow Freight and the KDOT place much of the blame for delays in issuing the permits required to start I–70 operations on the FHWA's failure to clarify its position on the State's grandfather rights in a timely fashion. The FHWA and a number of States—not including Kansas—had long disagreed on the question of whether LCV operations were legitimately grandfathered. One of the purposes of the LCV freeze was to resolve these disputes by ratifying actual operations allowed by State law on June 1, 1991. The KDOT's announced intention to allow SVC's on I–70 was one more indication of the rapid spread of LCV's in States west of the Mississippi. Because of the desirability of a uniform policy toward all States that allowed LCV operations, the FHWA did not immediately address the question of Kansas' grandfather rights. However, on April 8, 1991, just over a month after the KDOT's regulations authorizing SVC permits became effective, the FHWA asked for an opinion by the Kansas Attorney General (AG). The KDOT requested the opinion on April 26, 1991, and the AG replied on May 30, 1991, that the State's grandfather rights were broad enough to encompass SVC operations on I–70. Since the issue here is "regular or periodic" operations, it would serve no purpose to discuss the AG's grandfather claims. The KDOT quickly issued an annual SVC permit to Yellow Freight and operations began the following day.

The State's regulatory process was not completed until March 4, 1991, and the Kansas AG required more than a month to respond to the KDOT's request for an opinion. The FHWA had no part in these delays. It is true, however, that the KDOT made a good faith effort to satisfy the FHWA's legal concerns and postponed the start of SVC operations on I–70 until the deadline included in the draft ISTEA legislation had nearly passed. We do not wish to penalize Kansas simply for cooperating with the FHWA.

Yellow Freight asserted that "(a)s originally drafted, the Federal LCV freeze date would have been April 1, 1991. Senator Dole's office intervened to move that federal freeze date to June 1, 1991, specifically to accommodate the Goodland triples route."

In its comments in response to the SNPRM, the ATA said:

> ATA was deeply involved in the Congressional deliberations leading to the LCV freeze. It is our understanding that the language in the Conference report was designed to preclude establishing LCV operations based on single trip permits for infrequent truck movements. Therefore one or two movements of heavy machinery by a specialized carrier would not create "grandfathered rights."
>
> ATA understands that for Kansas, a single trip permit would normally be issued for "occasional use" purposes. It is clear that the intent of the (SVC) permit was for multiple trip purposes and not occasional "one or two trips." The permit had been applied for long before the freeze language was proposed. It was only a matter of timing that so few trips were made.

There is nothing in the ISTEA legislative history that clarifies the meaning of "regular or periodic basis," but the ATA's interpretation is plausible, especially in view of the Caltrans' response to the SNPRM. The Caltrans stated that it

> [I]ssued two permits, at the request of the California Legislature, allowing two vehicle combinations with three 26.5-foot trailers to operate from October 27 to November 5, 1971. These vehicle combinations had an overall length of 94.25 feet with gross vehicle weights of 76,800 pounds and 90,000 pounds. The 1971 permits were issued to gather information on truck tractor and triple trailer combination operations. The information was used to consider whether triple combination operations should be allowed in California.

In 1983, the Caltrans issued permits for operational tests of (1) a 111,000-pound "Triple" (28-foot trailers) between October 24–28; (2) a 106,850-pound "Rocky Mountain Double" (48-foot semitrailer, 28-foot pup) between November 7–10; and (3) a 122,650-pound "Turnpike Double" (two 48-foot trailers) between November 14–18. The Caltrans argued that

> California retains the right to issue an extralegal permit for good cause to operate a divisible combination of vehicles exceeding the maximum size or weight limits with specific guidance provided by the California Legislature.

The brief tests performed by California one and two decades ago, which never resulted in the authorization of LCV's, are certainly among the minimal operations that the requirement for "regular or periodic" use was intended to exclude. The FHWA has therefore declined to list these vehicles in appendix C.

Kansas and Yellow Freight, on the other hand, clearly expected LCV's to use I–70 routinely and for years to come, and made elaborate preparations on that basis. In addition, the KDOT's efforts to cooperate with the FHWA delayed the issuance of the first permits, which would otherwise have been available in March 1991. On balance, the FHWA believes that the SVC operations on I–70 satisfy the statutory standard. The Goodland route has therefore been restored to appendix C.

The CRASH commented on the accuracy of the lists of routes available

to the different vehicle combinations. Appendix C now reflects the proper route listings. Due to the SVC and Turnpike operations, the truck tractor and three trailing unit combination does have more route mileage available to it than do two trailing unit combinations. The new route lists show that I–70 between the Colorado State Line and Goodland is available only to SVC's with three trailing units and not to LCV combinations with two trailing units.

LEGAL CITATIONS:

One change has been made at the request of the State. KSA–8–1915 has been moved from the list of applicable statutes for two trailing unit combinations to the list for three trailing unit combinations.

MASSACHUSETTS

LENGTH OF THE CARGO-CARRYING UNITS:

The CRASH commented that the cargo-carrying length listed in the SNPRM for the "Turnpike Double—LCV" was incorrectly listed as 114 feet. This figure is the overall length previously allowed for this configuration. Applying the convention for determining cargo-carrying length used throughout this rulemaking, 10 feet will be deducted for the tractor. The cargo-carrying length now shown in appendix C for the truck tractor and two trailing unit combination is 104 feet.

OPERATIONAL CONDITIONS:

VEHICLE: The CRASH pointed out two vehicle requirements missing from the SNPRM, one concerning emergency equipment and the other concerning passing requirements. Both provisions have been added to appendix C.

PERMIT: The CRASH commented that the SNPRM did not include the requirement to have insurance coverage of certain amounts. Appendix C has been changed to reflect the requirement to have insurance coverage, however, the amounts are not included in appendix C. The amount of insurance coverage is not an item that is directly related to the size and weight of LCV's.

MICHIGAN

COMBINATION:

The State commented that the vehicle in question is a truck tractor-semitrailer-trailer where one of the cargo units exceeds 28.5 feet in length. Michigan statutes allow an overall length for the two trailers, as measured from the front of the first trailer to the rear of the second trailer, of 58 feet, including the load. This vehicle configuration was excluded from the original listing of LCV's in the NPRM. The exclusion was based on a definition of excepted combination used in the NPRM (57 FR 9901, March 20, 1992) as follows:

Truck tractor-semitrailer-semitrailer and truck tractor-semitrailer-trailer configurations with a maximum length of cargo-carrying units of 62 feet or less are subject to the provisions of 23 CFR part 658. These are the twin 28-foot units authorized by the STAA, and the 28-foot B-train doubles authorized as specialized equipment by the FHWA.

Michigan contends that the vehicle was correctly excepted in the NPRM since the Michigan vehicle clearly fell within the length parameters of non-LCV vehicles.

The exclusion by the FHWA in the NPRM was erroneous. The vehicle was included in the SNPRM and is now in the final rule since it can consist of a truck tractor and two trailing units and can carry more than 80,000 pounds on the Interstate System.

The State also commented that the "Rocky Mountain Double—LCV" description in the SNPRM was inappropriate for the vehicle in operation in Michigan. The revised combination categories now used in appendix C has alleviated this concern.

MAXIMUM ALLOWABLE GROSS WEIGHT:

The State commented that the table listing vehicle combinations subject to the ISTEA, illustrating a Michigan vehicle listed under "Rocky Mountain Doubles" with a 128,000-pound maximum gross weight, was inappropriate. Michigan, the State argued, is an axle weight State with a grandfather provision and maximum gross weights are determined based on axle and axle group weight limits. Therefore, it would be inappropriate to specify a single maximum gross weight for Michigan. The FHWA does not agree. The table and text have been revised to show a maximum allowable gross weight of 154,000 pounds. The 154,000-pound figure was determined from the maximum axle weight limits for an 11-axle vehicle (the maximum number of axles allowed under State law) with optimum axle spacing and with a combined cargo-carrying box length of 58 feet. Vehicles with fewer axles or less than optimum axle spacing will have a lower allowable gross weight based on State requirements.

OPERATIONAL CONDITIONS:

VEHICLE: Michigan commented that certain statements included in the SNPRM did not apply to the vehicle in question. These statements concerned (1) the overall length of a truck and trailer or semitrailer combination and (2) operational hours for certain vehicles hauling hazardous materials. The appropriate sentences have been removed from the text.

ACCESS: The State commented that "Access" should read "all designated State highways." This change has been made.

ROUTES:

In response to a comment by the State, the "ROUTES" description has been changed to indicate that all Interstate and designated State highways are open to these vehicles.

MISSISSIPPI

COMBINATION:

The State commented that a CMV with two cargo units, subject to the freeze requirements of section 4006 of the ISTEA, originally submitted by the State and included in the NPRM, was inadvertently left out of the SNPRM. The vehicle, which is subject to the freeze because the trailing units may each be up to 30 feet long, has been included in appendix C with the operational information listed as supplied by the State.

MISSOURI

OTHER COMMENTS:

The CRASH claimed that an error in available routes had been made in the SNPRM, and that the SNPRM did not include several items that pertain to permitted loads. The CRASH not only questioned the availability of several Interstate routes in the Kansas City metropolitan area, but also the availability of I–44 in southwest Missouri. It stated that "the only National Network route from which LCV's can enter Missouri is I–70 in Kansas." Several NN routes in Kansas and Oklahoma come up to the Missouri State Line. LCV's are allowed to operate on I–44 in Oklahoma, thus making I–44 available to enter Missouri. In Kansas, LCV's have access to the northeastern end of the Kansas Turnpike, over any route within a 20-mile radius. Within that 20-mile radius in Kansas, several Interstate and other highways, which prior to passage of the ISTEA were designated as Federal-aid Primary highways, come up to the Missouri State Line. LCV's may use any of these routes to reach terminals in Missouri which fall within a 20-mile band of the Kansas State Line.

The CRASH indicated that the State indivisible load requirement had been omitted from the SNPRM. In addition, the CRASH contends that several operational requirements were also

omitted, including those involving time-of-day restrictions, weather requirements, oversize load signs, speed, tractor unit power, and the need for insurance. The State responded that routine overdimension and overweight special permit issuance in Missouri is made in accordance with State Rule 7 CSR 10–2.010 (based on Section 304.200, Revised Statutes of Missouri 1992), which provides for a uniform administration of large and heavy loads.

Although the rule (7 CSR 10–2.010) as originally promulgated by the Missouri Highway and Transportation Commission disallows routing reducible loads (except for farm products) under permit, in July 1986 the State's chief engineer, exercising other authority within the rule, authorized travel for multi-unit LCV's carrying reducible loads. To quote Rule 7 CSR 10–2.010:

[T]he chief engineer of the State Department of Highways and Transportation, for good cause shown and when the public safety or public interest so justifies, shall issue special permits for vehicles or equipment exceeding the limitations on width, length, height, and weight herein specified * * *.

It was determined to be in the public interest to allow LCV operation to relieve economic stress and give motor carriers the incentive to retain terminals in Missouri. Missouri would then be more competitive with adjacent western States which allow LCV operations. The operation of LCV's has gone without reported incident, according to annual documented safety assessments made by the Missouri Highway and Transportation Department, the Missouri State Highway Patrol, the Kansas City Public Works Department, and the Kansas City Police Department.

In response to other items listed, the State made the point that Missouri Revised Statute § 304.200 (1992) gives the chief engineer significant latitude in allowing the operation of LCV's, and that several items including speed and weather restrictions are conditions of the permit issued for the operation of LCV's.

MONTANA

OPERATIONAL CONDITIONS:

PERMIT: The CRASH said that a provision requiring carriers operating vehicles subject to the ISTEA freeze to have "public liability and property damage insurance for the protection of the traveling public as a whole" was omitted from appendix C. Appendix C has been changed to reflect the requirement to have insurance coverage; however, the amounts are not included. The amount of insurance coverage is not an item that is directly related to the size and weight of LCV's.

OTHER COMMENTS:

The CRASH said that Chapter 672 of the Montana Session Laws of 1991, which amended Montana Code Annotated (MCA) section 61–10–124, increased the length of Turnpike Doubles from 95 to 100 feet in length effective January 1, 1992, and, therefore, the cargo-carrying length in appendix C should be based on the shorter length. This is incorrect. Before the change, section 61–10–124 read as follows:

A term permit may be issued for any combination of vehicles that exceeds 95 feet in length but does not exceed 100 feet in length, * * *.

After the 1992 change, it read as follows, with the additional word underlined.

A term permit may be issued for any combination of vehicles that exceeds 95 feet in length but does not exceed 100 feet in *combination* length, * * *.

The amendment clarified but did not substantially change the law; term permits could be issued for "Turnpike Doubles" not more than 100 feet long on June 1, 1991.

NEVADA

OPERATIONAL CONDITIONS:

VEHICLE: The CRASH said that the Nevada Department of Transportation Rules and Regulations in Sections 484.400, 484.405(4), 484.425, 484.430, 408.100–4, and 408.100–6(1), primarily dealing with emergency and safety equipment, should be added to the Nevada provisions in appendix C. We concur, and this has been done.

OTHER COMMENTS:

While appendix C has been changed to reflect the requirement to have insurance coverage, the amounts are not included in appendix C. The amount of insurance coverage is not an item that is directly related to the size and weight of LCV's.

NEW MEXICO

LENGTH OF THE CARGO-CARRYING UNITS:

The cargo-carrying length restriction does not apply to two trailing unit combinations. The length of each trailing unit is limited to 28.5 feet. This describes a two trailing unit vehicle whose operation is guaranteed by the STAA regardless of inter-unit-spacing. As long as each trailing unit is 28.5 feet long or less, cargo-carrying length is not restricted. This combination is listed as an LCV because it can exceed the 80,000-pound threshold established in the congressional definition. New Mexico has a grandfathered gross weight limit of 86,400 pounds.

NEW YORK

COMBINATION:

The State submitted an additional vehicle for inclusion in appendix C. It is an STAA Double (twin 28.5-foot units) hauling up to 100,000 pounds under a State DOT permit. As this combination may operate on NN highways in New York, appendix C has been amended to account for its operation. This combination was inadvertently omitted by the State DOT in its previous LCV submissions and docket comments.

OPERATIONAL CONDITIONS:

VEHICLE: The CRASH commented that several items were omitted from the "VEHICLE" discussion in the SNPRM, including the need to carry emergency equipment, mud flaps, safety chains, and a tractor certification identification number. All of these items are now included in appendix C.

The discussion under *DRIVER, VEHICLE,* and *PERMIT* has been revised to note the fact that the New York State Thruway Authority, in addition to its responsibility for the tolled sections of Interstate routes 87, 87/287, 90, 95, and 190 (the original Thruway mainline between New York City and Pennsylvania along with the Berkshire, New England, and Niagara sections), now also has jurisdiction over the full length of I–84, and that portion of I–287 between Thruway exit 8 and I–95. These latter two sections remain toll-free, and the operating rules that apply are the same as those in effect on all other highways in the State that are under the jurisdiction of the New York State DOT.

OTHER COMMENTS:

The CRASH also sought to include the insurance requirements and the amounts. While appendix C has been changed to reflect the requirement to have insurance coverage, the amounts are not included in appendix C. The amount of insurance coverage is not an item that is directly related to the size and weight of LCV's.

In addition to the added combination discussed earlier, the State submitted a second vehicle for inclusion in appendix C. It is a combination which uses twin 28.5-foot units to carry nondivisible loads. This vehicle has not been included as nondivisible loads moving under permit are not subject to the freeze.

OKLAHOMA

LENGTH OF THE CARGO-CARRYING UNITS:

The cargo-carrying unit length for the two trailing unit combination has been listed in this final rule at 110 feet. This length was determined after further review of docket comments submitted by the CRASH, actual operation documentation submitted by various carriers, and the appropriate State statutes and regulations. The composite of the information available leads the FHWA to conclude that on or before June 1, 1991, the longest legally allowed multi-unit combination vehicle in regular or periodic use in the State consisted of a truck tractor-semitrailer-trailer, wherein each of the trailing units was 53 feet long. Combining twin 53-foot units with a 4-foot drawbar results in the 110-foot cargo-carrying length. In the NPRM the cargo-carrying length listed for both the "Rocky Mountain" and "Turnpike" Doubles was 123 feet. In the SNPRM, 123 feet was again listed for the "Turnpike" Double. The 123-foot distance was the result of combining a 4-foot drawbar with twin 59-foot 6-inch units.

For purposes of establishing a cargo-carrying length subject to the freeze provisions of the ISTEA, the State incorrectly interpreted relevant provisions of the STAA of 1982. It appears the State reasoned that since the STAA required (1) that all States allow truck tractor-semitrailer-trailer "Doubles" combinations, and (2) that Oklahoma must allow a 59-foot 6-inch semitrailer to meet the grandfather provisions of the STAA (53 FR 2599, Jan. 29, 1988), it follows that Oklahoma must therefore allow twin 59-foot 6-inch units to operate as part of a multi-unit combination vehicle.

While the STAA does require all States to allow "Doubles," the only applicable length requirement is that each State must allow at least 28.5-foot trailing units. The allowance of any longer unit is at a State's discretion within the parameters established by this final rule. The grandfathered semitrailer length applies only for truck tractor-semitrailer combinations. The STAA requires that each State continue to allow trailers or semitrailers of such dimensions as those that were in actual and lawful use in the State on December 1, 1982. The January 1988 rulemaking referred to earlier established that length as 59 feet 6 inches for Oklahoma.

For purposes of establishing a cargo-carrying length subject to the freeze provisions of the ISTEA, a determination must be made as to the unit lengths comprising combination vehicles authorized by State statute or regulation and in actual operation on a regular or periodic basis on or before June 1, 1991. Re-examination of all submitted material and docket comments resulted in the 110-foot length.

OREGON

LENGTH OF THE CARGO-CARRYING UNITS:

The Oregon Department of Transportation (ODOT) commented that overall length requirements for three trailing unit combinations have a significant impact on public safety and must be retained. The ODOT also said that the length of tractors in combination with three trailing units is not a uniform 10 feet long but can range from 9 to 14 feet.

The freeze does not affect the authority of the ODOT to enforce an overall length limit on triple-trailer combinations. However, it does limit the overall length of the cargo-carrying units to what was authorized and in use on or before June 1, 1991. Although the comment does not specifically indicate that 9-foot-long tractors were in use with "Triples" on or before June 1, 1991, we assume that was the intent. Therefore, appendix C has been changed to correct the cargo-carrying length of three trailing unit combinations from 95 to 96 feet.

OPERATIONAL CONDITIONS:

VEHICLE: The CRASH commented that ORS 818.150(5) provides that any towed vehicles in a combination must be equipped with safety chains or cables to prevent the towbar from dropping to the ground in the event the coupling fails. The chains or cables must have sufficient strength to control the towed vehicle in the event the coupling device fails and must be attached with no more slack than necessary to permit proper turning. However, this requirement does not apply to a fifth-wheel coupling if the upper and lower halves of the fifth wheel must be manually released before they can be separated. Appendix C has been amended accordingly.

ROUTES:

The ODOT indicated that there is no direct relationship between approved routes for three trailing unit combinations and the NN highways. The connection is that the freeze applies only on NN highways. Consequently, truck tractor and three trailing unit combinations may not operate with more than 96 feet of cargo-carrying length on routes shown in appendix C. The State is free to regulate the use of triple-trailer combinations as it sees fit on other highways.

OTHER COMMENTS:

The CRASH also indicated that officials who issue permits may require the applicant to furnish public liability and property damage insurance and establish that the permit vehicle will stay on the right side of the centerline at all times. We do not regard these conditions to be the type which must be published in appendix C since the State has discretion whether or not to apply them.

The ODOT asked for a definition of terms and vehicles used in FHWA rulemakings but did not cite any specific items that should be defined. We are unaware of any items that should be defined or that could be defined without affording interested persons the opportunity to comment on the proposed definitions.

SOUTH DAKOTA

OPERATIONAL CONDITIONS:

VEHICLE: The CRASH said that provisions relating to public liability insurance, the amount of offtracking allowed and the entering of the dimensions used to calculate the offtracking on the permit form should be included in appendix C. We concur, and appendix C has been modified accordingly.

OTHER COMMENTS:

The State said that the maximum weight limit for "Rocky Mountain Doubles" is not "129K" as shown on the table at 58 FR 11465–11466 of the SNPRM but is the "Uncapped Federal Bridge Formula." For LCV's the maximum allowable weight is capped at what was allowed and in actual operation on June 1, 1991. Based on the information submitted by the State, a "Turnpike Double," which must also comply with the Federal Bridge formula, is limited to a maximum of 129,000 pounds. The recategorization of the vehicles subject to the LCV freeze has adopted the 129,000-pound value for the "Turnpike Double" as the maximum for a truck tractor and two trailing units.

The State showed the length of the road tractor-trailer-trailer combination as 80 feet. However, this is the overall length. When the length determination in the SNPRM is used, the cargo-carrying length is the overall length minus 10 feet for the length of the tractor. Therefore, the cargo-carrying length of this combination is shown in appendix C as 70 feet.

The State asked for certain additions and deletions to appendix C. The

recategorization of the vehicles subject to the LCV freeze accounted for most of the changes suggested by the State. The descriptions for South Dakota, which now appear in appendix C, take into account the comments made by the State.

UTAH

OPERATIONAL CONDITIONS:

VEHICLE: The CRASH said that Utah Regulations for Legal and Permitted Vehicles, sections 400.2(8), (12), and (14) pertaining to sway of multiple-trailer vehicles, following distance, and insurance requirements, respectively, should be reflected in appendix C. We concur, and appendix C has been amended accordingly.

ROUTES:

The State clarified the basis for delineating vehicles allowed to operate on divided or nondivided highways from overall length to length of cargo-carrying units. This reformatting did not change the lengths allowed, but simply re-stated the lengths to match the language of the ISTEA.

LEGAL CITATIONS:

The State also corrected the legal citation for truck tractor and two trailing unit combinations and indicated that those for "Triples" should be the same. These changes have been made.

WASHINGTON

COMBINATION:

The State indicated that the listing in the SNPRM for "Dump truck with pup trailers" should be changed to "Truck and trailer." We agree, and this change has been made in appendix C.

OTHER COMMENTS:

The State indicated that the listing in the SNPRM of "truck tractor with dromedary box-semitrailer-trailer" should be changed to read "truck tractor carrying a freight compartment no longer than eight feet-semitrailer-semitrailer or full trailer." As indicated previously, we have decided for the time being not to list dromedary equipment separately. This vehicle is therefore covered by the listing for the truck tractor and two trailing unit LCV which also has a cargo-carrying length of 68 feet.

The State also commented that the length of the cargo-carrying units for "Rocky Mountain Doubles" should indicate that the 68-foot length includes the load. We disagree. The ISTEA limited the length of cargo-carrying units, not loads. If the State wants to prohibit, or allow, cargo overhangs over that length, it is free to do so since it retains all the authority it possessed prior to the ISTEA to regulate cargo overhangs.

WYOMING

Many of the comments made by the WTA and the State DOT involved allowable lengths and weights for what previously had been differentiated as "Rocky Mountain" and "Turnpike" Doubles. The recategorization into truck tractor and two trailing units now used in appendix C, has accommodated many of these comments.

COMBINATION:

On or before June 1, 1991, Wyoming only allowed combination vehicles consisting of not more than three single vehicles. This precluded the operation of triple-trailer combinations which consist of four single vehicles—a truck tractor, a semitrailer, and two trailers. A provision of the ISTEA, in effect, gave the State until the next general election day following enactment (November 3, 1992) to decide whether to allow "Triples." A Statewide referendum to allow their use was defeated in the November 3, 1992, election and, as a result, the ISTEA bars the use of "Triples" in Wyoming.

LENGTH OF THE CARGO-CARRYING UNITS:

Provisions relating to the length of a semitrailer in a truck tractor-semitrailer combination will not be added to appendix C since this vehicle is not subject to the ISTEA freeze. The State DOT argued that its 60-foot semitrailer length limit would apply to automobile and boat transporters with no overall length limit. This is not consistent with the Federal requirement that States must allow standard automobile and boat transporters to have a minimum overall length of 65 feet (75 feet if stinger-steered), with no specific limit on the length of the semitrailer. However, application of the State rule does not conflict with the Federal requirement since, as a practical matter, it only applies to vehicles longer than 65 or 75 feet. Such longer combinations would be subject to the ISTEA freeze. As a result, appendix C has been changed to list the overall length of auto and boat transporters, since cargo is typically carried on a headrack the same length as the tractor, in addition to the cargo on the trailer.

OTHER COMMENTS:

The WTA said that a truck-trailer combination falls under the definition of "any other combination of vehicles" in Wyoming law and, therefore, is limited to a total overall length of 85 feet with no single unit exceeding 60 feet. While the combination is limited to 85 feet, the 60-foot limit applies only to semitrailers in a truck tractor-semitrailer combination. The showing of 78 feet for the length of the cargo-carrying units was based on allowing 7 feet for cab length.

The WTA said that it could not understand why the cargo-carrying length of saddlemount combinations was shown in the SNPRM as 75 feet. Under Wyoming law it would be considered as "any other combination" subject to an overall length of 85 feet. We agree. Since the tractor in a saddlemount combination is part of the cargo being transported, we have changed the length of the cargo-carrying units for this combination to 85 feet.

TOW TRUCK OPERATIONS

The nature of the service provided by wreckers or tow trucks is such that these vehicles need to have immediate access to all roads in a State to remove disabled or abandoned, as well as accident-damaged, vehicles. They are, to that extent, emergency vehicles. There is no evidence that Congress intended to include these operations under the freeze restrictions. Therefore, the FHWA proposed in the SNPRM to exclude emergency towing operations from any of the freeze provisions proposed in appendix C. Comments on this issue were received from the California and Washington DOT's and the California Highway Patrol.

Both of the California agencies recommended that proposed 23 CFR 658.23(b)(5), which would allow tow trucks and vehicles in tow to operate on the NN without regard to the freeze on length, be amended to require a State permit to operate overlength. This is unnecessary since 23 CFR 658.23(b)(5) merely means that they are not limited to whatever length was allowed and in use on June 1, 1991. Since they also are not STAA vehicles, the State may regulate their length in any manner it sees fit, including the requirement for a permit, if it wishes.

The Washington DOT asked if tow truck operations are restricted to the length and weight in effect on June 1, 1991. As stated in the SNPRM, emergency towing operations are excluded from any of the freeze provisions in appendix C. However, the proposed provisions in paragraph (b) of 23 CFR 658.23 only excluded tow trucks from the length provisions of appendix C. In order to fully exclude emergency towing operations from any of the provisions contained in new 23 CFR

658.23, the underlined phrase in paragraph (a)(1) has been added:

(a)(1) Except as otherwise provided in this section and *except for tow trucks with vehicles in tow,* * * *.

Also, in paragraph (b)(5) "with" has been substituted for "and."

Pole Trailers

In the SNPRM the FHWA proposed to list, as the authorized length for expandable trailers used for carrying poles, logs or pipe, etc. (pole trailers), the lengths allowed by State law, even if these limits refer to the cargo rather than the vehicle itself.

Only five sets of comments were received which specifically addressed the issue of pole trailers. The South Dakota DOT supported the position that the State-allowed length of the cargo should be considered the cargo-carrying length of the unit. The State added that the FHWA should establish a national cargo overhang policy similar to that in effect for automobile and boat transporters; that is, 3 feet in front and 4 feet to the rear of the vehicle. The Pennsylvania DOT commented that its special length limitation (70 feet) for any combination transporting nondivisible articles has been in place for over 20 years, and that it should be listed as Pennsylvania's length for these vehicles. The California Highway Patrol provided that State's applicable length limits for pole or log trailers. Taking a different tack, both the ATA and the WTA stated in their comments that pole trailers should not be considered or regulated as LCV's. The ATA stated that the "FHWA is incorrect in believing that establishing length limits for pole trailers is consistent with the purpose of section 4006 of ISTEA." In addition to echoing the ATA's comment, the WTA went on to state that the FHWA's proposal with regard to regulating pole trailers as an LCV, "does not recognize that timber harvesters do not cut logs in the same lengths all the time. Utility poles transported by telephone and power companies are not the same length and neither are the joints of pipe used in oil well drilling, pipe line construction and water and sewer line repair and construction."

The FHWA has re-examined this issue. In the SNPRM, the FHWA admitted that the statutory language concerning the freeze is not readily applicable to such vehicles. The discussion of pole trailers and the inclusion of these vehicles in the SNPRM was based on an interpretation that the two cross-members on which the cargo rests constitute individual cargo-carrying units for purposes of section 4006 of the ISTEA. That argument is difficult to maintain. In fact, the hitch, the load, and rear dolly combine to create a *de facto* semitrailer. The FHWA has decided not to include these vehicles in appendix C, as truck tractor-semitrailers are not subject to the requirements of the freeze. Two separate pole trailers pulled by a tractor, however, must comply with section 4006.

Further Restrictions on ISTEA Vehicles

The ISTEA provides that States may further restrict, or even prohibit, the operation of LCV's or CMV's with two or more cargo-carrying units after June 1, 1991. Such restrictions, however, must be consistent with sections 411, 412, and 416(a) of the STAA. This means that States may not prohibit twin trailer combinations with trailers not over 28 feet long (28.5 feet if grandfathered) from operating on the NN or reasonable access routes. States may not restrict the width of vehicles on the NN or reasonable access routes to less than 102 inches or the metric equivalent, 102.36 inches.

A State must notify the Secretary within 30 days after the imposition of further restrictions or prohibitions on the operation of LCV's or CMV's with two or more cargo-carrying units. The FHWA does not have approval authority over any additional restrictions a State may impose, but is required to publish such restrictions in the **Federal Register**. The FHWA may require further information or clarification before publishing the restrictions in the **Federal Register**.

No additional comments were received on this issue in response to the SNPRM. The proposed regulatory language in the SNPRM directly reflected congressional intent as expressed in the ISTEA. That language has been adopted unchanged by this final rule in § 658.23(e).

Minor Adjustments to Listed Information

Sections 1023 and 4006 of the ISTEA allow States to make minor adjustments of a temporary and emergency nature which will relax route designations and vehicle operating restrictions in effect on June 1, 1991. They also direct the Secretary to issue regulations establishing criteria for the States to follow in making such adjustments.

Minor adjustments must be both temporary and caused by an emergency. According to the Conference Report on the ISTEA (H.R. Conf. Rep. No. 404, 102d Cong., 1st Sess. 314 (1991)), such adjustments are intended to be temporary and limited, e.g., a bridge failure that would require the rerouting of ISTEA vehicles to highways where they would otherwise be prohibited. Since it is impossible to foresee all types of emergencies that might necessitate a minor adjustment, and it is not the intent of the FHWA to establish a burdensome reporting requirement, the proposed regulation would require a State to report the details of an adjustment only if the duration was expected to exceed 30 days. Emergency adjustments with a duration of 30 days or less would not be reported to the FHWA.

The NPRM proposed to cap the duration of minor adjustments at 1 year. Adjustments lasting more than 1 year would not be considered to be of a temporary or emergency nature. Minor adjustments for the same emergency would not be permitted to be broken into periods of less than 1 year to extend the emergency for a period longer than that. Similarly, an emergency would not be permitted to be broken into 30-day or shorter periods to avoid reporting. The FHWA re-examined the issue in light of the comments received to the NPRM docket. Subsequently, the SNPRM removed the NPRM's 1-year maximum duration for a minor adjustment, but clearly spelled out that the FHWA must approve any minor adjustments which exceed 30 days. The SNPRM proposal also clearly spelled out that rejection of a State's request would cause the immediate reimposition of freeze restrictions, with failure to do so putting a State at risk of a funding penalty pursuant to 23 U.S.C. 141.

Two sets of comments to the SNPRM addressed the issue, those of the CRASH and those of the Advocates For Highway and Auto Safety (Advocates). Both organizations objected to the removal of the original 1-year time limit. They feared that under the SNPRM States would be allowed to detour LCV's onto highways less capable of safely accommodating these vehicles for unspecified, indefinite lengths of time. The Advocates also objected to the SNPRM proposal because

It fails to provide any criteria for the states to use in choosing alternate routes. The agency (FHWA) simply asserts that it will exercise its discretion to review and approve or disapprove any state's request for an LCV routing adjustment.

It argues that the FHWA is reserving for itself a power to make decisions on an important issue without publicly available guidelines which have been developed through a rulemaking process.

The criteria represented in the final rule by § 658.23(c) are necessarily

general and rely on the review-and-approval nature of the Federal-State relationship.

It is not practical to develop specific criteria to evaluate requests which might originate for any number of reasons. However, to allay the concerns of both the CRASH and Advocates—that minor adjustments, insofar as alternate routes are concerned, will result in LCV's temporarily operating on highways perceived to be less safe—this final rule includes additional guidance in selecting alternate routes. Section 658.23(c) now provides that in selecting alternate routes, States should, to the extent possible, select routes with geometric and pavement design features equivalent to those of the highway segment which is temporarily unavailable. In addition, each request involving an alternate route should include a discussion of what steps the State will take to mitigate any operational and/or safety problems that may develop.

The operating philosophy of the FHWA with respect to State issues has always been that of individual office autonomy within broad national guidelines. The Division Office of Motor Carriers within each State is in the best position to evaluate requests involving truck issues in the State. However, in order to assure that a degree of uniformity is applied to such requests, the Regional Office of Motor Carriers must be consulted before a decision is made on a State's request. On issues which involve alternate routes for LCV's, the final rule directs the Division Office of Motor Carriers to coordinate with the Division Administrator before consulting with the Regional Office.

Definition of Nondivisible Loads

Background

The definition of a nondivisible vehicle or load included in the NPRM was criticized by many commenters, and the following revised definition was therefore proposed in the SNPRM:

Nondivisible vehicle or load. As used in this part, "nondivisible" means any vehicle or load exceeding applicable length or weight limits which cannot readily be separated into smaller vehicles or loads that comply with such limits without:

(1) Compromising the intended use of the vehicle,

(2) Destroying the value of the load, or

(3) Using expert knowledge or specially designed tools. The intended use of a vehicle would be compromised if separating it into smaller units would make it unable to perform the function for which it was designed. The value of a load would be destroyed if separating it into smaller units would make the load unusable for its intended purpose. Expert knowledge means familiarity with procedures required to dismantle and reassemble a load which are beyond the job requirements typically associated with positions in the motor carrier industry. Specially designed tools means equipment designed and manufactured only for use with the load in question. A State may treat a sealed containerized load moving in international commerce as a nondivisible load.

Many of those who responded to the SNPRM discussed nondivisible loads, but a number of comments suggested that the scope of the definition requires clarification. The definition adopted here (and the others already codified in 23 CFR 658.5) apply, like the ISTEA freeze itself, to the same highways and vehicle characteristics as the underlying Federal law. The following paragraphs explain that principle in more detail.

Weight: As a condition of receiving Federal-aid funds, States are required to enforce Federal weight limits (23 U.S.C. 127) on the Interstate System and on routes providing reasonable access to and from the Interstate. The penalty for failure to do so is the withholding of a State's National Highway System (NHS) apportionment. A State may set any weight limit it wishes on other highways, though many have voluntarily adopted Interstate limits for all roads. States are therefore required to use the FHWA's definition only when considering whether to issue a nondivisible load permit allowing an overweight vehicle to operate on the Interstate System and roads providing reasonable access to and from the Interstate.

Length: Federal laws relating to vehicle length (49 U.S.C. app. 2311 and 23 CFR 658.13, 658.23) apply to the NN of highways—see appendix A to part 658—and routes providing reasonable access to and from the NN (49 U.S.C. app. 2312 and 23 CFR 658.19). The Interstate is part of the larger NN, and reasonable access rights extend the reach of Federal size laws beyond the NN itself. In contrast to Federal weight law, these provisions and the implementing regulations preempt conflicting State laws or regulations.

As a practical matter, the FHWA definition of a nondivisible load will rarely be applied to cargo length because it does not cover straight trucks or single-trailer combinations. It covers only loads on vehicles (1) operating on the NN, and routes providing reasonable access to and from the NN, (2) which have two or more cargo-carrying units, and (3) when the overall length from the front of the first to the rear of the last cargo-carrying unit exceeds the longest such length in actual legal operation for a specific configuration on or before June 1, 1991. There are very few single loads that rest simultaneously on the bed of a straight truck and on a trailer, or on two or more trailers. And even in those cases, the definition would not apply unless the total cargo box length were greater than that allowed by the State in 1991. The definition will apply more often to loads, like entire buildings, that are moved on a series of dollies, each of which is a single cargo-carrying unit. There has been virtually no controversy about these loads, and we expect little in the future.

Width: Federal width law (49 U.S.C. app. 2316 and 23 CFR 658.15), like the length requirements, applies on the NN and reasonable access routes, and it preempts conflicting State laws or regulations. However, the definition of a nondivisible load adopted by this rule does not apply to an overwidth vehicle because Federal law provides that States may issue permits to motor vehicles more than 102 inches wide without regard to divisibility or nondivisibility (49 U.S.C. app. 2316(c)).

Height: The FHWA has no authority to regulate vehicle height; there is no Federal law on this subject.

Comments to the Docket

Containers: The SNPRM proposed to allow States to treat containers moving in international commerce as nondivisible loads. Responses were about equally divided. Three State transportation departments favored the proposal, while two States, the ATA, and the Advocates opposed it.

Missouri said that "(u)niformity among States to issue overweight permits for containerized loads in excess of 80,000 pounds gross weight would be a giant accomplishment."

Connecticut suggested that States be required to treat sealed containerized loads moving in international commerce as nondivisible, subject to maximum dimensions and weights it did not specify. Florida went even further, pointing out that

> no justification is presented in the SNPRM for not affording identical containerized loads in domestic commerce a benefit being afforded such containers in international commerce. Therefore, it is proposed that the final rule make no reference to either international or domestic commerce and the statement in question should be revised to read: A State may treat a sealed containerized load as a nondivisible load.

On the other hand, the Washington State Patrol strongly disagreed with the proposal.

> If that were allowed, the industry could load any container to whatever weight, claim its (sic) moving in international commerce and obtain an overweight permit, without

regard to axle, gross weight or bridge formula requirements * * *.

During a recent "Container Weight" study, conducted by the Washington State Patrol, it was shown that of the 3,100 vehicles transporting containers, which exceeded the legal weight limits, all but one could be transported legally by using vehicles with the proper number of axles and axle spacings.

The Washington State Patrol concluded that "(t)he proposal * * * appears to be in conflict with the 'Intermodal Safe Container Transportation Act of 1992' * * *."

Similarly, the Washington DOT argued that "(r)ather than stating a policy that the FHWA is ambivalent about whether the states allow containerized cargo to be treated as non-divisible, it would seem better to encourage a national policy that they are not. This would alleviate competition on this point among ports to make their services more amenable to haulers and shippers." South Dakota contended that "(j)ust because the container is 'sealed' or is 'moving in international commerce' should not preclude a loaded container from meeting the same size and weight requirements which exists for a load which is loaded in a container, such as a truck box, not 'sealed' and not 'moving in international commerce.'"

The ATA recommended that the proposal to allow containers to be treated as nondivisible loads be dropped and that the issue be addressed in the rulemaking to implement the Intermodal Safe Container Transportation Act.

The Advocates argued that the FHWA had "openly contravened Congressional intent" expressed in section 4006 of the ISTEA "by explicitly endorsing the prospective regular issuance of such permits for any 'sealed containerized cargo in international commerce.'"

FHWA Response: The FHWA agrees that there is a serious question whether the proposal to allow States to treat containers in international commerce as nondivisible loads is consistent with the Intermodal Safe Container Transportation Act of 1992 (Safe Container Act) (Pub. L. 102–548, 106 Stat. 3646, partly codified at 49 U.S.C. 508).

Briefly, the Safe Container Act requires the party tendering a loaded intermodal container or trailer with a cargo weight in excess of 10,000 pounds to provide the initial carrier a written certification of the cargo weight and a reasonable description of the contents. Each carrier in the intermodal chain is required to transmit the certification to the next carrier. Motor carriers are prohibited from hauling loaded intermodal containers or trailers subject to the Safe Container Act without receiving a certification. It is also illegal to coerce a motor carrier to haul such a container or trailer (1) without a certification or (2) when the certified weight would make the combination vehicle exceed applicable State weight limits. There are two statutory options if State enforcement personnel discover an overweight tractor-chassis-intermodal container (or tractor-intermodal semitrailer) combination which is on the highway because the motor carrier relied on a false or erroneous certified weight. First, the State is authorized to assess the overweight fine against the initial tenderer and to impound the container or trailer until that party or the beneficial owner of the cargo has paid the fine. Second, if the State fines the motor carrier instead of trying to collect from the shipper or beneficial owner, the motor carrier has a lien on the contents of the container or trailer equal to the amount of the fine imposed and any additional costs incurred in the incident until it receives payment from the tenderer or beneficial owner. If payment is not made within a reasonable time, the carrier may sell the contents to satisfy the lien. The FHWA's proposed regulations to implement the Safe Container Act were published on July 14, 1993, at 58 FR 37895.

The Safe Container Act imposes administrative requirements and costs on tens of thousands of intermodal shippers around the world, and on the international transportation system, in part to reduce the number of overweight containers operating on the Nation's highways. The Safe Container Act is designed to give U.S. motor carriers enough information about the weight and cargo characteristics of intermodal containers and trailers to enable them to decide whether a particular vehicle can be transported without violating State weight limits. If States were allowed to continue routinely to issue nondivisible load permits for overweight containers, some of the essential purposes of the Safe Container Act would appear to be compromised. There would be little incentive for shippers to load intermodal containers or trailers with U.S. weight limits in mind, little if any reduction in the number of overweight vehicles (even though a permit makes them legal), and little reduction in pavement and bridge damage. Many of the expected benefits of the Safe Container Act would be lost, and the regulatory burdens it entails for shippers and carriers would be pointless, if the FHWA adopted the rule on containers proposed in the SNPRM. The FHWA has therefore decided not to promulgate a final rule dealing with containers, but to treat this subject in a separate notice of proposed rulemaking where the issue can be examined more explicitly and in greater detail. In the meantime, the FHWA's previous policy will remain in effect: the States may continue to issue nondivisible load permits to containers moving in international commerce.

Expert Knowledge or Specially Designed Tools: Many of the comments focused on the third test for nondivisibility proposed in the SNPRM. If "expert knowledge or specially designed tools" were required to dismantle a load, it would be considered nondivisible. Most of the comments were critical.

The Pennsylvania Department of Transportation found the test to be

(1) Vague,

(2) Impractical to measure or verify.

(3) Subject to manipulation by industry,

(4) Subject to subjective factors other than the vehicle or load itself, such as driver knowledge of cargo,

(5) Subject to varying interpretation, and

(6) In reality, a restatement of the initial economic criterion that was deleted from this latest rulemaking * * *.

The members of the Specialized Carriers & Rigging Association (SCRA) often move loads that would qualify as nondivisible by any definition. The SCRA noted that the definition proposed by the SNPRM explained expert knowledge as familiarity with procedures required to dismantle and reassemble a load which are "beyond the job requirements typically associated with positions in the motor carrier industry." The Association argued that because highly specialized skills are typically associated with positions in its segment of the motor carrier industry, the definition would make it impossible for special carriers and riggers to obtain nondivisible load permits.

The Alaska Department of Transportation and Public Facilities also commented that "expert knowledge" means very different things in different parts of the industry. It concluded that "(s)ome further work needs to be done on this definition."

The Caltrans commented that, "(w)hatever definition is finally promulgated, Caltrans is totally opposed to the provisions concerning expert knowledge and specially designed tools."

FHWA Response: The FHWA agrees that a test based on "expert knowledge or specially designed tools" is too complicated and ambiguous to be effective. It has therefore been replaced with a test based on the time required to divide a load. This general approach was suggested by the Oregon DOT in response to the NPRM. The full definition adopted by this rule is as follows:

Nondivisible load or vehicle.

(1) As used in this part, "nondivisible" means any load or vehicle exceeding applicable length or weight limits which, if separated into smaller loads or vehicles, would:

(i) Compromise the intended use of the vehicle, i.e., make it unable to perform the function for which it was intended;

(ii) Destroy the value of the load or vehicle, i.e., make it unusable for its intended purpose; or

(iii) Require more than 8 workhours to dismantle using appropriate equipment. The applicant for a nondivisible load permit has the burden of proof as to the number of workhours required to dismantle the load.

(2) A State may treat emergency response vehicles and casks designed and used for the transport of spent nuclear materials as nondivisible vehicles or loads.

The first two tests proposed in the SNPRM, and adopted here as paragraphs (1)(i) and (1)(ii), have elicited little comment and no controversy. These standards are appropriate but very stringent. The FHWA believes there are loads that could be divided without literally destroying their value, but only after unreasonable delay and expense to the shipper and motor carrier; the States should be allowed to issue nondivisible load permits in those cases. As the Pennsylvania DOT recognized, this is essentially an "economic criterion." Our earlier proposals to codify this idea would have allowed nondivisible load permits if dismantling the load imposed "significant additional costs on the shipper or motor carrier" (NPRM) or required "expert knowledge or specially designed tools" (SNPRM). The final rule uses 8 workhours, i.e., a full working day, as a proxy for nondivisibility. The number of workhours required by the rule is the same no matter how many people are involved; for example, if one person working 8 hours, 2 people working 4 hours each, or 4 people working 2 hours apiece, could not dismantle the load, it would be nondivisible. Most loads that require more than one full workday to dismantle, using appropriate equipment, probably were not designed to be taken apart after leaving the factory. We believe Congress intended to allow the use of nondivisible load permits for cargoes which are theoretically divisible, but so tightly integrated that they cannot be dismantled without excessive cost and delay. On the other hand, the definition sets a standard high enough to keep easily divided overweight machinery and equipment off the highway.

The definition adopted today as paragraph (1)(iii) is more objective than that proposed in the NPRM and less confusing than the amended version included in the SNPRM. It remains complex, however, and disagreements between enforcement officers, motor carriers, and shippers are likely. The rule does not specify how State officials are to determine the length of time required to break down a given load. Manufacturers may sometimes provide the necessary information. The motor carrier itself may have reliable data if it has previously dismantled such cargoes. The rule does not require a carrier or shipper to demonstrate that a given load cannot be broken down in less than 8 workhours, but it would not prohibit a State from requiring such a demonstration either. Enforcement officials may be able to work out other reliable methods in cooperation with motor carriers. Paragraph (1)(iii) requires that "appropriate equipment" be used in an effort to dismantle a cargo. The number of workers involved and the type of equipment used will depend on the load to be moved. A State is not required to grant a permit in any case, and it would certainly be reasonable to deny a permit to a carrier or shipper which makes a perfunctory or deliberately inadequate effort to dismantle a load within 8 workhours.

The FHWA intends to allow the States some latitude in implementing the definition, unless indications of nonenforcement or abuse appear.

Overweight and Overwidth Vehicles: In many cases, nondivisible load permits are likely to be requested for loads which are both overweight and overwidth. The South Dakota DOT favored the definition of a nondivisible load adopted by the Western Association of State Highway Officials (WASHTO), which includes the following:

> Portions of a load can be detached and reloaded on the same hauling unit provided that the separate pieces are necessary to the operation of the machine or equipment which is being hauled, if the arrangement does not exceed permittable limits.

The State explained how this definition would work in case of an overweight, overwidth load.

> For example, suppose that a ten foot wide crawler tractor with a fourteen foot wide dozer is to be moved. This load can be moved two ways, overweight and fourteen feet wide with the dozer and ten feet wide without the dozer. Clearly the safest way to move the load would be legal weight and ten feet wide but separating the dozer from the crawler tractor destroys the unit for its intended use and it requires expert knowledge to take the dozer off.

FHWA Response: The State has misread the FHWA's proposed definition. Although a bulldozer might be temporarily "unusable for its intended purpose" without a blade, that phrase merely clarifies the term "destroy the value of the load." Removing the blade certainly would not destroy the value of the bulldozer. The "expert knowledge" test has been eliminated, but it is unclear whether a blade would require more than 8 workhours to remove.

The flaw in the WASHTO definition is that it allows the separate pieces of an allegedly nondivisible load to be reloaded onto the same vehicle. That defeats the purpose of such a provision, which is to hold down vehicle weights in order to protect the public investment in roads and bridges. The WASHTO definition simply allows a divisible load permit to masquerade as a nondivisible load permit. That is unacceptable.

Overwidth Vehicles: The WTA described a related, but different situation:

> FHWA seems to assume that all overlength (and over-width) loads are also overweight. Much of the equipment used in agriculture is oversize, but not overweight. Allowing the removal of a portion of this type of machinery such as tires and allowing it to be carried on the same trailer is clearly in the public interest, especially when in all respects, the machinery is otherwise eligible for a nondivisible load permit. Requiring a second vehicle to haul the removed part(s) is not smart economics.

FHWA Response: If a piece of farm machinery is overwidth but not overweight, the State may either issue an overwidth permit, make the permit conditional upon the removal of tires but allow them to be carried on the same trailer, or deny a permit. These options are entirely within the discretion of the State. If farm machinery is neither overwidth nor overweight, the question of divisibility would not arise unless two or more cargo-carrying units were needed to transport it, certainly a rare occurrence.

California Policy: The California Highway Patrol also argued that "there

are incidents involving the transportation of some nondivisible loads, when more than one unit is loaded, (and) can be transported safely. To qualify, loads would have to be oversize, rather than overweight in nature. California permit policy allows the transportation of multiple nondivisible pieces together, provided sufficient supporting justification is given." The Caltrans asked for a definition that allows this kind of flexibility.

FHWA Response: States may allow several nondivisible overwidth loads on the same vehicle, as long as the normal weight limits are observed. That appears to be what California authorizes. As mentioned above, Federal law gives the States great discretion in issuing permits for overwidth loads. There would also be no conflict with Federal regulations if a State allowed more than one overlength nondivisible load to be carried on a single trailer vehicle—assuming the vehicle was not overweight—because the FHWA's definition of a nondivisible load applies only to overlength nondivisible loads carried on two or more cargo-carrying units.

Safety: The Wyoming DOT, the WTA, and Black Hills Trucking, Inc., referred to *Rocky Mountain Prestress, Inc.*, v. *Leno Menghini et al.*, No. C79–057B, an unreported 1979 Wyoming Federal district court decision, in support of the proposition that safety should be considered in any definition of nondivisible loads. Rocky Mountain Prestress manufactured concrete panels that were to be mounted, two at a time, on A-frame trailers and transported from Denver to Casper for use in construction projects. Wyoming law allowed special permits for overweight "indivisible loads," but the Highway Department rejected plaintiff's application on the ground that two panels were a divisible load. Plaintiff sued the Chief Engineer of the Department, arguing among other things that Wyoming's permit law violated the Commerce Clause of the Constitution. The court held the law constitutional, but found that it had been applied in an arbitrary and capricious manner which impermissibly burdened interstate commerce. The court explained that:

> Our conclusion is buttressed by the admission of the Defendants that heavy equipment which is being carried by trailer qualifies as an indivisible load even though the parts thereof may be easily dismantled. Such an approach to granting overweight permits signifies that the State Highway Department has previously, as they must in this case, considered circumstances other than the mere physical divisibility of the goods in transit.
>
> * * * * *
>
> We would also observe that forestry goods, baled hay and sugar beets are statutory exceptions to the mandated weight limits. The special interest group exceptions in the Wyoming statutes discriminate against the Plaintiff and others similarly situated who may be equally deserving of exceptions from the weight limitation in view of the safety and economic factors involved. * * *
>
> * * * [T]he State's desire to protect its highways has been severely diluted by the discriminatory granting of overweight permits to special interest groups, as well as by the routine issuance of such permits based on an indivisible load regulatory provision that we believe was arbitrarily and capriciously applied to the Plaintiff.

FHWA Response: The court concluded that "the 'A' frame is the safest * * * mode of transportation for loading and shipping panels," but its evidence on that point was meager. The issue of safe transportation of concrete panels was discussed at some length in the SNPRM (see 58 FR 11455–11457). As we noted there, a single panel, mounted horizontally, would improve the vehicle's braking capability and reduce its susceptibility to side winds. Two such panels obviously constitute a divisible load, and a "safety" rationale for doubling the weight of a divisible load is not persuasive.

Black Hills Trucking now contends that one panel cannot be carried horizontally because it "is not constructed to stand up to forces coming through its sides," or vertically "because it is not heavy enough in proportion to the 'sail' area exposed to side winds which destabilize the load." The apparent fragility of these concrete panels does not make two of them any less divisible. Furthermore, the Great Plains experience winds high enough to overturn tractor trailer combinations and double-stack container trains. The interests of safety are better served by halting trucking operations under those conditions than by doubling the weight of the cargo in an effort to anchor the vehicle.

The *Rocky Mountain Prestress'* decision is not binding on the FHWA. To the extent this rule requires Wyoming to adopt and enforce a new definition for purposes of issuing nondivisible load overweight permits for the Interstate System, it is no longer binding on the State either. The 1979 decision was based upon the State's arbitrary and capricious administration of its own permit law, in particular its failure to apply that law consistently to all motor carriers and commodities. At the time, there was no Federal law on nondivisible loads. Congress enacted nondivisible load provisions for vehicle weight in 1982 and for vehicle length in 1991. Proposed regulations to implement that authority have been subjected to extensive comment and discussion in this rulemaking. Wyoming, like the other States, will be required to adopt the new definition for Interstate operations. That definition will result in greatly increased nationwide uniformity in the treatment of nondivisible loads. Wyoming will have no more administrative discretion than any other State. A judicial challenge to the FHWA's definition of a nondivisible load would therefore confront a legal and factual situation completely different from that which existed in 1979.

Emergency Vehicles: Section 1023(e)(1) of the ISTEA prohibited the FHWA from penalizing States that allow emergency vehicles to use the Interstate at weights in excess of Federal axle and Bridge Formula limits. The exemption was in effect for 2 years after the date of enactment of the ISTEA and expired on December 18, 1993. Section 1023(e) also required a study of State laws and permit practices to determine whether statutory changes were needed to accommodate emergency vehicles.

To carry out the study, the FHWA requested comments on a variety of questions (57 FR 46941, October 13, 1992). The information submitted indicated that most fire trucks exceed the Federal single- and/or tandem-axle weight limits (20,000 and 34,000 pounds, respectively). These vehicles are rarely short enough to violate the Bridge Formula, however, and almost all of them have gross weights under 80,000 pounds. Technological developments in the manufacturing sector combined with the equipment preferences of fire departments are driving up the size and, especially, the weight of fire trucks. On the other hand, tandem and tridem axles are not favored because they reduce the maneuverability these vehicles need to reach burning buildings. Some States exempt fire equipment from normal weight limits, and others issue blanket overweight permits. The Caltrans reached a compromise with fire officials that will require the latter to observe specific axle limits for various types of vehicles and to make purchasing decisions accordingly.

The U.S. DOT's report was transmitted to Congress on September 7, 1993. It recommended that Congress take no further action because the matter could be resolved by an FHWA policy statement. On November 9, 1993, the Federal Highway Administrator informed the FHWA's regional offices.

and through them the States, that "the FHWA will not withhold Federal-aid funds from States which issue nondivisible load permits to emergency vehicles equipped for their intended use. We will not require that the vehicles have a full crew or be operating under emergency conditions. States may set whatever permit terms, conditions, and fees they consider appropriate." The Federal Highway Administrator added that this policy "is compatible with the Agency's draft definition" published on February 25, 1993, in the SNPRM and that if it "in any way conflicts with the definition ultimately adopted through the rulemaking process, appropriate action will be taken to amend or rescind the policy."

The Federal Highway Administrator's decision was based upon conclusions set forth in his November 9, 1993, letter:

> Some States may have refused to issue nondivisible load permits to emergency vehicles because much of their equipment is readily detachable. Fire trucks often carry firefighting teams, water, hoses, axes, respirators and other devices; advanced life-support vehicles typically carry at least two paramedics (one of whom drives), defibrillators, oxygen tanks, stretchers, and medical supplies. In one sense, ancillary equipment and personnel are "divisible" parts of the load, and removing them might lighten an emergency vehicle enough to restore compliance with Interstate weight limits. Doing so, however, would defeat the purpose of these vehicles and make it impossible for them to respond effectively to emergencies. New vehicles may even be overweight as they leave the final stage manufacturing facility, either because the base vehicle is particularly heavy or because ancillary equipment is supplied with it. The equipment that could be removed from emergency vehicles to reduce weight is essential to the services they are designed to perform. These vehicles and loads are functionally if not physically nondivisible and I believe the States should have the option to treat them as such.

In the language of the regulation we are adopting today, requiring an emergency vehicle to unload separable pieces of equipment would "compromise the intended use of the vehicle." Emergency vehicles meet the definition of a nondivisible vehicle or load.

Spent Nuclear Fuel: The Pennsylvania DOT pointed out that the FHWA informed the American Association of State Highway and Transportation Officials several years ago that the FHWA regards overweight casks used to move spent nuclear fuel as nondivisible. This determination was not reflected in the SNPRM. The casks used to transport spent nuclear materials, especially nuclear fuel, are extraordinarily strong and heavy, both to prevent a release in case the transporter vehicle was involved in an accident and to block radiation that would penetrate lighter materials. Some of these containment devices can make a vehicle overweight even before the nuclear materials are loaded. These vehicles cannot be used for any other cargo or reduced to legal weights without frustrating their purpose. A new provision has therefore been added which essentially states that specially designed casks used to move spent nuclear fuel meet the definition of a nondivisible load.

Other Issues: The Pennsylvania DOT suggested that the SNPRM be amended to acknowledge that both the President and State governors

> Have the executive authority to temporarily modify any vehicle size or weight law or regulation, including the nondivisible criteria, in order to provide for emergency relief to promote the general welfare and public safety, without threat of Federal sanction after the emergency.

While the FHWA would not necessarily impose sanctions if weight enforcement suffered during emergencies that threatened public welfare, Federal weight law simply does not authorize waivers of the Interstate limits or regulatory definitions.

The Connecticut DOT suggested that we use the definition of a nondivisible load to establish "an Ultimate Limit or a guideline to be used by manufacturing." Federal size and weight laws confer no authority to regulate manufacturers.

The FHWA mentioned in the SNPRM that bulk commodities such as liquids, grain, and cement are inherently divisible. The CRASH suggested that the definition include "a much more complete listing of loads that are inherently divisible * * *." In view of the enormous variety of products that move by truck, we do not believe divisible loads could reasonably be itemized.

Grove Worldwide, a manufacturer of cranes, proposed that a load be defined as nondivisible if dismantling it would cause a competitive disadvantage, compromise the integrity and safety of the equipment when disassembled, or jeopardize the warranty. The FHWA considers these tests too far removed from the question of physical divisibility to be appropriate.

Procedure to Review and Correct Final List

Sections 1023 and 4006 of the ISTEA provide a review and correction procedure for the final list of ISTEA vehicles, published today as appendix C to 23 CFR part 658. Any person or State may request that the Secretary review the final list to determine if there is cause to believe that it contains a mistake. The Secretary may also initiate the review. If the Secretary believes an error exists, he or she must commence a proceeding to determine if the list should be corrected, and if so, make the correction. Proposed language establishing such a procedure was included in the SNPRM. No comments were received on this issue. Accordingly, that language has been adopted, unchanged, by this final rule in § 658.23(f).

Temporary Exemption for Public Transit Vehicles

Section 1023 of the ISTEA was amended by the Department of Transportation and Related Agencies Appropriations Act for fiscal year (FY) 1993, Public Law 102–388, 106 Stat. 1520. Section 341 added a new subsection (h) which reads in part as follows:

> (h) Public Transit Vehicles.—
> (1) Temporary Exemption.—The second sentence of section 127 of title 23, United States Code, relating to axle weight limitations for vehicles using the Dwight D. Eisenhower System of Interstate and Defense Highways, shall not apply, in the 2-year period beginning on the date of the enactment of this Act, to any vehicle which is regularly and exclusively used as an intrastate public agency transit passenger bus. The Secretary may extend such 2-year period for an additional year.

This prevents the FHWA from sanctioning States that fail to enforce the Interstate axle-weight limits for public transit vehicles at least until October 6, 1994. If the Secretary exercises the authority to extend the exemption an additional year, it would apply until October 6, 1995. The 2-year exemption was included in the ISTEA to allow States to suspend axle weight enforcement on the Interstate System against public transit vehicles while the Secretary conducts the study called for in section 1023(h)(2). That study, which is currently underway, is to determine whether or not public transit vehicles should be exempted from the requirements of 23 U.S.C. 127, State weight laws, or if such laws should be modified to accommodate these vehicles. The FHWA and the Federal Transit Administration published a joint notice and request for comments on this issue on November 16, 1993 (58 FR 60481). A report on the results of the study, along with recommendations, will ultimately be submitted by the Secretary to Congress.

In a comment to the SNPRM docket, the American Public Transit Association urged that the temporary exemption

language be codified into part 658. The FHWA agrees with this comment. Accordingly, the exemption is codified in this final rule at § 658.17(k).

Temporary Exemption for Emergency Vehicles

Section 1023(e) of the ISTEA added the following exemption from 23 U.S.C. 127:

(1) Temporary Exemption.—The second sentence of section 127 of title 23, United States Code, relating to axle weight limitations and the bridge formula for vehicles using the Dwight D. Eisenhower System of Interstate and Defense Highways, shall not apply, in the 2-year period beginning on the date of the enactment of this Act, to any existing vehicle which is used for the purpose of protecting persons and property from fires and other disasters that threaten public safety and which is in actual operation before such date of enactment and to any new vehicle to be used for such purpose while such vehicle is being delivered to a fire fighting agency. The Secretary may extend such 2-year period for an additional year.

This prevented the FHWA from sanctioning States that failed to enforce the Interstate axle-weight and Bridge Formula limits for fire or emergency vehicles in actual operation on or before December 18, 1991, and for such equipment being delivered from the manufacturer to a fire department. The normal gross weight limit was not affected by the exemption. The exemption remained in effect through December 18, 1993. The SNPRM proposed to codify the exemption at § 658.17(k).

Two comments were received on this issue. The South Dakota DOT expressed its desire to go on record as "not in favor of allowing a temporary or permanent axle weight exemption or bridge formula weight exemption for emergency vehicles." The State contends that "operation of these vehicles overweight threatens the public's safety" and "that emergency vehicles should be designed to operate within legal size and weight limits." The Caltrans objected to the FHWA's interpretation of the law which indicated that the normal gross weight limit (80,000 pounds) remained in effect during the period of the exemption. They contend that gross weight is determined by the Bridge Formula and that our interpretation was contradictory.

The FHWA believes that Congress intended the exemption in section 1023(e)(1) to cover (1) single- and tandem-axle limits, (2) application of the bridge formula to intermediate axles (the inner bridge limits), and (3) application of the Bridge Formula to the overall wheelbase of the vehicle (the outer bridge limit). However, the 80,000-pound maximum gross weight allowed by 23 U.S.C. 127(a) is not inherently part of the Bridge Formula. It is a separate statutory restriction, and we do not believe Congress intended to authorize an exemption to the 80,000-pound limit.

The 2-year exemption was included in the ISTEA to allow States to suspend enforcement action against these vehicles while the Secretary conducted the study called for in section 1023(e)(2). That study has been completed, as indicated above, and the authority of the Secretary to extend the temporary exemption an additional year will not be exercised. The temporary exemption expired December 18, 1993. However, the definition of a nondivisible load adopted in this final rule specifically declares emergency vehicles to be nondivisible. States may therefore issue overweight permits for these vehicles if they wish.

Interstate System Weight Requirements

The first sentence in 23 U.S.C. 127(a) was amended by the STAA of 1982 to require all States to allow the maximum weights permitted by Federal law on the Interstate System. In effect, the weight limits set forth in section 127 became minimums which the States must allow, as well as the maximums the States could allow, on the Interstate System. Since the STAA amendment of section 127 became effective (January 6, 1983), States have occasionally argued that the amendment applied only to the single-axle, tandem-axle, and maximum gross weight limits, and not to gross weights developed by the Bridge Formula. In addition, a degree of confusion regarding applicability has lingered over the years as a result of the regulations issued to implement the STAA (49 FR 23302, June 5, 1984). Although those regulations were published 1½ years after enactment of the STAA, the statutory action making the weight value minimums was not highlighted nor was any regulatory language included.

The SNPRM proposed to clarify and resolve this issue by including a § 658.17(f) as follows.

(f) States may not enforce on the Interstate System vehicle weight limits of less than 20,000 pounds on a single axle, 34,000 pounds on a tandem axle, or the weights derived from the bridge formula, up to a maximum of 80,000 pounds, including all enforcement tolerances.

Comments on this proposal were received from six State Departments of Transportation (Arizona, Montana, Nevada, Oregon, South Dakota, and Washington), as well as from the WASHTO's Subcommittee on Highway Transport. All seven commenters objected to the paragraph as proposed for fear that it would no longer allow the States to further control axle weight using a regulation based on pounds per inch of tire width. Each of the six States providing direct comments currently has this type of weight control regulation in force. The "Guide For Uniform Laws and Regulations Governing Truck Size and Weight Among the WASHTO States," prepared by the WASHTO Subcommittee on Highway Transport and adopted by the WASHTO Policy Committee on June 26, 1993, recommends that all 17 member States adopt a 600-pound/inch tire width weight control.

State tire loading regulations are intended to limit the use of single tires or wheels designed for dual tire applications. This is a practice which results in higher pavement stress and shorter pavement life, and greatly reduces the safety margin provided by dual tires. Depending on the pound-per-inch limit chosen, these regulations may also restrict the use of some "super single" tires. The Washington State DOT included in its docket comments a copy of a report of research on the effects of wide based single tires on flexible pavements conducted by the FHWA at our Pavement Testing Facility during 1989 and 1990. Dual 11R22.5 radial tires, previously identified as one of the most common truck tires in use today, were tested against a 425/65R22.5 wide base single tire. Under a load rating methodology established by the United States Tire and Rim Association, the load ratings for the duals and the single are equivalent; however, the footprint on the pavement is significantly different. The approximate footprint of an 11R22.5 tire is 8.5 inches. Thus, two sets of duals (four tires) can result in approximately 34 inches of tire being available to transmit an axle load to the pavement. For the 425/65R22.5 wide base tire, the footprint is approximately 11 inches, which would make approximately 22 inches available to transmit an axle load to the pavement. The research demonstrated that the 425/65R22.5 wide based single tire was significantly more damaging to conventional flexible pavements than the traditional 11R22.5 dual tires.

The Federal axle weight limits on the Interstate System were adopted to protect the tremendous Federal investment in that System. Restrictions on the weight a tire may carry, based on its width, are consistent with that goal and not forbidden by Federal law. It would be anomalous to adopt axle

weight limits to protect Interstate System pavements and then prevent States from blocking the use of tires so narrow that much of the protection was lost. In addition, a pound-per-inch tire limit does not directly limit the weight that an axle may carry, since additional or wider tires may be utilized. Therefore, unless such restrictions operate so that, as a practical matter, axles cannot be loaded to the Federal weight limits, they are not inconsistent with 23 U.S.C. 127. We believe that laws limiting tire weights as low as 500 pounds per inch width of tire or tread width will allow axles to be loaded to the Federal axle weight limits without particular difficulty.

Steering axles must be treated differently, however, since they cannot always be equipped with wider or additional tires. The FHWA has already recognized a different standard for steering axles by not requiring States to allow truckers to load them to 20,000 pounds when the manufacturer's weight rating is less than that. Therefore, States may not impose pound-per-inch restrictions that would reduce the allowed weight of steering axles on the Interstate System to less than 20,000 pounds or the manufacturer's weight rating, whichever is lower.

Arizona, Montana, and Oregon also suggested that proposed § 658.17(f) be amended to allow temporary weight restrictions based on climatic conditions or emergencies.

Some northern States have for decades enforced lower axle limits during spring thaw. When moisture in a pavement's sub-base, frozen during the winter months, begins to melt, the load-carrying capacity of the pavement structure is reduced until the moisture drains. The degree of reduction is a function of the overall pavement structure thickness, the type of underlying material, amount of moisture, and depth of frost penetration.

Federal weight restrictions apply only to the Interstate System. The standards to which the System has been built include pavement designs developed with the strength to allow maximum legal weights year round. The FHWA does not agree that there is a need to provide regulatory flexibility for climatic conditions. The pavement design parameters of the Interstate System preclude the need for this authority. However, the States do retain the authority to establish such restrictions for highways that are not part of the Interstate System.

"Emergency" weight restrictions requested by States generally are not restrictions at all, but rather the lessening of restrictions to allow heavier weights. For example, when natural disasters occur, carriers, relief agencies, or States would often like to allow trucks carrying relief supplies to exceed normal weight limits. Federal law simply does not allow waivers of this kind. On the other hand, if a flood or earthquake has seriously weakened a bridge or stretch of pavement, it remains within the police powers of the State or municipality to close or limit access to the facility in order to protect the public.

Of the three exceptions to § 658.17(f) sought by commenters, the FHWA agrees that States should retain the authority to enforce the tire loading restrictions, but does not concur in the request to provide climatic or emergency restrictions. Accordingly, § 658.17(f), as proposed in the SNPRM, is amended to read as follows:

§ 658.17 Weight.

* * * * *

(f) Except as provided herein, States may not enforce on the Interstate System vehicle weight limits of less than 20,000 pounds on a single axle, 34,000 pounds on a tandem axle, or the weights derived from the Bridge Formula, up to a maximum of 80,000 pounds, including all enforcement tolerances. States may not limit tire loads to less than 500 pounds per inch of tire or tread width, except that such limits may not be applied to tires on the steering axle. States may not limit steering axle weights to less than 20,000 pounds or the axle rating established by the manufacturer, whichever is lower.

Bus Length and Access

Section 4006(b)(1) of the ISTEA amended section 411(a) of the STAA [49 U.S.C. app. 2311(a)] by inserting "of less than 45 feet on the length of any bus," after "vehicle length limitation."

Section 4006(b)(2) of the ISTEA amended section 412(a)(2) of the STAA [49 U.S.C. app. 2312(a)(2)] by inserting "motor carrier of passengers" after "household goods carriers."

The first provision has the effect of requiring States to allow buses with a length of 45 feet or less on the NN and reasonable access routes. The second provision requires States to allow motor carriers of passengers to have the same access off the NN as household goods carriers, i.e., to "points of loading and unloading." In the SNPRM, the FHWA proposed changes to the "Length" and "Reasonable Access" sections of part 658 to account for these provisions.

Comments on this proposal were received from the Caltrans and the Department of California Highway Patrol. Both agencies recommended that a final rule include definitions of both "bus" and "motor carrier of passengers" to "prevent confusion on the interpretation and application of the regulations." The FHWA agrees with this comment.

The STAA defines a "commercial motor vehicle" in part as "any self-propelled * * * vehicle used on the highways in [interstate] commerce principally to transport passengers * * * (B) if such vehicle is designed to transport more than 10 passengers, including the driver * * *" [49 U.S.C. app. 2301(1)(B)]. While this definition applies only to subchapter I of chapter 32 of title 49, U.S.C., which makes grants available to States that agree to enforce Federal, or compatible State, safety regulations, it is an indication of congressional intent. For purposes of administering the commercial vehicle safety program, "bus" was defined in 49 CFR 390.5 as "any motor vehicle designed, constructed, and or used for the transportation of passengers, including taxicabs." The Motor Carrier Safety Act of 1984 amended the definition of a bus to a "vehicle designed to transport more than 15 passengers, including the driver * * *." [49 U.S.C. app. 2503(1)(B)].

The intent of Congress, as expressed in the ISTEA, is to guarantee national route availability and reasonable access for "buses" not exceeding 45 feet in length. Since virtually all States already allowed 40-foot buses to operate Statewide prior to the ISTEA, the number of passengers the vehicle is designed to carry is not an issue, simply the establishment of a national standard length. Accordingly, this final rule will use the most generic of the definitions already established, that found in 49 CFR 390.5.

While the term "motor carrier of passengers" has not previously been defined, this type of operation can generally be characterized as belonging to at least one of three groups: (1) Common carriers that offer service on regular (and sometimes on irregular) routes, (2) contract carriers that provide charter service to groups, or (3) private carriers that do not serve the public but use buses as part of some other enterprise. Someone who uses a 45-foot bus for recreational or other non-business purposes would not qualify as a motor carrier of passengers. For this final rule "motor carrier of passengers" is defined as follows:

Motor Carrier of Passengers—is a common, contract, or private carrier using a bus to provide commercial transportation of passengers

The list of definitions contained in 23 CFR 658.5 has been amended to include this definition. In addition, the

provisions of § 658.13 (Length) and § 658.19 (Reasonable Access) have been amended to account for these provisions.

Lengths of Trailers and Semitrailers

Fruehauf Trailer Corporation (Fruehauf) commented that the FHWA should clarify the methods by which length is determined for trailers which are part of a multi-unit vehicle subject to the freeze. Because of the attention focused on the LCV length issue by the freeze, Fruehauf contends that it is important that all States (and enforcement agencies) have a uniform understanding of how the length of the individual units is to be determined. Fruehauf's specific concern is with full trailers used in LCV's which are actually made up of a semitrailer and a converter dolly.

In a Notice of Interpretation (NOI) published on March 13, 1987, at 52 FR 7834, the FHWA addressed the issue of trailer or semitrailer length, as part of an overall discussion of length and width exclusive devices. The first length interpretation is relevant here.

1. The length of a semitrailer equipped with an upper coupler (mates with a truck tractor fifth wheel) and a full trailer (with either a permanently mounted dolly or equipped with a converter dolly) is to be measured from the front vertical plane of the foremost transverse load carrying structure to the rear vertical plane of the rearmost transverse load carrying structure. The towbar of a full trailer is excluded from the length measurement (of that trailer) since, technically, it carries no load, but rather it is the means by which the trailer unit is drawn.

The length of any two or more units subject to the freeze requirements of section 4006 is to be measured from the front of the foremost transverse load-carrying structure of the first cargo-carrying unit to the rear of the rearmost transverse load-carrying structure of the last such unit. The upper coupler on a semitrailer is not to be included in the length determination of these units.

National Network—California

This final rule will also amend appendix A to 23 CFR part 658, National Network—Federally-Designated Routes, to reflect the inclusion of the I–580 Richmond-San Rafael Bridge (toll) in the NN. Under the STAA, all Interstate System routes are part of the NN unless deletion is authorized by law. The I–580 Richmond-San Rafael Bridge was withheld from the NN until a direct connection to I–80 from the east end of the bridge could be completed. This condition was reflected in Note 1 to the California listing of NN routes in appendix A. Now that this connection has been completed, the FHWA is amending appendix A by removing Note 1 and redesignating Note 2 as "Note."

This amendment will merely reflect the fact that the I–580 Richmond-San Rafael Bridge is now included in the NN pursuant to the provisions of the STAA. For this reason, and the others set forth above, the FHWA has determined that prior notice and opportunity for public comment on this action are unnecessary. Furthermore, due to the technical nature of this amendment, the FHWA has determined that prior notice and opportunity for comment are not required under the U.S. Department of Transportation's Regulatory Policies and Procedures, as it is not anticipated that such action will result in receipt of useful information.

National Network—Virginia

The ISTEA freeze applies to the operation of specified CMV's on the Interstate and other portions of the NN. The identification of NN routes in Virginia contained in appendix A to 23 CFR part 658 utilizes Interstate System exit numbers to identify the beginning or end of some NN routes. During 1992, the State converted all Interstate System exit numbers from a consecutive number system to a milepost numbering system. In response to this portion of the SNPRM, the State indicated that there appeared to be a discrepancy between what was published in the SNPRM and what the State was considering to be its NN.

The State list not only includes those highway sections designated by the Secretary which comprise appendix A to part 658, but also additional segments which the State has also decided to open to STAA vehicles. Each State retains the authority to open additional mileage, beyond what is listed in appendix A of part 658, to STAA vehicles without the approval of the Secretary. In order to identify NN routes in Virginia which have been federally designated, we are reissuing the State's NN routes in appendix A, 23 CFR part 658, to reflect the new milepost-based exit numbers.

Definition Of Maxi-Cube

Among the vehicles specifically excluded from listing in appendix C, and therefore not subject to the restrictions described in section 4006 of the ISTEA, is the maxi-cube vehicle. "Maxi-Cube" is a registered trademark of LHT Industries, which designed the vehicle, but the maxi-cube regulations adopted in this rule apply to any vehicles that meet their terms.

In 1987, Congress amended the STAA by adopting a definition of a maxi-cube and authorizing the vehicle to operate on the same terms as other STAA vehicles (49 U.S.C. app. 2311(f)(2) and 2311(c), respectively). It soon became apparent that the definition, reproduced below, was flawed:

(2) For purposes of this section, *maxi-cube vehicle* means a truck tractor combined with a semi-trailer and a separable cargo-carrying unit which is designed to be loaded and unloaded through the semi-trailer, except that the entire combination shall not exceed 65 feet in length and the separable cargo-carrying unit shall not exceed 34 feet in length.

49 U.S.C. app. 2311(f)(2).

Although the term maxi-cube was intended to apply to a specific combination of straight truck and trailing unit, the 1987 language described the power unit as a "truck tractor," which the STAA elsewhere defines as "the noncargo carrying power unit that operates in combination with a semitrailer or trailer * * *" (49 U.S.C. app. 2311(f)(1)).

Theoretically, therefore, the maxi-cube is a noncargo-carrying power unit combined with a semitrailer and a separable cargo-carrying unit which is designed to be loaded and unloaded through the semi-trailer. Unfortunately, this vehicle is a chimera. The separable cargo-carrying unit cannot be placed on the "noncargo carrying" power unit, and if it were placed on the semitrailer, the result would seem to be a truck tractor-chassis-intermodal container combination. Container vehicles had long been legal, however, so the 1987 language certainly was not directed at them. In some sense all containers and semitrailers are designed to be loaded and unloaded "through" themselves, but the description does not really fit a combination with only one cargo-carrying unit. The fact is that the definition of the vehicle to be authorized did not correspond to the actual vehicle.

Recognizing the problem, Congress amended the STAA again in 1990 to make maxi-cubes "specialized equipment" and thus eligible for the special regulatory treatment authorized by 49 U.S.C. app. 2311(d). The accompanying report of the House Appropriations Committee said the following:

The bill includes language (Sec. 327) amending section 411(d) of the Surface Transportation Assistance Act of 1982 regarding maxi-cube vehicles. A maxi-cube vehicle is a truck combination consisting of a power unit capable of carrying cargo that pulls a semitrailer. The power unit is a single or tandem axle truck that carries either a

detachable or a permanently attached cargo box or platform. The trailing unit is a semitrailer attached to the front unit by a specially built draw bar which gives the entire combination a single point of articulation. The front of the rear unit is specially designed so cargo may be loaded through the rear unit to the front unit. The length of the trailing cargo unit can be no more than 34 feet excluding the draw bar. The distance from the front of the cargo box on the power unit to the rear of the trailing unit can be no more than 60 feet.

(H.R. Rep. No. 584, 101st Cong. 2d Sess. at 78–79 (1990).)

Although this is an accurate description of a maxi-cube, the flawed definition of the same vehicle in 49 U.S.C. app. 2311(f)(2) was not repealed. In the SNPRM, the FHWA therefore exercised its broad discretionary authority over specialized equipment to propose a definition of the maxi-cube that largely codified the policy guidance of the Committee Report while omitting or modifying the erroneous parts of the statutory definition. We believe this is consistent with the principle that ambiguous or confusing statutes must be interpreted and implemented in a manner that minimizes difficulties and produces the most sensible result.

The definition of a maxi-cube proposed in the SNPRM has been adopted in this final rule, with slight modifications for clarity. It should be noted that the word "semitrailer" used in the statute and Committee Report has been changed to "trailer or semitrailer," since some of the vehicles built as maxi-cubes in recent years are equipped with pintle-hooks, non-load-bearing hitches used for full trailers. Others are equipped with load-bearing fifth-wheel hitches typical of semitrailers. This modification of the definition is well within the FHWA's authority to promulgate rules to accommodate specialized equipment.

The SNPRM also proposed that maxi-cube vehicles should be measured with the adjustable-length drawbar (if so equipped) at its maximum extension, since we assumed that was how the drawbar would be positioned for over-the-road operations. The Pennsylvania DOT supported this proposal in its comments to the docket.

It appears, however, that adjustable drawbars usually are not fully extended when the vehicle is in motion. Magna Van and Coca Cola commented that 24 inches is the normal distance between the first and second units of their maxi-cube vehicles during over-the-road operations, but that longer distances are used for access to driveways and transferring freight in off-road situations. Other information submitted to the docket indicated that 27 inches is probably the longest distance between cargo units for highway travel. However, there are times when a longer drawbar setting may be desirable, such as on rough terrain to keep the cargo boxes from hitting each other; in urban areas while making sharp turns; or while loading and unloading cargo from the front unit while the rear unit is attached. The maximum reported unit separation in these instances is 42 inches.

The FHWA believes Congress intended the maxi-cube length limits to apply to vehicles in their normal operational configuration. We have concluded that the cargo capacity of these vehicles would be needlessly reduced if the rule required length measurements to be made with the drawbar at maximum extension, since that position is used only to assist in low-speed maneuvering or loading and unloading. The last sentence of § 658.13(e)(4) has therefore been modified to read:

If the maxi-cube vehicle is equipped with an adjustable drawbar, the 60- and 65-foot distances shall be measured with a drawbar spacing of not more than 27 inches. The drawbar may be temporarily extended beyond that distance to maneuver or load the vehicle.

The American Movers Conference believes that the load-through feature of the maxi-cube should be made optional. We do not agree. That language is included both in the statutory definition in 49 U.S.C. app. 2311(f)(2) and in the Appropriations Committee report. This feature is one of the primary reasons Congress declared maxi-cubes specialized equipment. Removing the load-through element from the definition would make these vehicles indistinguishable from truck-trailer combinations.

The State of Connecticut asked if the maxi-cube vehicle will be designated as specialized equipment since it will be limited to the NN and reasonable access routes. Maxi-cube vehicles are by statute specialized equipment, and Federal regulations for such equipment apply only on the NN and reasonable access routes.

This action concludes the FHWA rulemaking proceeding that was designated with the regulation identification number 2125–AC65.

Beverage Semitrailers

A rulemaking to designate as specialized equipment the 28-foot van-type, drop-frame beverage semitrailer when it is equipped with an upper coupler plate that extends in front of the semitrailer, has been underway since 1990. The last action on the subject was publication of an NPRM on June 25, 1990, at 55 FR 25850. The final rule was being prepared when the ISTEA was enacted. Since the rulemaking necessary to implement the "LCV-freeze" would, like the beverage semitrailer rule, amend 23 CFR part 658, the decision was made to include both in a single document. Since they amend the same existing regulation, combining them minimizes the number of separate changes made to an already complex regulatory document.

The STAA, codified at 49 U.S.C. app. 2311 *et seq.*, established length and width standards for vehicles using the highways designated as the NN (appendix A to 23 CFR part 658 (1993)). The STAA prohibited any State from enforcing a length limit of less than 28 feet on a semitrailer or trailer operating in a truck tractor-semitrailer-trailer combination on the NN (49 U.S.C. app. 2311 (a)). The STAA, under an equipment grandfather provision, also allows the use of 28.5-foot semitrailers and trailers in truck tractor-semitrailer-trailer combinations if they were actually and lawfully operating on December 1, 1982, within a 65-foot overall length limit in any State. The statute prohibited any State from denying reasonable access to points of loading and unloading for a truck tractor pulling a single 28-foot (28.5-foot if grandfathered) semitrailer that generally operates as part of a truck tractor-semitrailer-trailer combination. In addition, the STAA gave the Secretary authority to exclude from measurement of trailer length and width, devices necessary for the safe and efficient operation of CMV's, provided length exclusive devices did not have, by design or use, the capability to carry cargo (49 U.S.C. app. 2311(h), 2316(b)).

Questions involving permissible vehicle length and length exclusive devices are critical to a new design for 28-foot beverage semitrailers. As used in this proceeding, "beverage" means a liquid for drinking, including water. One new design places the kingpin under the nose of the trailer with a portion of the upper coupler plate extending beyond the front of the vehicle. Since these beverage semitrailers use an enclosed van-type, drop-frame design, mounting the kingpin in this manner allows the drop-frame portion of the semitrailer to be extended forward. The FHWA has issued several NOI of length and width exclusive devices. The most recent was published on March 13, 1987, at 52 FR 7834. That NOI recognized a number of length-exclusive design features, including (1) the pickup plate lip of the upper coupler, and (2) any non-load-

carrying device which falls within the swing radius of the semitrailer (measured from the center line of the kingpin to the front corner of the semitrailer). As applied to the new design described above, these two provisions have proved difficult to administer and have caused confusion and misunderstanding between the FHWA and the industry. The June 25, 1990, NPRM proposed to designate as specialized equipment van-type, drop-frame beverage semitrailers. A 30-day comment period (through July 25, 1990) was provided.

In addition to seeking general comments, the NPRM requested all interested parties to respond to four questions concerning these vehicles.

The FHWA solicited comments on the following questions as well as other comments:

1. Should "beverage trailer" and "beverage semitrailer" be defined in the proposed regulation?

2. Is the proposed length limit for the upper coupler extension of the semitrailer clear?

3. Will the semitrailer, as configured, be as safe as one with the upper coupler plate positioned fully under the semitrailer?

4. Will the position of the center of the kingpin, not more than 28 feet from the rear of the semitrailer, produce offtracking characteristics that are significantly greater than those of conventional 28-foot semitrailers?

Discussion

Eight responses to the June 25, 1990, NPRM were submitted to the docket. The respondents included four State Departments of Transportation: California (Caltrans), Florida (FDOT), Minnesota (MnDOT), and Virginia (VDOT) and the Connecticut Department of Motor Vehicles, the Port Authority of New York and New Jersey, Hinkley and Sons, Inc. (trailer manufacturer), and one individual. Of these respondents, six favored designating the beverage semitrailer as specified equipment, one (Caltrans) opposed, and one (VDOT) was not sure the vehicle could operate on its current system of highways for STAA dimensioned vehicles.

Comments Submitted to Docket 90-9

1. Should "beverage trailer" and "beverage semitrailer" be defined in the proposed regulation?

Six respondents commented on defining the "beverage trailer" and "beverage semitrailer." Two State DOT's (FDOT and VDOT) and the Port Authority requested that the terms "beverage trailer" and "beverage semitrailer" be defined in order to administer the regulation without erroneous interpretations. They see this terminology as a potential enforcement problem. The individual stated that the definition was incomplete as it was now written and should specify that the trailer has side access only for cargo. The trailer manufacturer requested that it not be defined because the trailers are also used for palletized cargo as well. Other types of cargo hauled on this type of trailer include automobile batteries, coin compartments from pay telephones, mushrooms, and nursery plants.

The trailer manufacturer also suggested that the regulation read as follows: "with the center line of the kingpin mounted not more than 28 feet from the rear of the semitrailer * * *." It requested the addition of the words "the center line of" because (1) in the semitrailer design under consideration, every inch is important, (2) this change would provide more swing clearance for the tractor under the gooseneck area of the semitrailer, (3) the length of the trailer body would not be increased, and (4) it is common in the industry to specify kingpin location by kingpin center. Based on these comments, the FHWA has modified the definition to state that the semitrailer have "side access only" and that the cargo be limited to bottled or canned beverages. The definition has also been revised to allow the 28-foot length to be measured from the centerline of the kingpin to the rear of the semitrailer.

2. Is the proposed length limit for the upper coupler extension of the semitrailer clear?

The trailer manufacturer and the individual commented that the proposed length limit of the upper coupler was clear and in a workable location. They did not foresee any possible misinterpretation. The trailer manufacturer responded that by limiting the upper coupler extension to fall within the swing radius of the front corner of the semitrailer it is both clear and very workable. This approach has been allowed for the purpose of excluding other front-mounted items from length measurement and accordingly is to be used for this case as well. The FDOT commented that the proposed length limit was not clear as described in the June 25, 1990, NPRM. The FDOT also suggests that language is needed to assure that the coupler plate does not become a cargo carrier in and of itself and that the device stays reasonable in length. The MnDOT responded that its law currently allows semitrailers of 28.5 feet, in three vehicle combinations, and the proposed design would only minimally exceed the current standard.

In accordance with these comments, the FHWA concludes that not allowing the upper coupler plate extension to extend beyond the swing radius of the semitrailer is a clear and sufficient means to restrict the length of this device. The operational rules have been amended to specify that the upper coupler plate itself cannot be used to carry cargo.

3. Will the semitrailer, as configured, be as safe as one with the upper coupler plate positioned fully under the semitrailer?

The Caltrans, MnDOT, trailer manufacturer, and individual agreed that the configuration would be as safe as the upper coupler positioned fully under the semitrailer. The FDOT commented that the final rule should include requirements similar to those found in 49 CFR part 393, subpart F—Coupling Devices and Towing Methods. These and other Federal regulations continue to apply to beverage trailers and need not be cross-referenced in every other applicable regulation. Due to the specialized nature of the equipment discussed here, however, reference to an applicable provision of 49 CFR part 393 is included.

The trailer manufacturer responded that the configuration would be safe because the maximum kingpin-to-trailer axle span will be 25.5 feet. A single 53-foot semitrailer can have a kingpin-to-center of trailer tandem-axle span of 45.5 feet and still be considered safe. The individual commented that there is no reason to believe that trailers produced to this configuration would be less safe than trailers with upper couplers fully under the trailer. Dump trailers and short container chassis often have configurations that place the kingpin forward of the body

The VDOT commented that demonstrations should be conducted with each type of semitrailer to determine any difference between the two mounting plates. A demonstration is not necessary because this style of trailer has been in operation for several years, and the operating characteristics are known to be compatible to other trailers in current use.

Based on the comments, the FHWA concludes that the semitrailer as configured will be as safe as one with the upper coupler positioned fully under the semitrailer.

4. Will the position of the kingpin, not more than 28 feet from the rear of the semitrailer, produce offtracking characteristics that are significantly greater than those of conventional 28-foot semitrailers?

The Port Authority and the manufacturer responded "no" to the question. The Port Authority commented that it appears to them that the offtracking of the beverage semitrailer combinations set forth in the proposed regulation will not differ significantly from the conventional semitrailer combinations already permitted upon port authority vehicular crossings. The trailer manufacturer used a "sum of squares" method to determine offtracking (Society of Automotive Engineers (SAE) J695) and does not find a great increase in offtracking.

The individual commented that offtracking of these specialized trailers will be greater than conventional 28-foot trailers since the distance from the kingpin to the trailer's axle will increase by up to 3 feet. Also, using the techniques of SAE J695, he calculated the offtracking for conventional and beverage semitrailers as shown in the following table:

COMPARISON OF OFFTRACKING OF SELECTED SEMITRAILERS

Radius conventional curve semitrailer	Conventional 28-foot semitrailer	Beverage semitrailer	48-foot
50 feet	6.86 feet .	8.70 feet .	
120 feet ...	2.55 feet .	3.17 feet .	8.53 feet.

The FDOT responded that the potential of an extra 2 or 3 feet to the kingpin setting may be important with units running as a tandem combination; however, as a single-unit semitrailer, the difference would be insignificant when considering the 41-foot kingpin setting that is being discussed as a *de facto* national limit for such settings.

Based on the comments, the FHWA concludes that the offtracking characteristics of the beverage semitrailer being designated as specialized equipment are not significantly greater than those of conventional 28-foot semitrailers.

5. Other comments.

The Caltrans, FDOT, and MnDOT expressed concerns about future petitions for the FHWA to propose a similar rule for longer beverage semitrailers or semitrailers of a similar design for carrying other goods. The Caltrans' concern is that the beverage semitrailer is another small step toward allowing larger vehicles by means of an exception process. For example, since the weight of the beverage semitrailer and load rest on the upper coupler plate extending from the front of the semitrailer, why not allow the van portion to the semitrailer to be extended over the plate? Also, if a weight supporting upper coupler plate is permitted for a 28-foot beverage semitrailer, is a 48-foot beverage semitrailer next? The possibility of a 48-foot beverage semitrailer raises strong concerns about offtracking. A typical semitrailer has the kingpin located 3 feet from the front of the semitrailer. The Caltrans' evaluation of the State Highway System for designation of terminal access routes is on the basis of a 48-foot trailer with a 43-foot kingpin-to-center of the rearmost axle which is equivalent to the 41-foot kingpin-to-center of tandem axles.

The FDOT responded that the proposed rule needs to be modified to assure that other trailers/semitrailers do not grow in length as a result of this proposed rule. It should be expected that other segments of the industry will seek the same benefits as are being provided to the beverage haulers under this proposed rule. Similarly, the MnDOT would discourage the FHWA from further "piecemeal" exemptions until a comprehensive review of the commercial vehicle length definition is conducted. The State finds that this examination is warranted in light of the recent research from the Roads and Transportation Association of Canada, which demonstrates that the U.S. may in fact be discouraging uniformity and the use of more stable vehicle configurations on U.S. highways, due to current vehicle definitions. The State supported the use of the terms "box length" and uniform "kingpin or wheelbase" for specifying length limits for commercial vehicle equipment. On the other hand, the MnDOT also commented that the configuration under discussion here would not have adverse effects on pavements, bridges, or maneuvering.

The FHWA understands the concerns of these States about its handling of petitions from other segments of the trucking industry for relief similar to that being provided for beverage semitrailers. The FHWA also recognizes that different ways to specify trailer length provisions do exist. Future petitions for similar relief provisions will be evaluated with these concerns in mind.

Finally, the Caltrans commented that the 28-foot beverage semitrailer was not specialized equipment, but rather another attempt to incrementally increase (by regulatory action) the limits set by the STAA. The FHWA disagrees. This equipment as defined by this rulemaking is highly specialized.

Conclusions

In order to remove any doubt about using 28-foot beverage semitrailers with an upper coupler plate that extends beyond the front of the semitrailer on the NN without a special permit, the FHWA is designating them as specialized equipment pursuant to our authority under section 411(d) of the STAA (49 U.S.C. app. 2311(d)).

This designation as specialized equipment applies only to van-type, drop-frame, side-loading only, beverage semitrailers for which the upper coupler plate extends beyond the front of the semitrailer, and the distance from the centerline of the kingpin connection to the rear of the semitrailer is not greater than 28 feet. The rule preempts States from imposing an overall length limit on such vehicles operating in semitrailer or double trailer combinations and guarantees these truck tractor-single beverage semitrailer combinations the same access to points of loading and unloading as 28-foot (28.5-foot if grandfathered) semitrailers in 23 CFR 658.19. After reviewing the comments to the docket, the FHWA has concluded that this action would allow for a productivity gain without adversely effecting public safety. A definition of beverage semitrailer has been added to § 658.5, and regulatory language has been added to § 658.13. This action concludes the FHWA rulemaking proceeding that was designated with the regulation identification number 2125–AC57.

Certification

Section 1023(c) of the ISTEA amended 23 U.S.C. 141(b) by adding a new sentence at the end which reads as follows:

> Each State shall also certify that it is enforcing and complying with the provisions of section 127(d) of this title and section 411(j) of the Surface Transportation Assistance Act of 1982.
> (49 U.S.C. app. 2311(j)).

As implemented by 23 CFR 657.13, 23 U.S.C. 141(b) requires each State to certify annually that it is enforcing its size and weight laws on the Federal-aid Primary System (FAP), Federal-aid Urban System (FAU), Federal-aid Secondary System (FAS), and the Interstate System in accordance with 23 U.S.C. 127.

Under the new ISTEA provision, States must also certify that they are enforcing and complying with the ISTEA freeze on the use of LCV's and other multi-unit vehicles. Failure to certify would subject a State to the penalties provided in 23 U.S.C. 141(c)(2).

The ISTEA, however, effectively replaced the FAP with the NHS, and eliminated the FAU and FAS Systems, without providing a conforming amendment to 23 U.S.C. 141(b). Until 23 U.S.C. 141 is amended to reflect changes in system nomenclature, the FHWA will require the States to certify size and weight enforcement on those routes which, prior to October 1, 1991, were designated as part of the FAP, FAS, or FAU Systems.

The State of Alaska objected to the certification statement proposed in the SNPRM. That statement would require the State to certify that it is enforcing the freeze provisions of 23 U.S.C. 127(d) and that its State laws are consistent with 23 U.S.C. 127 (a) and (h). Alaska asserts that section 127 does not apply to the State because the State does not have any Interstate System mileage as defined in 23 U.S.C. 103, 139(a) or 139(b). The FHWA agrees with this comment.

The same situation with respect to highway system also exists in Puerto Rico, which is considered a "State" for the purposes of title 23, United States Code.

The certification language proposed by the SNPRM has been retained, except that language to recognize the situations in Alaska and Puerto Rico has also been included.

Language describing size and weight enforcement coverage in urban areas has also been clarified in this final rule.

Since its initial publication in 1980 (45 FR 52365), § 657.15 has required that "Urban areas not subject to State jurisdiction shall be identified and the statement shall address total (Federal-aid) mileage involved and an analysis of enforcement efforts in such areas." In practice, the FHWA's interpretation of this requirement over the years has been to focus on those areas over 50,000 population, also called urbanized areas (as determined by the Bureau of the Census). The FHWA recognizes an area as "urban" when the population is 5000 or more. It is not now, nor has it ever been, the intent of the FHWA to require extensive size and weight enforcement activities, or an analysis thereof, in areas with a population between 5,000 and 50,000. The intent of this requirement has always been to ensure that an adequate size and weight enforcement effort be conducted by larger cities, i.e., over 50,000 population, where the State weight enforcement agency does not have legal jurisdiction. Substitution of the word "urbanized" for "urban" (both terms as defined in 23 U.S.C. 101) in the second sentence of § 657.15(h) accomplishes this clarification.

What, prior to October 1, 1991, was Federal-aid system mileage in urban areas of less than 50,000 population, should continue to be covered by the State's overall weight enforcement program. This change in wording does not preclude, nor should it discourage, weight enforcement activity by local jurisdictions. Such activity is encouraged with results to be reported as part of the overall enforcement activity in the State.

Conforming Amendment

ISTEA section 4006(c) consisted of a conforming amendment as follows:

> Section 411(e)(1) of such Act (the STAA of 1982) is amended by striking "those Primary System highways" and inserting "those highways of the Federal-aid primary system in existence on June 1, 1991 * * * "

Section 411(e)(1) of the STAA describes the type of highways that the Secretary shall designate as open to the vehicles described by the STAA. These designated highways, in combination with the Interstate System, have come to be known as the NN. The ISTEA effectively replaced what had been known as the FAP System with the NHS. This conforming amendment corrects the technical problem of designating segments of a highway system (the FAP) which no longer exists. The necessary corrections to the definitions of "Federal-aid Primary System" and "National Network," both found in 23 CFR 658.5, have been made by this final rule.

Operation of Certain Specialized Hauling Vehicles on Interstate Route 68

Section 1023(d) of the ISTEA added 23 U.S.C. 127(e) to read as follows:

> (e) Operation of Certain Specialized Hauling Vehicles on Interstate Route 68 — The single-axle, tandem-axle, and bridge formula limits set forth in subsection (a) (23 U.S.C. 127(a)) shall not apply to the operation on Interstate Route 68 in Garrett and Allegany Counties, Maryland, of any specialized vehicle equipped with a steering axle and a tridem axle and used for hauling coal-logs, and pulpwood if such vehicle is of a type of vehicle as was operating in such counties on United States Route 40 or 48 for such purpose on August 1, 1991.

This exempts the described vehicles with selected cargo from the axle and Bridge Formula weight limits that Maryland must enforce on Interstate Route 68 in Allegany and Garrett Counties. However, the normal gross weight limit (80,000 pounds) remains in effect. This change is adopted by this final rule in § 658.17(j).

Reassignment of Size and Weight Responsibilities Within the FHWA

On October 1, 1991, responsibility for the vehicle Size and Weight and NN Programs in the FHWA's regional and divisional offices was transferred to the Office of Motor Carriers. Revisions to 23 CFR 657.11 and 657.17 were proposed in the SNPRM to reflect this change.

No comments were received on this issue. This final rule includes the changes as proposed.

Size and weight responsibilities in the Washington, DC., Headquarters office remain assigned to the Office of Motor Carriers

Rulemaking Analyses and Notices

This final rule implements sections 1023 and 4006 of the ISTEA, which restrict the operation of LCV's on the Interstate Highway System and CMV combinations with two or more cargo-carrying units on the NN to the type of vehicles in use on or before June 1, 1991, subject to whatever State rules, regulations, or restrictions were in effect on that date.

As noted in the following paragraphs, the FHWA has determined that this rulemaking is: (1) Not a significant regulatory action within the meaning of Executive Order 12866; (2) not a significant action within the meaning of Department of Transportation Regulatory Policies and Procedures; (3) will not have a significant economic impact on a substantial number of small entities; (4) does not require the preparation of a federalism assessment; and (5) does not require the preparation of an environmental impact statement. All of these findings were made and included in the NPRM and again in the SNPRM, in each case after the FHWA had carefully reviewed the applicable Federal statutes and Executive Orders.

The WTA submitted comments to the docket in response to both the NPRM and the SNPRM challenging what it saw as the FHWA's casual dismissal of determinations required by various statutes and Executive Orders. In comments on the NPRM, the WTA argued that a long-term effect of any freeze would be to prohibit the natural evolution of technology in the trucking industry. Such a situation, in time, would be likely to cause major and significant impacts on competing transportation modes, related businesses, and the general public. Accordingly, the WTA insisted that the FHWA conduct (1) a full regulatory evaluation, (2) a full economic assessment, (3) a federalism assessment, and (4) an environmental impact study

Effects on Small Entities and Other Economic Issues

After undertaking the analysis required by the Regulatory Flexibility Act (5 U.S.C. 601–612), the FHWA reiterated in the SNPRM its conclusion that this rulemaking would not have a significant economic impact on a substantial number of small entities. This conclusion remains unchanged in this final rule. The WTA, responding to an earlier document, stated that "there is no question that the form and substance of this NPRM are clearly harmful to small entities. Most businesses affected in Wyoming are small entities. The few large entities doing business in Wyoming are similarly adversely affected."

This rule in no way restricts the ability of small entities to enter the LCV segment of the motor carrier industry. The LCV segment of the industry can expand as rapidly as it finds customers. Neither the rule nor any State affected by the rule limits the number of LCV's that may be placed in service, or the number of motor carriers that may operate them. The rule does not reduce the highway network on which carriers may run LCV's; it simply lists the routes where the States have decided very large vehicles can operate without seriously damaging pavements and bridges. In Wyoming, that amounts to every NN route in the State.

The WTA seems to be demanding, not better regulatory analyses, but something like a full-scale econometric model of the transportation segment of the economy. The WTA apparently believes that such a model, when run, would demonstrate that the ISTEA freeze is likely to change the competitive balance between railroad and highway transportation, retard the technological development of trucks, reduce employment in the motor carrier industry, and raise freight costs.

Because the LCV freeze includes all State routes currently in use, and because we are not aware that any State wishes to expand its LCV network, we expect that the freeze will have none of the effects predicted by the WTA, at least in the short term. The FHWA believes that the "frozen" LCV Network offers ample opportunity for reasonable growth. Insufficient data exist to evaluate the possible longer-term effects of this rulemaking, and any conclusions presented here would be speculative in nature.

Environmental Issues

In considering this rulemaking action from the perspective of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) (NEPA), the FHWA has twice found that it would have no effect on the quality of the environment. The WTA disagreed: "A rule which dictates increased use of fuels, a scarce natural resource, affects the quality of the environment in a negative fashion." The rule does not dictate increased use of fuels. If LCV's move freight at a lower fuel or emission cost per ton/mile than other motor vehicles, as the WTA appears to believe, the rule would not prevent LCV's from displacing less efficient vehicles. The FHWA sees no reason to change its conclusion.

Changes to Part 658—National Network

As discussed earlier, this final rule makes two technical amendments to appendix A, 23 CFR part 658, which lists federally-designated routes on the NN. These changes would amend the listings for California, to reflect the inclusion of the I–580 Richmond-San Rafael Bridge in the NN, and also for Virginia, to reflect that State's new milepost-based exit numbering system. For the reasons set forth earlier in this document, the FHWA has determined that prior notice and opportunity for comment are not required for either amendment under the U.S. Department of Transportation's Regulatory Policies and Procedures, as it is not anticipated that such action will result in the receipt of useful information.

Executive Order 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

The FHWA has determined that this action is not a significant regulatory action within the meaning of Executive Order 12866 or significant within the meaning of U.S. Department of Transportation Regulatory Policies and Procedures. It is anticipated that the economic impact of this rulemaking will be minimal; therefore, a regulatory evaluation is not required.

Regulatory Flexibility Act

In compliance with the Regulatory Flexibility Act, the FHWA has evaluated the effects of this rule on small entities. Based on the evaluation, the FHWA hereby certifies that this action will not have a significant economic impact on a substantial number of small entities. This action merely lists applicable limitations by specific vehicle configuration, by State, in effect on June 1, 1991, and will not further restrict the operation of any vehicle in lawful operation on or before June 1, 1991, which is subject to those limitations.

Executive Order 12612 (Federalism Assessment)

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this action does not have sufficient federalism implications to warrant the preparation of a federalism assessment. Although its effect will be to prevent the expansion of the ISTEA vehicle network beyond that which States allowed on June 1, 1991, that is a direct result of the underlying statute. Moreover, there is no indication at this time that the States planned any significant expansion of that network which would be impeded by this requirement. This action merely implements requirements of the ISTEA.

Executive Order 12372 (Intergovernmental Review)

Catalog of Federal Domestic Assistance Program Number 20.217, Motor Carrier Safety. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities do not apply to this program.

Paperwork Reduction

This action does not contain an additional or expanded collection of information requirement for purposes of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* Data collection necessary for the States to be able to certify enforcement of State size and weight laws currently operates under OMB approval number 2125–0034.

National Environmental Policy Act

The FHWA has analyzed this action for the purpose of the NEPA and has determined that this action would not have any effect on the quality of the environment.

Regulation Identification Number

A regulation identification number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

List of Subjects in 23 CFR Parts 657 and 658

Grant programs—transportation, Highways and roads, and Motor carrier size and weight.

Issued on: May 27, 1994.

Rodney E. Slater,

Federal Highway Administrator.

In consideration of the foregoing, the FHWA is amending 23 CFR, subchapter G, parts 657 and 658 as set forth below.

PART 657—CERTIFICATION OF SIZE AND WEIGHT ENFORCEMENT

1. The authority citation for 23 CFR part 657 is revised to read as follows:

Authority: Sec. 123, Pub. L. 95–599, 92 Stat. 2689; 23 U.S.C. 127, 141, and 315; 49 U.S.C. app. 2311, 2312, and 2316; sec. 1023, Pub. L. 102–240, 105 Stat. 1914; and 49 CFR 1.48(b)(19), (b)(23), (c)(1), and (c)(19).

2. Section 657.11 is revised to read as follows:

§ 657.11 Evaluation of operations.

(a) The State shall submit its enforcement plan or annual update to the Office of Motor Carriers in the FHWA division office by July 1 of each year. However, if a State's legislative or budgetary cycle is not consonant with that date, the FHWA and the State may jointly select an alternate date. In any event, a State must have an approved plan in effect by October 1 of each year. Failure of a State to submit or update a plan will result in the State being unable to certify in accordance with § 657.13 for the period to be covered by the plan.

(b) The Office of Motor Carriers in the FHWA division office shall review the State's operation under the accepted plan on a continuing basis and shall prepare an evaluation report annually. The State will be advised of the results of the evaluation and of any needed changes either in the plan itself or in its implementation. Copies of the evaluation report and subsequent modifications resulting from the evaluation shall be forwarded through the Regional Director of Motor Carriers to the Washington, D.C., Headquarters office.

3. Section 657.13 is revised to read as follows:

§ 657.13 Certification requirement.

Each State shall certify to the Federal Highway Administrator, before January 1 of each year, that it is enforcing all State laws respecting maximum vehicle size and weight permitted on what, prior to October 1, 1991, were the Federal-aid Primary, Secondary, and Urban Systems, including the Interstate System, in accordance with 23 U.S.C. 127. The States must also certify that they are enforcing and complying with the ISTEA freeze on the use of LCV's and other multi-unit vehicles. The certification shall be supported by information on activities and results achieved during the preceding 12-month period ending on September 30 of each year.

4. Section 657.15 is revised to read as follows:

§ 657.15 Certification content.

The certification shall consist of the following elements and each element shall be addressed even though the response is negative:

(a) A statement by the Governor of the State, or an official designated by the Governor, that the State's vehicle weight laws and regulations governing use of the Interstate System conform to 23 U.S.C. 127.

(b) A statement by the Governor of the State, or an official designated by the Governor, that all State size and weight limits are being enforced on the Interstate System and those routes which prior to October 1, 1991, were designated as part of the Federal-aid Primary, Urban, and Secondary Systems, and that the State is enforcing and complying with the provisions of 23 U.S.C. 127(d) and 49 U.S.C. app. 2311(j). Urbanized areas not subject to State jurisdiction shall be identified. The statement shall include an analysis of enforcement efforts in such areas.

(c) Except for Alaska and Puerto Rico, the certifying statements required by paragraphs (a) and (b) of this section shall be worded as follows (the statements for Alaska and Puerto Rico do not have to reference 23 U.S.C. 127(d) in (c)(2), or include paragraph (c)(3) of this section):

I, *(name of certifying official), (position title),* of the State of _____ do hereby certify:

(1) That all State laws and regulations governing vehicle size and weight are being enforced on those highways which, prior to October 1, 1991, were designated as part of the Federal-aid Primary, Federal-aid Secondary, or Federal-aid Urban Systems;

(2) That the State is enforcing the freeze provisions of the Intermodal Surface Transportation Efficiency Act of 1991 (23 U.S.C. 127(d) and 49 U.S.C. app. 2311(j)); and

(3) That all State laws governing vehicle weight on the Interstate System are consistent with 23 U.S.C. 127 (a) and (b).

(d) If this statement is made by an official other than the Governor, a copy of the document designating the official, signed by the Governor, shall also be included in the certification made under this part.

(e) A copy of any State law or regulation pertaining to vehicle sizes and weights adopted since the State's last certification and an analysis of the changes made. Those laws and regulations pertaining to special permits and penalties shall be specifically identified and analyzed in accordance with section 123 of the Surface Transportation Assistance Act of 1978 (Pub. L. 95–599).

(f) A report of State size and weight enforcement efforts during the period covered by the certification which addresses the following:

(1) Actual operations as compared with those forecast by the plan submitted earlier, with particular attention to changes in or deviations from the operations proposed.

(2) Impacts of the process as actually applied, in terms of changes in the number of oversize and/or overweight vehicles.

(3) *Measures of activity*—(i) *Vehicles weighed.* Separate totals shall be reported for the annual number of vehicles weighed on fixed scales, on semiportable scales, on portable scales, and on WIM when used for enforcement.

(ii) *Penalties.* Penalties reported shall include citations issued, civil assessments, and incidences of load shifting or off-loading of excess weight categorized as follows: violations of axle and/or gross vehicle weights, or violations resulting from application of the bridge formula.

(iii) *Permits.* The number of permits issued for *overweight* loads shall be reported. The reported numbers shall specify permits for divisible and nondivisible loads and whether issued on a trip or annual basis. Permits issued for excess height, length, or width need not be reported except where issued for the overwidth movement of a divisible load.

5. Section 657.17 is revised to read as follows:

§ 657.17 Certification submittal.

(a) The Governor, or an official designated by the Governor, shall submit the certification to the Office of Motor Carriers in the FHWA division office prior to January 1 of each year.

(b) The Office of Motor Carriers in the FHWA division office shall forward the original certification to the Associate Administrator for Motor Carriers and one copy to the Office of Chief Counsel. Copies of appropriate evaluations and/or comments shall accompany any transmittal.

PART 658—TRUCK SIZE AND WEIGHT, ROUTE DESIGNATIONS—LENGTH, WIDTH, AND WEIGHT LIMITATIONS

6. The authority citation for 23 CFR part 658 is revised to read as follows:

Authority: 23 U.S.C. 127 and 315; 49 U.S.C. app. 2311, 2312, and 2316; 49 CFR 1.48(b)(19) and (c)(19).

7. Section 658.1 is revised to read as follows:

§ 658.1 Purpose.

The purpose of this part is to identify a National Network of highways available to vehicles authorized by provisions of the Surface Transportation Assistance Act of 1982 (STAA) as amended, and to prescribe national policies that govern truck and bus size and weight.

8. Section 658.5 is amended by removing the arabic letter paragraph designations from all definitions, placing the definitions in alphabetical order, revising two existing definitions, and adding six new definitions in appropriate order. The added and revised definitions read as follows:

§ 658.5 Definitions.

* * * * *

Beverage semitrailer. A van-type, drop-frame semitrailer designed and used specifically for the transport and delivery of bottled or canned beverages (i.e., liquids for drinking, including water) which has side-only access for loading and unloading this commodity. Semitrailer has the same meaning as in 49 CFR 390.5.

* * * * *

Cargo-carrying unit. As used in this part, cargo-carrying unit means any portion of a commercial motor vehicle (CMV) combination (other than a truck tractor) used for the carrying of cargo, including a trailer, semitrailer, or the cargo-carrying section of a single-unit truck.

* * * * *

Federal-aid Primary System. The Federal-aid Highway System of rural arterials and their extensions into or through urban areas in existence on June 1, 1991, as described in 23 U.S.C. 103(b) in effect at that time.

* * * * *

Longer combination vehicle (LCV). As used in this part, longer combination vehicle means any combination of a truck tractor and two or more trailers or semitrailers which operates on the Interstate System at a gross vehicle weight greater than 80,000 pounds.

* * * * *

Maxi-cube vehicle. A maxi-cube vehicle is a combination vehicle consisting of a power unit and a trailing unit, both of which are designed to carry cargo. The power unit is a nonarticulated truck with one or more drive axles that carries either a detachable or a permanently attached cargo box. The trailing unit is a trailer or semitrailer with a cargo box so designed that the power unit may be loaded and unloaded through the trailing unit. Neither cargo box shall exceed 34 feet in length, excluding drawbar or hitching device; the distance from the front of the first to the rear of the second cargo box shall not exceed 60 feet, including the space between the cargo boxes; and the overall length of the combination vehicle shall not exceed 65 feet, including the space between the cargo boxes.

* * * * *

Motor carrier of passengers. As used in this part, a motor carrier of passengers is a common, contract, or private carrier using a bus to provide commercial transportation of passengers. Bus has the same meaning as in 49 CFR 390.5.

* * * * *

National Network (NN). The composite of the individual network of highways from each State on which vehicles authorized by the provisions of the STAA are allowed to operate. The network in each State includes the Interstate System, exclusive of those portions excepted under § 658.11(f) or deleted under § 658.11(d), and those portions of the Federal-aid Primary System in existence on June 1, 1991, set out by the FHWA in appendix A to this part.

* * * * *

Nondivisible load or vehicle.

(1) As used in this part, *nondivisible* means any load or vehicle exceeding applicable length or weight limits which, if separated into smaller loads or vehicles, would:

(i) Compromise the intended use of the vehicle, i.e., make it unable to perform the function for which it was intended;

(ii) Destroy the value of the load or vehicle, i.e., make it unusable for its intended purpose; or

(iii) Require more than 8 workhours to dismantle using appropriate equipment. The applicant for a nondivisible load permit has the burden of proof as to the number of workhours required to dismantle the load.

(2) A State may treat emergency response vehicles and casks designed and used for the transport of spent nuclear materials as nondivisible vehicles or loads.

* * * * *

§§ 658.13 and 658.15 [Amended]

9. In the list below, for each section indicated in the left column, remove the citation indicated in the middle column from wherever it appears in the section, and add the citation indicated in the right column:

Section	Remove	Add
658.13(d)(1)(i) ..	658.5(k)	658.5
658.13(d)(2)(i) ..	658.5(k)	658.5
658.13(e)	658.5(e)	658.5
658.15(b)	658.5(i)	658.5
658.15(c)	658.5(g)	658.5

10. In § 658.13, paragraphs (d), (e), and (f) are redesignated as paragraphs (e), (f), and (g), respectively, a new paragraph (d) is added, and new paragraphs (e)(4) and (e)(5) are added under redesignated paragraph (e) to read as follows:

§ 658.13 Length.

* * * * *

(d) No State shall impose a limit of less than 45 feet on the length of any bus on the NN.

(e) * * *

(4) *Maxi-cube vehicle.* No State shall impose a length limit on a maxi-cube vehicle, as defined in § 658.5 of this part, of less than 34 feet on either cargo box, excluding drawbar or hitching device; 60 feet on the distance from the front of the first to the rear of the second cargo box, including the space between the cargo boxes; or 65 feet on the overall length of the combination, including the space between the cargo boxes. The measurement for compliance with the 60- and 65-foot distance shall include the actual distance between cargo boxes, measured along the centerline of the drawbar or hitching device. For maxi-cubes with an adjustable length drawbar or hitching device, the 60- and 65-foot distances shall be measured with a drawbar spacing of not more than 27 inches. The drawbar may be temporarily extended beyond that distance to maneuver or load the vehicle.

(5) *Beverage semitrailer.* (i) A beverage semitrailer is specialized equipment if it has an upper coupler plate that extends beyond the front of the semitrailer, but not beyond its swing radius, as measured from the center line of the kingpin to a front corner of the semitrailer, which cannot be used for carrying cargo other than the structure of the semitrailer, and with the center line of the kingpin not more than 48 feet from the rear of the semitrailer (exclusive of rear-mounted devices not measured in determining semitrailer length). No State shall impose an overall length limit on such vehicles when operating in a truck tractor-beverage

semitrailer or truck tractor-beverage semitrailer-beverage trailer combination on the NN.

(ii) The beverage trailer referred to in paragraph (e)(5)(i) of this section means a beverage semitrailer and converter dolly. Converter dolly has the same meaning as in 49 CFR 393.5.

(iii) Truck tractor-beverage semitrailer combinations shall have the same access to points of loading and unloading as 28-foot semitrailers (28.5-foot where allowed by § 658.13) in 23 CFR 658.19.

* * * * *

11. In § 658.17, paragraphs (f), (g), and (h) are redesignated as paragraphs (g), (h), and (i), respectively; new paragraphs (f), (j), and (k) are added; and redesignated paragraph (h) is revised. Paragraphs (f) through (k) now read as follows:

§ 658.17 Weight.

* * * * *

(f) Except as provided herein, States may not enforce on the Interstate System vehicle weight limits of less than 20,000 pounds on a single axle, 34,000 pounds on a tandem axle, or the weights derived from the Bridge Formula, up to a maximum of 80,000 pounds, including all enforcement tolerances. States may not limit tire loads to less than 500 pounds per inch of tire or tread width, except that such limits may not be applied to tires on the steering axle. States may not limit steering axle weights to less than 20,000 pounds or the axle rating established by the manufacturer, whichever is lower.

(g) The weights in paragraphs (b), (c), (d), and (e) of this section shall be inclusive of all tolerances, enforcement or otherwise, with the exception of a scale allowance factor when using portable scales (wheel-load weighers). The current accuracy of such scales is generally within 2 or 3 percent of actual weight, but in no case shall an allowance in excess of 5 percent be applied. Penalty or fine schedules which impose no fine up to a specified threshold, i.e., 1,000 pounds, will be considered as tolerance provisions not authorized by 23 U.S.C. 127.

(h) States may issue special permits without regard to the axle, gross, or Federal Bridge Formula requirements for nondivisible vehicles or loads.

(i) The provisions of paragraphs (b), (c), and (d) of this section shall not apply to single-, or tandem-axle weights, or gross weights legally authorized under State law on July 1, 1956. The group of axles requirements established in this section shall not apply to vehicles legally grandfathered under State groups of axles tables or formulas on January 4, 1975.

(j) The provisions of paragraphs (c) through (e) of this section shall not apply to the operation on Interstate Route 68 in Allegany and Garrett Counties, Maryland, of any specialized vehicle equipped with a steering axle and a tridem axle and used for hauling coal, logs, and pulpwood if such vehicle is of a type of vehicle as was operating in such counties on U.S. Routes 40 or 48 for such purposes on August 1, 1991.

(k) Beginning October 6, 1992, and ending October 5, 1994, the provisions of paragraphs (c) through (e) of this section shall not apply to any vehicle which is regularly and exclusively used as an intrastate public agency transit passenger bus. The Secretary may extend this temporary exemption for an additional year.

12. In § 658.19, paragraph (a) is revised to read as follows:

§ 658.19 Reasonable access.

(a) No State may enact or enforce any law denying reasonable access to vehicles with dimensions authorized by the STAA between the NN and terminals and facilities for food, fuel, repairs, and rest. In addition, no State may enact or enforce any law denying reasonable access between the NN and points of loading and unloading to household goods carriers, motor carriers of passengers, and any truck tractor-semitrailer combination in which the semitrailer has a length not to exceed 28 feet (28.5 feet where allowed pursuant to § 658.13(b)(5) of this part) and which generally operates as part of a vehicle combination described in §§ 658.13(b)(5) and 658.15(a) of this part.

* * * * *

13. Part 658 is amended by adding § 658.23 as follows:

§ 658.23 LCV freeze; cargo-carrying unit freeze.

(a) (1) Except as otherwise provided in this section and except for tow trucks with vehicles in tow, a State may allow the operation of LCV's on the Interstate System only as listed in appendix C to this part.

(2) Except as otherwise provided in this section, a State may not allow the operation on the NN of any CMV combination with two or more cargo-carrying units (not including the truck tractor) whose cargo-carrying units exceed:

(i) The maximum combination trailer, semitrailer, or other type of length limitation authorized by State law or regulation of that State on or before June 1, 1991; or

(ii) The length of the cargo-carrying units of those CMV combinations, by specific configuration, in actual, lawful operation on a regular or periodic basis (including continuing seasonal operation) in that State on or before June 1, 1991, as listed in appendix C to this part.

(b) Notwithstanding paragraph (a)(2) of this section, the following CMV combinations with two or more cargo-carrying units may operate on the NN.

(1) Truck tractor-semitrailer-trailer and truck tractor-semitrailer-semitrailer combinations with a maximum length of the individual cargo units of 28.5 feet or less.

(2) Vehicles described in § 658.13(e) and (g).

(3) Truck tractor-trailer and truck tractor-semitrailer combinations with an overall length of 65 feet or less.

(4) Maxi-cubes.

(5) Tow trucks with vehicles in tow.

(c) For specific safety purposes and road construction, a State may make minor adjustments of a temporary and emergency nature to route designations and vehicle operating restrictions applicable to combinations subject to sections 1023 and 4006 of Pub. L. 102–240 and in effect on June 1, 1991 (July 6, 1991, for Alaska). Adjustments which last 30 days or less may be made without notifying the FHWA. Minor adjustments which exceed 30 days require approval of the FHWA. When such adjustments are needed, a State must submit to the Division Office of Motor Carriers, by the end of the 30th day, a written description of the emergency, the date on which it began, and the date on which it is expected to conclude. If the adjustment involves route designations, the State shall describe the new route on which vehicles otherwise subject to the freeze imposed by sections 1023 and 4006 of Pub. L. 102–240 are allowed to operate. To the extent possible, the geometric and pavement design characteristics of the alternate route should be equivalent to those of the highway section which is temporarily unavailable. Approval or disapproval by Office of Motor Carriers officials of adjustments involving route designations shall be coordinated with the Division Administrator. If the adjustment involves vehicle operating restrictions, the State shall list the restrictions that have been removed or modified. Approval or disapproval of the adjustment by the Division Office of Motor Carriers shall take place only after consultation with the Regional Office of Motor Carriers. If the adjustment is approved, a copy of the approved submission shall be forwarded through the Regional Office of Motor Carriers, to the Associate Administrator for Motor Carriers at Headquarters, who

will publish the notice of adjustment, with an expiration date, in the **Federal Register**. Requests for extensions of time beyond the originally established conclusion date shall be subject to the same approval and publication process as the original request. If upon consultation with the Regional Office of Motor Carriers, a decision is reached that minor adjustments made by a State are not legitimately attributable to road or bridge construction or safety, the Division Office of Motor Carriers will so inform the State, and the original conditions of the freeze must be reimposed immediately. Failure to do so may subject the State to a penalty pursuant to 23 U.S.C. 141.

(d) A State may issue a permit authorizing a CMV to transport an overlength nondivisible load on two or more cargo-carrying units on the NN without regard to the restrictions in § 658.23(a)(2).

(e) States further restricting or prohibiting the operation of vehicles subject to sections 1023 and 4006 of Public Law 102–240 after June 1, 1991, shall notify the FHWA Division Office of Motor Carriers within 30 days after the restriction is effective. The Division Office of Motor Carriers shall forward the information through the Regional Office of Motor Carriers to the Associate Administrator for Motor Carriers at Headquarters. The FHWA will publish the restriction in the **Federal Register** as an amendment to appendix C to this part. Failure to provide such notification may subject the State to a penalty pursuant to 23 U.S.C. 141.

(f) The Federal Highway Administrator, on his or her own motion or upon a request by any person (including a State), shall review the information set forth in appendix C to this part. If the Administrator determines there is cause to believe that a mistake was made in the accuracy of the information contained in appendix C to this part, the Administrator shall commence a proceeding to determine whether the information published should be corrected. If the Administrator determines that there is a mistake in the accuracy of the information contained in appendix C to this part, the Administrator shall publish in the **Federal Register** the appropriate corrections to reflect that determination.

14. Appendix A to part 658 is amended in the entry for the State of California by removing Note 1 and redesignating Note 2, and by revising the entry for the State of Virginia to read as follows:

Route	From	To
. . .	. . .	. . .
CALIFORNIA		
. . .	. . .	. . .

Note: I–580 Oakland—All vehicles over 4½ tons (except passenger buses and stages) are prohibited on MacArthur Freeway between Grand Avenue and the north city limits of San Leandro. (Excepted under 23 CFR 658.11(f)).

. . .	. . .	. . .
Virginia		

Note 1: I–66 Washington, DC, area—There is a 24-hour total truck ban on I–66 from I–495 Capital Beltway to the District of Columbia. (Excepted under 23 CFR 658.11(f)).

Note 2: I–264 Norfolk—Truck widths are limited to 96 inches for the westbound tube of the Elizabeth River Downtown Tunnel from Norfolk to Portsmouth because of clearance deficiencies.

15. Part 658 is amended by adding appendix C to read as follows:

Appendix C to Part 658—Trucks over 80,000 Pounds on the Interstate System and Trucks over STAA Lengths on the National Network

This appendix contains the weight and size provisions that were in effect on or before June 1, 1991 (July 6, 1991 for Alaska), for vehicles covered by 23 U.S.C. 127(d) (LCV's) and 49 U.S.C. app 2311(j) (commercial motor vehicles (CMV's) with 2 or more cargo-carrying units). Weights and dimensions are "frozen" at the values shown here, which were in effect on June 1, 1991 (Alaska, July 6, 1991). All vehicles are listed by configuration type.

Trucks Over 80,000 Pounds on the Interstate System

In the State-by-State descriptions, CMV combinations which can also be LCV's are identified with the letters "LCV" following the type of combination vehicle. The maximum allowable gross vehicle weight is given in this appendix (in thousands of pounds is indicated by a "K"), as well as information summarizing the . . . operational conditions, routes, and legal citations. The term "Interstate System" as used herein refers to the Dwight D Eisenhower System of Interstate and Defense Highways.

Trucks Over STAA Lengths on the National Network

Listed for each State by combination type is either:

1. The maximum cargo-carrying length (shown in feet); or

2. A notation that such vehicle is not allowed (indicated by a "NO").

CMV's are categorized as follows.

1. A CMV combination consisting of a truck tractor and two trailing units.

2. A CMV combination consisting of a truck tractor and three trailing units.

3. CMV combinations with two or more cargo-carrying units not included in descriptions 1 or 2.

In the following table the top number is the maximum cargo-carrying length measured in feet from the front of the first cargo unit to the rear of the last cargo unit. This distance is not to include length exclusive devices which have been approved by the Secretary or by any State. Devices excluded from length determination shall only include items whose function is related to the safe and efficient operation of the semitrailer or trailer. No device excluded from length determination shall be designed or used for carrying cargo. The number below the length measurement is the maximum gross weight in thousands of pounds that the type of vehicle can carry when operating as an LCV on the Interstate System. For every State where there is a length or weight number in the table that follows, additional information is provided.

(1)—State submission includes multiple vehicles in this category—see individual State listings.
(2)—No maximum weight is established as this vehicle combination is not considered an "LCV" per the ISTEA definition. Florida's combination is not allowed to operate on the Interstate System, and the combinations for Hawaii, Mississippi, and Nebraska are not allowed to exceed 80,000 pounds.
(3)—No maximum cargo-carrying length is established for this combination. Because State law limits each trailing unit to not more than 28.5 feet in length, this combination is allowed to operate on all NN routes under the authority of the STAA of 1982, regardless of actual cargo-carrying length. The maximum weight listed is New Mexico's maximum allowable gross weight on the Interstate System under the grandfather authority of 23 U.S.C. 127.

The following abbreviation convention is used throughout the narrative State-by-State descriptions for the captions OPERATIONAL CONDITIONS, ROUTES, and LEGAL CITATIONS: two letter State abbreviation, dash, "TT" for truck tractor, and 2 or 3 for two or three trailing units. For example, the phrase "Arizona truck tractor and 2 trailing units", would be noted as "AZ-TT2"; the phrase "Indiana truck tractor and 3 trailing units" would be noted as "IN–TT3", etc.

STATE: ALASKA

COMBINATION: Truck tractor and 2 trailing units

LENGTH OF THE CARGO-CARRYING UNITS: 95 feet

OPERATIONAL CONDITIONS:

WEIGHT: The combination must be in compliance with State laws and regulations. There are no highways in

the State subject to Interstate System weight limits. Therefore, the ISTEA freeze as it applies to maximum weight is not applicable.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement.

VEHICLE: Combinations with an overall length greater than 75 feet, measured bumper to bumper, must display an "OVERSIZE warning sign on the front and rear. In combinations where one cargo-carrying unit is more than 5,000 pounds heavier than the other, the heavier unit shall be placed immediately behind the power unit. Weather restrictions are imposed when hazardous conditions exist, as determined by the Alaska Department of Transportation and Public Facilities (DOT&PF) and the Alaska Department of Public Safety, Division of State Troopers. Time of day travel is not restricted.

PERMIT: None required

ACCESS: Alaska allows reasonable access not to exceed 5 miles to reach or return from terminals and facilities for food, fuel, or rest. The most direct route must be used. The Commissioner of the Alaska DOT&PF may allow access to specific routes if it can be shown that travel frequency, necessity, and route accommodation are required.

ROUTES

	From	To
AK–1	Anchorage (Potter Weigh Station).	Palmer (Palmer Wasilla Highway Junction)
AK–2	Fairbanks (Gaffney Road Junction).	Delta Junction (MP 1412 Alaska Highway)
AK–3	Jct. AK–1	Fairbanks (Gaffney Road Junction).

LEGAL CITATIONS

17 AAC 25, and 35; the Administrative Permit Manual

STATE: ALASKA

COMBINATION: Truck tractor and 3 trailing units

LENGTH OF THE CARGO CARRYING UNITS: 110 feet

OPERATIONAL CONDITIONS

WEIGHT and ACCESS: Same as the AK–TT2 combination

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement. Drivers of this combination must have 10 years of experience in Alaska and certified training in operation of these combinations.

VEHICLE: Individual trailer length in a three trailing unit combination shall not exceed 45 feet. Engine power rating shall not be less than 400 horsepower

These combinations are allowed to operate only between April 15 and September 30 of each year. Weather restrictions are imposed when hazardous conditions exist, as determined by the Alaska DOT&PF and the Department of Public Safety, Division of State Troopers. No movement is permitted if visibility is less than 1,000 feet.

PERMIT: Permits are required with specified durations of not less than 3 months or more than 18 months. There is a fee.

ROUTES

	From	To
AK–1	Anchorage (Potter Weigh Station).	Jct. AK–3
AK–3	Jct. AK–1	Fairbanks (Gaffney Road Junction)

STATE: ALASKA

COMBINATION: Truck-trailer

LENGTH OF THE CARGO-CARRYING UNITS: 83 feet

OPERATIONAL CONDITIONS

WEIGHT, DRIVER, PERMIT, and ACCESS: Same as the AK–tt2 combination.

VEHICLE: Same as the AK–TT2 combination, except that overall combination length may not exceed 90 feet.

ROUTES: Same as the AK–TT2 combination

LEGAL CITATIONS: Same as the AK–TT2 combination.

STATE: ARIZONA

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 95 feet

MAXIMUM GROSS VEHICLE WEIGHT 111,000 pounds

OPERATIONAL CONDITIONS

WEIGHT: Single-axle maximum weight limit is 20,000 pounds, tandem axle maximum weight limit is 34,000 pounds, and the gross vehicle weight limit is 111,000 pounds, subject to the Federal Bridge Formula.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement. Drivers must comply with the Federal Motor Carrier Safety Regulations of the U.S. Department of Transportation and Title 28, Arizona Revised Statutes.

VEHICLE: This vehicle must be able to operate at speeds compatible with other traffic on level roads and maintain 20 miles per hour speed on grades where operated. A heavy-duty fifth wheel is required. The kingpin must be a solid type, not a screw-out or folding type. All hitch connectors must be of a no-slack type, preferably an air-actuated ram. Axles must be those designed for the width of the body. All braking systems must comply with State and Federal requirements. A brake force limiting valve, sometimes called a "slippery road" valve, may be provided on the steering axle. Mud flaps or splash guards are required. When traveling on a smooth, paved surface, trailers must follow in the path of the towing vehicle without shifting or swerving more than 3 inches to either side when the towing vehicle is moving in a straight line.

PERMITS: Permits are required. Fees are charged. This vehicle is allowed continuous travel, however, the State may restrict or prohibit operations during periods when traffic, weather, or other safety considerations make such operations unsafe or inadvisable. All multiple-trailer combinations shall be driven in the right-hand traffic lane.

Access: Access is allowed for 20 miles from I–15 Exits 8 and 27 or 20 miles from other authorized routes.

STATE: ARIZONA

COMBINATION: Truck tractor and 3 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 95 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 123,500 pounds

OPERATIONAL CONDITIONS:

VEHICLE, and ACCESS: Same as the AZ-TT2 combination.

WEIGHT: Single-axle maximum weight limit is 20,000 pounds, tandem-axle maximum weight limit is 34,000 pounds, and the gross vehicle weight limit is 123,500 pounds, subject to the Federal Bridge Formula.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement. Drivers must comply with the Federal Motor Carrier Safety Regulations of the U.S. Department of Transportation and Title 28, Arizona Revised Statutes. Drivers must be trained by an experienced driver of a three trailing unit combination. Training should be through special instructions or by traveling with the new driver until such time as the new driver is deemed adequately qualified by the trainer on the use and operation of these combinations.

PERMIT: Permits are required. Fees are charged. This vehicle is allowed continuous travel, however, the State may restrict or prohibit operations during periods when traffic, weather, or other safety considerations make such operations unsafe or inadvisable. These combinations shall not be dispatched during adverse weather conditions. All multiple-trailer combinations shall be driven in the right-hand traffic lane.

ROUTES: Same as the AZ-TT2 combination.

LEGAL CITATIONS: Same as the AZ-TT2 combination.

STATE: ARIZONA

COMBINATION: Truck-trailer

LENGTH OF THE CARGO-CARRYING UNITS: 69 feet

OPERATIONAL CONDITIONS:

WEIGHT: This combination must operate in compliance with State laws and regulations. Because it is not an LCV, it is not subject to the ISTEA freeze as it applies to maximum weight.

DRIVER, VEHICLE, PERMIT, and ACCESS: Same as the AZ-TT2 combination.

ROUTES: Same as the AZ-TT2 combination.

LEGAL CITATIONS: Same as the AZ-TT2 combination.

STATE: ARIZONA

COMBINATION: Truck-semitrailer-trailer

LENGTH OF THE CARGO-CARRYING UNITS: 98 feet

OPERATIONAL CONDITIONS:

WEIGHT: This combination must operate in compliance with State laws and regulations. Because it is not an LCV, it is not subject to the ISTEA freeze as it applies to maximum weight.

DRIVER, VEHICLE, PERMIT, and ACCESS: Same as the AZ-TT2 combination.

ROUTES: Same as the AZ-TT2 combination.

LEGAL CITATIONS: Same as the AZ-TT2 combination.

STATE: COLORADO

COMBINATION: Truck tractor and 2 trailing units—LCV

LENGTH OF THE CARGO-CARRYING UNITS: 111 feet

MAXIMUM ALLOWABLE GROSS WEIGHT: 110,000 pounds

OPERATIONAL CONDITIONS:

WEIGHT: The maximum gross weight is 110,000 pounds, subject to the formula W=800(L+40) where "W" equals the gross weight in pounds and "L" equals the length in feet between the centers of the first and last axles, or the gross weight determined by the Federal Bridge Formula, whichever is least. A single axle shall not exceed 20,000 pounds and a tandem axle shall not exceed 36,000 pounds.

DRIVER: The driver must have a commercial driver's license with the appropriate endorsement. The driver cannot have had any suspension of driving privileges in any State during the past 3 years where such suspension arose out of the operation of a motor vehicle used as a contract or common carrier of persons or property.

The driver must be certified by the motor carrier permit holder's safety office. The certification shall demonstrate that the driver has complied with all written requirements, and that the driver has successfully completed a company-approved road test for each type of combination vehicle operated.

VEHICLE: Vehicles shall not have fewer than six axles or more than nine axles. They shall be configured such that the shorter trailer shall be operated as the rear trailer, and the trailer with the heavier gross weight shall be operated as the front trailer. In the event that the shorter trailer is also the heavier, the load must be adjusted so that the front trailer is the longer and heavier of the two.

Vehicles shall have adequate power to maintain a minimum speed of 20 miles per hour on any grade over which the combination operates and can resume a speed of 20 miles per hour after stopping on any such grade.

Tires must conform to the standards in the Department of Public Safety's (DPS) Rules and Regulations Concerning Minimum Standards for the Operation of Commercial Motor Vehicles, at 8 CCR 1507–1 and C.R.S. 42–4–225 and 42–2–406.

Vehicles are required to have a heavy-duty fifth wheel and equal strength pick-up plates that meet the standards in the DPS Commercial Vehicle Rules. This equipment must be properly lubricated and located in a position that provides stability during normal operation, including braking. The trailers shall follow in the path of the towing vehicle without shifting or swerving more than 3 inches to either side when the towing vehicle is moving in a straight line.

Kingpins must be of a solid type and permanently fastened. Screw-out or folding type kingpins are prohibited.

Hitch connections must be of a no-slack type, preferably air-actuated ram.

Drawbar lengths shall be adequate to provide for the clearances required between the towing vehicle and the trailer(s) for turning and backing maneuvers.

Axles must be those designed for the width of the body of the trailer(s).

Braking systems must comply with the DPS Commercial Vehicle Rules and C.R.S. 42–4–220. Fast air-transmission and release valves must be provided on all trailer(s) and converter dolly axles. A brake force limiting valve, sometimes called a "slippery road" valve, may be provided on the steering axle.

PERMIT: An annual permit is required for which a fee is charged. Also, the vehicle must have an overweight permit pursuant to C.R.S. 42–4–409(11)(a)(II) (A), (B), or (C), and comply with Rule 4–15 in the rules pertaining to Extra-Legal Vehicles or Loads.

A truck tractor and two trailing units wherein at least one of the trailing units exceeds 28.5 feet in length shall not operate on the following designated highway segments during the hours of 6 a.m. to 9 a.m. and from 3 p.m. to 6 p.m.,

Monday through Friday, for Colorado Springs, Denver, and Pueblo. (A truck tractor with two trailing units wherein at least one of the trailing units exceeds 28.5 feet in length not operating at greater than the legal maximum weight of 80,000 pounds is subject to different hours-of-operation restrictions. Refer to rules pertaining to Extra-Legal Vehicles or Loads).

Colorado Springs: I–25 between Exit 135 (CO 83 Academy Blvd. So.) and Exit 150 (CO 83, Academy Blvd. No.).

Denver: I–25 between Exit 200 (Jct. I–225) and Exit 223 (CO 128, 120th Avenue),

I–70 between Exit 259 (CO 26/US 40) and Exit 282 (Jct. I–225),

I–76 between Exit 5 (Jct. I–25) and Exit 12 (US 85),

I–225 entire length,

I–270 entire length.

Pueblo: I–25 between Exit 94 (CO 45 Lake Ave.) and Exit 101 (US 50/CO 47).

The holder of a longer vehicle combination (LVC) permit must have an established safety program as provided in Chapter 9 of the "Colorado Department of Highways Rules and Regulations for Operation of Longer Vehicle Combinations on Designated State Highway Segments." Elements of the program include compliance with minimum safety standards at 8 CCR 1507–1, hazardous materials regulations at 8 CCR 1507–7, –8, and –9, Colorado Uniform Motor Vehicle Law, Articles 1 through 4 of Title 42, C.R.S. as amended, and Public Utility Commission regulations at 4 CCR 723–6, –8, –15, –22, and –23.

ACCESS: A vehicle shall not be operated off the designated portions of the Interstate System except to access food, fuel, repairs, and rest or to access a facility. Access to a facility shall be subject to the following conditions:

(1) The facility must:

(a) Be either a manufacturing or a distribution center, a warehouse, or truck terminal located in an area where industrial uses are permitted;

(b) Be a construction site; and

(c) Meet the following criteria:

1 vehicles are formed for transport or broken down for delivery on the premises;

2 adequate off-roadway space exists on the premises to safely maneuver the vehicles; and

3 adequate equipment is available on the premises to handle, load, and unload the vehicle, its trailers, and cargo.

(2) The facility must be located within a maximum distance of 10 miles from the point where the vehicle enters or exits the designated portions of the Interstate System. Such 10-mile distance shall be measured by the actual route(s) to be traveled to the facility, rather than by a straight line radius from the designated Interstate System to the facility;

(3) The access route(s) between the designated Interstate System and the facility must be approved in advance by the public entity (Colorado DOT, municipality, or county) having jurisdiction for the roadway(s) that make up the route(s). Where the State of Colorado has jurisdiction over the access route(s), it will consider the following safety, engineering, and other criteria in determining whether to approve the route(s):

(a) Safety of the motoring public;

(b) Geometrics of the street and roadway;

(c) Traffic volumes and patterns;

(d) Protection of State highways, roadways, and structures;

(e) Zoning and general characteristics of the route(s) to be encountered; and

(f) Other relevant criteria warranted by special circumstances of the proposed route(s).

Local entities, counties, and municipalities having jurisdiction over route(s), should consider similar criteria in determining whether to approve the proposed ingress and egress route(s); and
